Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol(s)	Name of each exchange on which registered
Ordinary Shares	ALLG	New York Stock Exchange
Warrants	ALLG.WS	New York Stock Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report: As of December 31, 2022, Allego N.V. had 267,177,592 ordinary shares outstanding.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See definition of "large accelerated filer," "accelerated filer," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Non-accelerated filer   
Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 13(a) of the Exchange Act.

†The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting over Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to § 240.10D-1(b).

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

US GAAP  International Financial Reporting Standards as issued by the International Accounting Standards Board  Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17  Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

**CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS**

This Annual Report on Form 20-F (this “*Annual Report*”) contains forward-looking statements as defined in Section 27A of the Securities Act of 1933, as amended (the “*Securities Act*”), Section 21E of the Securities Exchange Act of 1934, as amended (the “*Exchange Act*”), and the Private Securities Litigation Reform Act of 1995, that involve significant risks and uncertainties. All statements other than statements of historical facts are forward-looking statements. These forward-looking statements include information about our possible or assumed future results of operations or our performance. Words such as, “*anticipate*,” “*appear*,” “*approximate*,” “*believe*,” “*continue*,” “*could*,” “*estimate*,” “*expect*,” “*foresee*,” “*intends*,” “*may*,” “*might*,” “*plan*,” “*possible*,” “*potential*,” “*predict*,” “*project*,” “*seek*,” “*should*,” “*would*” and variations of such words and similar expressions (or the negative version of such words or expressions) may

---

identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. The risk factors and cautionary language referring to or incorporated by reference in this Annual Report provide examples of risks, uncertainties and events that may cause actual results to differ materially from the expectations described in our forward-looking statements, including among other things, the items identified in the section entitled “*Item 3.D. Risk Factors*” of this Annual Report. Forward-looking statements in this Annual Report may include, for example, statements about:

- changes adversely affecting Allego’s business;
- the risks associated with vulnerability to industry downturns and regional or national downturns;
- fluctuations in Allego’s revenue and operating results;
- unfavorable conditions or further disruptions in the capital and credit markets;
- Allego’s ability to generate cash, service indebtedness and incur additional indebtedness;
- competition from existing and new competitors;
- the growth of the electric vehicle market;
- Allego’s ability to integrate any businesses it may acquire;
- Allego’s ability to recruit and retain experienced personnel;
- risks related to legal proceedings or claims, including liability claims;
- Allego’s dependence on third-party contractors to provide various services;
- data security breaches or other network outages;
- Allego’s ability to obtain additional capital on commercially reasonable terms;
- Allego’s ability to remediate its material weaknesses in internal control over financial reporting;
- the impact of COVID-19 and other pandemics, including related supply chain disruptions and expense increases;
- general economic or political conditions, including the Russia/Ukraine conflict or increased trade restrictions between the United States, Russia, China and other countries; and
- other factors detailed under the section entitled “*Item 3.D. Risk Factors*” in this Annual Report and in Allego’s other filings with the SEC.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this Annual Report. Although we believe that the expectations reflected in such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct. These statements involve known and unknown risks and are based upon a number of assumptions and estimates, which are inherently subject to significant uncertainties and contingencies, many of which are beyond our control. Actual results may differ materially from those expressed or implied by such forward-looking statements. Accordingly, forward-looking statements should not be relied upon as representing our views as of any subsequent date, and we do not undertake any obligation to update forward-looking statements to reflect events or circumstances after the date they were made, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

#### **FINANCIAL STATEMENT PRESENTATION**

Athena Pubco B.V. was incorporated by Madeleine Charging B.V. on June 3, 2021 for the purpose of effectuating the Business Combination. Prior to the Business Combination, Athena Pubco B.V., which was redesignated as Allego N.V. in connection with the Closing, had no material assets and did not operate any businesses. The Business Combination resulted in Allego acquiring Allego Holding and combining with Spartan, with an exchange of the shares and warrants issued by Spartan for those of Allego. The Business Combination was accounted for as a capital reorganization followed by the combination with Spartan, which was treated as a recapitalization. Following the Business Combination, both Allego Holding and Spartan are wholly owned subsidiaries of Allego.

## INDUSTRY AND MARKET DATA

In this Annual Report, we present industry data, forecasts, information and statistics regarding the markets in which Allego competes as well as Allego management's analysis of statistics, data and other information that it has derived from third-parties, including independent consultant reports, publicly available information, various industry publications and other published industry sources, including: (i) traffic data from governmental agencies, such as Germany's BAST (*Bundesanstalt für Straßenwesen*), the Netherlands' Rijkswaterstaat, and the United Kingdom's Department of Transport, (ii) population data from EUROSTAT, (iii) registered cars data from governmental statistics agencies, such as Germany's Kraftfahrt Bundesamt, the Netherlands' CBS (*Centraal Bureau voor de Statistiek*) and the United Kingdom's Department of Transport, (iv) electric vehicle sales forecasts from consultancy firms, such as ING, UBS, BCG and Navigant, (v) electric vehicle sales data from the European Automobile Manufacturers' Association, and (vi) industry growth forecasts from BloombergNEF. Independent consultant reports, industry publications and other published industry sources generally indicate that the information contained therein was obtained from sources believed to be reliable. Such information is supplemented where necessary with our own internal estimates and information obtained from discussions with our customers, taking into account publicly available information about other industry participants and our management's judgment where information is not publicly available. This information appears in "*Item 4.B. Information on the Company—Business Overview*," "*Item 5. Operating and Financial Review and Prospects*" and other sections of this Annual Report.

Although we believe that these third-party sources are reliable, we cannot guarantee the accuracy or completeness of this information, and we have not independently verified this information. Forecasts and other forward-looking information obtained from these sources are subject to the same qualifications and uncertainties as the other forward-looking statements in this Annual Report. These forecasts and forward-looking information are subject to uncertainty and risk due to a variety of factors, including those described under "*Item 3.D. Risk Factors*." These and other factors could cause results to differ materially from those expressed in any forecasts or estimates. Some market data and statistical information are also based on our good faith estimates, which are derived from management's knowledge of our industry and such independent sources referred to above. Certain market, ranking and industry data included elsewhere in this Annual Report, including the size of certain markets and our size or position and the positions of our competitors within these markets, including its services relative to its competitors, are based on estimates by us. These estimates have been derived from Allego management's knowledge and experience in the markets in which Allego operates, as well as information obtained from surveys, reports by market research firms, our customers, distributors, suppliers, trade and business organizations and other contacts in the markets in which Allego operates and have not been verified by independent sources. Unless otherwise noted, all of Allego's market share and market position information presented in this Annual Report is an approximation. Allego's market share and market position, unless otherwise noted, is based on Allego's volume relative to the estimated volume in the markets served by Allego's business segments. References herein to Allego being a leader in a market or product category refer to Allego management's belief that Allego has a leading market share position in each specified market, unless the context otherwise requires. As there are no publicly available sources supporting this belief, it is based solely on Allego management's internal analysis of Allego volume as compared to the estimated volume of its competitors.

Internal data and estimates are based upon information obtained from trade and business organizations and other contacts in the markets in which Allego operates and Allego management's understanding of industry conditions. Although we believe that such information is reliable, this information has not been verified by any independent sources.

## DEFINED TERMS

"*Allego*", the "*Company*", "*we*", "*us*" and "*our*" means (i) prior to the consummation of the Business Combination, Allego Holding B.V. and (ii) following the consummation of the Business Combination, Allego N.V. Simultaneously with Closing, Athena Pubco B.V. was redesignated as Allego N.V., such that the go-forward public company is Allego N.V.

"*Allego Articles*" or "*Articles*" means the Articles of Association of Allego N.V.

"*Allego Board*" or "*Board*" means the board of directors of Allego.

"*Allego Holding*" means Allego Holding B.V., a Dutch private limited liability company (*besloten vennootschap met beperkte aansprakelijkheid*).

"*Allego Ordinary Shares*" or "*Ordinary Shares*" means the ordinary shares of Allego N.V. immediately following the Business Combination, with a nominal value of €0.12 per share.

## [Table of Contents](#)

“**Business Combination**” means the transactions contemplated by the Business Combination Agreement.

“**Business Combination Agreement**” means the Business Combination Agreement and Plan of Reorganization, dated as of July 28, 2021, by and among Allego, Allego Holding, Merger Sub, Spartan, Madeleine, and, solely with respect to the sections specified therein, E8 Investor.

“**Closing**” means the consummation of the Business Combination.

“**Closing Date**” means the date on which the Closing took place.

“**E8 Investor**” means E8 Partenaires, a French *société par actions simplifiée*.

“**Effective Time**” means date and time the certificate of merger by which the Spartan Merger consummated was filed.

“**First Special Fees Agreement**” has the meaning provided in “*Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions*” in this Annual Report.

“**General Meeting**” means the general meeting of Allego.

“**Group**” means Allego Holding B.V. and its subsidiaries prior to the completion of the Business Combination and Allego Holding N.V. and its subsidiaries after the completion of the Business Combination, unless indicated requires otherwise.

“**IFRS**” means International Financial Reporting Standards as issued by the International Accounting Standards Board.

“**LTIP**” means the Allego Long-Term Incentive Plan.

“**Madeleine**” means Madeleine Charging B.V., a Dutch private limited liability company (*besloten vennootschap met beperkte aansprakelijkheid*).

“**Mega-E**” means Mega-E Charging B.V. and “**Mega-E Group**” means Mega-E and its subsidiaries.

“**MOMA**” means Modélisation, Mesures et Applications S.A., an unlisted software company.

“**Merger Sub**” means Athena Merger Sub, Inc., a Delaware corporation.

“**NYSE**” means the New York Stock Exchange.

“**PIPE**” means the commitments obtained from certain investors for a private placement of an aggregate of 15,000,000 Allego Ordinary Shares, for a purchase price of \$10.00 per share and an aggregate purchase price of \$150,000,000.

“**Private Placement Warrants**” means the warrants issued to the Sponsor in a private placement simultaneously with the closing of Spartan’s IPO.

“**Public Warrants**” means the warrants sold as part of the Spartan Units.

“**SEC**” means the United States Securities and Exchange Commission.

“**Second Special Fees Agreement**” has meaning provided in “*Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions*” in this Annual Report.

“**Spartan**” means Spartan Acquisition Corp. III, a Delaware corporation, prior to the Business Combination and Allego US Inc., a Delaware corporation, following completion of the Business Combination, unless indicated otherwise.

“**Spartan Charter**” means Spartan’s Amended and Restated Certificate of Incorporation dated February 8, 2021.

“**Spartan Class A Common Stock**” means Spartan’s Class A common stock, par value \$0.0001 per share.

## [Table of Contents](#)

“*Spartan Founders Stock*” means Spartan’s Class B common stock, par value \$0.0001 per share.

“*Spartan Units*” means the units sold in connection with Spartan’s IPO.

“*Spartan Warrants*” means the Private Placement Warrants and the Public Warrants, collectively.

“*Special Fees Agreements*” mean the First Special Fees Agreement and the Second Special Fees Agreement.

“*Sponsor*” means Spartan Acquisition Sponsor III LLC, a Delaware limited liability company.

“*Trust Account*” means the trust account that held the cash proceeds from Spartan’s IPO and concurrent private placement of private placement warrants to the Sponsor.

“*Warrant Agreement*” means the Warrant Agreement dated February 8, 2021 by and between Spartan and Continental Stock Transfer & Trust Company.

“*Warrants*” or “*Assumed Warrants*” means the Spartan Warrants that were automatically converted in connection with the Business Combination into warrants to acquire one Allego Ordinary Share, and remain subject to the same terms and conditions (including exercisability) as were applicable to the corresponding Spartan Warrant immediately prior to the Business Combination.

“*Warrant Assumption Agreement*” means the Warrant Assumption Agreement dated March 16, 2022 by and among Spartan, Allego and Continental Stock Transfer & Trust Company.

**D. Risk Factors**

***Summary Risk Factors***

The following summarizes some, but not all, of the risks provided below. Please carefully consider all of the information discussed in this *‘Item 3.D.Risk Factors’* in this Annual Report for a detailed description of these and other risks.

- Allego is an early stage company with a history of operating losses, and expects to incur significant expenses and continuing losses for the near term and medium term.
- Allego has experienced rapid growth and expects to invest substantially in growth for the foreseeable future. If it fails to manage growth effectively, its business, operating results and financial condition could be adversely affected.
- Allego’s forecasts and projections are based upon assumptions, analyses and internal estimates developed by Allego’s management. If these assumptions, analyses or estimates prove to be incorrect or inaccurate, Allego’s actual operating results may differ adversely and materially from those forecasted or projected.
- Allego’s estimates of market opportunity and forecasts of market growth may prove to be inaccurate.
- Allego’s business is subject to risks associated with the price of electricity, which may hamper its profitability and growth.
- Allego is dependent on the availability of electricity at its current and future charging sites. Delays and/or other restrictions on the availability of electricity (for example, grid connections delays) would adversely affect Allego’s business and results of operations.
- Allego currently faces competition from a number of companies and expects to face significant competition in the future as the market for EV charging develops.
- Allego’s future revenue growth will depend in significant part on its ability to increase the number and size of its charging sites, traffic, and the sales of services to Business to Business customers.
- Allego may need to raise additional funds or debt and these funds may not be available when needed.
- If Allego fails to offer high-quality support to its customers and fails to maintain the availability of its charging points, its business and reputation may suffer.

- Allego relies on a limited number of suppliers and manufacturers for its hardware and equipment and charging stations. A loss of any of these partners or issues in their manufacturing and supply processes could negatively affect its business.
- Allego's EV driver base will depend upon the effective operation of Allego's EVCloud<sup>™</sup> platform and its applications with mobile service providers, firmware from hardware manufacturers, mobile operating systems, payment systems, networks and standards that Allego does not control.
- If Allego is unable to attract and retain key employees and hire qualified management, technical, engineering and sales personnel, its ability to compete and successfully grow its business would be harmed.
- Allego is expanding operations in many countries in Europe, which will expose it to additional tax, compliance, market, local rules and other risks.
- New alternative fuel technologies may negatively impact the growth of the EV market and thus the demand for Allego's charging stations and services.
- The European EV market currently benefits from the availability of rebates, scrappage schemes, tax credits and other financial incentive schemes from governments to offset and incentivize the purchase of EVs. The reduction, modification, or elimination of such benefits could cause reduced demand for EVs and EV charging, which would adversely affect Allego's financial results.
- Allego's business may be adversely affected if it is unable to protect its technology and intellectual property from unauthorized use by third parties.
- Computer malware, viruses, ransomware, hacking, phishing attacks and similar disruptions could result in security and privacy breaches and interruption in service, which could harm Allego's business.
- Allego's technology could have undetected defects, errors or bugs in hardware or software which could reduce market adoption, damage its reputation with current or prospective customers, and/or expose it to product liability and other claims that could materially and adversely affect its business.
- Allego has identified, and has previously identified, material weaknesses in its internal control over financial reporting. If Allego is unable to remediate these material weaknesses, or if Allego identifies additional material weaknesses in the future or otherwise fails to maintain an effective system of internal control over financial reporting, this may result in material misstatements contained within Allego's consolidated financial statements or cause Allego to fail to meet its periodic reporting obligations.
- Members of Allego's management have limited experience in operating a public company.
- Future sales, or the perception of future sales, of our Ordinary Shares and Warrants by us or selling security holders, including Madeleine, could cause the market price for our Ordinary Shares and Warrants to decline significantly.
- Madeleine owns a significant amount of Allego's voting shares and its interests may conflict with those of other shareholders.

Shareholders should carefully consider the following factors in addition to the other information set forth in this Annual Report. If any of the following risks actually occur, our business, financial condition and results of operations and the value of Allego Ordinary Shares would likely suffer.

#### **Risks Related to Allego's Business, Industry and Regulatory Environment**

*Allego is an early stage company with a history of operating losses, and expects to incur significant expenses and continuing losses for the near term and medium term.*

Allego incurred a net loss of €315 million and €304 million for the years ended December 31, 2022 and December 31, 2021, respectively, and as of December 31, 2022, Allego had total equity of approximately €28 million. Allego believes it will continue to incur net losses for the near term. Even if it achieves profitability, there can be no assurance that it will be able to maintain profitability in the future. Allego's potential profitability is particularly dependent upon the continued adoption of electric vehicles ("EVs") by consumers in Europe, which may occur at a slower pace than anticipated or may

not occur at all. This continued adoption may depend upon continued support from regulatory programs and in each case, the use of Allego chargers and Allego services may be at much lower levels than Allego currently anticipates.

***Allego has experienced rapid growth and expects to invest substantially in growth for the foreseeable future. If it fails to manage growth effectively, its business, operating results and financial condition could be adversely affected.***

Allego has experienced rapid growth in recent periods that has placed and continues to place a significant strain on employee retention, management, operations, financial infrastructure and corporate culture and has required several strategic adjustments. Allego's revenue has increased from €86.3 million in 2021 to €133.9 million in 2022. In addition, in the event of further growth, Allego's information technology systems and Allego's internal control over financial reporting and procedures may not be adequate to support its operations and may increase the risk of data security incidents that may interrupt business operations and permit bad actors to obtain unauthorized access to business information or misappropriate company funds. Allego may also face risks to the extent such bad actors infiltrate the information technology infrastructure of its contractors. Allego may also face the risk that EVCloud™, its core platform, is not able to support Allego's growth due to increased traffic on Allego charging points, which would interrupt business operations. Allego could then also face contractual penalties with its customers if this results in a failure to meet its contractual obligations.

To manage growth in operations and personnel management, Allego will need to continue to improve its operational, financial and management controls and reporting systems and procedures. Failure to manage growth effectively could result in difficulty or delays in developing new EV charging sites, in attracting new customers, declines in quality or customer satisfaction, increases in costs, difficulties in introducing new solutions and services or enhancing existing solutions and services, loss of EV sites and customers, information security vulnerabilities or other operational difficulties, any of which could adversely affect its business performance and operating results.

***Allego's forecasts and projections are based upon assumptions, analyses and internal estimates developed by Allego's management. If these assumptions, analyses or estimates prove to be incorrect or inaccurate, Allego's actual operating results may differ adversely and materially from those forecasted or projected.***

Allego's business forecasts and projections are subject to different parameters with significant uncertainty and are based on assumptions, analyses and internal estimates developed by Allego's management and teams, any or all of which may not prove to be correct or accurate. If these assumptions, analyses or estimates prove to be incorrect or inaccurate, Allego's actual operating results may differ materially and adversely from those forecasted or projected. Realization of the operating results forecasted will depend on the successful implementation of Allego's proposed business plan, and the development of policies and procedures consistent with Allego's assumptions. Future results will also be affected by events and circumstances beyond Allego's control, for example, the competitive environment, Allego's executive team, technological change, economic and other conditions in the markets in which Allego operates or proposes to operate, national and regional regulations, uncertainties inherent in product and software development and testing, Allego's future financing needs, and Allego's ability to grow and to manage growth effectively. In particular, Allego's forecasts and projections include forecasts and estimates relating to the expected size and growth of the markets in which Allego operates in Europe or seeks to enter and demand for its current and future charging points. For the reasons described above, it is likely that the actual results of its operations will be different from the results forecasted and those differences may be material and adverse.

***Allego's estimates of market opportunity and forecasts of market growth may prove to be inaccurate.***

Market opportunity estimates and growth forecasts, whether obtained from third-party sources or developed internally, are subject to significant uncertainty and are based on assumptions and estimates that may prove to be inaccurate, including any continuing effects on such estimates and forecasts caused by the COVID-19 pandemic. Estimates and forecasts relating to the size and expected growth of the target market, market demand, EV adoption across each individual national market in Europe and use cases, capacity of automotive and battery original equipment manufacturers ("OEMs") and ability of charging infrastructure to address this demand and related pricing may also prove to be inaccurate. In particular, estimates regarding the current and projected market opportunity for public fast and ultra-fast charging or Allego market share capture are difficult to predict. The estimated addressable market may not materialize in the timeframe of the projections, if ever, and even if the markets meet the size estimates and growth estimates, Allego's business could fail to grow at similar rates.

***Allego's business is subject to risks associated with the price of electricity, which may hamper its profitability and growth.***

Allego obtains electricity for its own charging stations through contracts with power suppliers or through direct sourcing on the market from producers. In most of the countries in which Allego operates, there are many suppliers that can offer

medium or long-term contracts that can allow Allego to hedge the price of electricity. However, market conditions may change, triggering fluctuations and global increases in the price of electricity, which we experienced during 2022. For example, the price of electricity is generally higher in the winter due to higher electricity demands, and Europe has recently seen record electricity price increases caused in large part by the Russia/Ukraine conflict. While these costs could be (and have been to a large extent in 2022) passed on to EV customers, increases in the price of electricity could result in near-term cash flow strains to Allego. In addition, global increases in electricity pricing will increase the price of charging, which could impact demand and hamper the use of public charging by EV customers, thus decreasing the number of charging sessions on Allego's charging stations and adversely impacting its profitability and growth. Furthermore, competitors may be able to source electricity on better terms than Allego, which may allow those competitors to offer lower prices for charging, which may also decrease the number of charging sessions on Allego's charging stations and adversely impact its profitability and growth.

***Allego is dependent on the availability of electricity at its current and future charging sites. Delays and/or other restrictions on the availability of electricity (for example, grid connections delays) would adversely affect Allego's business and results of operations.***

The operation and development of Allego's charging points is dependent upon the availability of electricity, which is beyond its control. Allego's charging points are affected by problems accessing electricity sources, such as planned or unplanned power outages or limited grid capacity. In the event of a power outage, Allego will be dependent on the grid operator, and in some cases the site host, to restore power for its B2B solutions or to unlock grid capacity. Any prolonged power outage or limited grid capacity could adversely affect customer experience and Allego's business and results of operations.

Allego's public charging points are often located in areas that must be freely accessible and may be exposed to vandalism or misuse by customers or other individuals, which would increase Allego's replacement and maintenance costs.

Allego's public charging points may be exposed to vandalism or misuse by customers and other individuals, increasing wear and tear of the charging equipment. Such increased wear and tear could shorten the usable lifespan of the chargers and require Allego to increase its spending on replacement and maintenance costs.

***Allego currently faces competition from a number of companies and expects to face significant competition in the future as the market for EV charging develops.***

The EV charging market is relatively new, and competition is still developing. Apart from China, Europe is currently the biggest EV market in the world and is currently more mature than the United States. Allego competes in its charging network and services businesses with many competitors in different countries. With respect to the development of its own ultra-fast public EV charging network, Allego primarily competes with incumbent utilities and oil and gas companies alongside pure EV charging players and companies linked to car manufacturers. With respect to its services business, Allego competes with a variety of companies, including hardware manufacturers, software platform vendors, installation companies and maintenance contractors. Despite Allego's longstanding European presence, it must continuously strive to remain competitive in its markets. Competition may hamper global EV adoption as an influx of providers may lead to poor service and trust in any one provider of EV charging solutions.

In addition, there are means for charging EVs other than publicly accessible charging, which could affect the level of demand for onsite charging capabilities at public or commercial areas, which are Allego's primary focus. For example, Tesla Inc. ("*Tesla*") continues to build out its supercharger network across Europe for its vehicles, which could reduce overall demand for EV charging at other sites. Tesla is also opening its supercharger network to support charging of non-Tesla EVs, which could further reduce demand for charging at Allego's sites. Additionally, third-party contractors can provide basic electric charging capabilities to potential customers of Allego, including commercial on premise charging and home charging solutions. Many EV hardware manufacturers are now offering home charging equipment, which could reduce demand for public charging if EV owners find charging at home to be more convenient. Regulations imposing home or workplace charging capabilities for all new buildings could also adversely affect the development of public charging versus home charging.

Furthermore, Allego's current or potential competitors may be acquired by third parties with greater available resources. As a result, competitors may be able to respond more quickly and effectively than Allego to new or changing opportunities, technologies, standards or customer requirements and may have the ability to initiate or withstand substantial price competition. In addition, competitors may in the future establish cooperative relationships with vendors of complementary products, technologies or services to increase the availability of their solutions in the marketplace. This competition may also materialize in the form of costly intellectual property disputes or litigation.

New competitors or alliances may emerge in the future that have greater market share, more widely adopted proprietary technologies, greater marketing expertise and greater financial resources, which could put Allego at a competitive disadvantage. Future competitors could also be better positioned to serve certain segments of Allego's current or future target markets, which could increase costs and create downward pricing pressure on charging sessions. In light of these factors, even if Allego's public charging network is larger and provides faster charging, and if its services offerings are more effective, higher quality and address more complex demands than those of its competitors, current or potential customers may accept other competitive solutions. If Allego fails to adapt to changing market conditions or continue to compete successfully with current charging providers or new competitors, its growth will be limited, which would adversely affect its business and results of operations.

***Allego's future revenue growth will depend in significant part on its ability to increase the number and size of its charging sites, traffic, and the sales of services to Business to Business ("B2B") customers.***

Allego's future revenue growth will depend in significant part on its ability to increase the number and size of its charging sites, traffic, and its sales of services to B2B customers. The sites Allego may wish to lease or acquire may first be leased or acquired by competitors or they may no longer be economically attractive due to certain adverse conditions such as increased rent which would hamper the growth and profitability of Allego's business.

Furthermore, Allego's B2B customer base may not increase as quickly as expected because the adoption of EVs may be delayed or transformed by new technologies. In addition to the factors affecting the growth of the EV market generally, transitioning to an EV fleet for some customers or providing EV equipment to facilities for other customers can be costly and capital intensive, which could result in slower than anticipated adoption. The sales cycle for certain B2B customers could also be longer than expected.

***Allego may need to raise additional funds or debt and these funds may not be available when needed.***

Allego may need to raise additional capital or debt in the future to further scale its business and expand to additional markets. Allego may raise additional funds through the issuance of equity, equity-related or debt securities, or through obtaining credit from financial institutions. Allego cannot be certain that additional funds will be available on favorable terms when required, or at all. If Allego cannot raise additional funds when needed, its financial condition, results of operations, business and prospects could be materially and adversely affected. If Allego raises funds through the issuance of debt securities or through loan arrangements, the terms of such arrangements could require significant interest payments, contain covenants that restrict Allego's business, or other unfavorable terms. In addition, to the extent Allego raises funds through the sale of additional equity securities, Allego shareholders would experience additional dilution. For example, in order to meet its current funding needs, during 2022 Allego entered into a new facility agreement, increasing the total available facility by €230 million to €400 million.

***If Allego fails to offer high-quality support to its customers and fails to maintain the availability of its charging points, its business and reputation may suffer.***

Once Allego charging points are operational, customers rely on Allego to provide maintenance services to resolve any issues that might arise in the future. Rapid and high-quality customer and equipment support is important so that drivers can reliably charge their EVs. The importance of high-quality customer and equipment support will increase as Allego seeks to expand its public charging network and retain customers, while pursuing new EV drivers and geographies. If Allego does not quickly resolve issues and provide effective support, its ability to retain EV drivers or sell additional services to B2B customers could suffer and its brand and reputation could be harmed.

***A potential renewed COVID-19 or other pandemic could have a material adverse effect on Allego's business and results of operations.***

The impact of a potential renewed COVID-19 or other pandemic, including changes in consumer and business behavior, pandemic fears and market downturns, and restrictions on business and individual activities, can create significant volatility in the global economy or lead to reduced economic activity. The recent COVID-19 pandemic created supply chain disruptions for vehicle manufacturers, suppliers and hardware manufacturers, as well as impacted the capacities of installers. Any sustained new disruption could impact demand for EVs and would harm Allego's business despite its historical growth.

If a potential renewed COVID-19 or other pandemic occurs, it could require a modification of our business (for example, grid connections delays), triggering mitigating actions (as may be required by government authorities or otherwise) in the best interests of our employees, customers, suppliers, vendors and business partners. If significant portions of our workforce in the future is unable to work effectively, including due to illness, quarantines, social distancing, government

actions or other restrictions, our operations will be negatively impacted. Furthermore, if significant portions of our customers' or potential customers' workforce are subject to stay-at-home orders or otherwise have substantial numbers of their employees working remotely for sustained periods of time, user demand for EV charging sessions and services may decline.

As of December 31, 2022, the impact of COVID-19 to Allego's business has been limited, but prospects and results of operations will depend on any future developments. Ongoing effects from the COVID-19 pandemic could continue to limit the ability of customers, suppliers, vendors and business partners to perform, including third-party suppliers' ability to provide components and materials used for Allego's charging stations or in providing transport, installation or maintenance services.

***Any economic recession that has occurred or may occur in the future will impact in the growth of EVs and the growth of EV charging demand.***

Difficult macroeconomic conditions, such as decreases in per capita income and level of disposable income, increased and prolonged unemployment or a decline in consumer confidence, as well as reduced spending by businesses, could each have a material adverse effect on the demand for Allego's charging points network and services.

***Allego relies on a limited number of suppliers and manufacturers for its hardware and equipment and charging stations. A loss of any of these partners or issues in their manufacturing and supply processes could negatively affect its business.***

Allego has extended its hardware and equipment supplier base but it still relies on a limited number of suppliers, although it is not dependent on any one supplier. This reliance on a limited number of hardware manufacturers increases Allego's risks, since it does not currently have proven alternatives or replacement manufacturers beyond these key parties. In the event of interruption or insufficient capacity, it may not be able to increase capacity from other sources or develop alternate or secondary sources without incurring material additional costs and substantial delays. In particular, disruptions or shortages at such suppliers, including as a result of delays or issues with their supply chain, including in respect of electronic chips, processors, semiconductors and other electronic components or materials, can negatively impact deliveries by such suppliers to Allego. Thus, Allego's business could be adversely affected if one or more of its suppliers is impacted by any interruption at a particular location or decides to reduce its deliveries to Allego for any reason including its acquisition by a third party or is unable to provide Allego with the quantities Allego requires for its growth.

If Allego experiences an increase in demand greater than expected for the development of its charging stations or from its services customers or if it needs to replace an existing supplier, it may not be possible to supplement or replace them on acceptable terms, which may undermine Allego's ability to capture higher growth or deliver solutions to customers in a timely manner. For example, it may take a significant amount of time to identify a new hardware manufacturer that has the capability and resources to build hardware and equipment in sufficient volume that meets Allego's specifications. Identifying suitable suppliers and manufacturers could be an extensive process that would require Allego to become satisfied with such suppliers' and manufacturers' quality control, technical capabilities, responsiveness and service, financial stability, regulatory compliance, and labor and other ethical practices. Accordingly, a loss of any significant suppliers or manufacturers could have an adverse effect on Allego's business, financial condition and operating results.

Allego's hardware and equipment may also experience technical issues, including safety issues, which could, on a large scale, negatively impact Allego's business and potentially in the most extreme cases lead Allego to an early replacement program of such hardware, resulting in Allego incurring substantial additional costs and delays.

In addition, the military conflict between Russia and Ukraine could lead to disruption, instability and volatility in global markets and industries that could negatively impact Allego's supply chain. The European Union, the United States and other governments have already imposed severe sanctions and export controls against Russia and Russian interests and may impose additional sanctions and controls. The impact of these measures, as well as potential responses to them by Russia, is currently unknown and could adversely affect Allego's supply chain, which, in turn, could affect Allego's business and operating results.

Further, the United States imposed extraordinary tariffs and extensive export controls targeted primarily at the semiconductor industry in China. If China retaliates to such measures or there is a conflict between China and Taiwan, which is a leading producer of semiconductors, there could be further disruption to the semiconductor industry and global supply chains. Allego or the suppliers it procures components from may be unable to manufacture products at prices our customers would accept, or at all. Any inability to pass on future increased costs to customers would put downward pressure on Allego's gross margins and adversely affect Allego's business, results of operations and financial condition.

***Allego's business is subject to risks associated with construction, cost overruns and delays, and other contingencies that may arise in the course of completing installations, and such risks may increase in the future as Allego expands its charging networks and increases its service to third parties.***

Allego does not typically install charging points directly on leased sites or at customer sites. These installations are typically performed by Allego's electrical contractors at its own sites or with contractors with an existing relationship with the customer and/or knowledge of the site. The installation of charging stations at a particular site is generally subject to oversight and regulation in accordance with national and local laws and regulations relating to building codes, safety, environmental protection and related matters, and typically requires various local approvals and permits, such as grid connection permits that may vary by jurisdiction. In addition, building codes, accessibility requirements or regulations may hinder EV charger installation due to potential increased costs to the developer or installer in order to meet such requirements. Meaningful delays or cost overruns may impact Allego's recognition of revenue in certain cases and/or impact customer relationships, either of which could impact Allego's business and profitability.

Contractors may require that Allego or Allego's customers obtain licenses in order to perform their services. Furthermore, additional rules on working conditions and other labor requirements may result in more complex projects with higher project management costs. If these contractors are unable to provide timely, thorough and quality installation-related services, Allego could fall behind its construction schedules which may cause EV drivers and Allego's customers to become dissatisfied with Allego's network and charging solutions. As the demand for public fast and ultra-fast charging increases and qualifications for contractors become more stringent, Allego may encounter shortages in the number of qualified contractors available to complete all of Allego's desired new charging stations and their maintenance.

Allego's business model is predicated on the presence of qualified and capable electrical and civil contractors and subcontractors in the new markets it intends to enter. There is no guarantee that there will be an adequate supply of such partners. A shortage in the number of qualified contractors may impact the viability of Allego's business plan, increase risks around the quality of work performed and increase costs if outside contractors are brought into a new market.

***Allego's business is subject to risks associated with increased cost of land and competition from third parties that can create cost overruns and delays and can decrease the value of some of Allego's charging stations.***

Allego typically enters into long-term leases for its charging stations. With the growing adoption of EVs, increased competition may develop in securing suitable sites for charging stations, especially in high traffic areas. This competition may trigger increases in the cost of land leases, tenders organized by landowners, delays in securing sites and a quicker depletion of available sites for Allego's charging stations. The term of leases may also be impacted by increased competition. This could negatively impact the potential economic return of building such charging stations in certain zones or on certain sites and therefore negatively impact Allego's business and profitability.

***Allego's EV driver base depends upon the effective operation of Allego's EVCloud™ platform and its applications with mobile service providers, firmware from hardware manufacturers, mobile operating systems, payment systems, networks and standards that Allego does not control.***

Allego is dependent on the interoperability of mobile service providers for the payment of charging sessions that must use open protocols. Its own mobile payment application is dependent upon popular mobile operating systems that Allego does not control, such as Google's Android and Apple's iOS software systems, and any changes in such systems that degrade or hamper the functionality of Allego's products or give preferential treatment to competitive products could adversely affect the usage of Allego's applications on mobile devices. Changes in standards, such as Open Charge Point Protocol, may require Allego to incur development expenses and delay its operations and the potential launch of new services. Continued support and operability of Allego's charging stations depends upon hardware manufacturers' firmware of which Allego has no control over. Additionally, in order to deliver high quality services to its customers, it is important that Allego's products work well with a range of technologies, including various firmware, software, payment systems, networks and standards that Allego does not control. Allego may not be successful in maintaining and updating its EVCloud™ platform and may not have sufficient knowledge to effectively keep up with new technologies, systems, networks or standards.

***A variety of factors may lead to interruption in service, which could harm Allego's business.***

Computer malware, viruses, physical or electronic break-ins and similar disruptions could lead to interruption and delays in Allego's operations and loss, misuse or theft of data. Computer malware, viruses, ransomware, hacking and phishing attacks against online networks have become more prevalent and may occur on Allego's systems in the future and on hardware manufacturers that supply Allego. Any attempts by cyber attackers to disrupt Allego's operations, services or systems, if successful, could harm its business, introduce liability to data subjects, result in the misappropriation of

company funds, be expensive to remedy and damage Allego's reputation or brand. Insurance may not be sufficient to cover significant expenses and losses related to cyber-attacks. Efforts to prevent cyber attackers from entering computer systems are expensive to implement, and Allego may not be able to cause the implementation or enforcement of such prevention. Though it is difficult to determine what, if any, harm may directly result from any specific interruption or attack, any failure to maintain performance, reliability, security and availability of systems and technical infrastructure may, in addition to other losses, harm Allego's reputation, brand and ability to operate reliably and to retain customers.

Allego has previously experienced, and may in the future experience, service disruptions, outages and other performance problems due to a variety of factors, including infrastructure changes, third-party service providers, scalability issues with its software tools, human or software errors and capacity constraints. Allego relies on telecom networks to support reliable operation, management and maintenance of its charger network, charging session management, and driver authentication, and payment processing by customers depends on reliable connections with wireless communications networks. As a result, Allego's operations depend on a handful of public carriers and are exposed to disruptions related to network outages and other communications issues on the carrier networks. Disruptions experienced in the payment chain from authorization to settlement also might cause financial harm, directly or indirectly to Allego. If Allego's services or charging points are unavailable when users attempt to access them, they may seek other services or networks, which could reduce demand for Allego's charging stations and services.

Allego has processes and procedures in place designed to enable it to recover from a disaster or catastrophe and continue business operations. However, there are several factors ranging from human error to data corruption that could materially impact the efficacy of such processes and procedures, including by lengthening the period of time that services are partially or fully unavailable to customers and users. It may be difficult or impossible to perform some or all recovery steps and continue normal business operations due to the nature of a particular disaster or catastrophe, especially during peak periods, which could cause additional reputational damages, contractual penalties or loss of revenues, any of which could adversely affect its business and financial results.

If Allego does not successfully implement, maintain or expand its processes and procedures relating to data security, its operations may be disrupted, and its ability to accurately and/or timely report its financial results could be impaired and deficiencies may arise in its internal control over financial reporting, which may impact its ability to certify its financial results.

***Should Allego pursue acquisitions in the future, it would be subject to risks associated with acquisitions.***

Allego may acquire additional assets such as public charging networks, products, technologies or businesses that are complementary to its existing business or that reinforce its core or adjacent competencies. The process of identifying and consummating acquisitions and the subsequent integration of new assets and businesses into Allego's own business would require attention from management and could result in a diversion of resources from its existing business, which in turn could have an adverse effect on its operations. Acquired assets or businesses may not generate the expected financial results or the expected technological gains. Key employees of acquired companies may also decide to leave. Acquisitions could also result in the use of cash, potentially dilutive issuances of equity securities, the occurrence of goodwill impairment charges, amortization expenses for other intangible assets and exposure to potential unknown liabilities of the acquired business.

***If Allego is unable to attract and retain key employees and hire qualified management, technical, engineering and sales personnel, its ability to compete and successfully grow its business would be harmed.***

Allego's success depends, in part, on its continuing ability to identify, hire, attract, train, develop and retain highly qualified personnel. The inability to do so effectively would adversely affect its business.

Competition for employees can be intense in the various parts of Europe where Allego operates, as there is a high demand of qualified personnel. The ability to attract, hire and retain personnel depends on Allego's ability to provide competitive compensation. Allego may not be able to attract, assimilate, develop or retain qualified personnel in the future, and failure to do so could adversely affect its business, including the execution of its strategy.

***Allego is expanding operations in many countries in Europe, which will expose it to additional tax, compliance, market, local rules and other risks.***

Allego's operations are within the European Union and in the United Kingdom, and it maintains contractual relationships with parts and manufacturing suppliers in Asia, directly or indirectly through its suppliers. Allego also intends to expand

into other EEA countries. Managing this global presence and expansion in Europe requires additional resources and controls, and could subject Allego to certain risks, associated with international operations, including:

- conformity with applicable business customs, including translation into foreign languages and associated expenses;
- ability to find and secure sites in new jurisdictions;
- availability of reliable and high quality contractors for the development of its sites and more globally installation challenges;
- challenges in arranging, and availability of, financing for customers;
- difficulties in staffing and managing foreign operations in an environment of diverse culture, laws, and customers, and the increased travel, infrastructure, and legal and compliance costs associated with European operations;
- differing driving habits and transportation modalities in other markets;
- different levels of demand among commercial customers;
- quality of wireless communication that can hinder the use of its software platform with charging stations in the field;
- compliance with multiple, potentially conflicting and changing governmental laws, regulations, certifications, and permitting processes including environmental, banking, employment, tax, information security, privacy, and data protection laws and regulations such as the European Union General Data Protection Regulation (“**GDPR**”), national legislation implementing the same;
- compliance with the United Kingdom Anti-Bribery Act;
- safety requirements as well as charging and other electric infrastructures;
- difficulty in establishing, staffing and managing foreign operations;
- difficulties in collecting payments in foreign currencies and associated foreign currency exposure;
- restrictions on operations as a result of the dependence on subsidies to fulfill capitalization requirements;
- restrictions on repatriation of earnings;
- compliance with potentially conflicting and changing laws of taxing jurisdictions, the complexity and adverse consequences of such tax laws, and potentially adverse tax consequences due to changes in such tax laws; and
- regional economic and political conditions.

As a result of these risks, Allego’s current expansion efforts and any potential future international expansion efforts may not be successful.

***Inflation could adversely affect Allego’s business and financial results.***

Inflation, which increased significantly during 2021 and 2022, could adversely affect Allego by increasing the costs of materials and labor needed to operate Allego’s business and could continue to adversely affect the Company in future periods. If this current inflationary environment continues, there can be no assurance that Allego would be able to recover related cost increases through price increases, which could result in downward pressure on Allego’s operating margins. As a result, Allego’s financial condition, results of operations, and cash flows, could be adversely affected over time.

***Certain of Allego’s strategic and development arrangements could be terminated or may not materialize into long-term contract partnership arrangements and may restrict or limit Allego from developing arrangements with other strategic partners.***

Allego has arrangements with strategic development partners and collaborators. Some of these arrangements are evidenced by memorandums of understanding, non-binding letters of intent, and early stage agreements that are used for design and development purposes but will require renegotiation at later stages of development, each of which could be terminated or may not materialize into next-stage contracts or long-term contract partnership arrangements. In addition, Allego does not currently have formal agreements with all partners and collaborators that are contemplated in the execution of its business plan. Moreover, existing or future arrangements may contain limitations on Allego’s ability to enter into strategic and development arrangements with other partners. If Allego is unable to maintain such arrangements and agreements, or if such agreements or arrangements contain other restrictions from or limitations on developing arrangements with other strategic partners, its business, prospects, financial condition and operating results may be materially and adversely affected.

**Risks Related to the EV Market**

***New alternative fuel technologies may negatively impact the growth of the EV market and thus the demand for Allego’s charging stations and services.***

As a number of European Union regulations have sought to achieve a sharp decrease in CO<sub>2</sub> emissions in Europe, consumer acceptance of EVs and other alternative vehicles has been increasing. If new technologies such as hydrogen for

light trucks or load transportation develop and are widely adopted, the demand for electric charging could diminish. In addition, the EV fueling model is different than gas or other fuel models, requiring behavioral change and education of influencers, consumers and others such as regulatory bodies. Developments in alternative technologies, such as fuel cells, compressed natural gas or hydrogen may materially and adversely affect demand for EVs and EV charging stations, which in turn would materially and adversely affect Allego's business, operating results, financial condition and prospects.

***Allego's future growth and success is highly correlated with and thus dependent upon the continuing rapid adoption of EVs.***

Allego's future growth is highly dependent upon the adoption of EVs by consumers. The market for EVs is still rapidly evolving, characterized by rapidly changing technologies, competitive pricing and competitive factors, evolving government regulation and industry standards and changing consumer demands and behaviors and the environment generally. Although demand for EVs has grown in recent years, bolstered in part by pro-EV regulations in Europe, there is no guarantee that such demand will continue to grow. If the market for EVs develops more slowly than expected, Allego's business, prospects, financial condition and operating results would be harmed. The market for EVs could be affected by numerous factors, such as:

- perceptions about EV features, quality, safety, performance and cost;
- perceptions about the limited range over which EVs may be driven on a single battery charge;
- competition, including from other types of alternative fuel vehicles as hydrogen or fuel cells;
- concerns regarding the stability of the electrical grid;
- the decline of an EV battery's ability to hold a charge over time;
- availability of service for EVs;
- consumers' perception about the convenience and cost of charging EVs;
- government regulations and economic incentives, including adverse changes in, or expiration of, favorable tax incentives related to EVs, EV charging stations or decarbonization generally; and
- concerns about the future viability of EV manufacturers.

In addition, sales of vehicles in the automotive industry can be cyclical, which may affect growth in acceptance of EVs. It is uncertain how macroeconomic factors will impact demand for EVs, particularly since they can be more expensive than traditional fuel-powered vehicles, when the automotive industry globally has been experiencing a recent decline in sales.

Demand for EVs may also be affected by factors directly impacting automobile prices or the cost of purchasing and operating automobiles, such as sales and financing incentives, prices of raw materials and parts and components and governmental regulations, including tariffs, import regulation and other taxes. Volatility in demand may lead to lower vehicle unit sales, which may result in reduced demand for EV charging solutions and therefore adversely affect Allego's business, financial condition and operating results.

***The European EV market currently benefits from the availability of rebates, scrappage schemes, tax credits and other financial incentive schemes from governments to offset and incentivize the purchase of EVs. The reduction, modification, or elimination of such benefits could cause reduced demand for EVs and EV charging, which would adversely affect Allego's financial results.***

Most European countries provide incentives to end users and purchasers of EVs and EV charging stations in the form of rebates, scrappage schemes for internal combustion engines ("ICEs"), tax credits and other financial incentives. The EV market relies on these governmental rebates, scrappage schemes for ICEs, tax credits and other financial incentives to significantly lower the effective price of EVs and EV charging stations to customers and to support widespread installation of EV charging infrastructure. However, these incentives may expire on a particular date, may end when allocated funding is exhausted, or may be reduced or terminated as a matter of regulatory or legislative policy. For example, in Germany, incentives are expected to continue until 2030, and in the Netherlands, these incentives are expected to continue until 2025. Any reduction in rebates, scrappage schemes for ICEs, tax credits or other financial incentives could reduce the demand for EVs and EV charging stations and as a result, may adversely impact Allego's business and expansion potential.

***The EV charging market is characterized by rapid technological change, which requires Allego to continue developing new innovations of its software platform and to keep up with new hardware technologies. Any delays in such development could adversely affect market adoption of its solutions and Allego's financial results.***

Continuing technological changes in battery and other EV technologies or payment technologies could adversely affect adoption of current EV charging technology and/or Allego's charging network or services. Allego's future success will depend upon its ability to develop new sites and introduce a variety of new capabilities and innovations to enhance EV drivers experience using its network and its existing services offerings.

As EV technologies change, Allego may need to upgrade or adapt its charging stations technology and introduce new hardware in order to serve vehicles that have the latest technology, in particular battery cell technology, which could involve substantial costs. This could lead Allego to replace some charging hardware before its expected lifespan involving financial costs and reduced return. Even if Allego is able to keep pace with changes in technology and develop new features and services, its research and development expenses could increase and its gross margins could be adversely affected.

Allego cannot guarantee that any new services or features of its software platform will be released in a timely manner or at all, or that if such services or features are released, that they will achieve market acceptance. Delays in delivering new services that meet customer requirements could damage Allego's relationships with customers and lead them to seek alternative providers. For some customers, delays in delivering new services and features could induce the application of contractual penalties. Delays in introducing innovations or the failure to offer innovative services at competitive prices may cause existing and potential customers to purchase Allego's competitors' products or services.

If Allego is unable to devote adequate resources to develop new features and services or cannot otherwise successfully develop features or services that meet customer requirements on a timely basis or that remain competitive with technological alternatives, its charging network or services could lose market share, its revenue will decline, it may experience operating losses and its business and prospects will be adversely affected.

#### **Risks Related to Allego's Technology, Intellectual Property and Infrastructure**

*Allego may need to defend against intellectual property infringement or misappropriation claims, which may be time consuming and expensive.*

From time to time, the holders of intellectual property rights may assert their rights and urge Allego to obtain licenses, and/or may bring suits alleging infringement or misappropriation of such rights. There can be no assurance that Allego will be able to mitigate the risk of potential suits or other legal demands by competitors or other third parties. Accordingly, Allego may consider entering into licensing agreements with respect to such rights, although no assurance can be given that such licenses can be obtained on acceptable terms or at all or that litigation will not occur, and such licenses and/or associated litigation could significantly increase Allego's operating expenses. In addition, if Allego is determined to have or believes there is a high likelihood that it has infringed upon or misappropriated a third party's intellectual property rights, it may be required to cease making, selling or incorporating certain key components or intellectual property into the products and services it offers, to pay substantial damages and/or royalties, to redesign its products and services, and/or to establish and maintain alternative branding. In addition, to the extent that Allego's customers and business partners become the subject of any allegation or claim regarding the infringement or misappropriation of intellectual property rights related to Allego's products and services, Allego may be required to indemnify such customers and business partners. If Allego were required to take one or more such actions, its business, prospects, operating results and financial condition could be materially and adversely affected. In addition, any litigation or claims, whether or not valid, could result in substantial costs, negative publicity and diversion of resources and management attention.

*Allego's business may be adversely affected if it is unable to maintain, protect or enforce its rights in its technology and intellectual property.*

Allego's success depends, in part, on Allego's ability to establish, maintain and protect its rights in its core technology and intellectual property. To accomplish this, Allego relies on, and plans to continue relying on, trade secrets, copyright, trademark and other intellectual property laws, employee and third-party nondisclosure agreements, intellectual property licenses and other contractual rights. Failure to adequately maintain, protect or enforce its rights in its technology and intellectual property could result in competitors offering similar products, potentially resulting in the loss of some of Allego's competitive advantage and a decrease in revenue which would adversely affect its business, prospects, financial condition and operating results.

Allego cannot guarantee that competitors will not infringe its intellectual property. Despite Allego's efforts to protect its intellectual property, third parties may attempt to copy or otherwise obtain and use Allego's intellectual property or seek court declarations that Allego's intellectual property is invalid or unenforceable or that they do not infringe upon Allego's intellectual property. Monitoring unauthorized use of Allego's intellectual property is difficult and costly and the steps Allego has taken or may take in the future in an effort to prevent infringement or misappropriation may not be successful. From time to time, Allego may have to resort to litigation to enforce its intellectual property, which could result in substantial costs and diversion of our resources, and ultimately may not be successful.

In addition, it is possible that:

- current and future competitors may independently develop similar trade secrets or works of authorship, such as software;

## [Table of Contents](#)

- know-how and other proprietary information Allego purports to hold as a trade secret may not qualify as a trade secret under applicable laws; and
- proprietary designs, software design and technology embodied in Allego's offers may be discoverable by third parties through means that do not constitute violations of applicable laws.

Patent, trademark and trade secret laws vary significantly throughout the world. Some foreign countries do not protect intellectual property rights to the same extent as do the laws of the European Union, United Kingdom, or EEA countries. Further, policing the unauthorized use of its intellectual property in foreign jurisdictions may be difficult or impossible. Therefore, Allego's intellectual property rights may not be as strong or as easily enforced outside of the European Union, United Kingdom, and EEA.

### ***The current lack of international standards may lead to uncertainty, additional competition and further unexpected costs.***

Lack of unique industry standards for EV station management, coupled with utilities and other large organizations mandating their own specifications that have not become widely adopted in the industry, may hinder innovation or slow new solutions and services or new feature introduction.

In addition, automobile manufacturers may choose to utilize their own proprietary systems and networks, which could lock out competition for EV charging stations, or use their size and market position to influence the market, which could limit Allego's market and reach to customers, negatively impacting its business.

Further, should regulatory bodies impose new standards that are not compatible with Allego's infrastructure, it may incur significant costs to adapt its business model to the new regulatory standards, which may require significant time and, as a result, may have a material adverse effect on its revenues or results of operations.

### ***Allego's technology could have undetected defects, errors or bugs in hardware or software which could reduce market adoption, damage its reputation with current or prospective customers, and/or expose it to product liability and other claims that could materially and adversely affect its business.***

Allego may be subject to claims that its charging stations have malfunctioned and persons were injured or purported to be injured. Any insurance that Allego carries may not be sufficient or it may not apply to all situations. Similarly, to the extent that such malfunctions are related to components obtained from third-party vendors, such vendors may not assume responsibility for such malfunctions. In addition, Allego's customers could be subjected to claims as a result of such incidents and may bring legal claims against Allego to attempt to hold it liable. Any of these events could adversely affect Allego's brand, relationships with customers, operating results or financial condition.

Across Allego's solutions and services line, Allego develops equipment solutions and services based on preferred second source or common off-the-shelf vendors. However, due to its design specifications, Allego does rely on certain single source vendors, the unavailability or failure to source from these vendors can pose risks to supply chain or product installation which may negatively impact Allego's business.

Furthermore, Allego's software platform is complex and includes a number of licensed third-party commercial and open-source software libraries. Allego's software has contained defects and errors and may in the future contain undetected defects or errors. Allego is continuing to evolve the features and functionality of its platform through updates and enhancements, and as it does, it may introduce additional defects or errors that may not be detected until after deployment to customers. In addition, if Allego's products and services, including any updates or patches, are not implemented or used correctly or as intended, inadequate performance and disruptions in service may result.

Any defects or errors in product or services offerings, or the perception of such defects or errors, or other performance problems could result in any of the following, each of which could adversely affect Allego's business and results of its operations:

- expenditure of significant financial and product development resources, including recalls, in efforts to analyze, correct, eliminate or work around errors or defects;
- loss of existing or potential customers or partners;
- interruptions or delays in sales;
- delayed or lost revenue;
- delay or failure to attain market acceptance;
- delay in the development or release of new functionality or improvements;
- negative publicity and reputational harm;
- sales credits or refunds;
- exposure of confidential or proprietary information;

- diversion of development and customer service resources;
- breach of warranty claims;
- contractual penalties with services customers as it doesn't meet its contractual obligations;
- legal claims under applicable laws, rules and regulations; and
- an increase in collection cycles for accounts receivable or the expense and risk of litigation.

Although Allego has contractual protections, such as warranty disclaimers and limitation of liability provisions in many of its agreements with customers and other business partners, such protections may not be uniformly implemented in all contracts and, where implemented, may not fully or effectively protect from claims by customers, business partners or other third parties. Any insurance coverage or indemnification obligations of suppliers may not adequately cover all such claims or cover only a portion of such claims. A successful product liability, warranty, or similar claim could have an adverse effect on Allego's business, operating results and financial condition. In addition, even claims that ultimately are unsuccessful could result in expenditure of funds in litigation, divert management's time and other resources and cause reputational harm.

***Allego's use of "open source" software could subject its proprietary software to general release, adversely affect its ability to sell its products and services, and subject it to possible litigation, claims or proceedings.***

Allego relies on some open-source software and libraries, including those issued under the General Public License (or similar "copyleft" licenses) for development of its products and may continue to rely on open source software in the future. Companies that use open source software in connection with their products have, from time to time, faced claims challenging the use of open source software and/or compliance with open source license terms. As a result, third parties may assert claims against Allego claiming ownership of what Allego believes to be open source software or claiming noncompliance with open source licensing terms. Some open source software licenses may require users who distribute proprietary software containing or linked to open source software to publicly disclose all or part of the source code to such proprietary software and/or make available any derivative works of the open source code under the same open source license, which could include proprietary source code. In such cases, the open source software license may also restrict us from charging fees to licensees for their use of our software. While we monitor the use of open source software and try to ensure that open source software is not used in a manner that would subject our proprietary source code to these requirements and restrictions, such use could inadvertently occur, which may decrease revenue and lessen any competitive advantage Allego has due to the secrecy of its source code.

Further, in addition to risks related to license requirements, use of certain open source software may carry greater technical and legal risks than does the use of third-party commercial software. For example, open source software is generally provided as-is without any support or warranties or other contractual protections regarding infringement or the quality of the code, including the existence of security vulnerabilities. To the extent that Allego's platform depends upon the successful operation of open source software, any undetected errors or defects in open source software that Allego uses could prevent the deployment or impair the functionality of its systems and injure its reputation. In addition, the public availability of such software may make it easier for attackers to target and compromise Allego's platform through cyber-attacks. Any of the foregoing risks could materially and adversely affect Allego's business, prospects, financial condition, results of operations, and cash flows.

***Interruptions, delays in service or inability to increase capacity, including internationally, at third-party data center facilities could impair the use or functionality of Allego's operation, harm its business and subject it to liability.***

Allego currently serves customers from third-party data center facilities operated by Microsoft Azure Services ("MAS") located in the United States, Europe and Canada. In addition to MAS, some Allego services are housed in third-party data centers. Any outage or failure of MAS or of such data centers could negatively affect Allego's product connectivity and performance. Furthermore, Allego depends on connectivity from its charging stations to its data centers through cellular service providers, such as KPN, a Dutch cellular service provider. Any incident affecting a data center facility's or a cellular service provider's infrastructure or operations, whether caused by fire, flood, severe storm, earthquake, power loss, telecommunications failures, breach of security protocols, computer viruses and disabling devices, failure of access control mechanisms, natural disasters, war, criminal act, military actions, terrorist attacks and other similar events could negatively affect the use, functionality or availability of Allego's services.

Any damage to, or failure of, Allego's systems, or those of its third-party providers, could interrupt or hinder the use or functionality of its services. Impairment of or interruptions in Allego's services may reduce revenue, subject it to claims and litigation, cause customers to terminate their subscriptions, and adversely affect renewal rates and its ability to attract new customers. Allego's business will also be harmed if customers and potential customers believe its products and services are unreliable.

*Allego expects to incur research and development costs and devote significant resources to developing new solutions, services and technologies and to enhancing its existing solutions and services, which could significantly reduce its profitability and may never result in revenue to Allego.*

Allego's future growth depends on penetrating new markets, adapting existing products to new applications and customer requirements, and introducing new solutions and services that achieve market acceptance. Allego plans to incur significant research and development costs in the future as part of its efforts to design, develop, manufacture and introduce new solutions and services, new technologies and enhance existing solutions and services. Allego's development expenses were €4.0 million in 2022, €3.0 million in 2021, and €3.1 million in 2020, and are likely to be similar in the future. These expenses related to the development of Allego's EV Cloud platform and have been capitalized as intangible assets. Further, Allego's research and development program may not produce successful results, and its new solutions and services or new technologies may not achieve market acceptance, create additional revenue or become profitable. Allego's potential inability to develop the necessary software and technology systems may harm its competitive position. Allego is also relying on third-party suppliers to develop a number of emerging technologies for use in its products. These technologies are not today, and may not ever be, commercially viable. There can be no assurances that Allego's suppliers will be able to meet the technological requirements, scalability, quality, production timing, and volume requirements to support its business plan. As a result, Allego's business plan could be significantly impacted.

#### **Customer-Related Risks**

*Allego may be unable to increase the demand for its public charging network, which could adversely affect its profitability and growth.*

Allego's development strategy consists, in part, on the rollout of public charging sites with a combination mostly of fast and ultra-fast charging capabilities. The growth in utilization of these charging sites is key for the profitability of Allego's business. If utilization does not increase, if the adoption of fast and ultra-fast charging is slower than expected, or if the marketing cost to increase such utilization, either directly or through third parties, is increasing widely, the profitability and growth of Allego may be adversely affected. The expected premium for fast and ultra-fast charging compared to slow charging may not be realized, hampering the growth of fast and ultra-fast charging which may adversely affect Allego's profitability and growth.

*Allego's business will depend on the utilization of its network by EV drivers and the mobility service providers ("MSPs") to offer access to Allego's network. If EV drivers do not continue to use Allego's network or MSPs do not continue to offer access to Allego's network, Allego's business and operating results will be adversely affected.*

Allego depends on traffic from EV drivers to charge on its network and partly from MSPs that facilitate the use of Allego's network to a larger base of EV drivers. Allego has a very large base of MSPs. However, if some MSPs do not offer access to Allego's network for whatever reason or if EV drivers do not use its network due to pricing or lack of services, among other reasons, the utilization of Allego's sites will be hampered. EV drivers' retention on Allego's network may decline or fluctuate as a result of a number of factors, including satisfaction with software and features, functionality of the charging sites, prices, features and pricing of competing solutions and services, reductions in spending levels, mergers and acquisitions involving networks from competitors and deteriorating general economic conditions. If customers do not use Allego's charging network or if they opt to use other charging options, its business and operating results will be adversely affected.

*Failure to effectively expand Allego's sites could harm its ability to increase revenue.*

Allego's ability to grow the number of EV drivers using its charging network, to expand its customer base, achieve broader market share, grow revenue, and achieve and sustain profitability will depend, to a significant extent, on its ability to effectively expand its site development on the one hand and its sales and marketing operations to customers on the other hand. Site development, sales and marketing expenses represent a significant percentage of its total revenue, and its operating results may suffer if site development, sales and marketing expenditures do not increase to support revenue.

Allego is substantially dependent on its direct development team to develop new sites and sales in order to obtain new customers and contracts. Allego also plans to continue to expand its development team with the support of external parties. The proper coordination and efficiency of site prospection is key to increasing Allego's revenue. Allego may not be able to recruit, hire and retain a sufficient number of site developers, which may adversely affect its ability to expand its charging sites. New sales and marketing personnel will be needed to grow Allego's services business as well. New hires require significant training and investment before they achieve full productivity, particularly in new sales territories. Allego may be unable to hire or retain sufficient qualified individuals. Furthermore, hiring sales personnel in new markets where Allego seeks to operate can be costly, complex and time-consuming, and requires additional upfront costs that may be

disproportionate to the initial revenue expected from those markets. There is significant competition for direct sales personnel. Allego's ability to achieve significant revenue growth in the future will depend, in large part, on its success in recruiting, training, incentivizing and retaining a sufficient number of qualified direct site developers and sales personnel and on such personnel attaining desired productivity levels within a reasonable amount of time. Allego's business will be harmed if continuing investment in its site development, sales and marketing capabilities does not generate a significant increase in revenue. Allego's operations may be unable to cope appropriately with the growth of its operating charging points, preventing it from fully benefitting from such growth. Such limitations might come from external suppliers for software and IT-related services as well as from the capacity of Allego to properly upgrade its software platform. Allego could also face contractual penalties with its services customers if it is unable to meet its contractual obligations as a result of these limitations.

#### **Risks Related to Ownership of Allego Securities**

##### ***Allego could be treated as a U.S. corporation or a "surrogate foreign corporation" for U.S. federal income tax purposes as a result of the Business Combination.***

Under current U.S. federal income tax law, a corporation is generally considered to be a tax resident in the jurisdiction of its organization or incorporation. Therefore, a corporation organized under the laws of the Netherlands would generally be treated as a non-U.S. corporation (and, therefore, not a U.S. tax resident) for U.S. federal income tax purposes. Section 7874 of the Code and the Treasury Regulations promulgated thereunder, however, contain rules that may cause a non-U.S. corporation that acquires the stock of a U.S. corporation to be treated as a U.S. corporation for U.S. federal income tax purposes under certain circumstances (an "***Inverted Corporation***"). If Allego were an Inverted Corporation for U.S. federal income tax purposes, among other consequences, it would generally be subject to U.S. federal income tax on its worldwide income, and its dividends, if any, would be subject to taxation by the United States as dividends from a U.S. corporation. Regardless of the application of Section 7874 of the Code, Allego is expected to be treated as a Dutch tax resident for Dutch tax purposes. Consequently, if Allego were an Inverted Corporation for U.S. federal income tax purposes under Section 7874 of the Code, it could be liable for both U.S. and Dutch taxes and dividends paid by Allego to its shareholders could be subject to both U.S. and Dutch withholding taxes.

In addition, even if Allego is not an Inverted Corporation pursuant to Section 7874 of the Code, it may be subject to unfavorable treatment as a "surrogate foreign corporation" (within the meaning of Section 7874(a)(2)(B) of the Code) under certain circumstances (a "***Surrogate Foreign Corporation***"). If it were determined that Allego is a Surrogate Foreign Corporation for U.S. federal income tax purposes under Section 7874 of the Code and the Treasury Regulations promulgated thereunder, dividends, if any, made by Allego would not qualify for "qualified dividend income" treatment, and U.S. affiliates of Allego, if any, could be subject to increased taxation under Sections 7874 and 59A of the Code.

Allego does not expect to be an Inverted Corporation or Surrogate Foreign Corporation for U.S. federal income tax purposes, and Allego intends to take this position on its tax returns. Allego has not sought and will not seek any rulings from the IRS as to such tax treatment. Further, there can be no assurance that your tax advisor, Allego's tax advisors, the IRS, or a court will agree with the position that Allego is not an Inverted Corporation or Surrogate Foreign Corporation pursuant to Section 7874 of the Code. Allego is not representing to you that Allego will not be treated as an Inverted Corporation or Surrogate Foreign Corporation for U.S. federal income tax purposes under Section 7874 of the Code. The rules for determining whether a non-U.S. corporation is an Inverted Corporation or Surrogate Foreign Corporation for U.S. federal income tax purposes are complex, unclear, and the subject of ongoing regulatory change. Allego's intended position is not free from doubt.

##### ***If Allego were a passive foreign investment company ("PFIC") for U.S. federal income tax purposes, U.S. Holders of Allego Ordinary Shares or Assumed Warrants could be subject to adverse U.S. federal income tax consequences.***

If Allego is treated as a PFIC within the meaning of Section 1297 of the Code for any taxable year during which a U.S. Holder (as defined in "***Item 10.E. Taxation—Material U.S. Federal Income Tax Considerations***") holds Allego Ordinary Shares or Assumed Warrants (regardless of whether Allego remains a PFIC for subsequent taxable years), certain adverse U.S. federal income tax consequences, such as taxation at the highest marginal ordinary income tax rates on capital gains and on certain actual or deemed distributions, and interest charges on certain taxes treated as deferred, and additional reporting requirements may apply to such U.S. Holder. Under certain circumstances, certain elections may be available to U.S. Holders of Allego Ordinary Shares to mitigate some of the adverse tax consequences resulting from PFIC treatment, but U.S. Holders will not be able to make similar elections with respect to the Assumed Warrants.

PFIC status depends on the composition of a company's income and assets and the fair market value of its assets from time to time, as well as on the application of complex statutory and regulatory rules that are subject to potentially varying or changing interpretations. Based on the projected composition of Allego's income and assets, including goodwill, Allego

expects to take the position that it is not a PFIC for the taxable year of the Business Combination, but such position will not be free from doubt. Allego's PFIC status for the taxable year of the Business Combination or any subsequent taxable year will not be determinable until after the end of each such taxable year, and Allego cannot assure you that it will not be a PFIC in the taxable year of the Business Combination or in any future taxable year. If Allego were later determined to be a PFIC, you may be unable to make certain advantageous elections with respect to your ownership of Allego Securities that would mitigate the adverse consequences of Allego's PFIC status, or making such elections retroactively could have adverse tax consequences to you. Allego is not representing to you, and there can be no assurance, that Allego will not be treated as a PFIC for the taxable year of the Business Combination or in any future taxable year. Allego has not sought and will not seek any rulings from the IRS or any opinion from any tax advisor as to such tax treatment. U.S. Holders should consult with, and rely solely upon, their tax advisors to determine the application of the PFIC rules to them and any resultant tax consequences.

For more information about the tax considerations with respect to PFIC classification to Holders, please refer to *Item 10.E. Taxation—Material U.S. Federal Income Tax Considerations.*"

***The issuance of additional capital stock in connection with financings, acquisitions, investments, our long term incentive plan, contributions from Madeleine or otherwise could dilute the ownership and voting power of shareholders.***

Allego may need to raise additional financing through loans, securities offerings or additional investments in order to fund its ongoing operations. If Allego chooses to raise additional financing through the issuance of Allego Ordinary Shares, such additional Allego Ordinary Shares or such other securities may be issued at a discount to the market price of Allego Ordinary Shares at the time of issuance. Any issuance of such securities could result in substantial dilution to Allego's existing shareholders and cause the market price of Allego Ordinary Shares to decline.

***The Allego Articles include exclusive jurisdiction and forum selection provisions, which may impact the ability of shareholders to bring actions against us or increase the costs of bringing such actions.***

The Allego Articles include exclusive jurisdiction and forum selection provisions, which may impact the ability of shareholders to bring actions against Allego or increase the costs of bringing such actions. The Allego Articles provide that, to the fullest extent permitted by applicable law, and unless Allego consents to the selection of an alternative forum, with respect to any complaint asserting a cause of action arising under the Securities Act or the Exchange Act, the federal courts of the United States will be the exclusive forum for resolving any such complaint. These limitations on the forum in which shareholders may initiate action against us may limit a shareholder's ability to bring a claim in a judicial forum that it finds favorable and could increase the costs and inconvenience of pursuing claims or otherwise adversely affect a shareholder's ability to seek monetary or other relief. There is uncertainty as to whether a court would enforce such provisions with respect to the Securities Act or the Exchange Act and the rules and regulations thereunder and a court could decline to enforce these exclusive jurisdiction and forum provisions with respect to such claims. Furthermore, investors are not able to waive compliance with federal securities laws and the rules and regulations thereunder. If a court were to find these provisions to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions.

#### **Financial and Accounting-Related Risks**

***Allego's financial condition and results of operations are likely to fluctuate on a quarterly basis in future periods, which could cause its results for a particular period to fall below expectations, resulting in a decline in the price of Allego Ordinary Shares.***

Allego's financial condition and results of operations have fluctuated in the past and may continue to fluctuate in the future due to a variety of factors, many of which are beyond its control.

In addition to the other risks described herein, the following factors could also cause Allego's financial condition and results of operations to fluctuate on a quarterly basis:

- the timing and volume of new site acquisitions;
- the timing of new electricity grid connections and permits;
- the cost of electricity;
- fluctuations in service costs, particularly due to unexpected costs of servicing and maintaining charging stations;
- weaker than anticipated demand for charging stations, whether due to changes in government incentives and policies or due to other conditions;
- fluctuations in sales and marketing or research and development expenses;
- supply chain interruptions and manufacturing or delivery delays;
- the timing and availability of new solutions and services relative to customers' and investors' expectations;

- the length of the sales and installation cycle for a particular customer;
- the potential impact of pandemics on Allego's workforce, or those of its suppliers, vendors or business partners and its customers;
- disruptions in sales, operations, IT services or other business activities or Allego's inability to attract and retain qualified personnel; and
- unanticipated changes in regional, federal, state, local or foreign government incentive programs, which can affect demand for EVs.

Fluctuations in operating results and cash flow could, among other things, give rise to short-term liquidity issues. In addition, revenue, and other operating results in future quarters may fall short of the expectations of investors and financial analysts, which could have an adverse effect on the price of Allego Ordinary Shares.

***Changes to applicable tax laws and regulations or exposure to additional tax liabilities could adversely affect Allego's business and future profitability.***

Allego conducts operations, directly and through its subsidiaries, within the European Union and the United Kingdom, and Allego and its subsidiaries will therefore be subject to income taxes in such jurisdictions. Allego may also in the future become subject to income taxes in other foreign jurisdictions. Allego's effective income tax rate could be adversely affected by a number of factors, including changes in the valuation of deferred tax assets and liabilities, changes in tax laws, changes in accounting and tax standards or practices, changes in the composition of operating income by tax jurisdictions, changes in Allego's operating results before taxes, and the outcome of income tax audits in the jurisdictions in which it operates. Allego will regularly assesses all of these matters to determine the adequacy of its tax liabilities. If any of Allego's assessments are ultimately determined to be incorrect, Allego's business, results of operations, or financial condition could be materially adversely affected.

Due to the complexity of multinational tax obligations and filings, Allego and its subsidiaries may have a heightened risk related to audits or examinations by federal, state, provincial, and local taxing authorities in the jurisdictions in which it operates. Outcomes from these audits or examinations could have a material adverse effect on Allego's business, results of operations, or financial condition.

The tax laws of the jurisdictions in which Allego operates, as well as potentially any other jurisdiction in which Allego may operate in the future, have detailed transfer pricing rules that require that all transactions with related parties satisfy arm's length pricing principles. Although Allego believes that its transfer pricing policies have been reasonably determined in accordance with arm's length principles, the taxation authorities in the jurisdictions where Allego carries on business could challenge its transfer pricing policies. International transfer pricing is a subjective area of taxation and generally involves a significant degree of judgment. If any of these taxation authorities were to successfully challenge Allego's transfer pricing policies, Allego could be subject to additional income tax expenses, including interest and penalties, as well as transfer pricing mismatches. Any such increase in Allego's income tax expense and related interest and penalties could have a material adverse effect on its business, results of operations, or financial condition.

Allego may also be adversely affected by changes in the relevant tax laws and tax rates, treaties, regulations, administrative practices and principles, judicial decisions, and interpretations thereof, in each case, possibly with retroactive effect.

***As a result of Allego's plans to expand operations, including to jurisdictions in which the tax laws may not be favorable, Allego's effective tax rate may fluctuate, tax obligations may become significantly more complex and subject to greater risk of examination by taxing authorities or Allego may be subject to future changes in tax laws, in each case, the impacts of which could adversely affect Allego's after-tax profitability and financial results. .***

In the event that Allego expands its operating business in the European Union or the United Kingdom, or to other jurisdictions, Allego's effective tax rates may fluctuate widely in the future. Future effective tax rates could be affected by: operating losses in jurisdictions where no tax benefit can be recorded under IFRS, changes in deferred tax assets and liabilities, changes in tax laws or the regulatory environment, changes in accounting and tax standards or practices, changes in the composition of operating income by tax jurisdiction, and the pre-tax operating results of Allego's business.

Additionally, Allego's after-tax profitability and financial results could be subject to volatility or be affected by numerous factors, including (a) the availability of tax deductions, credits, exemptions, refunds and other benefits to reduce tax liabilities, (b) changes in the valuation of deferred tax assets and liabilities, if any, (c) the expected timing and amount of the release of any tax valuation allowances, (d) the tax treatment of stock-based compensation, (e) changes in the relative amount of earnings subject to tax in the various jurisdictions, (f) the potential business expansion into, or otherwise becoming subject to tax in, additional jurisdictions, (g) changes to existing intercompany structure (and any costs related thereto) and business operations, (h) the extent of intercompany transactions and the extent to which taxing authorities in relevant jurisdictions respect those intercompany transactions, and (i) the ability to structure business operations in an

efficient and competitive manner. Outcomes from audits or examinations by taxing authorities could have an adverse effect on Allego's after-tax profitability and financial condition. Additionally, several tax authorities have increasingly focused attention on intercompany transfer pricing with respect to sales of products and services and the use of intangibles. Tax authorities could disagree with Allego's intercompany charges, cross-jurisdictional transfer pricing or other matters and assess additional taxes. If Allego does not prevail in any such disagreements, its profitability may be affected.

Allego's after-tax profitability and financial results may also be adversely affected by changes in relevant tax laws and tax rates, treaties, regulations, administrative practices and principles, judicial decisions and interpretations thereof, in each case, possibly with retroactive effect.

***Allego's ability to utilize net operating loss carryforwards and certain other tax attributes may be limited.***

The ability of Allego to utilize net operating loss and tax loss carryforwards and other tax attributes (including carry-forward non-deductible interest expenses under the Dutch earnings stripping rule) is conditioned upon Allego's attaining profitability and generating taxable income. Allego Holding and its Dutch group entities incurred significant net losses since inception and Allego is expected to continue to incur significant losses. Additionally, Allego's ability to utilize net operating loss and tax loss carryforwards to offset future taxable income may be subject to certain limitations. In this respect, the exact amount of the tax losses of Allego Holding and its Dutch subsidiaries for the financial years 2020, 2021 and 2022 are not fully clear since the Dutch corporate income tax returns for 2020, 2021 and 2022 still have to be filed with the Dutch Tax Authorities and the Dutch Tax Authorities still have to review and approve this tax return. That said, the amount of tax losses of Allego Holding and its Dutch subsidiaries with respect to the period prior to the Business Combination has been discussed with the Dutch Tax Authorities and the Dutch Tax Authorities have confirmed that the Business Combination does not result in the application of the Dutch change in ownership rules. As a result, the tax losses incurred prior to the Business Combination and allocable to Allego Holding and its Dutch subsidiaries will remain available for set-off following the Business Combination (and the termination of the Dutch tax group as a result thereof). The Dutch Tax Authorities confirmed the methodology of allocating the tax losses to Allego Holding and its Dutch subsidiaries at the time of the Business Combination in respect of the tax losses (to be) incurred for the financial years 2018, 2019, 2020, 2021 and 2022. However, going forward, these tax losses will only be available for set off against taxable income actually realized by Allego Holding and its Dutch subsidiaries, in respect of tax losses incurred and allocated to Allego Holding, or its relevant Dutch subsidiary, in respect of tax losses incurred and allocated to that Dutch subsidiary.

Furthermore, as of January 1, 2022, an indefinite loss carry forward period applies in the Netherlands. However, both the carry forward and carry back tax loss relief will be limited to 50% of the taxable profit to the extent it exceeds € 1 million, calculated per financial year. As a result of transitional law, tax losses incurred in the financial years that started on or after January 1, 2013 and that are still available for carry forward as of January 1, 2022 also fall under these new rules that entered into effect on January 1, 2022 and will therefore be indefinite.

For these reasons, in the event Allego would attain profitability in the future, Allego may not be able to use its tax losses available for carryforward to fully offset taxable income for Dutch tax purposes, which may result in Dutch corporate income tax becoming due by Allego, even if it has tax loss carryforwards.

***Allego prepares its financial statements in accordance with IFRS as issued by the IASB, which is different than financial statements prepared in accordance with U.S. GAAP.***

The SEC permits foreign private issuers to file financial statements in accordance with IFRS as issued by the International Accounting Standards Board's ("IASB"). As a foreign private issuer, Allego prepares its financial statements in accordance with IFRS as issued by the IASB. The application by Allego of different accounting standards, a change in the rules of IFRS as issued by the IASB, or in the SEC's acceptance of such rules, could have a significant effect on Allego's reported financial results. Additionally, U.S. GAAP is subject to interpretation by the Financial Accounting Standards Board, the American Institute of Certified Public Accountants, the Public Company Accounting Oversight Board, the SEC, and various bodies formed to promulgate and interpret appropriate accounting principles. IFRS are subject to change or revision by the IASB. A change in these principles or interpretations could have a significant effect on Allego's reported financial results.

***Allego faces increased expenses and administrative burdens as a public company, which could have an adverse effect on its business, financial condition and results of operations.***

Allego faces increased legal, accounting, administrative and other costs and expenses as a public company that it did not incur as a private company. The Sarbanes-Oxley Act, including the requirements of Section 404, as well as rules and regulations subsequently implemented by the SEC, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 and the rules and regulations promulgated and to be promulgated thereunder, the Public Company Accounting

Oversight Board and the securities exchanges, impose additional reporting and other obligations on public companies. Compliance with public company requirements will increase costs and make certain activities more time-consuming. A number of those requirements require it to carry out activities Allego has not done previously. In addition, expenses associated with SEC reporting requirements will be incurred. Furthermore, if any issues in complying with those requirements are identified (for example, if Allego's auditors identify a significant deficiency or additional material weaknesses in the internal control over financial reporting), Allego could incur additional costs to rectify those issues, and the existence of those issues could adversely affect its reputation or investor perceptions. In addition, Allego will purchase director and officer liability insurance, which has substantial additional premiums. The additional reporting and other obligations imposed by these rules and regulations increase legal and financial compliance costs and the costs of related legal, accounting and administrative activities. Advocacy efforts by shareholders and third parties may also prompt additional changes in governance and reporting requirements, which could further increase costs.

***Allego has identified, and has previously identified, material weaknesses in its internal control over financial reporting. If Allego is unable to remediate these material weaknesses, or if Allego identifies additional material weaknesses in the future or otherwise fails to maintain an effective system of internal control over financial reporting, this may result in material misstatements of Allego consolidated financial statements or cause Allego to fail to meet its periodic reporting obligations, which may have an adverse effect on the share price.***

As of December 31, 2022, Allego is required to provide management's attestation on internal control over financial reporting pursuant to Section 404(a) of the Sarbanes-Oxley Act. The standards required for a public company under the Sarbanes-Oxley Act are significantly more stringent than those previously required of Allego as a privately-held company. Management has not been able to effectively implement controls and procedures that adequately respond to the increased regulatory compliance and reporting requirements of the Sarbanes-Oxley Act which may subject it to adverse regulatory consequences or restatements of its financial statements and could harm investor confidence.

In connection with the preparation and audit of Allego's consolidated financial statements, material weaknesses were identified in its internal control over financial reporting as of December 31, 2022. See "Item 15. Controls and Procedures" of this Annual Report. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of Allego's annual or interim financial statements will not be prevented or detected on a timely basis.

Management identified the following other material weaknesses:

- Allego did not maintain a sufficient complement of personnel with an appropriate degree of accounting knowledge, experience and training, including supervision of external consultants, to appropriately analyze, record and disclose accounting matters commensurate with its accounting and reporting requirements.
- Allego did not adequately maintain formal accounting policies, procedures, including those around risk assessments, and controls, including segregation of duties, over accounts and disclosures to achieve complete, accurate and timely financial accounting, reporting and disclosures, including segregation of duties and adequate controls related to the preparation and review of journal entries. Further, Allego did not maintain sufficient entity level controls to prevent and correct material misstatements.
- Allego did not adequately maintain controls over the identification and assessment of recurring transactions in revenue recognition, including modification to contracts, inventory management and valuation, and lease accounting as well as the proper accounting of unusual significant transactions such as in areas of share-based payments and related parties.
- Allego did not adequately document controls over certain information technology ("IT") general controls, including third-party IT service providers, for information systems that are relevant to the preparation of its consolidated financial statements. Specifically, Allego did not design and maintain (a) program change management controls to ensure that information technology program and data changes affecting financial IT applications and underlying accounting records are identified, tested, authorized and implemented appropriately and (b) user access controls to ensure appropriate segregation of duties and that adequately restrict user and privileged access to its financial applications and data to appropriate company personnel.

The material weakness related to formal accounting policies, procedures and controls resulted in adjustments to several accounts and disclosures. The IT deficiencies did not result in a material misstatement to the consolidated financial statements, however, the deficiencies, when aggregated, could impact maintaining effective segregation of duties, as well as the effectiveness of IT-dependent controls that could result in misstatements potentially impacting all financial statement accounts and disclosures that would not be prevented or detected. Each of these material weaknesses could result in a misstatement of account balances or disclosures that would result in a material misstatement to the annual or interim consolidated financial statements that would not be prevented or detected.

Allego has begun implementing a plan to remediate these material weaknesses; however, its overall control environment is still immature and may expose it to errors, losses or fraud. These remediation measures are ongoing and include hiring additional IT, accounting and financial reporting personnel and implementing additional policies, procedures and controls. Allego currently cannot estimate when it will be able to remediate these material weaknesses and it cannot, at this time, provide an estimate of the costs it expects to incur in connection with implementing the plan to remediate this material weakness. These remediation measures may be time consuming, costly, and might place significant demands on its financial and operational resources. If Allego is unable to successfully remediate these material weaknesses or successfully rely on outside advisors with expertise in these matters to assist it in the preparation of its financial statements, the financial statements could contain material misstatements that, when discovered in the future, could cause Allego to fail to meet its future reporting obligations and cause the trading price of Allego Ordinary Shares to decline.

Further, Allego's independent registered public accounting firm is not required to formally attest to the effectiveness of its internal control over financial reporting until after it is no longer an "emerging growth company" as defined in the U.S. legislation Jumpstart Our Business Startups Act of 2012 (the "*JOBS Act*"). At such time, Allego's independent registered public accounting firm may issue a report that is adverse in the event it is not satisfied with the level at which its internal control over financial reporting is documented, designed or operating. Any failure to maintain effective disclosure controls and internal control over financial reporting could adversely affect the business and operating results and could cause a decline in the trading price of Allego Ordinary Shares. In addition, even if Allego is successful in strengthening its internal controls and procedures, in the future those internal controls and procedures may not be adequate to prevent or sufficiently identify irregularities or errors or to facilitate the fair presentation of Allego's financial statements.

## **Risks Related to Legal Matters and Regulations**

### ***Members of Allego's management have limited experience in operating a public company.***

Allego's executive officers have limited experience in the management of a publicly-traded company. The management team may not successfully or effectively manage a public company that is and will be subject to significant regulatory oversight and reporting obligations under federal securities laws. Our management team's limited experience in dealing with the increasingly complex laws pertaining to public companies could be a significant disadvantage as an increasing amount of their time may be devoted to complying with such laws, which will result in less time being devoted to the management of the company. Allego currently has limited personnel with the appropriate level of knowledge, experience and training in the accounting policies, practices or internal control over financial reporting required of public companies. The development and implementation of the standards and controls and the hiring of experienced personnel necessary to achieve the level of accounting standards required of a public company may require costs greater than expected.

### ***Privacy concerns and laws, or other domestic or foreign regulations, may adversely affect Allego's business.***

Transnational organizations such as the European Union, national and local governments and agencies in the countries in which Allego and its customers operate or reside have adopted, are considering adopting, or may adopt laws and regulations regarding the collection, use, storage, processing and disclosure of information regarding consumers and other individuals, which could impact its ability to offer services in certain jurisdictions. Laws and regulations relating to the collection, use, disclosure, security and other processing of individuals' information can vary significantly from jurisdiction to jurisdiction and are particularly stringent in Europe. The costs of compliance with, and other burdens imposed by, laws, regulations, standards and other obligations relating to privacy, data protection and information security are significant. In addition, some companies, particularly larger enterprises, often will not contract with companies that do not meet these rigorous standards. Accordingly, the failure, or perceived inability, to comply with these laws, regulations, standards and other obligations may limit the use and adoption of Allego's solutions, reduce overall demand, lead to regulatory investigations, litigation and significant fines, penalties or liabilities for actual or alleged noncompliance, or slow the pace at which we close sales transactions, any of which could harm its business. Moreover, if Allego or any of its employees or contractors fail or are believed to fail to adhere to appropriate practices regarding customers' data, it may damage its reputation and brand.

Additionally, existing laws, regulations, standards and other obligations may be interpreted in new and differing manners in the future, and may be inconsistent among jurisdictions. Future laws, regulations, standards and other obligations, and changes in the interpretation of existing laws, regulations, standards and other obligations could result in increased regulation, increased costs of compliance and penalties for non-compliance, and limitations on data collection, use, disclosure and transfer for Allego and its customers.

Additionally, the EU adopted the GDPR in 2016, which became effective in May 2018. The GDPR establishes requirements applicable to the handling of personal data and imposes penalties for non-compliance of up to the greater of € 20 million or 4% of worldwide revenue. The costs of compliance with, and other burdens imposed by, the GDPR may limit the use and adoption of Allego's solutions and services and could have an adverse impact on its business. Although Allego

initiated a compliance program designed to ensure GDPR compliance, Allego may remain exposed to ongoing legal risks related to GDPR and any amendments that may be made by the European Union.

Furthermore, in 2020, the European Union adopted a European Strategy for Data that may lead to further regulation of data use. The costs of compliance with, and other burdens imposed by, these new regulations may limit the use and adoption of Allego's solutions and services and could have an adverse impact on its business.

The costs of compliance with, and other burdens imposed by, laws and regulations relating to privacy, data protection and information security that are applicable to the businesses of customers may adversely affect ability and willingness to process, handle, store, use and transmit certain types of information, such as demographic and other personal information.

In addition to government activity, privacy advocacy groups, the technology industry and other industries have established or may establish various new, additional or different self-regulatory standards that may place additional burdens on technology companies. Customers may expect that Allego will meet voluntary certifications or adhere to other standards established by them or third parties. If Allego is unable to maintain these certifications or meet these standards, it could reduce demand for its solutions and adversely affect its business.

***Failure to comply with anticorruption and anti-money laundering laws, including the FCPA, the European Directive (EU) 2015/849, the UK Bribery Act 2010 and similar laws associated with activities inside and outside of the United States and Europe, could subject Allego to penalties and other adverse consequences.***

Allego is subject to the FCPA, the U.S. domestic bribery statute contained in 18 U.S.C. § 201, the U.S. Travel Act, the USA PATRIOT Act, the UK Bribery Act, the European Directive (EU) 2015/849 and possibly other anti-bribery and anti-money laundering laws in countries in which it conducts activities. Allego is subject to regulations and as a result, interacts with foreign officials. In connection therewith, it faces significant risks if it fails to comply with the FCPA and other anti-corruption laws that prohibit companies and their employees and third-party intermediaries from promising, authorizing, offering or providing, directly or indirectly, improper payments or benefits to foreign government officials, political parties and private-sector recipients for the purpose of obtaining or retaining business, directing business to any person or securing any advantage. Any violation of the FCPA, other applicable anti-corruption laws, and anti-money laundering laws could result in whistleblower complaints, adverse media coverage, investigations, loss of export privileges, or severe criminal or civil sanctions, which could have a materially adverse effect on Allego's reputation, business, operating results and prospects. In addition, responding to any enforcement action may result in a significant diversion of management's attention and resources, significant defense costs and other professional fees.

***Failure to comply with laws relating to employment could subject Allego to penalties and other adverse consequences.***

Allego is subject to various employment-related laws in the jurisdictions in which its employees are based. It faces risks if it fails to comply with applicable regional, federal or state wage laws. Any violation of applicable wage laws or other labor- or employment-related laws could result in complaints by current or former employees, adverse media coverage, investigations and damages or penalties, which could have a materially adverse effect on Allego's reputation, business, operating results and prospects. In addition, responding to any such proceeding may result in a significant diversion of management's attention and resources, significant defense costs and other professional fees.

***Existing and future environmental and health and safety laws and regulations could result in increased compliance costs or additional operating costs or construction costs and restrictions. Failure to comply with such laws and regulations may result in substantial fines or other limitations that may adversely impact Allego's financial results or results of operation.***

Allego and its operations, as well as those of Allego's contractors, suppliers and customers, are subject to certain environmental laws and regulations, including laws related to the use, handling, storage, transportation and disposal of wastes including electronic wastes and hardware, whether hazardous or not. These laws may require Allego or others in Allego's value chain to obtain permits and comply with procedures that impose various restrictions and obligations that could materially affect Allego's operations. If key permits and approvals cannot be obtained on acceptable terms, or if other operational requirements cannot be met in a manner satisfactory for Allego's operations or on a timeline that meets Allego's commercial obligations, it may adversely impact its business.

Environmental and health and safety laws and regulations can be complex and may be subject to change, such as through new requirements enacted at the supranational, national, sub-national and/or local level or new or modified regulations that may be implemented under existing law. The nature and extent of any changes in these laws, rules, regulations and permits may be unpredictable and may have material effects on Allego's business. Future legislation and regulations or changes in existing legislation and regulations, or interpretations thereof, including those relating to hardware manufacturing,

electronic waste or batteries, could cause additional expenditures, restrictions and delays in connection with Allego's operations, the extent of which cannot be predicted.

Further, Allego currently relies on third parties to ensure compliance with certain environmental laws, including those related to the disposal of hazardous and non-hazardous wastes. Any failure to properly handle or dispose of such wastes, regardless of whether such failure is Allego's or its contractors, may result in liability under environmental laws pursuant to which liability may be imposed without regard to fault or degree of contribution for the investigation and clean-up of contaminated sites, as well as impacts to human health and damages to natural resources. Additionally, Allego may not be able to secure contracts with third parties to continue their key supply chain and disposal services for our business, which may result in increased costs for compliance with environmental laws and regulations.

***Increasing attention to Environmental, Social and Governance ("ESG") matters may adversely impact Allego's business.***

Increasing attention to, and societal expectations on companies to address, climate change and other environmental and social impacts and investor and societal expectations regarding voluntary ESG disclosures may result in increased costs and impact access to capital.

In addition, organizations that provide information to investors on corporate governance and related matters have developed ratings processes for evaluating companies on their approach to ESG matters. These ratings are often developed in a manner that can make it challenging to predict a company's performance, and unfavorable ESG ratings could lead to increased negative investor sentiment toward the Company and could impact Allego's access to and costs of capital. Additionally, to the extent ESG matters negatively impact Allego's reputation, Allego may not be able to compete as effectively to recruit or retain employees, which may adversely affect Allego's business. ESG matters may also impact Allego's suppliers, which may lead to Allego being required or choosing to change suppliers that may otherwise have been the most economically efficient, which may in turn adversely impact Allego's business and financial condition.

***New climate disclosure rules proposed by the SEC and further ESG-related regulation may increase Allego's costs of compliance and adversely impact Allego's business.***

On March 21, 2022, the SEC proposed new rules relating to the disclosure of a range of climate-related risks. Public comments were due by June 17, 2022 and the SEC is currently finalizing the new rules, which are expected to be effective in 2023. Allego is currently assessing the rule, but at this time Allego cannot predict the costs of implementation or any potential adverse impacts resulting from the rule. Further, similar disclosure obligations have been implemented, and have been proposed, in other jurisdictions (including in the EU and the UK). To the extent this rule is finalized in its current or similar form (and/or similar rules are maintained or implemented in other jurisdictions), Allego could incur increased costs relating to the assessment and disclosure of climate-related risks and costs. Allego may also face increased litigation risks related to disclosures made pursuant to the rule if finalized as proposed. Similar risks may also apply to Allego in relation to its obligations to comply with existing and future climate and ESG-related regulation across a number of jurisdictions.

***We are a foreign private issuer and, as a result, we are not subject to U.S. proxy rules and are subject to Exchange Act reporting obligations that, to some extent, are more lenient and less frequent than those of a U.S. domestic public company.***

We are a foreign private issuer and, as a result, we are not subject to U.S. proxy rules and are subject to Exchange Act reporting obligations that, to some extent, are more lenient and less frequent than those of a U.S. domestic public company. Because we are a foreign private issuer under the Exchange Act, we are exempt from certain provisions of the Exchange Act that are applicable to U.S. domestic public companies, including (i) the sections of the Exchange Act regulating the solicitation of proxies, consents or authorizations in respect of a security registered under the Exchange Act, (ii) the sections of the Exchange Act requiring insiders to file public reports of their share ownership and trading activities and liability for insiders who profit from trades made in a short period of time and (iii) the rules under the Exchange Act requiring the filing with the SEC of quarterly reports on Form 10-Q containing unaudited financial and other specified information. In addition, foreign private issuers are not required to file their annual report on Form 20-F until 120 days after the end of each fiscal year, while U.S. domestic issuers that are accelerated filers are required to file their annual report on Form 10-K within 75 days after the end of each fiscal year and U.S. domestic issuers that are large accelerated filers are required to file their annual report on Form 10-K within 60 days after the end of each fiscal year. Foreign private issuers are also exempt from Regulation FD, which is intended to prevent issuers from making selective disclosures of material information. As a result of all of the above, shareholders may not have the same protections afforded to shareholders of a company that is not a foreign private issuer.

*We may lose our foreign private issuer status in the future, which could result in significant additional costs and expenses.*

We are a foreign private issuer, and therefore, we are not required to comply with all of the periodic disclosure and current reporting requirements of the Exchange Act. The determination of foreign private issuer status is made annually on the last business day of an issuer's most recently completed second fiscal quarter, and, accordingly, the next determination will be made with respect to us on June 30, 2023. In the future, we would lose our foreign private issuer status if (i) more than 50% of our outstanding voting securities are owned by U.S. residents and (ii) a majority of our directors or executive officers are U.S. citizens or residents, or we fail to meet additional requirements necessary to avoid loss of foreign private issuer status. If we lose our foreign private issuer status, we will be required to file with the SEC periodic reports and registration statements on U.S. domestic issuer forms, which are more detailed and extensive than the forms available to a foreign private issuer. We will also have to mandatorily comply with U.S. federal proxy requirements, and our officers, directors and principal shareholders will become subject to the short-swing profit disclosure and recovery provisions of Section 16 of the Exchange Act. In addition, we will lose our ability to rely upon exemptions from certain corporate governance requirements under the listing rules of NYSE. As a U.S. listed public company that is not a foreign private issuer, we will incur significant additional legal, accounting and other expenses that we will not incur as a foreign private issuer, and accounting, reporting and other expenses in order to maintain a listing on a U.S. securities exchange. These expenses will relate to, among other things, the obligation to present our financial information in accordance with U.S. GAAP in the future.

*As we are a foreign private issuer and may follow certain home country corporate governance practices, our shareholders may not have the same protections afforded to shareholders of companies that are subject to all NYSE governance requirements.*

As a foreign private issuer, we have the option to follow certain home country corporate governance practices rather than those of NYSE, provided that we disclose the requirements we are not following and describe the home country practices we are following. We rely or may rely, as applicable, on this "foreign private issuer exemption" with respect to the NYSE requirements with respect to shareholder meeting quorums, shareholder approval and certain board, committee and director independence requirements. However, we may in the future elect to follow home country practices with regard to other matters. As a result, our shareholders may not have the same protections afforded to shareholders of companies that are subject to all NYSE corporate governance requirements.

*The JOBS Act permits "emerging growth companies" like us to take advantage of certain exemptions from various reporting requirements applicable to other public companies that are not emerging growth companies, and we cannot be certain if the reduced disclosure requirements applicable to emerging growth companies makes Allego Ordinary Shares less attractive to investors and may make it more difficult to compare performance with other public companies.*

We qualify as an "emerging growth company" as defined in Section 2(a)(19) of the Securities Act, as modified by the JOBS Act. As such, we take advantage of certain exemptions from various reporting requirements applicable to other public companies that are not emerging growth companies, including the exemption from the auditor attestation requirements with respect to internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act. As a result, our shareholders may not have access to certain information they deem important. We will remain an emerging growth company until the earliest of (a) the last day of the fiscal year (i) following the fifth anniversary of the effectiveness of the Form F-4, (ii) in which we have total annual gross revenue of at least \$1.235 billion (as adjusted for inflation pursuant to SEC rules from time to time) or (iii) in which we are deemed to be a large accelerated filer, which means the market value of our Allego Ordinary Shares that is held by non-affiliates exceeds \$700 million as of the last business day of our prior second fiscal quarter, and (b) the date on which we have issued more than \$1.0 billion in non-convertible debt during the prior three year period.

In addition, Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the exemption from complying with new or revised accounting standards provided in Section 7(a)(2)(B) of the Securities Act as long as we are an emerging growth company. An emerging growth company can therefore delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies, but any such election to opt out is irrevocable. We have elected not to opt out of such extended transition period, which means that when a standard is issued or revised and it has different application dates for public or private companies, we, as an emerging growth company, can adopt the new or revised standard at the time private companies adopt the new or revised standard. This may make comparison of our financial statements with another public company that is neither an emerging growth company nor an emerging growth company that has opted out of using the extended transition period difficult or impossible because of the potential differences in accounting standards used.

We cannot predict if investors will find our Allego Ordinary Shares less attractive because we will rely on these exemptions. If some investors find our Allego Ordinary Shares less attractive as a result, there may be a less active trading market for our Allego Ordinary Shares and our stock price may be more volatile.

***The exclusive forum clause set forth in the Warrant Agreement may have the effect of limiting an investor's rights to bring legal action against Allego and could limit the investor's ability to obtain a favorable judicial forum for disputes with us.***

The Warrant Agreement provides that (i) any action, proceeding or claim against Allego arising out of or relating in any way to the Warrant Agreement will be brought and enforced in the courts of the State of New York or the United States District Court for the Southern District of New York and (ii) Allego irrevocably submits to such jurisdiction, which jurisdiction will be exclusive. Allego has waived or will waive any objection to such exclusive jurisdiction or that such courts represent an inconvenient forum. We note, however, that there is uncertainty as to whether a court would enforce these provisions and that investors cannot waive compliance with the federal securities laws and the rules and regulations thereunder. Section 22 of the Securities Act creates concurrent jurisdiction for state and federal courts over all suits brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder.

Notwithstanding the foregoing, these provisions of the Warrant Agreement will not apply to suits brought to enforce any liability or duty created by the Exchange Act or any other claim for which the federal district courts of the United States of America are the sole and exclusive forum. Section 27 of the Exchange Act creates exclusive federal jurisdiction over all suits brought to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder. Any person or entity purchasing or otherwise acquiring any interest in any of the Assumed Warrants shall be deemed to have notice of and to have consented to the forum provisions in the Warrant Agreement. If any action, the subject matter of which is within the scope of the forum provisions of the Warrant Agreement, is filed in a court other than a court of the State of New York or the United States District Court for the Southern District of New York (a "***foreign action***") in the name of any holder of the Assumed Warrants, such holder shall be deemed to have consented to: (x) the personal jurisdiction of the state and federal courts located in the State of New York in connection with any action brought in any such court to enforce the forum provisions (an "***enforcement action***"), and (y) having service of process made upon such warrant holder in any such enforcement action by service upon such warrant holder's counsel in the foreign action as agent for such warrant holder.

This choice-of-forum provision may limit a warrant holder's ability to bring a claim in a judicial forum that it finds favorable for disputes with Allego, which may discourage such lawsuits. Alternatively, if a court were to find this provision of the Warrant Agreement inapplicable or unenforceable with respect to one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could materially and adversely affect our business, financial condition and results of operations and result in a diversion of the time and resources of our management and board of directors.

***Future sales, or the perception of future sales, of our Ordinary Shares and Warrants by us or selling security holders or pursuant to future offerings by shareholders with registration rights could cause the market price for our Ordinary Shares and Warrants to decline significantly.***

The sale of substantial amounts of our Ordinary Shares or Warrants, or the perception that such sales could occur, could harm the prevailing market price of our Ordinary Shares and Warrants. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate. We believe the likelihood that Warrant holders will exercise their Warrants, and therefore the amount of cash proceeds that we would receive, is dependent upon the market price of our Ordinary Shares. If the market price for our Ordinary Shares is less than \$11.50 per share, we believe the Warrant holders will be less likely to exercise their Warrants. As of May 15, 2023, the closing price of our Ordinary Shares was \$2.19. In addition, Madeleine's Ordinary Shares constitute approximately 74.0% of the outstanding Ordinary Shares and are subject to future registration rights, and any future registration of Madeleine's Ordinary Shares could cause a significant decline in the market trading price for our Ordinary Shares.

In addition, in accordance with the Registration Rights Agreement, E8 Investor agreed not to transfer any of the 39,876,396 Ordinary Shares held by it until September 16, 2023, subject to certain exceptions specified in the Registration Rights Agreement. Further, in accordance with the power of attorney agreement with Madeleine, E8 Investor has agreed not to transfer more than 26,584,264 Ordinary Shares held by it before September 30, 2026, without the prior written consent of Madeleine or Meridiam.

As restrictions on resale end, the market trading price for our Ordinary Shares and Warrants could drop significantly if the holders of the Ordinary Shares or Warrants, including the Ordinary Shares owned by Madeleine, are sold or are perceived

by the market as intending to be sold. These factors could also make it more difficult for us to raise additional funds through future offerings of our Ordinary Shares or other securities.

***The grant and future exercise of registration rights may adversely affect the market price of Allego Ordinary Shares.***

Pursuant to the Registration Rights Agreement entered into by Allego, the Sponsor, Madeleine, E8 Investor and certain other holders of Allego Ordinary Shares (collectively, the “**Registration Rights Holders**”) in connection with the Business Combination, and which is described elsewhere in this Annual Report, the Registration Rights Holders that hold registrable securities having an aggregate value of at least \$50 million can demand that Allego register their registrable securities under certain circumstances, and each Registration Rights Holder will also have piggyback registration rights for these securities in connection with certain registrations of securities that Allego undertakes. In addition, Allego is required to file and maintain an effective registration statement under the Securities Act covering such securities and certain other securities of Allego. The registration of these securities will permit the public sale of such securities. The registration and availability of such a significant number of securities for trading in the public market may have an adverse effect on the market price of Allego Ordinary Shares.

***Madeleine owns a significant amount of Allego’s voting shares and its interests may conflict with those of other shareholders.***

Madeleine owns approximately 74.0% of the outstanding Allego Ordinary Shares and has the right to direct the voting of an additional approximately 15.4% of the outstanding Allego Ordinary Shares as a result of the irrevocable voting power of attorney granted by E8 Investor to Madeleine. As a result, Madeleine will be able to control matters requiring shareholder or board approval, including the election of directors, approval of any potential acquisition of Allego, changes to Allego’s organizational documents and significant corporate transactions. This concentration of ownership and voting power makes it unlikely that any other holder or group of holders of Allego’s securities will be able to affect the way Allego is managed or the direction of its business. The interests of Madeleine with respect to matters potentially or actually involving or affecting Allego, such as future acquisitions, financings and other corporate opportunities and attempts to acquire Allego may conflict with the interests of other shareholders. In particular, Meridiam, which is the manager of the indirect parent entities of Madeleine, is in the business of making investments in companies and may acquire and hold interests in businesses that compete directly or indirectly with Allego. Meridiam and their respective affiliates may also pursue acquisition opportunities that may be complementary to Allego’s business (and, as a result, those acquisition opportunities may not be available to Allego) or may have an interest in Allego pursuing acquisitions, divestitures or other transactions that, in their judgment, could enhance their investment, even though such transactions might involve risks to Allego or other Allego shareholders.

***Changes to tax laws or regulations expose us to tax uncertainties and could adversely affect our results of operations or financial condition.***

Allego operates in various countries, and changes to tax laws or regulations in the jurisdictions in which Allego operates, or in the interpretation of such laws or regulations, could impact Allego.

In particular, as a result of different initiatives undertaken by the Organization for Economic Co-operation and Development (the “**OECD**”), the OECD Pillar Two Blueprint of the Inclusive Framework on Base Erosion and Profit Shifting aims to ensure that multinational corporations pay a minimum effective tax rate of 15%. The OECD Pillar Two agreement has been joined by over 140 countries, and many countries have initiated domestic legislative procedures to enact these global minimum tax rules, including the Netherlands and the United Kingdom. Depending on each country’s final enactment, these rules may apply to and adversely affect Allego. The OECD Pillar Two rules will only become relevant when Allego reaches an annual turnover of at least €750 million.

***It may be difficult to enforce U.S. judgments against us.***

Allego is incorporated under the laws of the Netherlands, and a substantial portion of its assets are outside of the United States. Most of our directors and senior management and independent auditors are resident outside the United States, and all or a substantial portion of their respective assets may be located outside the United States. As a result, it may be difficult for U.S. investors to effect service of process within the United States upon these persons. It may also be difficult for U.S. investors to enforce within the United States judgments predicated upon the civil liability provisions of the securities laws of the United States or any state thereof. In addition, there is uncertainty as to whether the courts outside the United States would recognize or enforce judgments of U.S. courts obtained against us or our directors and officers predicated upon the civil liability provisions of the securities laws of the United States or any state thereof. Therefore, it may be difficult to enforce U.S. judgments against us, our directors and officers and independent auditors.

#### ITEM 4. INFORMATION ON THE COMPANY

##### A. History and Development of the Company

On July 28, 2021, Spartan, Allego, Merger Sub, Madeleine, Allego Holding, and, solely with respect to the sections specified therein, E8 Investor, entered into the Business Combination Agreement. Pursuant to the Business Combination Agreement, among other things, (i) the shareholders of Allego Holding contributed and transferred all of their shares in Allego Holding to Allego in exchange for Allego Ordinary Shares; (ii) Merger Sub merged with and into Spartan (the “*Spartan Merger*”), with Spartan surviving the Spartan Merger as a wholly owned subsidiary of Allego and each outstanding share of Spartan Class A Common Stock (including the shares of Spartan Class A Common Stock received upon conversion of the Spartan Founders Stock) was cancelled and converted into one Allego Ordinary Share; (iii) Allego converted into a Dutch public limited liability company (*naamloze vennootschap*) and its articles of association were amended; (iv) subscribers subscribed for Allego Ordinary Shares in a private placement; and (v) Allego assumed the Warrant Agreement. The Business Combination was consummated on March 16, 2022, and on March 17, 2022 Allego Ordinary Shares and Assumed Warrants began trading on the NYSE under the symbols “ALLG” and “ALLG.WS,” respectively.

Athena Pubco B.V. was incorporated pursuant to Dutch law on June 3, 2021 for the purpose of effectuating the Business Combination and, following the consummation of the Business Combination on March 16, 2022, Allego was redesignated as Allego N.V. and became the parent company of the combined business. In connection with the Business Combination, the Allego Articles were amended and Allego changed its legal form from a Dutch private liability company (*besloten vennootschap met beperkte aansprakelijkheid*) to a Dutch public liability company (*naamloze vennootschap*). See “*Item 5. Operating and Financial Review and Prospects*” for a discussion of Allego’s principal capital expenditures and divestitures.

The mailing address of Allego’s registered office is Westervoortsedijk 73 KB, 6827 AV Arnhem, the Netherlands, and Allego’s phone number is +31 (0) 88 033 3033. Allego’s principal website address is [www.allego.eu](http://www.allego.eu). We do not incorporate the information contained on, or accessible through, Allego’s websites into this Annual Report, and you should not consider it as a part of this Annual Report. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The SEC’s website is [www.sec.gov](http://www.sec.gov).

##### B. Business Overview

Allego operates one of the largest pan-European electric vehicle EV public charging networks and is a provider of high value-add EV charging services to third-party customers. Its large, vehicle-agnostic European public network offers easy access for all EV car, truck and bus drivers. As of December 31, 2022, Allego owns or operates more than 33,000 public charging ports and 17,000 public and private sites across 16 countries and has had over a million unique network users, 80% of which are recurring users as of December 31, 2022. In addition, it provides a wide variety of EV-related services including site design and technical layout, authorization and billing, and operations and maintenance to more than 400 customers that include fleets and corporations, charging hosts, OEMs, and municipalities.

Founded in 2013, Allego is a leading EV charging company in Europe with its first fast charger becoming operational soon after founding and deploying Europe’s first ultra-fast charging station in 2017. From its inception, Allego has focused on EV charging solutions that can be accessed by the highest number of vehicles, regardless of vehicle type or OEM, thus allowing it to grow in a vehicle-agnostic manner.

Allego believes its business is set to expand quickly with the growth of transportation electrification and that its growth could potentially exceed the industry-wide anticipated four-times growth of the number of EVs from 2020 to 2025, according to a report entitled “Electric Vehicle Outlook 2020” by BloombergNEF (“*BNEF Report*”), a strategic research provider covering global commodity markets and disruptive technologies. The European EV market is larger and growing faster than the U.S. market, according to Allego’s estimates, due to European market attributes that generally favor fast charging, including more stringent regulatory regimes, high urbanization rates, a scarcity of in-home parking in dense cities and significant interurban traffic. According to Allego’s estimates, between 2020 and 2030 fast public charging will increase its share from 24% to 37% of public charging in Europe. The shift from traditional ICE cars to EVs has occurred more rapidly in Europe than expected, particularly in light of governmental regulations such as the total ban of ICE cars in large cities such as London as soon as 2030 and the restrictions on ICE sales in some countries, including the United Kingdom. The BNEF Report projects that the investment in EV charging in Europe for commercial and public charging will require more than \$54 billion between 2020 and 2030 and more than an additional \$84 billion between 2030 and 2040.

The growth in the EV market in Europe has driven increased demand in public charging. Most of the cars in Europe can only be charged through public charging, as home garage access is often limited. Furthermore, fast and ultra-fast charging sites enable drivers to charge their EV's in a reasonable time when compared to the time it takes for "fueling" ICE vehicles. EV drivers want to have the same level of service as old "fueling" methods, at a similar price point and Allego seeks to provide that experience.

### **Allego's Business Model for EV Charging**

Allego's business model is based on the premise of providing easily accessible, highly reliable, hassle-free charging points to all types of EV users. Allego developed a unique, proprietary software platform that can manage any hardware chargers and charging sessions while enabling any MSP to use Allego's network. Allego used this platform to create two complementary business segments to capitalize on the full breadth of EV charging opportunity: its owned fast and ultra-fast public charging network and high value-add third-party services.

#### ***Owned fast and ultra-fast charging network***

Allego's primary business focus going forward is in building, owning and operating ultra-fast and fast EV charging sites. Allego is the operator of one of the largest pan-European public EV charging networks. We use our proprietary Allamo™ software to identify premium charging sites and forecast demand using external traffic statistics. These sites generally are situated in high-density urban or suburban locations, and we believe that Allamo™ has been instrumental in securing a strong pipeline of premium sites. Allego's proprietary software also supports compatibility and an optimized user experience for all EV drivers. The Allego EVCloud™ further provides software solutions for EV charging owners, including payment, analytics, customer support and achieving high uptime. Allego's charging sites are vehicle-agnostic, and therefore can charge vehicles without limitations on OEM or user groups. Allego has one of the biggest ultra-fast charging networks in Europe, with 722 fast and 749 ultra-fast charging ports as of December 31, 2022, and intends to accelerate its growth in this business segment.

#### ***Third-party services***

Allego offers high value-add third-party services to customers and corporations, as a strategic focus for non-core technologies. This business segment is driven by attractive, high margin third-party service contracts for a variety of services including site design and technical layout, authorization and billing, and operations and maintenance. These offerings allow Allego to manage large and complex solutions and serve as a one-stop shop with its white label software suite. Allego designs the charging solution and offers full development from installation to maintenance and operations to the customers.

Allego's two business lines complement each other: the service activities capitalize on Allego's network and technologies while directly addressing and being responsive to its customers' trends. Both business lines also allow Allego to focus on long-term and recurring revenue ranging from 5 years on average for our service activities to more than 15 years for the revenue from our charging stations. Allego invests significantly in its owned fast charging network and believes this segment will grow the fastest and represents the highest margins in the EV charging value chain.

By investing directly in its charging stations, Allego believes it can secure long-term revenue and special access to EV drivers. The services business segment can then trigger higher traffic as fleet companies or last mile companies require solutions to provide charging on the go.

Although Allego does not manufacture its own hardware, it has a significant base of diversified suppliers that provide Allego with the ability to demand certain specifications. In addition, because Allego is hardware agnostic, it is well-positioned to select optimal equipment. Allego also works directly with manufacturers for firmware and components. Allego is focused on developing the software that manages charging sessions and the payment systems with direct access to EV drivers.

### **Revenue Streams**

Allego generates its revenues through the sale of charging sessions on its charging points to EV drivers and through the service and sales contracts Allego has with its B2B customers. For more information, see also Note 5 (Segmentation – Revenue from major customers) and Note 5 (Segmentation – Revenue from external customers) to the consolidated audited financial statements included elsewhere in this Annual Report.

### ***Charging sessions***

Allego sells EV drivers charging sessions at its public charging points. Drivers can pay for these sessions through direct payment, such as by contactless payment or credit card, or with tokens with MSPs with whom the EV driver has a contract. With respect to tokens, Allego charges the price of the sessions on a monthly basis to the MSP. Allego's network can be accessed by more than 250 MSPs in Europe and through e-clearing net, which facilitates the interoperability of the public charging networks. Allego typically manages its charging sites by selecting the site through its Allamo™ software which then provides an optimal configuration of charger types based on the expected traffic. Allego then processes the building and grid connection permits. The technical layout of the charging stations is derived from Allego's intellectual property which minimizes installation and maintenance costs while addressing capacity constraints of the site. Allego then selects chargers that are installed by Allego contractors, and when complete, the site is onboarded onto Allego's EVCloud™ platform to enable access and charging sessions to the EV drivers with its Smoov™ app. With the Smoov™ app, all EV drivers can find Allego charging points, see their availability, start sessions, and determine the price and the cost of the charging sessions. As EV traffic builds, existing sites are upgraded with additional chargers to support increased throughput and charging sessions.

### ***Services***

Allego provides charging solutions to its B2B customers on a range of services. In order to provide these services, Allego leverages the same knowledge and organization that it uses to develop its charging sites. Allego customers can be municipalities that decide to own their network, corporations that want to equip their facilities for commercial or public access, funds that want to invest in networks and that buy certain of Allego's software, and fleet operators that want to use parts of Allego's software platform to manage their chargers in the field.

- **Charging points network for third-parties.** Services related to hardware, installation, maintenance, and operations are provided to B2B customers 24/7. Services are provided under one-off, long-term operations and maintenance contracts, with typical terms ranging from between 4 to 5 years, and such contracts generate recurring revenues. Depending on the requirements, Allego can organize the supply of chargers, including home charging and installations for specific customers such as OEMs. Hardware and charging points management are standardized across the range of solutions offered by Allego's platform in order to maximize synergies with Allego's other services.
- **Platform services.** Allego provides certain of its customers software solutions by offering elements of its EVCloud™ platform for them to manage their chargers. These services generate recurring revenues and are typically for 5-year terms. Platform services enable Allego to create technological relationships with customers with a very high retention effect.
- **Site development.** Allego develops public charging points networks with third-parties. This service includes comprehensive development services ranging from site selection with a targeted internal rate of return ("*IRR*") to long-term operations and maintenance under 15-year contracts. Allego also manages payments through its Smoov™ app.
- **Consulting services.** Allego provides consulting services on research strategy and development of proprietary integrated tools taking the form of both software and/or hardware as a result of the MOMA acquisition.

### ***Allego's Market Strategy***

#### ***Allego charging network***

Allego operates its public charging networks through its local teams and subsidiaries in the countries in which it operates. The selection of a site is managed by a central network team, and the lease agreements for the sites are managed locally. Allego's team efficiently contacts retailers, real estate companies, municipalities, and other entities with space or charging needs that Allego may provide.

#### ***Services activity***

Allego's approach to servicing customers focuses on two segments.

- **Commercial.** Many commercial businesses already own or lease parking spaces. Allego targets businesses that wish to electrify some or all of these parking spaces. This often comes in the form of a sale and service, but Allego may choose to invest in the network depending on the quality of the sites. If Allego decides to

invest in a network, the charging points are integrated into the Allego charging network. Allego's software platform offers the flexibility to allow businesses to charge specific prices to its customers while giving access to the public generally. Allego's capacity to invest in sites enables it to secure the best locations and to foster long-term relationships with commercial customers. Accordingly, Allego is able to offer its commercial customers a dual-tracked approach, depending upon the needs of its customers, which offers a strong proposition for many commercial sites throughout Europe.

- **Fleet.** Allego's fleet customers are organizations that operate vehicle fleets in the delivery and logistics, sales, service, motorpool, shared transit and ridesharing spaces. Allego has developed comprehensive solutions for its fleet customers by offering chargers and installations for special access to its network, specific prices, and charging solutions in their premises.

Allego's charging network is a capital-intensive activity with attractive margins. Allego's services offerings do not require substantial capital, but allow it to leverage synergies and create a network effect to increase traffic. Furthermore, there is organizational overlap between developing Allego's charging network and bolstering its services activity which decreases the cost of operations.

### **Our Platform**

The Allego go-to-market strategy uses its proprietary platform that facilitates the various steps of development and sales. Site selection, business plan computation, orders, installation, commissioning, maintenance, monitoring and payments are managed through the EVCloud™ and Allamo™ platforms which promotes efficiency and continuously decreases operational costs. Allego continuously invests in the EVCloud™ platform for maintenance and to develop new functionalities. It is essential to have a scalable platform that can handle tens of thousands of transactions simultaneously and manage distributed assets on a large scale with thousands of sites remotely.

### **Energy Supply**

Allego has extensive knowledge of the electricity supply in its markets. Its sourcing is from green renewable energy supported by green certificates. Allego can source its electricity on a long-term basis with renewable assets in order to hedge price increases and can pass-through increases in electricity prices in the charging sessions of the Allego network. In addition, Allego has developed its own capacity to operate directly on the electricity market as a wholesaler if needed in order to minimize the cost of its sourcing and to have long-term direct relationships with renewable assets such as wind or solar farms. Furthermore, Allego has developed smart charging capacity in order to cope with grid capacity constraints and avoid any overload of the grid. Allego is also developing solutions in order to offer ancillary services to grid operators through its charging points, making it one of the first EV company to propose such services. The anticipated costs associated with providing these ancillary services have been included in the budget for the development of Allego's platform and do not represent additional costs. Management anticipates that these ancillary services will be offered to grid operators in the near future.

Allego's energy supply is an element of its cost structure. Allego obtains electricity for its own charging stations through contracts with power suppliers or through direct sourcing in the market. Supply costs related to energy supply are based on short term, mid-term or long-term power futures prices on the various European power exchanges. In addition to these supply costs, there are grid connection costs (distribution of power, connection, and meters) which are paid by Allego as a consumer of power. These grid connection costs are regulated and paid to the Transmission System Operator and Distribution System Operator which are regulated entities.

For the year ended December 31, 2022, Allego had one major electricity vendor that represented approximately 10% of total purchases.

### **Public Policy**

Allego has been at the forefront of the development of EVs in Europe. Allego is one of the founders of Charge Up Europe, the EV charging business organization that promotes EV infrastructure in Europe. Allego promotes:

- Policies related to CO<sub>2</sub> reduction
- Openness: standard and interoperability
- Free access to the grid in order to streamline grid connectivity

### **Growth Strategies**

Allego estimates that it has an average market share globally of 12% in fast and ultra-fast charging in terms of sites in the major European markets including Belgium, Denmark, France, Germany, Hungary, Luxembourg, the Netherlands, Norway, Switzerland, Portugal, Sweden and the United Kingdom, making it a leading EV public charging provider in Europe.

Allego's growth strategy consists of:

- Increasing its leadership in fast and ultra-fast charging by investing in its owned public charging points network. This segment is anticipated to become the largest segment of Allego's services.
- Developing its services business to complement its public charging points network. The objective is twofold, triggering more traffic on the Allego network and securing long-term relationships with B2B customers.
- Offering new functionalities to EV drivers that use the Allego network or its services with enhanced features of Allego's software platform.

### **Government Regulation and Incentives**

Regulation related to EV policy and building and grid connection permits differ at the European, national, and regional levels and, as a result, compliance with such varying regulations can cause installation delays or cost discrepancies between jurisdictions. In the jurisdictions in which Allego operates, two primary permits are required. One permit is required in order to connect to the distribution grid operator and the other permit is required in order to build charging stations.

Allego has experience in navigating this regulatory environment, which may result in increased efficiency and decreased operational costs due to faster installation and commissioning. However, obtaining such permits may be a time consuming process. The costs of the connection to the distribution grid operator vary by jurisdiction. Such costs are included in the building costs of the charging stations. Because such connections are physically performed by the distribution grid operator, Allego is dependent upon the availabilities of the distribution grid operators, which may lead to unexpected delays during construction.

### **Building Permits**

Allego must comply with local regulations for each of its charging stations. We believe that Allego is currently in full compliance with applicable building permit regulations.

### **Electric Standard for Equipment and Installation**

Allego believes that its hardware and equipment purchased from third-party vendors is compliant with all applicable regulations in each jurisdiction in which it operates. Electrical installations must comply with national regulations and must be carried out by trained contractors pursuant to specific authorizations and licenses, which are verified at the time such installments are performed.

### **Platform Standard**

Allego's software platform, EVCloud™, uses open charge point interfaces and open charge point protocols so that its network and solutions respect the openness standard it promotes. In order to promote common technical frameworks and interoperability, Allego is a member of a number of technical associations, including Platform for Electro Mobility, ChargeUp Europe (founding member), EVroaming4Europe, Open Charge Alliance, Dutch Association Electrification of Transport, Avere Belgium, BDEW, AVERE France and Renewable Energy Association UK. By supporting these openness standards, Allego hopes to improve the EV user experience. Openness enables EVs to charge on any charger, reducing the risk that EV drivers will not be able to find a charge point, and avoids a costly duplication of charging infrastructure and increases utilization rates. Allego has pursued a "chargers' manufacturer agnostic policy," meaning its platform can on-board any type of charger from any manufacturer. As a result, Allego can benefit from innovation and reduced hardware procurement costs. In addition, EVCloud™ can thus accommodate several types of payment providers and Allego's network serves all EV drivers.

## **Research and Development**

Allego has invested a significant amount of time and expense into the research and development of its platform technologies. Allego's ability to maintain its leadership position depends in part on its ongoing research and development activities. Allego's technical teams are responsible for defining technical solutions for all of the services Allego provides, from hardware specifications to the technical layout for installation, to the development of its software platform.

Allego has a software development team that develops its platform technologies, as well as the different components that comprise such platforms. For specific development needs, Allego will sometimes use external parties that are closely supervised by Allego.

Allego's research and development is principally conducted at its headquarters in Arnhem, Netherlands. As of December 31, 2022, Allego's research and development team consisted of more than 11 full time employees.

## **Intellectual Property**

Allego relies on a combination of trademark, copyright, unfair competition and trade secret laws, as well as confidentiality procedures and contractual restrictions, to establish, maintain and protect its proprietary rights. Allego's success depends in part upon its ability to obtain and maintain proprietary protection over Allego's products, services, solutions, technology and know-how, to operate without infringing the proprietary rights of others, and to prevent others from infringing upon Allego's proprietary rights. Allego's key trademarks are Allego, Smoov™, EVCloud™, and Allamo™.

## **Suppliers and Service Providers**

Allego relies on third-party vendors for design, manufacturing and testing of EV charging equipment. Currently, equipment is unique to each supplier with respect to components, firmware, after-market maintenance and warranty services. Equipment and services are sourced from different vendors for each category of charging solutions: AC (slow charging), DC (fast charging) and HPC (ultra-fast charging) (“HPC”). For the year ended December 31, 2022, Allego had one major equipment vendor that represented approximately 20% of total purchases.

Allego has invested in its own specifications for its charging stations and maintains long-term relationships with suppliers and service providers. Allego designs the layout and certain specifications of its charging stations in-house and procures these charging stations from an assortment of hardware manufacturers. Allego does not typically install the charging stations but instead manages the installation process. The installations are typically performed by electrical contractors. Allego has established relationships with multiple EV charging manufacturers. Further, Allego has formed relationships with construction and maintenance companies that have significant experience building and maintaining EV charging sites.

## **Competition**

In the charging network space, Allego generally competes with more localized providers of EV charging station networks for charging sessions to the EV drivers. Some networks are owned by utilities providers to extend their supply business, or oil and gas companies in order to complement their fueling stations. There are currently few pan-European pure players that are vehicle-agnostic such as Allego and those that do exist have a smaller reach.

In the services space, Allego competes with a variety of different companies depending upon the services provided. As Allego provides comprehensive solutions to its customers, generally its competitors are those that can offer both hardware equipment and management solutions. With the development of EV charging, some potential customers will try to split tenders by separating the supply of hardware equipment, operation and maintenance. In this case, these tenders are less desirable for Allego as they only offer part of the value chain of the operations within its platform. In the long run, however, we do not believe this trend will continue because it can lead in many cases to poor performance and low availability of charging points, which trigger many issues for EV drivers and cause higher costs. Integrating different price schemes, ease of use, seamless software performance, scalability and scale of operation are extremely difficult to achieve with different suppliers. With the maturing of the EV business, we believe that seamless end-to-end solutions are better provided by a single integrated offering.

## **Facilities**

Allego's headquarters are located in Arnhem, Netherlands where it currently leases approximately 3,350 square meters of office space under a lease that expires in March 2035. Of that space, 1,990 square meters have been sublet until January

2024. This current primary space is sufficient to meet Allego’s needs for the foreseeable future, and any additional space Allego may require after 2024 will be assessed before determining to continue sub-letting on commercially reasonable terms. Allego also maintains rented facilities in Mechelen, Belgium; Berlin, Germany; and Stockholm, Sweden, and sales offices in England and France. See also Note 17 (Leases) of the consolidation financial statements included elsewhere in this Annual Report.

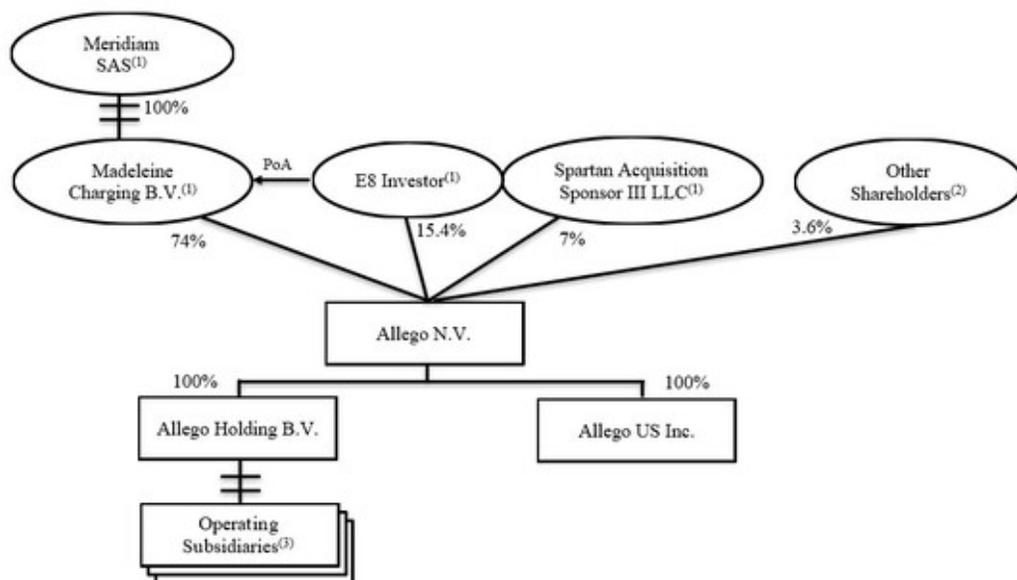

**Employees**

Allego strives to offer competitive employee compensation and benefits in order to attract and retain a skilled and diverse work force. As of December 31, 2022, Allego had 220 employees, 182 of whom were regular full-time and 38 of whom were engaged on a part-time basis. All of Allego’s employees are located in Europe, with the majority in the Netherlands, Germany, Belgium, France, Sweden and the United Kingdom. As a result of the COVID-19 pandemic, a large part of Allego’s employees are still working remotely, although specific schemes are in place based on the country in order to be as efficient as possible. It is expected that most of its employees will return to work at its facilities noted above in the coming months. Allego has a works council as required by law in the Netherlands and Allego believes it maintains good relations with its employees.

**Legal Proceedings**

Allego is not party to any material legal proceedings. From time to time, Allego may be involved in legal proceedings or subject to claims incident to the ordinary course of business. Regardless of the outcome, such proceedings or claims can have an adverse impact on Allego because of legal defense and settlement costs, diversion of resources and other factors, and there can be no assurances that favorable outcomes will be obtained.

**C. Organizational Structure**

(1) See “Item 7.A. Major Shareholders and Related Party Transactions—Major Shareholders” below for more information.

(2) Includes PIPE and other public investors.

(3) See also Exhibit 8.1 to this Annual Report for a list of our subsidiaries..

**D. Property, Plants and Equipment**

See “Item 4.B. Business Overview—Facilities” above.

**ITEM 4A. UNRESOLVED STAFF COMMENTS**

Not applicable.

**ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS**

The following discussion and analysis provides information which Allego’s management believes is relevant to an assessment and understanding of Allego’s consolidated results of operations and financial condition. The discussion and analysis should be read in conjunction with Allego’s consolidated financial statements as of December 31, 2022 and December 31, 2021, and for the years ended December 31, 2022, December 31, 2021 and December 31, 2020, and related notes thereto, included elsewhere in this Annual Report. In addition to historical information, this discussion contains forward-looking statements that involve risks, uncertainties, and assumptions that could cause Allego’s actual results to differ materially from management’s expectations due to a number of factors, including those discussed in the sections entitled “*Cautionary Note Regarding Forward-Looking Statements*” and “*Item 3.D. Risk Factors*”, and in other parts of this Annual Report.

**A. Operating Results**

**Overview**

Founded in 2013, Allego is a leading EV charging company in Europe and has deployed, as of December 31, 2022, over 33,000 public charging ports across 17,000 public and private locations, spanning activities in 16 European countries. In 2018, Allego was acquired by Meridiam, a global long-term sustainable infrastructure developer and investor, which provided necessary capital to enable the expansion of Allego’s existing global network, services and technologies. Allego’s charging network includes fast, ultra-fast, and slow charging equipment. Allego takes a two-pronged approach to delivering charging solutions, providing an owned and operated public charging network with 100% certified renewable energy in addition to charging solutions for B2B customers, including leading retail and auto brands.

Allego’s charging solutions business provides design, installation, operations and maintenance of chargers owned by third-parties. Allego’s chargers are open to all EV brands, with the ability to charge light vehicles, vans and e-trucks, which promotes increasing utilization rates across its locations. Allego has developed a rich portfolio of partnerships with strategic partners, including municipalities, real estate owners, and OEMs. As additional fleets shift to EVs, Allego expects to leverage its expansive network of fast and ultra-fast chargers to service these customers, which see above average use-rates.

Allego’s proprietary suite of software, developed to help identify and assess locations and provide uptime optimization with payment solutions, underpins Allego’s competitive advantage. Allamo™ allows Allego to select premium charging sites to add to its network by analyzing traffic statistics and proprietary databases to forecast EV charging demand using over 100 factors, including local EV density, driving behavior and EV technology development. This allows a predictable, cutting-edge tool to optimize those locations that are best positioned for higher utilization rates.

Allego EVCloud™ is a sophisticated chargers management platform and payment tool that provides essential services to owned and third-party customers, including charging authorization and billing, smart charging and load balancing, analysis and customer support. This service offering is integral to fleet operators’ operations and enables Allego to provide insight and value to the customer, in addition to driving increased margins through third-party service contracts and operational and maintenance margins.

Allego continues to benefit from a European EV market that, according to Allego’s estimates, is nearly twice the size of the United States’ EV market, and Allego estimates that the European EV market will have a 41% CAGR from 2022 to 2026. Based on this projection, the number of EVs in Europe is expected to grow to nearly 19 million by 2026, as compared to 5 million today. The combination of a high urbanization rate and a scarcity of in-home parking means European EV drivers require fast, public EV charging locations that provide reliable and convenient charging. As part of Allego’s expansion plans, Allego will focus on fast and ultra-fast charging locations, which maximize utilization rates, carry higher gross margins and are required by EV drivers and fleets operators.

Additionally, stringent European CO<sub>2</sub> regulations for ICE and highly favorable incentives for electric vehicle purchases are expected to continue to drive adoption rates of EV over ICE vehicles. With a first mover advantage, a robust pipeline of over 1,300 premium sites to be equipped with fast and ultra-fast chargers, committed by legally binding agreements, and an

additional pipeline of more than 1,000 sites being currently negotiated, Allego believes it is well-positioned to execute its growth objectives.

### **How Allego Generates Revenue**

Allego generates its revenues through the sale of charging sessions to EV drivers and by providing charging solutions to corporate customers and municipalities. Specifically, revenue is earned through the following streams:

#### ***Charging sessions***

At these sites, Allego sells charging sessions directly to EV drivers who access Allego's publicly available charging points. Payments from EV drivers can be processed through direct payment or tokens that are handled by MSPs with whom the EV driver and Allego have contracts. In the latter case, Allego charges the price of the sessions on a monthly basis to the MSPs. The Allego network can be accessed by more than 250 MSPs in Europe and through e-clearings that facilitate the interoperability of the public charging networks.

#### ***Revenue from the sale of charging equipment***

Allego enters into agreements with customers for the sale of charging equipment. These contracts are generally awarded based on a proposal and business case for a certain location including traffic and other activity predictions to develop public charging point networks. Allego provides the comprehensive development from site selection with a targeted IRR. If Allego's proposal is accepted by the customer, Allego enters into a development contract, pursuant to which Allego purchases and installs charging equipment at the relevant location.

#### ***Revenue from installation services***

Installation services are provided as part of the development contract described above under "*Revenue from the sale of charging equipment*" as well as to corporate customers where charging equipment needs to be installed.

#### ***Revenue from operation and maintenance of charging equipment***

These services include the deployment of Allego's cloud-based platform EVCloud™ to monitor chargers and charging sessions, collect, share and analyze charging data as well as the maintenance of the site. Generally, these contracts involve a one-off development cost but generate long-term revenues.

Depending on the requirements, Allego can organize the supply of home charging and installation for specific customers as an operation and maintenance contract and provide the information flow management that such solutions require. The range of solutions offered is standardized in terms of hardware and charging points managed by Allego's platform in order to maximize synergies with its previous activity.

The revenue streams described above complement each other: the service activities make the most of the development of Allego network and uses the synergies of their technologies while being responsive to customer trends.

#### ***Revenue from consulting services***

The group provides consulting services on research strategy and develops proprietary integrated tools taking the form of both software and/or hardware.

### **Key Factors Affecting Operating Results**

Allego believes its performance and future success depend on several factors that present significant opportunities for it but also pose risks and challenges, including those discussed below and in the section of this Annual Report titled "*Item 3.D. Risk Factors.*"

#### **Growth of EV adoption**

Allego's revenue growth is directly tied to the adoption and continued acceptance and usage of passengers and commercial EVs, which it believes drives the demand for charging infrastructure and charging services. Even though the EV market

has grown rapidly in recent years, future growth is not guaranteed. Factors affecting the adoption of EVs include but are not limited to: perceptions about EV features, quality, safety, performance and cost; perceptions about the limited range over which EVs may be driven on a single battery charge; availability of services for EVs; consumers' perception about the convenience, speed and cost of EV charging; volatility in the price of gasoline and diesel; availability, cost and desirability of other alternative fuel vehicles and plug-in hybrid electric vehicles. In addition, macroeconomic factors could impact demand for EVs, particularly since EVs can be more expensive than traditional gasoline-powered vehicles. The uncertainty of the current geopolitical situation in Europe, including the military conflict between Russia and Ukraine, and the volatility in oil supply could drive this demand further. However, the current macroeconomic situation could also impact the supply of EVs given the sharp increase of required commodities in EV battery manufacturing such as copper and nickel. These factors may increase prices for EV cars more compared to traditional gasoline-powered vehicles.

#### **EV driver's usage patterns**

Allego's revenues are driven by EV drivers' driving and charging behaviors. The EV market is still developing and current behavioral patterns may not be representative of future behaviors. Key behavioral shifts may include but are not limited to: annual vehicle miles traveled, preferences for urban, suburban or exurban locations, preferences for public or private fast charging, preferences for home or workplace charging, demand from rideshare or urban delivery services, and the emergence of autonomous vehicles, micro mobility and mobility as-a-service platforms requiring EV charging services.

#### **Competition**

The EV market has become significantly more competitive in recent years. The principal factors on which industry participants compete include charger count, locations and accessibility; location visibility, including on digital platforms; charger connectivity to EVs and ability to charge all standards; speed of charging relative to expected vehicle dwell times at the location; network reliability, scale and local density; software-enabled services offering and overall customer experience; operator brand, track record and reputation; and pricing. Existing competitors may expand their product offerings and sales strategies and new competitors can enter the market. Allego intends to maintain its market share over time relative to the overall growth of EV adoption. If Allego's market share decreases due to increased competition, its revenue and ability to generate profits in the future may be impacted.

#### **Technology risks**

The EV market is a fast-developing market which is susceptible to technology changes. Allego relies on numerous internally developed software technologies (EVCloud<sup>TM</sup>, Smoov<sup>TM</sup> and Allamo<sup>TM</sup>) to operate its network and generate earnings. The ability of Allego to continue to integrate its technology stack with technological advances in the wider EV ecosystem including EV model characteristics, charging standards, charging hardware, software and battery chemistries will determine Allego's sustained competitiveness in offering charging services. There is a risk that some or all of the components of the EV technology ecosystem become obsolete and Allego will be required to make significant investment to continue to effectively operate its business. Allego's management believes their business model is well-positioned to enable Allego to effectively operate and allow the business to remain competitive regardless of long-term technological shifts.

#### **Supply risks**

Macro-economic factors regarding the supply side of EV charging equipment could negatively influence revenues of Allego. The fast-growing demand in EV driving places an equally high demand on the supply side, which may cause bottlenecks. If Allego experiences problems to meet the increasing demands of charging equipment due to these supply bottlenecks its revenue growth could be negatively impacted.

#### **Energy pricing**

The results for the year ended December 31, 2022 have been heavily impacted by the increase of energy costs in the first half of 2022. In response, Allego increased charging prices during the second half of 2022 and entered into power purchase agreements to mitigate the future negative impact of increased energy costs. Overall, the average cost of energy per kWh in 2022 increased by 33% compared to 2021.

## COVID-19

The impact of COVID-19, including changes in consumer and business behavior, pandemic fears, market downturns, and restrictions on business and individual activities, has created significant volatility in the global economy and has led to reduced economic activity. The spread of COVID-19 has created supply chain disruptions for vehicle manufacturers, suppliers and hardware manufacturers, as well as impacted the capacities of installers. Any sustained downturn in demand for EVs would harm Allego's business despite its historical growth.

Allego has modified its business practices since the start of the COVID-19 pandemic by recommending that all non-essential personnel work from home and cancelling or reducing physical participation in sales activities, meetings, events and conferences with only online engagements. Allego has also implemented additional safety protocols for essential workers and implemented cost cutting measures in order to reduce its operating costs. If significant portions of Allego's workforce in the future are unable to work effectively, due to illness, quarantines, social distancing, government actions or other restrictions in connection with the COVID-19 pandemic or other pandemics, its operations will be negatively impacted. Furthermore, if significant portions of its customers' or potential customers' workforce are subject to stay-at-home orders or otherwise have substantial numbers of their employees working remotely for sustained periods of time, user demand for EV charging sessions and services may decline.

The results for the year ended December 31, 2020 were impacted by COVID-19. Based on the Google Transit Data tracking, there was an immediate drop of 52% in consumed energy in April 2020 compared to February 2020 due to the COVID-19 lockdown. During April 2020, the situation reverted, and the volumes of consumed energy commenced to steadily increase. It is difficult to assess and quantify the impact COVID-19 has had on the Group's charging revenues but a similar trend is observed when comparing the charging revenue from January and February 2020 of € 1.5 million and € 1.4 million, respectively, to the following two months. The revenue for March and April 2020 decreased to € 0.98 million and € 0.67 million seeing a drop of 54% from the revenue recorded in January to the revenue recorded in April. However, revenue recovered throughout the rest of the year.

The results for the year ended December 31, 2021 were impacted by COVID-19. During the first quarter of 2021, traffic by EV-drivers and consumed energy levels declined as a result of COVID-19 lockdown measures imposed by governments throughout Europe. As COVID-19 lockdown measures eased, traffic by EV-drivers and consumed energy levels increased. The impact on the Group's charging revenues correlate with these trends. Charging revenue recovered throughout the remainder of the first half-year of 2021, which continued in the second half-year of 2021. The impact of COVID-19 on the Group's charging revenue in the second half-year have been limited.

The results for the year ended December 31, 2022 were not materially impacted by COVID-19.

## Key Performance Indicators

Allego regularly reviews a number of metrics to evaluate its business, measure its progress and make strategic decisions. EBITDA, Operational EBITDA, gross profit excluding depreciation and amortization, and free cash flow, which are non-IFRS measures, are currently utilized by management and may be used by our investors and competitors to assess performance. See the section entitled "*—Non-IFRS Financial Measures.*"

Management also reviews utilization rates, which are defined as the number of charging sessions per charge point per day divided by a maximum number of charging sessions per charger per day of 50 (for the ultra-fast charging pole). Allego uses utilization rates to track profitability of the applicable charge point, to make comparisons to its business plan, and also to evaluate when it may want to consider adding charge poles to a given site to avoid increased wait times. Gathering information on utilization rates may also enable Allego to improve its forecasting abilities in the future.

Allego believes these measures assist its investors in gaining a meaningful understanding of its performance. Because not all companies use identical calculations or definitions Allego's presentation of these key performance indicators, including non-IFRS measures, may not be comparable to other similarly titled measures of other companies.

### Utilization Rate

The following table represents the overall utilization rate (which includes slow, fast and ultra-fast chargers) of Allego's charging network for the years ended December 31, 2022, 2021 and 2020.

	For the year ended December 31,		
	2022	2021	2020
Utilization rate	10.00 %	6.90 %	5.34 %

In the year ended December 31, 2022, the utilization rate increased when compared to the same period in 2021 primarily due to an increase in EV usage, which is a key driver for the demand in EV charging.

### Key Components of Results of Operations

#### Revenue

Allego's revenues are generated across various revenue streams. The majority of Allego's revenue is generated from charging sessions on its charging points and the sale and installation of charging equipment. Charging sessions revenue include the revenues related to charging sessions at charging equipment owned by Allego or corporate third-parties. Allego also supplies electricity to owners and drivers of electric vehicles which use a charge card issued by an MSP, credit card, or direct payment through Smoov™ to pay for these services. Agreements related to the sale and installation of charging equipment are arranged via a development contract under which Allego purchases and installs charging equipment at the relevant location.

In addition, Allego generates revenues from operation and maintenance of charging equipment, as well as from consulting services.

#### Cost of sales

Cost of sales represents the electricity cost for the charging revenues which is billed to Allego by utility companies or directly by the markets and renewable assets connected to Allego balancing perimeters. Cost of sales related to development contracts consist of the cost of charging equipment and the third-party service cost for the installation services including the establishment of the grid connection. Cost of sales related to the operations and maintenance contracts mainly consists of the third-party service cost. Cost of sales also includes charging depreciation, land permit depreciation, and EV-Cloud platform amortization.

#### Gross profit and gross margin

Gross profit is revenue less cost of sales. Gross margin is gross profit (loss) as a percentage of revenue.

#### Other income

Other income consists of government grants, income from the sale of CO<sub>2</sub> tickets certificates (linked to CO<sub>2</sub> emission offsets, for example HBE in the Netherlands), the net gain or loss on the disposal of property, plant and equipment, sublease rental income, fair value gains/(losses) on derivatives (purchase options) and other items. Government grants are related to the development of the EV charging infrastructure networks in the EU and represent the reimbursement of incurred expenses. HBE certificates are issued by a Dutch government agency and are part of a program to stimulate the use of energy efficient and clean transportation. In Germany, a similar scheme is in place. Allego is periodically granted a certificate based on the number of kWh of green energy that has been sold to customers. Allego sells such certificates to companies that are required to offset their use of non-green energy through a brokerage. Other items mainly relate to reimbursements from (energy) network operators with respect to the power grid connections used. At the end of the year, Allego is reimbursed based on usage of actual grid connections used. Other items also include reimbursements that the Group has received from one of its suppliers for chargers.

#### Selling and distribution expenses

Selling and distribution expenses relate to Allego's sales function and mainly comprise employee benefits, amortization of customer relationships, depreciation charges, marketing and communication costs, housing and facility costs, travelling costs and other selling and distribution expenses.

**General and administrative expenses**

General and administrative expenses relate to Allego's support functions and mainly comprise employee benefits, depreciation, amortization and impairment charges, IT costs, housing and facility costs, travelling costs, fees incurred from third parties, share-based payment expenses, and other general and administrative expenses.

**Operating loss**

Operating loss consists of Allego's gross profit less other income, selling and distribution expenses and general and administrative expenses.

**Finance income/(costs)**

Finance income/(costs) primarily consist of interest expenses, exchange differences, loss on debt modifications and extinguishments, fair value gains and losses on interest rate cap derivatives and fair value gains and losses on warrant liabilities.

**Loss for the year**

Loss for the year consists of Allego's operating loss plus its finance income/(costs) less income tax.

**Results of Operations****2022 versus 2021**

The following table summarizes Allego's historical results of operations for the years ended December 31, 2022 and 2021:

(in € million)	For the year ended December 31,		Year-over-year Change For the year ended December 31, 2022 to 2021	
	2022	2021	Change (€)	Change (%)
Revenue	133.9	86.3	47.6	55 %
Cost of sales	(126.7)	(69.3)	(57.4)	83 %
<b>Gross profit</b>	<b>7.2</b>	<b>17.0</b>	<b>(9.8)</b>	<b>(57 %)</b>
Other income	3.7	10.9	(7.1)	(66 %)
Selling and distribution expenses	(2.6)	(2.5)	(0.1)	5 %
General and administrative expenses	(323.4)	(329.3)	5.9	(2 %)
<b>Operating loss</b>	<b>(315.0)</b>	<b>(303.9)</b>	<b>(11.1)</b>	<b>4 %</b>
Finance income/(costs)	10.3	(15.4)	25.7	(167 %)
<b>Loss before income tax</b>	<b>(304.7)</b>	<b>(319.3)</b>	<b>14.7</b>	<b>(5 %)</b>
Income tax	(0.6)	(0.4)	(0.2)	81 %
<b>Loss for the year</b>	<b>(305.3)</b>	<b>(319.7)</b>	<b>14.4</b>	<b>(5 %)</b>

The revenue numbers are further broken down below:

(in € million)	For the year ended December 31,		Change	Change
	2022	2021	€	%
<b>Type of goods or service</b>				
Charging sessions	65.3	26.1	39.2	150 %
Service revenue from the sale of charging equipment	33.6	37.3	(3.7)	(10 %)
Service revenue from installation services	28.6	19.5	9.1	47 %
Service revenue from operation and maintenance of charging equipment	3.2	3.4	(0.2)	(5 %)
Service revenue from consulting services	3.1	—	3.1	100 %
<b>Total revenue from external customers</b>	<b>133.9</b>	<b>86.3</b>	<b>47.6</b>	<b>55 %</b>

## Revenue

Revenue was €133.9 million for the year ended December 31, 2022 compared to €86.3 million for the year ended December 31, 2021. Revenue increased €47.6 million, or 55%, as further described below:

### Charging revenue

(in € million)	
Total charging revenue for the year ended December 31, 2021	26.1
Increase related to increase in energy sold	22.7
Increase related to increase of charging prices	16.5
<b>Total charging revenue for the year ended December 31, 2022</b>	<b>65.3</b>

Charging sessions revenue for the year ended December 31, 2022 increased €39.2 million, or 150%, to €65.3 million compared to €26.1 million for the year ended December 31, 2021.

During 2022, charging revenue increased €22.7 million as a result of an increase in energy sold. This was driven by both new and existing chargers. During 2022, the Company had a 6% increase in charging points, including strong growth in installations of ultra-fast charging ports, which increased 95% year-over-year. The increase in energy sold was additionally driven by a 71% increase in the number of charging sessions. The total energy sold increased from 83 GWh in 2021 to 155 GWh in 2022, an increase of 71% due to an increase in EV usage and increased installed base of charging ports. There was a 45% increase in the utilization of the chargers year over year.

Finally, an increase of €16.5 million was due to an increase in average charging price per kWh. The average charging price / kWh increased by 33% year over year. The increase in average revenue per session is due to price increases in the 2nd half of 2022 and a growing number of new cars with extended battery capacity being sold during the period, as well as higher sales prices on ultra-fast and fast chargers compared to slow chargers.

As at December 31, 2022, Allego owned and operated charging stations predominantly in the Netherlands, Belgium, and Germany.

### Service revenue

(in € million)	
Total service revenue for the year ended December 31, 2021	60.2
Decrease related to sale of charging equipment	(3.7)
Increase in installation services	9.1
Decrease in operation and maintenance of charging equipment	(0.2)
Increase in consulting services	3.1
<b>Total service revenue for the year ended December 31, 2022</b>	<b>68.6</b>

## [Table of Contents](#)

Overall service revenue for the year ended December 31, 2022 increased €8.4 million, or 14%, to €68.6 million compared to €60.2 million for the year ended December 31, 2021.

Service revenue from installation services increased €9.1 million, or 47%, to €28.6 million for the year ended December 31, 2022 from €19.5 million for the year ended December 31, 2021. Service revenue from the sale of charging equipment for the year ended December 31, 2022 decreased €3.7 million, or 10%, to €33.6 million compared to €37.3 million for the year ended December 31, 2021. Service revenue from operation and maintenance of charging equipment was €3.2 million for the year ended December 31, 2022, compared to €3.4 million for the year ended December 31, 2021, a decrease of €0.2 million, or 5%.

Overall, the increase in service revenue was primarily due to strong growth in the demand for business-to-business charging solutions and the continued development with Carrefour for the development of over 200 charging locations across France, which resulted in an increase of service revenue of €28.0 million. This is offset by a decrease on the Mega-E project of €22.5 million due to the acquisition of Mega-E in March 2022, which is now consolidated by the Group.

During 2022, service revenue from consulting services of €3.1 million (2021: Enil) was generated as a result of the acquisition of MOMA in June 2022.

### Cost of sales

(in € million)

Cost of sales for the year ended December 31, 2021	69.3
Increase due to volume of energy sold	19.9
Increase due to price of energy	17.0
Increase due to depreciation and amortization	12.2
Increase due to development, sale, and installation of Carrefour chargers	19.6
Decrease due to Mega-E acquisition	(13.2)
Increase due to changes in inventory value	3.3
Decrease due to other projects	(1.4)
<b>Cost of sales for the year ended December 31, 2022</b>	<b>126.7</b>

Cost of sales for the year ended December 31, 2022 increased €57.4 million, or 83%, to €126.7 million compared to €69.3 million for the year ended December 31, 2021.

The increase in cost of sales was substantially driven by an increase in energy sold and an increase in energy prices throughout Europe. Year over year, the average cost of energy / kWh increased by 40% and average maintenance costs / kWh increased by 19%. Additionally, during the year ended December 31, 2022, maintenance costs increased by 123% due to increased installed base and energy sold. This is a result of Allego's continued expansion of its portfolio of chargers, with a focus on ultra-fast chargers (including through the acquisition of Mega-E), which require higher operation and maintenance costs.

### Gross profit and gross margin

Gross profit for the year ended December 31, 2022 decreased €9.8 million, or 57%, to €7.2 million compared to €17.0 million for the year ended December 31, 2021. The gross margin for the year ended December 31, 2022 decreased to 5% compared to 20% for the year ended December 31, 2021. This was driven primarily by an increase in energy prices throughout Europe during the year, without corresponding increases in prices charged to customers during the first half of 2022. As described above, revenue increased €16.5 million year-over-year as a result of rising electricity prices, compared to an increase in cost of sales of €17.0 million. In addition, there was an increase in inventory write-offs during 2022 of €3.3 million. The remaining decrease in margin was due to faster growth in lower-margin charging revenue compared to service revenue during the year.

### Other income

Other income for the year ended December 31, 2022 decreased €7.1 million, or 66%, to €3.7 million compared to €10.9 million for the year ended December 31, 2021. The decrease in other income is due to the following factors:

(in € million)	2022
Other income for the year ended December 31, 2021	10.9
Increase in fair value gain on purchase option derivatives	1.0
Increase in income generated from the sale of CO <sub>2</sub> tickets	4.1
Increase in loss on disposal of property, plant and equipment	(12.3)
Decrease in government grants	(1.8)
Other	1.9
<b>Other income for the year ended December 31, 2022</b>	<b>3.8</b>

### Selling and distribution expenses

Selling and distribution expenses for the year ended December 31, 2022 amounted to €2.6 million, remaining relatively constant when compared to the year ended December 31, 2021 (€2.5 million).

### General and administrative expenses

General and administrative expenses for the year ended December 31, 2022 decreased €5.9 million, or 2%, to €323.4 million compared to €329.3 million for the year ended December 31, 2021. The decreased general and administrative expenses is due to the following factors:

(in € million)	2022
General and administrative expenses for the year ended December 31, 2021	329.3
Decrease in employee benefit expenses	(39.9)
Decrease in legal, accounting and consulting fees	(135.1)
Increase in share-based payment expenses - SPAC	158.7
Increase in depreciation and amortization expenses	3.0
Increase in IT costs	1.7
Increase in insurance costs	6.8
Other	(1.1)
<b>General and administrative expenses for the year ended December 31, 2022</b>	<b>323.4</b>

The overall decrease in general and administrative expenses for the year ended December 31, 2022 is primarily driven by a decrease in legal, accounting and consulting fees incurred (2022: €73.9 million, 2021: €208.9 million) as well as a decrease in employee benefit expenses (2022: €65.1 million, 2021: €105.0 million). The decreases were a result of a reduction in share-based payment expenses following the termination of the First Special Fees Agreement in connection with the completion of the Business Combination in March 2022, whereas this agreement was in place for all of 2021. Share-based payment expenses amounted to €99.4 million in 2022 (2021: €291.8 million) of which €58.1 million (2021: €202.2 million) were recognized as legal, accounting and consulting fees and €41.2 million (2021: €89.6 million) were recognized as employee benefit expenses. The share-based payment expenses in 2022 related to the Second Special Fees Agreement and the Management Incentive Plan. This is offset by share-based payment expenses incurred in 2022 in relation to the Business Combination of €158.7 million (2021: €nil) representing costs of service in respect of the stock exchange listing for Allego Ordinary Shares.

### Operating Loss

Operating loss for the year ended December 31, 2022 increased €11.1 million, or 4%, to €315.0 million compared to €303.9 million for the year ended December 31, 2021. The increased operating loss is mostly due to a decrease in gross profit and other income, offset by lower share-based payment expenses.

**Finance income/(costs)**

(in € million)	2022
Finance income/(costs) for the year ended December 31, 2021	(15.4)
Increase in finance costs on borrowings	(3.8)
Fair value gain on derivatives	4.9
Fair value gains on warrant liabilities	27.1
Other	(2.4)
<b>Finance income/(costs) for the year ended December 31, 2022</b>	<b>10.3</b>

Finance income/(costs) for the year ended December 31, 2022 increased €25.7 million, or 167%, to €10.3 million in income compared to €15.4 million in costs for the year ended December 31, 2021. The increased finance income is due to fair value gains generated by derivatives and warrant liabilities which are offset by increased interest expenses on senior debt as a result of the refinancing that occurred during the year ended December 31, 2022.

**Loss before income tax**

Loss before income tax for the year ended December 31, 2022 decreased €14.7 million, or 5%, to €304.7 million compared to €319.3 million for the year ended December 31, 2021. The increase in revenue and reduction in finance costs and general and other administrative expenses have been partially offset by increased cost of sales and lower other income. Finance income, as opposed to finance expense in 2021, was generated due to fair value gains on derivatives and warrant liabilities. General and administrative expenses decreased due to a decrease in share-based payments subsequent to the completion of the Business Combination.

**Income tax**

(in € million)	2022
Income tax for the year ended December 31, 2021	(0.4)
Additional current tax expense	(0.9)
Origination of temporary differences and tax losses	16.9
Derecognition of deferred tax assets	(16.3)
<b>Income tax for the year ended December 31, 2022</b>	<b>(0.6)</b>

For the year ended December 31, 2022, Allego recognized additional current tax expenses of €0.9 million mainly related to an additional tax expense for profitable countries of €0.3 million and the acquisition of MOMA €0.7 million. The decrease is further caused by the derecognition of deferred tax assets for €16.3 million and offset by the origination of temporary differences of €16.9 million. This resulted in an increase in income taxes of €0.2 million, or 81%, compared to the year ended December 31, 2021.

**Loss for the year**

Loss for the year ended December 31, 2022 decreased €14.4 million, or 4%, to €305.3 million compared to €319.7 million for the year ended December 31, 2021. The increase in revenue and reduction in finance costs and general and other administrative expenses has been partially offset by increased cost of sales and lower other income. Finance income, as opposed to finance expense in 2021, was generated due to fair value gains on derivatives and warrant liabilities. General and administrative expenses decreased due to a decrease in share-based payments subsequent to the completion of the Business Combination.

**2021 versus 2020**

The following table summarizes Allego's historical results of operations for the years ended December 31, 2021 and 2020:

(in € million)	For the year ended December 31,		Year-over-year Change For the year ended December 31, 2021 to 2020	
	2021 (restated) <sup>1</sup>	2020 (restated) <sup>1</sup>	Change (€)	Change (%)
Revenue	86.3	44.2	42.0	95 %
Cost of sales	(69.3)	(39.0)	(30.3)	78 %
<b>Gross profit</b>	<b>17.0</b>	<b>5.3</b>	<b>11.8</b>	<b>223 %</b>
Other income/(expenses)	10.9	5.4	5.4	100 %
Selling and distribution expenses	(2.5)	(3.9)	1.4	-37 %
General and administrative expenses	(329.3)	(39.4)	(289.9)	735 %
<b>Operating loss</b>	<b>(303.9)</b>	<b>(32.7)</b>	<b>(271.2)</b>	<b>830 %</b>
Finance costs	(15.4)	(11.3)	(4.1)	37 %
<b>Loss before income tax</b>	<b>(319.3)</b>	<b>(43.9)</b>	<b>(275.4)</b>	<b>627 %</b>
Income tax	(0.4)	0.7	(1.0)	-151 %
<b>Loss for the year</b>	<b>(319.7)</b>	<b>(43.3)</b>	<b>(276.4)</b>	<b>639 %</b>

<sup>1</sup> Refer to Note 2.7.24 in the accompanying consolidated financial statements for details regarding the restatement of comparative figures as a result of changes in accounting policies.

The revenue numbers are further specified below:

(in € million)	For the year ended December 31,		Change	
	2021	2020	€	%
<b>Type of goods or service</b>				
Charging sessions	26.1	14.9	11.2	75 %
Service revenue from the sale of charging equipment	37.3	15.2	22.1	145 %
Service revenue from installation services	19.5	12.3	7.2	59 %
Service revenue from operation and maintenance of charging equipment	3.4	1.9	1.5	79 %
<b>Total revenue from external customers</b>	<b>86.3</b>	<b>44.2</b>	<b>42.1</b>	<b>95 %</b>

**Revenue**

Revenue was € 86.3 million for the year ended December 31, 2021 compared to € 44.2 million for the year ended December 31, 2020. Revenue increased € 42.1 million, or 95%.

Charging sessions revenue for the year ended December 31, 2021 increased € 11.2 million, or 75%, to € 26.1 million compared to € 14.9 million for the year ended December 31, 2020. The increase was due to an increase in charging points as well as an increase in the utilization of the chargers. As at December 31, 2021, Allego operated owned charging stations predominantly in the Netherlands, Belgium, Germany, the Nordics and France. The charging stations installed during 2021 led to a revenue increase of € 2.2 million compared to the revenue for the year ended December 31, 2020. Furthermore, the average revenue per session for the year ended December 31, 2021 increased by 5%, which was caused by the increased average kWh consumption per session. The consumption increase was caused by an increase in the number of charging sessions and an increase in the average duration of charging sessions, driven by the growing number of new cars with extended battery capacity being sold during the period. The increase in average revenue per session was also due to higher sales prices per kWh on ultra-fast and fast chargers compared to slow chargers. The remaining increase was due to an increase in charging sessions at the charging points installed pre-2021.

Service revenue increased across all revenue streams during the year ended December 31, 2021. Service revenue from the sale of charging equipment for the year ended December 31, 2021 increased € 22.1 million, or 145%, to € 37.3 million compared to € 15.2 million for the year ended December 31, 2020. Service revenue from installation services increased € 7.2 million, or 59%, to € 19.5 million for the year ended December 31, 2021 from € 12.3 million for the year ended December 31, 2020. Service revenue from operation and maintenance of charging equipment was € 3.4 million for the year ended December 31, 2021, compared to € 1.9 million for the year ended December 31, 2020, an increase of € 1.5 million, or 79%. The increase in service revenue was primarily due to a strong growth in demand for B2B charging solutions and the continued development of the Mega-E roll out over Europe, which entailed creating charging infrastructure in a larger part of Europe. New contracts entered into during the year included a contract for the installation of five HPC locations along France's A355 highway, a strategic partnership with Casino Group to develop and install over 250 HPC locations at 36 supermarkets in France, a strategic partnership with Van der Valk Hotels to install HPC locations at more than 50 of their hotels in the Netherlands and Belgium, an agreement with REWE Nord to build more than 100 fast charging sites across their locations in Germany and a partnership with Carrefour for the development of over 200 charging locations across France.

#### **Cost of sales<sup>1</sup>**

Cost of sales for the year ended December 31, 2021 increased € 30.3 million, or 78%, to € 69.3 million compared to € 39.0 million for the year ended December 31, 2020. The increase in cost of sales was substantially due to the increase shown for the service revenue streams.

During the year ended December 31, 2021, Allego continued to expand its portfolio of chargers, which led to a decrease in the cost per session due to the maintenance costs being divided over a larger number of chargers and a larger number of charging sessions. Additionally, there was a positive impact to cost of sales because the cost of sales increased at a slower pace than revenue. This was due to the mix of projects for 2021 being different than for 2020 as several high gross margin projects were completed in 2021. However, this positive impact was offset due to increases in energy prices throughout Europe, especially in the second half year of 2021, which affected the cost of sales of revenue from charging sessions.

<sup>1</sup> Refer to Note 2.7.24 in the accompanying consolidated financial statements for details regarding the restatement of comparative figures as a result of changes in accounting policies

#### **Gross profit and gross margin<sup>1</sup>**

Gross profit for the year ended December 31, 2021 increased € 11.8 million, or 223%, to € 17.0 million compared to € 5.3 million for the year ended December 31, 2020. While the increase in gross profit was driven by the overall increase in revenue, the gross margin of 20% for the year ended December 31, 2021 decreased compared to the gross margin of 12% for the year ended December 31, 2020. Although the gross margin increased due to the relative increase of specific revenue streams with higher gross margins as a percentage of total revenue, this effect was offset by a greater increase in cost of sales of revenue from charging sessions due to the increase in energy prices.

<sup>1</sup> Refer to Note 2.7.24 in the accompanying consolidated financial statements for details regarding the restatement of comparative figures as a result of changes in accounting policies

#### **Other income**

Other income for the year ended December 31, 2021 increased € 5.5 million, or 102%, to € 10.9 million compared to € 5.4 million for the year ended December 31, 2020. The increase in other income was mostly due to a € 2.9 million fair value gain on purchase option derivatives and a € 3.0 million increase in the income generated from the sale of HBE certificates.

#### **Selling and distribution expenses**

Selling and distribution expenses for the year ended December 31, 2021 decreased € 1.4 million, or 36%, to € 2.5 million compared to € 3.9 million for the year ended December 31, 2020. The decrease was primarily attributable to reduced employee benefits expenses resulting from a restructuring plan which streamlined Allego's operations. Implementation of the restructuring plan started in 2020.

#### **General and administrative expenses<sup>1</sup>**

General and administrative expenses for the year ended December 31, 2021 increased € 289.9 million, or 735%, to € 329.3 million compared to € 39.4 million for the year ended December 31, 2020. The increase in general and administrative

expenses was primarily due to € 291.8 million (2020: € 7.1 million) share-based payment expenses for shares that were granted to an external consulting firm in the year ended December 31, 2020. € 202.2 million (2020: € 4.7 million) of these costs were recognized as legal, accounting and consulting fees and € 89.6 million (2020: € 2.4 million) of these costs were recognized as employee benefit expenses.

<sup>1</sup> Refer to Note 2.7.24 in the accompanying consolidated financial statements for details regarding the restatement of comparative figures as a result of changes in accounting policies

### **Operating Loss**

Operating loss for the year ended December 31, 2021 increased € 271.1 million, or 827%, to € 303.9 million compared to € 32.8 million for the year ended December 31, 2020. The increase in operating loss was mostly due to higher share-based payment expenses.

### **Finance costs**

Finance costs for the year ended December 31, 2021 increased € 4.1 million, or 36%, to € 15.4 million compared to € 11.3 million for the year ended December 31, 2020. The increase in finance costs was mostly due to increasing interest expenses on shareholder loans due to accruing interest and increasing interest expenses on senior debt, as additional drawdowns were completed during the year ended December 31, 2021.

### **Loss before income tax**

Loss before income tax for the year ended December 31, 2021 increased € 275.2 million, or 624%, to € 319.3 million compared to € 44.1 million for the year ended December 31, 2020. Although revenue increased, the gross margin remained relatively stable. Additionally, other income increased for the year ended December 31, 2021 compared to the year ended December 31, 2020. However, this increase in other income was offset by increased finance costs and general and administrative expenses resulting in an increased loss before income tax. The interest expenses on shareholder loans increased due to compounding interest. The interest on the senior debt facility increased due to additional drawdowns completed during the year ended December 31, 2021. The general and administrative expenses increased due to the increase in share-based payment expenses.

### **Income tax**

For the year ended December 31, 2020, Allego recognized a deferred tax asset in Germany as it expected to realize taxable profits in the future, which resulted in a positive tax impact of € 0.7 million. For the year ended December 31, 2021 Allego recognized a deferred tax asset for its operations in Belgium as it expected to realize future taxable profits in the future. However, this was offset by the decrease in the deferred tax asset for its German operations as part of the previously recognized asset was utilized in 2021. For the year ended December 31, 2021, Allego realized profits on its operations in France, Norway and Sweden. Therefore, Allego recorded an income tax expense of € 0.2 million with respect to its profits in these countries. This resulted in a total tax impact of € 0.4 million. This resulted in a change in income taxes of € 1.1 million, or 157%, compared to the year ended December 31, 2020.

### **Loss for the year**

Loss for the year ended December 31, 2021 increased € 276.3 million, or 638%, to € 319.7 million compared to € 43.4 million for the year ended December 31, 2020. The increase in loss was primarily due to higher share-based payment expenses, which are included in general and administrative expenses. Although revenue increased, the gross margin remained relatively stable. Additionally, other income increased for the year ended December 31, 2021, compared to the year ended December 31, 2020. However, this increase in other income is offset by increased finance costs and general and administrative expenses resulting in an increased loss before income tax. The interest expenses on shareholder loans increased due to compounding interest. The interest on the senior debt facility increased due to additional drawdowns completed during the year ended December 31, 2021. The increase in the loss for the year ended December 31, 2021 compared to 2020 was mainly driven by an increase in general and administrative expenses due to the increase in share-based payment expenses (refer to Note 11 (Share-based payments) of the consolidated financial statements included elsewhere in this Annual Report).

*Interim Data*

During the current year-end financial reporting process, the Company identified prior period accounting errors that impact the Company's previously reported unaudited interim condensed consolidated financial statements as of June 30, 2022 ("Prior Period Financial Statements"). As disclosed elsewhere in this Annual Report, including in Note 6 (Revenue from contracts with customers) of the consolidated financial statements, the Group entered into a strategic partnership with a PIPE Investor for future charging sessions. This partnership was entered into on the Closing Date in connection with the Business Combination Agreement. The Company previously accounted for the investment as an equity contribution in the Prior Period Financial Statements. However, the Company subsequently concluded that a portion of the cash received for the PIPE Investment should be accounted for as a contract liability in recognition of future services to be transferred to the customer.

The tables below set forth the impact of the error correction on the unaudited interim condensed consolidated statement of financial position as of June 30, 2022, and the unaudited interim condensed consolidated statement of cash flows for the six months ended June 30, 2022. The error had no impact on the unaudited interim consolidated statement of profit or loss or comprehensive income for the 2022 interim period.

**B. Liquidity and Capital Resources**

*Sources of Liquidity*

The Group's strategy requires significant capital expenditures, as well as investments in building the Group's organization aimed at increasing the scale of its operations. The Group incurred losses during the first years of its operations, including during 2022, and expects to continue to incur losses in the next twelve months from the date hereof. We believe this is typical in the industry, as builders and operators of EV charging sites often incur losses in the early years of operation as the network grows and consumers begin adopting EVs. Therefore, the Group relies heavily on bank financing. Our primary sources of liquidity have historically been bank borrowings, revenues from our various revenue streams, and the proceeds from the transactions related to the Business Combination, which was completed in the first quarter of 2022.

*The Business Combination*

On July 28, 2021, the Company and Spartan signed the Business Combination Agreement. On March 16, 2022, the Company consummated the Business Combination and became a publicly traded company on the NYSE. The Group received €146.0 million (\$161.1 million) of gross proceeds (not inclusive of transaction expenses) from a combination of a PIPE offering of €136.0 million (\$150.0 million) at €9.07 (\$10.00) per share, along with €10.0 million (\$11.1 million) of cash held in trust by Spartan after redemptions. Each of these amounts have been translated at the EUR/USD exchange rate as of March 16, 2022.

Additionally, we will receive the proceeds from any exercise of any Warrants in cash. At December 31, 2022, the Group had 13,799,948 Public Warrants and no Private Placement Warrants outstanding, after the private warrant holders exercised on a cashless basis all their warrants on April 15, 2022. Public Warrants entitle the holder to convert each warrant into one Ordinary Share at an exercise price of \$11.50. The aggregate amount of proceeds could be up to \$266.3 million if all Public Warrants are exercised for cash. We expect to use any such proceeds for general corporate purposes, which would increase our liquidity, but do not need such proceeds to fund our operations. We believe the likelihood that warrant holders will exercise their Public Warrants, and therefore the amount of cash proceeds that we would receive, is dependent upon the market price of our Ordinary Shares. If the market price for our Ordinary Shares is less than \$11.50 per share, we believe warrant holders will be unlikely to exercise their Public Warrants. As of May 15, 2023, the closing price of our Ordinary Shares was \$2.19.

*Borrowings*

On July 28, 2022, the Group expanded its old €120.0 million facility by an additional €50.0 million through an accordion feature of the old facility with the group of lenders thereto. Under the original terms, the old facility was due to expire in May 2026.

Additionally, on December 19, 2022, the Group entered into the renewed facility agreement with a group of lenders led by Société Générale and Banco Santander, increasing the total available facility by €230.0 million to €400.0 million, to further support its growth. The renewed facility consists of:

- a. €170.0 million used to settle the old facility;
- a. up to €200.0 million to be used for financing and refinancing certain capital expenditures and permitted acquisitions (and for other permitted debt servicing uses); and
- a. up to €30.0 million to be used for issuance of guarantees and letters of credit (and when utilized by way of letters of credit, for general corporate purposes).

The renewed facility expires in December 2027 and bears interest at EURIBOR plus a margin. The principal terms and conditions of the renewed facility are as follows:

- drawdown stop when conditions precedent are not met;
- repayment in full at maturity date;
- commitment fee per year equals to 35% of the applicable margin and is payable for each undrawn facility in the period from the agreement signing date to the date being 42 months following the signing date. For the year ended December 31, 2022, the commitment fee was 1.365% per year (equal to 35% of the margin of 3.9%).

In December 2022, the Group completed two drawdowns on the renewed facility for a total amount of €279.2 million, of which €170.0 million was used to repay the Group's old facility by a way of netting with the drawdown on the renewed facility.

In parallel to the renewed facility, the Group entered into interest rate caps to hedge the interest rate risk on 65% of the outstanding loan amounts under the renewed facility. Details about the Group's interest rate caps are included in Note 19 (Other financial assets) and Note 32 (Financial risk management) of the consolidated financial statements included elsewhere in this Annual Report.

Under the terms of the renewed facility, the Group is required to comply with financial covenants, including leverage ratio and interest cover ratio, at the consolidated level of Allego N.V.

The compliance with covenants under the renewed facility agreement shall be tested every 6 months, with the testing period being the 12 months ending December 31 and June 30. The first testing date of the interest cover ratio is June 30, 2023, and the first testing date of the leverage ratio is June 30, 2024.

In the event of a covenant breach, the Group may within ten business days from the occurrence of a breach or the anticipated breach of the loan covenants remedy such default by providing evidence of receipt of new funding, sufficient to cure such breach ("*equity cure right*"). Such remediation is available for not more than two consecutive testing dates and four times over the duration of the renewed facility. In case if the covenants breach is not cured, such a breach is

considered a default and could lead to the cancellation of the total undrawn commitments and the loan to become immediately due and payable.

Additionally, there are covenant ratios set as drawstop event conditions for the part of the renewed facility aimed at financing and refinancing certain capital expenditures and permitted acquisitions, which if breached prior to the anticipated utilization of the capex portion of the renewed facility – will result in the drawdown stop. Please refer to Note 25 (Borrowings) and Note 33 (Capital Management) of the consolidated financial statements included elsewhere in this Annual Report for more information.

*Pledged balances*

The renewed facility is secured by pledges on the bank accounts (presented as part of cash and cash equivalents and non-current other financial assets) and pledges on the shares in the capital of Allego Holding B.V. held by the Company.

The carrying amount of assets pledged as security for the renewed facilities as of December 31, 2022 is €66.8 million. Refer to Note 25 (Borrowings) of the consolidated financial statements included elsewhere in this Annual Report for more information.

Subsequent to year-end, from January to March, 2023, the Group pledged additional assets in relation to the renewed facility: the bank accounts of €4.8 million as at March 31, 2023 (presented as part of cash and cash equivalents), the trade and other receivables of €18.8 million as at March 31, 2023, and the shares in the capital of Allego Netherlands, Allego Germany and Allego France held by the Group. Refer to Note 37 (Subsequent Events) of the consolidated financial statements included elsewhere in this Annual Report for more information.

*Going concern*

We believe that our sources of liquidity and capital will be able to fund the expected cash outflows in the next 12 months. Although the expectation for the coming year is that the Company will continue to have net losses and make additional investments, we believe our cash flows from operations and renewed credit facility is sufficient for more than the next 12 months from the date hereof. This is subject, to a certain extent, to general economic, financial, competitive, regulatory and other factors that are beyond our control.

Further long-term envisioned growth more than 12 months out – in line with the Group’s strategy – including capital investments, development activities, and operations, may require additional financing. Currently, no commitments exist for further growth investments. The Group will be required to seek additional financing to continue to execute its growth strategy and business plan in the long-term. The realization of such financing is inherently uncertain. If we obtain additional capital by issuing equity, the interests of our existing shareholders will be diluted and, if we incur additional indebtedness, that indebtedness may contain significant financial and other covenants that may significantly restrict our operations. We cannot assure you that we could obtain additional financing on favorable terms or at all.

As of December 31, 2022, we were in compliance with the covenants under our the agreements governing our indebtedness.

*Contractual Obligations and Commitments*

As at December 31, 2022, significant expenditures for chargers and charging infrastructure contracted for, but not recognized as liabilities were €2.5 million. The Group uses these assets either as own chargers (property, plant and equipment) or as charging equipment to fulfill its obligations under development contracts entered into with its customers (inventory).

Additionally, our lease agreements provide for lease obligations – refer to Note 17 (Leases) of the consolidated financial statements included elsewhere in this Annual Report for more information.

Finally, for other information related to the Company’s future maturities of financial liabilities, refer to Note 32 (Financial risk management) of the consolidated financial statements included elsewhere in this Annual Report for more information.

*Treasury Policy*

For information regarding the type of the Company’s financial instruments used, the maturity profile of debt, currency and interest rate structure, refer to Notes 30 (Financial Instruments), 31 (Fair value measurement), and 32 (Financial risk management) of the consolidated financial statements included elsewhere in this Annual Report.

*Liquidity Policy*

As an early-stage company, we maintain a strong focus on liquidity and define our liquidity risk tolerance based on uses and sources to maintain a sufficient liquidity position to meet our obligations under both normal and stressed conditions. The Group invests in new stations, chargers, grid connections, and potential business acquisitions only if the Group has

secured financing for such investments. Management prepares detailed liquidity forecasts and monitors cash and liquidity forecasts on a continuous basis. In assessing the going concern basis of preparation of the consolidated financial statements included elsewhere in this Annual Report, management had to estimate the expected cash flows for the next 12 months, incorporating current cash levels, revenue projections, detailed capital expenditures, operating expense budgets, interest payment obligations, and working capital projections, as well as compliance with covenants, the potential exercise of warrants and availability of other financial funding from banks, like those obtained in 2023. These forecasts reflect potential scenarios and management plans and are dependent on securing significant contracts and related revenues.

### Cash flows

The cash flows for the year ended December 31, 2022 are presented below and compared with the cash flows for the year ended December 31, 2021:

(in € million)	Year ended December 31,		
	2022	2021	2020
Cash flows used in operating activities	(108.3)	(9.2)	(34.4)
Cash flows used in investing activities	(95.0)	(15.4)	(15.3)
Cash flows provided by (used in) financing activities	261.7	41.0	36.7
<b>Net increase (decrease) in cash and cash equivalents</b>	<b>58.4</b>	<b>16.4</b>	<b>(13.0)</b>

### Cash flows used in operating activities

Cash used in operating activities for the year ended December 31, 2022 was €108.3 million compared to cash used in operating activities of €9.2 million during the year ended December 31, 2021 and €34.4 million during the year ended December 31, 2020.

During the year ended December 31, 2022, the cash used in operating activities primarily consisted of a net loss before income tax of €304.7 million, reduced by non-operating elements of €281.6 million, an increase in net operating assets of €72.7 million, interest paid of €9.2 million, an increase in proceeds from settlement of derivatives of €1.1 million, an increase in the payment of derivatives premiums of €4.1 million, and income taxes paid of €0.4 million.

The major components of non-operating elements related to loss on extinguishment and modification of debt of €4.6 million, other finance costs of €12.2 million, share-based payment expenses of €258.1 million, fair value losses/(gains) on derivatives of €3.8 million, fair value losses/(gains) on warrant liabilities of €27.1 million, depreciation, amortization and (reversal of) impairments of €27.2 million and net (gain)/loss on disposal of property, plant and equipment of €10.5 million. The increase in net operating assets was mainly due to an increase of €23.9 million in trade and other receivables, contract assets and prepayments, a decrease of €31.0 million in trade and other payables and contract liabilities, as well as an increase in inventory and other financial assets of €17.9 million.

During the year ended December 31, 2021, the cash used in operating activities primarily consisted of a net loss before income tax of €319.3 million, reduced by non-operating elements of €316.2 million, a decrease in net operating assets of €0.2 million, interest paid of €6.0 million and income taxes paid of €0.3 million. The major components of non-operating elements relate to finance costs, share-based payment expenses, fair value gains/(losses) on purchase options derivatives and depreciation, amortization and (reversal of) impairments of €15.3 million, €291.8 million, negative €2.9 million and €11.9 million, respectively. The decrease in net operating assets was mainly due to an increase of €28.6 million in trade and other payables and contract liabilities. This was partially offset by an increase of €21.3 million in trade and other receivables, contract assets and prepayments, an increase in inventory and other financial assets of €6.9 million and a decrease in provisions of €0.2 million.

During the year ended December 31, 2020, the cash used in operating activities primarily consisted of a net loss before income tax of €43.9 million, reduced by non-operating elements of €28.7 million, an increase in net operating assets of €14.7 million and interest paid of €4.5 million. The major components for non-operating elements relate to finance costs, share-based payment expenses and depreciation and amortization costs of €11.3 million, €7.1 million and €10.3 million, respectively. The increase in net operating assets was mainly due to an increase of €14.2 million in trade and other receivables, contract assets and prepayments and a decrease of €4.3 million in trade and other payables and contract liabilities. This is partially offset by a decrease in inventory and other financial assets of €3.7 million and an increase in provisions of €0.1 million.

### **Cash flows used in investing activities**

Cash used in investing activities for the year ended December 31, 2022 was €95.0 million compared to €15.4 million during the year ended December 31, 2021. The year-over-year movement was primarily due to an increase in acquisition expenses of €68.4 million and increased purchases of property, plant and equipment of €16.8 million. This was partially offset by decreased proceeds from investment grants of €1.2 million, a decrease in the purchases of intangible assets of €5.2 million and a decrease in the payment of purchase option premiums of €1.5 million.

Cash used in investing activities for the year ended December 31, 2021 was €15.4 million compared to cash used in investing activities of €15.3 million during the year ended December 31, 2020. The year-over-year decrease was primarily due to a decrease in purchases of property, plant and equipment of €7.0 million and decrease in proceeds from investment grants of €1.5 million. This was partially offset by an increase in the purchases of intangible assets of €4.0 million as well as an increase in the payment of purchase option premiums of €1.5 million.

### **Cash flows provided by financing activities**

Cash from financing activities for the year ended December 31, 2022 was €261.7 million compared to cash used in financing activities of €41.0 million during the year ended December 31, 2021. The year-over-year increase was primarily due to proceeds from issuing equity instruments of €142.8 million, and an increase in proceeds from borrowings of €114.9 million. This was partially offset by an increase in the payment of transaction costs of €11.5 million, an increase in repayment of borrowings of €23.4 million, and an increase in the payment of the principal portion of lease liabilities of €2.0 million.

Cash from financing activities for the year ended December 31, 2021 was €41.0 million compared to cash used in financing activities of €36.7 million during the year ended December 31, 2020. The year-over-year increase was primarily due to an increase in proceeds from borrowings of €6.0 million. This was partially offset by an increase in the payment of principal portion of lease liabilities of €1.6 million and an increase in the payment of transaction costs of €0.1 million.

### **Contractual Obligations and Commitments**

Significant expenditures for charging stations and charging infrastructure contracted for, but not recognized as liabilities, as at December 31, 2022 was €2.5 million (December 31, 2021: €2.3 million). Allego uses these assets either as its own charging stations (property, plant and equipment) or as charging equipment to fulfill its obligations under development contracts entered into with its customers (inventory). Allego is not a party to any other off-balance sheet arrangements.

### **Non-IFRS Financial Measures**

This Annual Report includes the following non-IFRS financial measures: *EBITDA*, *Operational EBITDA*, *gross profit excluding depreciation and amortization*, and *free cash flow*. Allego believes EBITDA, Operational EBITDA, gross profit excluding depreciation and amortization, and free cash flow are measures used internally to establish forecasts, budgets, and operational goals to manage and monitor its business. We present the non-IFRS measures because we consider them to be important supplemental measures of our performance, and we believe they are frequently used by securities analysts, investors and other interested parties in the evaluation of companies. Management believes that investors' understanding of our performance is enhanced by including the non-IFRS measures as a reasonable basis for comparing our ongoing results of operations. By providing the Non-IFRS Measures, together with reconciliations to IFRS, we believe we are enhancing investors' understanding of our business and our results of operations, as well as assisting investors in evaluating how well we are executing our strategic initiatives.

Allego defines EBITDA as net income (loss) before interest expense, taxes, depreciation, amortization and impairments. Allego defines Operational EBITDA as EBITDA further adjusted for share-based payment expenses, transaction costs, bonus payments to consultants, fair value gain/(losses) on certain derivatives, reorganization and severance costs, certain business optimization costs, and lease buyouts. Allego defines gross profit excluding depreciation and amortization as gross profit before depreciation and amortization expenses. Allego defines free cash flow as net cash flow from operating activities less capital expenditures and adjusted for proceeds from/repayments of investment grants.

EBITDA, Operational EBITDA, gross profit excluding depreciation and amortization, and free cash flow are not prepared in accordance with IFRS and may be different from non-IFRS financial measures used by other companies. These measures should not be considered as measures of financial performance under IFRS, and the items excluded from or included in these metrics are significant components in understanding and assessing Allego's financial performance. These metrics should not be considered as alternatives to net income (loss) or any other performance measures derived in

## Table of Contents

accordance with IFRS. The following unaudited table presents the reconciliation of net loss, the most directly comparable IFRS measure to EBITDA and Operational EBITDA and the reconciliation of cash generated from operations, the most directly comparable IFRS measure to free cash flow for the years ended December 31, 2022, 2021 and 2020:

(in € millions)	Year ended December 31		
	2022	2021	2020
<b>Loss for the year</b>	<b>(305.3)</b>	<b>(319.7)</b>	<b>(43.3)</b>
Income tax	0.6	0.4	(0.7)
Finance costs	(10.3)	15.4	11.3

### C. Research and Development, Patents and Licenses, etc.

Please refer to “Item 4.B. Business—Research and Development” and “Item 4.B. Business—Intellectual Property”.

### D. Trend Information

Please refer to “Item 5.A. Operating and Financial Review and Prospects—A. Operating Results—Key Factors Affecting Operating Results.”

### E. Critical Accounting Estimates

The discussion and analysis of Allego’s financial condition and results of operations is based upon financial statements which have been prepared in accordance with IFRS. The preparation of these financial statements requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and disclosures with respect to contingent liabilities and assets at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Certain of Allego’s accounting policies require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. By their nature, these judgments are subject to an inherent degree of uncertainty. On an ongoing basis, Allego evaluates its estimates including those related to charging station depreciable lives, impairment of financial assets, share-based compensation and the

recognition of deferred tax assets. These judgments are based on Allego's historical experience, terms of its existing contracts, evaluation of trends in the industry, information provided by its clients and information available from outside sources, as appropriate. Allego's actual results may differ from those estimates. See Note 2 (Significant accounting policies) to the audited consolidated financial statements included elsewhere in this Annual Report for additional description of the significant accounting policies that have been followed in preparing Allego's financial statements. The accounting policies described below are those Allego considers to be the most critical to an understanding of its financial condition and results of operations and that require the most complex and subjective management judgment.

**Revenue Recognition:**

Allego recognizes revenue from the following activities:

- Revenue from charging sessions;
- Revenue from the sale of charging equipment to customers;
- Revenue from installation services; and
- Revenue from the operation and maintenance of charging equipment owned by customers.
- Revenue from consulting services

**Charging sessions:** Charging revenue, which includes electricity price and a service fee, is recognized at a point in time, at the moment of charging, when the control of electricity is transferred to the customer. Allego is acting as a principal in charging transactions for charging equipment that is owned by Allego as it has primary responsibility for these services and discretion in establishing the price of electricity. Allego is considered an agent in charging transactions for charging equipment owned by third-parties as Allego does not have control over electricity. Allego has to reimburse the electricity costs to EV drivers because the charging services to homeowners and company locations are administrative in nature.

**Sale of charging equipment.** Allego has determined that the sale and installation of the equipment constitutes two distinct performance obligations since the integration of both performance obligations is limited, the installation is relatively straight forward, and these installation services can be provided by other suppliers as well. These separate performance obligations are both sold on a stand-alone basis and are distinct within the context of the contract. When the contract includes multiple performance obligations, the transaction price is allocated to each performance obligation based on the stand-alone selling prices. Where such stand-alone selling prices are not directly observable, these are estimated based on expected cost-plus margin. Revenue from the sale of charging equipment is recognized at a point in time when control of the charging equipment is transferred to the customer. Depending on the terms and conditions of the contract, this can be:

- the moment when the customer has the legal title and the physical possession of the charging equipment once the delivery on premise takes place; or
- the moment when the customer has not taken physical possession of the charging equipment and the delivery on premise has not taken place, but the customer has requested Allego to hold onto the charging equipment, and has the ability to direct the use of, and obtain substantially all of the remaining benefits from the charging equipment

**Installation services:** Revenue from installation of charging equipment is recognized over time. Allego uses an input method in measuring progress of the installation services because there is a direct relationship between Allego's effort and the transfer of service to the customer. The input method is based on the proportion of contract costs incurred for work performed to date in proportion to the total estimated costs for the services to be provided.

**Operation and maintenance of charging equipment** Service revenue from operation and maintenance services of charging equipment owned by customers is recognized over time. Services include the deployment of Allego's cloud based platform to monitor chargers and charging sessions, collect, share and analyze charging data as well as the maintenance of the site. Customers are invoiced monthly, and consideration is payable when invoiced. Allego recognizes revenue only when the performance obligation is satisfied, therefore any upfront billing and payments are accounted for as an advance payment.

**Consulting services:** The Group recognizes revenue from providing consulting services on research strategy and development of proprietary integrated tools taking the form of both software and/or hardware. Revenue from providing consulting services is recognized in the accounting period in which the services are rendered. Revenue is recognized over time using the input variable method as a measure of progress.

In the case of fixed-price contracts, the customer pays the fixed amount based on a payment schedule. If the services rendered by the Group exceed the payments, a contract asset is recognized. If the payments exceed the services rendered, a contract liability is recognized.

#### ***Business combinations***

Allego accounts for business combinations using the acquisition method when the acquired set of activities and assets meets the definition of a business as per IFRS 3 and control is transferred to Allego. To determine whether a particular set of activities and assets is a business, Allego assesses whether the set of assets and activities acquired includes, at a minimum, an input and a substantive process and whether outputs can be produced.

The cost of an acquisition is measured at the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, Allego elects whether to measure non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

Any contingent or deferred consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent or deferred consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured, and settlement is accounted for within equity. Otherwise, other contingent or deferred consideration is remeasured at fair value at each reporting date and subsequent changes in the fair value of the consideration are recognized in the consolidated statement of profit or loss.

If the business combination is achieved in stages, the acquisition date carrying value of Allego's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognized in the consolidated statement of profit or loss.

In the event of an asset acquisition, Allego applies the guidance prescribed by IFRS 3 and allocates the cost of the transaction to the assets acquired and liabilities assumed based on their relative fair values at the date of purchase with no goodwill recognized. For any identifiable asset or liability initially measured at an amount other than cost, Allego initially measures that asset or liability at the amount specified in the applicable IFRS Standard. Allego then allocates the residual transaction price to the remaining identifiable assets and liabilities based on their relative fair values at the date of the acquisition.

#### ***Business Combination Agreement***

The Business Combination is not within the scope of IFRS 3 Business Combinations as Spartan does not meet the definition of a business as per IFRS 3. In accordance with an agenda decision of the IFRS Interpretations Committee, the transaction is in scope of IFRS 2 Share-based Payment and was accounted for as a recapitalization in which Allego issued shares in exchange for the net assets of Spartan.

The excess of fair value of Allego Ordinary Shares issued over the fair value of Spartan's identifiable net assets was treated as costs for the service of obtaining a listing and expensed during the reporting period in which the transaction occurred.

Additionally, Allego Ordinary Shares were issued with respect to the PIPE offering. Allego received a total of €136 million in cash and cash equivalents in return for issuing 15 million Allego Ordinary Shares. Allego also entered into a strategic partnership with a PIPE Investor for future charging sessions. A portion of the cash received for the PIPE Investment was therefore accounted for as a contract liability in recognition of future services to be transferred to the customer. The remaining difference between the value of the proceeds on the date of the merger and the nominal value of the shares has been accounted for as share premium. Further details are disclosed in the audited consolidated financial statements.

Furthermore, Allego Ordinary Shares were issued to Madeleine and E8 Investor based on their relative shareholding percentage in Allego Holding immediately before the capital reorganization. This increase in share capital has been offset by a reduction in share premium of the same amount.

### ***Consolidation of Mega-E***

On July 28, 2021, the Allego Group and Meridiam EM SAS — an indirectly wholly-owned subsidiary of Meridiam SAS, Allego’s then ultimate parent — entered into a call option (the “Mega-E Option”) agreement to acquire 100% of the share capital of Mega-E. Allego paid no consideration for the option. The purchase price under the option amounted to €9.5 million in accordance with the Mega-E Option agreement. The call option was exercisable by Allego at the earliest on January 15, 2022, and within the six-month period thereafter.

Until March 16, 2022, the exercise of the call option by Allego was conditioned upon completion of the Business Combination. On March 16, 2022, Allego consummated the Business Combination, thereby becoming able to exercise its call option right pursuant to the terms of the Mega-E Option agreement. Therefore, Allego reassessed its control assessment over Mega-E.

The Mega-E Option provided Allego with potential voting rights, which are considered substantive as of March 16, 2022, because as of that date all conditions under the Mega-E Option were met and Allego was able to exercise its rights thereunder. Allego concluded that these potential voting rights provided them with control over Mega-E. The acquisition of Mega-E by Allego is not considered to be a business combination within the scope of IFRS 3 as Mega-E does not meet the definition of a business as it does not contain any substantive processes. The acquisition of Mega-E has therefore been accounted for as an asset acquisition in Allego’s consolidated financial statements.

### ***Acquisition of MOMA***

On June 7, 2022, Allego acquired shares representing 100% of the share capital of MOMA – an unlisted software company based in France and current service provider for the Group’s EV Cloud platform. This constitutes a Business Combination (specifically referred to as the “***MOMA acquisition***”) as defined in terms of IFRS 3 Business Combinations, thus the transaction has been accounted for by Allego using the acquisition method of accounting in accordance with IFRS 3. Allego has considered the following main judgements:

#### ***Purchase price allocation***

Assets and liabilities of subsidiaries acquired are included at their fair value at the acquisition date. Some assets, namely the investment in equity securities, customer relationships and goodwill at acquisition date had fair values that differed significantly from its carrying values as detailed in Allego’s audited consolidated financial statements.

#### ***Goodwill***

The excess of the purchase price over the fair value of the identifiable assets and liabilities is recorded as goodwill. An impairment assessment is performed at least once annually, or more frequently if indicators of potential impairment exist, which includes evaluating qualitative and quantitative factors to assess the likelihood of an impairment. Such impairment assessments require management to make significant estimates and assumptions, which are further detailed in the consolidated financial statements.

### ***Valuation of share-based payment awards***

#### ***First Special Fees Agreement***

A first share-based payment arrangement was provided to E8 Investor via the First Special Fees Agreement. For more information, see ‘*Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions*’ and Note 11.1 (First Special Fees Agreement) in the consolidated financial statements included elsewhere in this Annual Report. The fair value of the share-based payment arrangement granted under the First Special Fees Agreement was recognized as an expense, with a corresponding increase in accumulated deficit. The total amount to be expensed was determined by reference to the fair value of the share-based payment arrangement, including market performance conditions. The fair value excludes the impact of any service and non-market performance vesting conditions.

For the First Special Fees Agreement, the expense was recognized over the service period. Allego may revise its estimate of the length of the service period, if necessary, if subsequent information indicates that the length of the service period differs from previous estimates. This may result in the reversal of expenses if the estimated service period is extended.

Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model and making assumptions about them. For the measurement of the fair value of equity-settled

transactions with E8 Investor under the First Special Fees Agreement at the grant date (and subsequent measurement dates to determine the fair value of consulting services received, for the portion of share-payment expenses that relates to compensation for external consulting services), Allego uses a valuation model which takes into account how the fees payable in cash and equity instruments will depend on the equity value of Allego at the time of a future liquidity event as defined in the First Special Fees Agreement.

### ***Second Special Fees Agreement***

A second share-based payment arrangement is provided to E8 Investor via the Second Special Fees Agreement. For more information, see “*Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions*” and Note 11.2 (Second Special Fees Agreement) in the consolidated financial statements included elsewhere in this Annual Report. The fair value of the share-based payment arrangement granted under the Second Special Fees Agreement is recognized as an expense, with a corresponding increase in accumulated deficit as long as the agreement remained in place between Madeleine and the consulting firm. The Second Special Fees Agreement was novated from Madeleine to Allego during the reporting period and as a result, the fair value of the share-based payment arrangement granted under the Second Special Fees Agreement is recognized as an expense, with corresponding movements in the provision recognized as part of the novation. The total amount to be expensed is determined by reference to the fair value of the share-based payment arrangement, including market performance conditions. The fair value excludes the impact of any service and non-market performance vesting conditions.

For the Second Special Fees Agreement, the expenses are recognized over the service periods. Allego may revise its estimate of the length of the service period, if necessary, if subsequent information indicates that the length of the service period differs from previous estimates. This may result in the reversal of expenses if the estimated service period is extended.

For the measurement of the fair value of equity-settled transactions with an external consulting firm under the Second Special Fees Agreement at the grant date (and subsequent measurement dates until the novation of the Second Special Fees Agreement to determine the fair value of consulting services received, for the portion of share-payment expenses that relates to compensation for external consulting services) and at the novation date, Allego uses a valuation model which takes into account how the fees payable in cash will depend on the equity value following future equity injection events as defined in the Second Special Fees Agreement. The same valuation model is used for the measurement of the fair value of cash-settled transactions with an external consulting firm under the Second Special Fees Agreement for measurement dates subsequent to the novation of the Second Special Fees Agreement.

The assumptions and model used for estimating the fair value for share-based payment transactions under the First and Second Special Fees Agreements are disclosed in Note 11.1 (First Special Fees Agreement) and Note 11.2 (Second Special Fees Agreement) to the consolidated financial statements included elsewhere in this Annual Report.

### ***Management Incentive Plan***

A share-based payment arrangement is in place related to the Management Incentive Plan. As part of this plan, a key management employee was granted options, with performance vesting criteria attached to some of these options.

The grant date fair value of grant options is recognized as an operating expense with a corresponding increase in accumulated deficit. The fair value is determined at the grant date and the total expense is recognized immediately since the participants are not required to complete a specified period of service period before becoming unconditionally entitled to these equity instruments.

The grant date fair value of the performance options (options subject to predefined performance conditions and the expiry of the blocking period) is recognized as an operating expense with a corresponding increase in accumulated deficit. The fair value is determined at the grant date and the total expense is recognized over the vesting period. At the end of each reporting period, Allego revises the expense for the services received based on the non-market vesting and service conditions. The impact is recognized in the consolidated statement of profit or loss with the corresponding increase in accumulated deficit.

The grant options and performance options do not include any market conditions or non-vesting conditions that should be included in their fair value. The grant date fair value remains the same over time.

As the exercise price applicable to the options is negligible, no specific option-pricing models are used by Allego and the fair value of options granted under Allego’s management incentive plan is determined by reference to the fair value of Allego’s share at the grant date, excluding the impact of any service and non-market performance vesting conditions (e.g.

operational EBITDA, financing targets, compliance and reporting, engagement with investors and remaining an employee of the company over a specified time period). The options do not include any market conditions or non-vesting conditions that should be included in the fair value at recognition.

***Impairment of non-financial assets (including goodwill)***

At each reporting date, Allego assesses an asset or a group of assets for impairment whenever there is an indication that the carrying amounts of the asset or group of assets may not be recoverable. In such event Allego compares the assets or group of assets carrying value with its recoverable amount, which is the higher of the value in use and the fair value less costs of disposal.

Goodwill impairment testing is performed annually or more frequently if indicators of potential impairment exist, which includes evaluating qualitative and quantitative factors to assess the likelihood of an impairment. In such case the carrying amount of goodwill is compared with the recoverable amount of the Cash Generating Units ("*CGU*") it was allocated to, which is the higher of the CGU's value in use and the CGU's fair value less cost to sell.

Allego uses a discounted cash flow ("*DCF*") model to determine the value-in-use. The cash flow projections contain assumptions and estimates of future expectations. This value in use is determined using cash flow projections from financial budgets approved by senior management covering a five-year period, cash flows beyond the five-year period are extrapolated using a growth rate and the future cash flows are discounted. The value in use amount is sensitive to the discount rate used in the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

***Recognition of deferred tax assets***

Deferred tax assets are carried on the basis of the tax consequences of the realization or settlement of assets, provisions, liabilities or accruals and deferred income as planned by Allego at the reporting date. A deferred tax asset is recognized to the extent that it is probable that future taxable profit will be available for set-off. In this assessment, Allego includes the availability of deferred tax liabilities set-off, the possibility of planning of fiscal results and the level of future taxable profits in combination with the time and/or period in which the deferred tax assets are realized.

***Valuation of warrant liabilities***

Public and Private Placement Warrants originally issued by Spartan to its public shareholders and its sponsors were converted on the closing date of the Business Combination Agreement into a right to acquire one Allego Ordinary Share on substantially the same terms as were in effect immediately prior to the closing date.

On the closing date of the Business Combination Agreement (March 16, 2022), Allego issued Warrants to registered holders of Spartan's Public and Private Placement Warrants in exchange for the originally issued Warrants. Allego assumed and continues to hold these Warrants on the same terms as before (unless the options were exercised during the period).

According to management's assessment, the Warrants fall within the scope of IAS 32 and have been classified as a derivative financial liability. In accordance with IFRS 9, derivatives that are classified as financial liabilities shall be measured at fair value with subsequent changes in fair value to be recognized in the consolidated statement of profit or loss.

Fair value valuations require management to make significant estimates and assumptions regarding the measurement of the Warrant derivative liabilities. The Warrants qualified for the level 3 category in the fair value hierarchy at the time of their issuance due to the fact that they were not traded in an active market at the time and their fair value was determined using a binomial tree framework. As at December 31, 2022, the Warrants qualify for the level 1 category in the fair value hierarchy due to the fact that their fair value is determined based on quoted market inputs. On April 15, 2022, the Private Placement Warrants were exercised with the fair value on that date being determined based on quoted market inputs such as the spot price per share. For further details regarding the inputs and assumptions inherent in the Warrants' valuation models used refer to the consolidated financial statements included elsewhere in this Annual Report.

***Valuation of purchase options***

During the year ended December 31, 2021, Allego entered into two purchase option agreements to acquire an unlisted software company, MOMA, and into a purchase option agreement to acquire Mega-E. The fair value of the purchase options recorded in the consolidated statement of financial position cannot be measured based on quoted prices in active

stock markets. Their fair value is therefore measured using an option pricing model, i.e. Black-Scholes pricing model. The inputs to this model are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing the fair value. Judgements include considerations of inputs such as the market value of the underlying assets (*i.e.*, spot price per share) and volatility. Changes in assumptions relating to these factors could affect the reported fair value of the purchase options.

Due to the exercise of the MOMA options and the consolidation of Mega-E, as of December 31, 2022, these options are not recognized on the consolidated statement of financial position.

#### **Related Party Transactions**

See Note 35 (Related-party transactions) to the consolidated financial statements included elsewhere in this Annual Report and *Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions* for more information regarding transactions with related parties.

#### **Recent Accounting Pronouncements**

See Note 2 (Significant accounting policies) to the consolidated financial statements included elsewhere in this Annual Report for more information regarding recently issued accounting pronouncements.

#### **Internal Control Over Financial Reporting**

In connection with the preparation and audit of Allego’s consolidated financial statements as of December 31, 2022 and 2021 and for the years ended December 31, 2022, 2021 and 2020, material weaknesses were identified in its internal control over financial reporting. See the subsection entitled “*Item 3.B. Risk Factors—Allego has identified, and has previously identified, material weaknesses in its internal control over financial reporting. If Allego is unable to remediate these material weaknesses, or if Allego identifies additional material weaknesses in the future or otherwise fails to maintain an effective system of internal control over financial reporting, this may result in material misstatements of Allego consolidated financial statements or cause Allego to fail to meet its periodic reporting obligations, which may have an adverse effect on the share price*” and “*Item 15. Controls and Procedures*”.

#### **JOBS Act**

On April 5, 2012, the JOBS Act was signed into law in the United States. The JOBS Act contains provisions that, among other things, relax certain reporting requirements for qualifying public companies. Allego qualifies as an “*emerging growth company*” under the JOBS Act and is allowed to comply with new or revised accounting pronouncements based on the effective date for private (not publicly traded) companies. As an “*emerging growth company*,” Allego is not required to, among other things, (a) provide an auditor’s attestation report on our system of internal control over financial reporting, (b) provide all of the compensation disclosure that may be required of non-emerging growth public companies, (c) comply with any requirement that may be adopted by the Public Company Accounting Oversight Board regarding mandatory audit firm rotation or a supplement to the auditor’s report providing additional information about the audit and the financial statements (auditor discussion and analysis) and (d) disclose comparisons of the chief executive officer’s compensation to median employee compensation. These exemptions will apply for a period of five years following the completion of a business combination or until we otherwise no longer qualify as an “*emerging growth company*.”

**ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES****A. Directors and Senior Management**

The following table sets forth the names, ages and positions of our executive officers and directors.

<b>Name</b>	<b>Age</b>	<b>Position</b>
Mathieu Bonnet	49	Chief Executive Officer and Director
Ton Louwers	57	Chief Financial Officer
Alexis Galley	58	Chief Technical Officer
Jane Garvey	79	Director
Christian Vollmann	45	Director
Julia Prescott	64	Director
Julien Touati	41	Director
Thomas Josef Maier	64	Director
Patrick Sullivan	63	Director
Ronald Stroman	71	Director
Thierry Déau	53	Temporary Director

**Mathieu Bonnet** joined Allego in 2019 as Chief Executive Officer. Before Allego, he founded a group of energy companies including E6, a European energy management platform for renewable energy. Mr. Bonnet also served as Chief Executive Officer of Compagnie Nationale du Rhône (“*CNR*”), the second biggest hydro company in France. Prior to CNR, he worked for Electrabel in Belgium, where he was in charge of outage management, and the Ministry of Industry, where he was in charge of implementing programs for small-and-medium-size enterprise development in the Provence region. Additionally, he spent several years in the United States, working on commercial bilateral issues between the United States and France and leading programs to sustain French exports in the United States. Mr. Bonnet graduated from Ecole Polytechnique in 1993, where he ranked first in mathematics, and Ecole des Mines de Paris in 1996. He also holds a Masters of Nuclear Engineering from the Université Catholique de Louvain.

**Ton Louwers** has served as Chief Financial Officer of Allego since September 2021. Mr. Louwers previously worked for a small dredging company in the Netherlands, which he departed when he was asked to assist Alliander in the divestment of the business now operated under Allego Holding. Initially offering support to Allego’s management in 2018, Mr. Louwers soon took over as the interim Chief Financial Officer until Meridiam S.A.S (together with its subsidiaries and affiliates, “*Meridiam*”) closed the acquisition. He soon shifted focus to Operations and served as Chief Operating Officer until taking the Chief Financial Officer position again in September 2021. Previously, Mr. Louwers served as Chief Financial Officer for the Nordic Division of Royal Imtech, and Chief Financial Officer for Royal Imtech’s Benelux Division. He has also served as Chief Financial Officer of the industrial service company Hertel and Chief Financial Officer for the Netherlands at Thales, in addition to numerous other positions. Mr. Louwers graduated from the University of Amsterdam and holds a Masters in Business Economics, followed by a post-graduate degree as a chartered accountant.

**Alexis Galley** has worked for Allego since 2019 and has been Chief Technology Officer since 2021. Before Allego, Mr. Galley worked at MOMA, a company specializing in IT software platforms, where he served as Chief Operations Officer and Chief Executive Officer, and served as the chairman of Voltalis, a spin-off of MOMA, specializing in demand response. Prior to MOMA, he was the Chief Executive Officer of Kinomai, a video tools company, and managing director in charge of e-commerce logistics for the retailer Carrefour. Mr. Galley also worked for the French Minister of the Environment, as well as a large industrial group developing electric components for mobile phone manufacturers and the French Corps des Mines. He is a graduate of Ecole des Mines de Paris where he studied mathematics and physics.

**Jane Garvey** has served as a director on our Board since Closing and has served as the Global Chairman of Meridiam Infrastructure, a global investor and asset manager specializing in long-term public infrastructure projects, since August 2009. Before Meridiam, Ms. Garvey was the 14th Administrator of the Federal Aviation Administration (“*FAA*”) from August 1997 to August 2002, where she led the FAA through the formidable events of September 11, 2001 and through many safety and modernization milestones. She also served as the Acting Administrator and Deputy Administrator of the Federal Highway Administration. After leaving public service, Ms. Garvey led the U.S. Public/Private Partnerships advisory group at JP Morgan, where she advised states on financing strategies to facilitate project delivery for state governments. She joined the board of United Airlines Holdings, Inc. in 2016 and served as chairman of the board from 2017 until 2019. Ms. Garvey has served as a member of the board of Blade Urban Mobility since 2020.

**Christian Vollmann** has served as a director on our Board since Closing and is an entrepreneur and angel investor who has made 75 angel investments since 2005. His most recent venture is nebenan.de, Germany's leading social neighborhood network. Before nebenan.de, Mr. Vollmann built iLove.de into Germany's leading dating service at the start of the millennium, founded the online video portal MyVideo.de and co-founded Affinitas (now Spark Networks), a global leader in online dating with activities in 29 countries. Mr. Vollmann serves as the Vice Chairman of the board of directors of Linus Digital Finance AG and is a Venture Partner and Member of the Investment Committee of PropTech1 Ventures. Mr. Vollmann advises the German Federal Ministry of Economics as Chairman of the Advisory Board Young Digital Economy and advocates for the interests of startups as Vice-Chairman of the German Startups Association.

**Julia Prescott** has served as a director on our Board since Closing and has been a co-Founder of Meridiam since 2005 and currently serves as Chief Strategy Officer. Before Meridiam, Ms. Prescott was a Senior Director at HBOS, London. Prior to HBOS, she served as a Director and Head of Project Advisory at Charterhouse Bank and a Director and Head of Project Finance at Hill Samuel Bank. Ms. Prescott has served as the chair of London-based Neuconnect Limited, a company developing a major energy interconnector between the United Kingdom and Germany, since 2017 and has served on the board of Fulcrum Infrastructure Group since 2007. Ms. Prescott was a non-executive director for InfraCo Asia Investments between 2016 and 2018 and the Emerging Africa Infrastructure Fund from 2015 to 2018. Ms. Prescott is a Commissioner for the UK's National Infrastructure Commission, a member of the UK's Investment Council, a member of the Advisory Panel of Glennmont Partners and a non-executive director at the Port of Tyne. She is currently on the board of P4G, a multilateral organization focused on environmental public-private partnerships, and is an Honorary Professor at University College London.

**Julien Touati** has served as a director on our Board since Closing and joined Meridiam in 2011. He currently serves as a Partner, Corporate Development Director, and Executive Committee Member with responsibility over the management of energy transition and the strategic developments of the group. Prior to this role, Mr. Touati set up Meridiam activities in Africa and led infrastructure investments in Europe. Before Meridiam, Mr. Touati was responsible for managing the French Government's shareholding in Électricité de France, in addition to other roles at SNCF Réseau, Veolia, Capgemini and the infrastructure division of Proparco. He is an expert in the energy transition investment space, a contributor to several publications, and a member of several international think tanks. Mr. Touati is also on the board of several leading green infrastructure solution providers, including Allego, Voltalis, and Evergaz. He holds a Master's Degree in Engineering, a Master's Degree in Environmental and Energy Economics and a Master of Public Affairs from the École des Ponts in Paris. He is an Atlantic Council Millennium Fellow.

**Thomas Josef Maier** has served as a director on our Board since Closing and currently serves as a director on the Regional Advisory Board of Meridiam Infrastructure Europe and Eastern Europe. He is also a strategic advisor to the Global Infrastructure Hub, a G20 body and has been Chairman of the Board of INFEN Limited since 2017. Mr. Maier has been a member of the Advisory Board of Stirling Infrastructure Partners since April 2021. Previously, he was Managing Director for Infrastructure at the European Bank for Reconstruction and Development, where he oversaw both commercial and social infrastructure delivery. He has chaired the Global Infrastructure Council of the World Economic Forum and has been involved in infrastructure related work streams of G20 since 2013. He served on the board of Global Ports Holding from 2017 to 2020.

**Patrick T. Sullivan** has served as a director on our Board since Closing and served as a partner at PricewaterhouseCoopers LLP (**PwC**) from 1993 until his retirement in 2020. From 2014 to 2020, he led PwC's New York market private equity practice. Over his career, he primarily led teams in assisting global private equity and corporate clients in their evaluation of potential transactions across a wide range of industries, including consumer, energy, technology, business services and industrials. In addition, he worked extensively with portfolio companies on financings, operational improvements, and public and private exits. Since his retirement from PwC in 2020, Mr. Sullivan has provided consulting services to private equity firms and their portfolio companies. Mr. Sullivan obtained his B.S. in Business Administration from the University of Maryland.

**Ronald Stroman** has served as a director on our Board since Closing and is currently serving on the United States Postal Service Board of Governors (the **U.S. Postal Board**), a position he was appointed to by President Joseph Biden and confirmed by the Senate, with his current term expiring on December 8, 2028. Mr. Stroman also serves on the U.S. Postal Board Audit and Finance Committee and Operations Committee. Previously, Mr. Stroman served as the 20th Deputy Postmaster General ("**DPMG**"), the second-highest ranking postal executive, from March 2011 until his retirement in June 2020. While serving as DPMG, Mr. Stroman was directly responsible for the Postal Service functions of Government Relations and Public Policy, International Postal Affairs, Sustainability, and the Judicial Officer Department. Mr. Stroman also had more than 30 years of professional experience in government, legislative affairs and leadership before becoming

DPMG. Mr. Stroman earned his undergraduate degree from Manhattan College and his Juris Doctorate from Rutgers University Law Center.

**Thierry Déau** has served as a temporary director of our Board since October 13, 2022 and is Chairman and Chief Executive Officer of Meridiam. He founded Meridiam, an independent investment firm specialized in the development, financing and management of long-term and sustainable infrastructure projects in 2005. Managing over \$19 billion of assets, the firm has to date more than 100 projects under development, construction or in operation. Prior to Meridiam, Mr. Déau worked for France’s Caisse des Dépôts et Consignations where he held several positions with its engineering and development subsidiary Egis Projects to his appointment as Chief Executive Officer in 2001. Mr. Déau is currently a board member of Fondation des Ponts, Chairman of Archery for Inclusive Leadership and founder of Africa Infrastructure fellowship program Foundation (AIFP Foundation). In addition, he is a founding member of the Sustainable Development Investment Partnership (SDIP) of the World Economic Forum, a member of Prince of Wales’ Sustainable Markets Council for the Commonwealth, and honorary chairman of the Long Term Infrastructure Association (LTIA). Mr. Déau graduated from École Nationale des Ponts et Chaussées engineering School.

**B. Compensation**

Our policy concerning the compensation of the directors shall be determined with due observance of the relevant statutory requirements and applicable company policies.

Currently, Allego pays Non-Executive Directors an annual base fee of \$100,000 payable per annum. The Lead Non-Executive Director is entitled to an additional fee of \$25,000 for the additional duties and responsibilities related to that role, payable per annum. Allego also pays each Non-Executive Director serving on one of Allego’s committees of the board an additional fee as set forth below:

- Audit Committee—\$25,000 (chairperson), \$10,000 (other members)
- Compensation Committee—\$25,000 (chairperson), \$10,000 (other members)
- Nominating and Corporate Governance Committee—\$25,000 (chairperson), \$10,000 (other members)

The Allego Board shall submit proposals concerning compensation arrangements for the Allego Board in the form of Allego Ordinary Shares or rights to subscribe for Allego Ordinary Shares to the General Meeting for approval. This proposal must at least include the number of Allego Ordinary Shares or rights to subscribe for Allego Ordinary Shares that may be awarded to the Allego Board and which criteria apply for such awards or changes thereto. The absence of the approval of the General Meeting shall not affect the powers of representation.

**Historical Compensation**

*Historical Executive and Non-Executive Directors*

The following table summarizes the compensation received by the members of the Allego Board from Allego for the year ended December 31, 2022:

<b>Executive director</b> (in €'000)	<b>Base compensation</b> <sup>(1)</sup>	<b>Additional benefits</b> <sup>(2)</sup>	<b>Pension expenses</b>	<b>Share-based payments</b> <sup>(3)</sup>	<b>Total</b>
M.J.J. Bonnet (CEO)	1,441	81	—	—	<b>1,522</b>

- (1) Base compensation represents the cash compensation paid annually to our CEO and statutory director (or his companies), as well as any social security payment relating to premiums paid in addition to the cash salary for mandatory employee insurances required by Dutch law and paid to the tax authorities.
- (2) Additional benefits include reimbursement of housing expenses.
- (3) Certain of Allego’s executive officers have received and may in the future receive additional share-based compensation from E8 Investor, including in connection with the employment agreement with Mathieu Bonnet. For

## Table of Contents

further detail, see “Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions”. These are not included within the historical compensation amounts as they are not paid by Allego.

Non-executive directors (in €'000) <sup>***</sup>	Board of directors membership	Committee membership	Total
J.C. Garvey*	—	—	—
J.M. Touati*	—	—	—
C. Vollman	78	8	86
J.E. Prescott*	—	—	—
T.J. Maier	78	8	86
P.T. Sullivan	78	27	105
R.A. Stroman	78	20	98
S.V.F. Lagumina**	—	—	—
T.E. Déau*	—	—	—
<b>Total</b>	<b>312</b>	<b>63</b>	<b>375</b>

\* Please note that Ms. Jane Garvey, Mr. Julien Touati, Ms. Julia Prescott, Mr. Thierry Déau and Ms. Sandra Lagumina are employed by Meridiam SAS and did not receive compensation for their Allego Board of Directors activities.

\*\* Ms. Sandra Lagumina resigned on July 31, 2022.

\*\*\* Amounts are based on the annual fees prorated for the length of service and translated at the average EUR/USD exchange rate for the financial year ended December 31, 2022.

### Historical Executive Officers

For the fiscal year ended December 31, 2022 (“Fiscal 2022”), Allego’s executive officers were:

- Mathieu Bonnet, Chief Executive Officer
- Ton Louwers, Chief Financial Officer
- Alexis Galley, Chief Technology Officer

### Historical Compensation of Allego’s Executive Officers

The amount of compensation paid, and benefits in kind granted, to Allego’s executive officers for the year ended December 31, 2022 is described in the table below (excluding the CEO, whose compensation is included in the discussion of the compensation earned by the Allego Board above). We are providing disclosure on an aggregate basis, as disclosure of compensation on an individual basis is not required in Allego’s home country and is not otherwise publicly disclosed by Allego.

All executive officers (excluding CEO)	(in € '000)
Base compensation <sup>(1)</sup>	2,418
Share-based compensation <sup>(2)</sup>	14,361
Additional benefit payments <sup>(3)</sup>	31
Total compensation	16,810

- (1) Base compensation represents the cash compensation paid annually to our executive officers (or their companies), as well as any social security payment relating to premiums paid in addition to the cash salary for mandatory employee insurances required by Dutch law and paid to the tax authorities.
- (2) Share-based compensation includes payments made by Allego under the Management Incentive Plan described below. For details related to the specific share-based compensation received, refer to Note 11 (Share-based payments) to the consolidated financial statements elsewhere in this Annual Report. Additionally, certain of Allego’s executive officers have received and may in the future receive additional share-based compensation from E8 Investor, in connection with the employment agreements with Mathieu Bonnet and Alexis Galley. For further detail, see “Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions”. These are not included within the historical compensation amounts as they are not paid by Allego.
- (3) Additional benefits include reimbursement of car and housing expenses.

### *Management Incentive Plan*

The Allego Board and the Compensation Committee adopted the management incentive plan ("MIP") on April 20, 2022. The MIP is designed to provide long-term incentives for key management employees to deliver long-term shareholder returns, while enabling it to attract, retain, incentivize and reward individuals who will contribute to its long-term success. The plan includes two types of granted options: the right to acquire a percentage of the Company's issued share capital immediately following the listing, subject to the expiry of a blocking period of 18 months, and the right to acquire a percentage of the Company's issued share capital immediately following the listing, subject to predefined performance conditions and the expiry of the blocking period. The granted options carry no dividend or voting rights. As of December 31, 2022, there was one participant in the MIP.

### *Long Term Incentive Plan*

The Allego Board and the Compensation Committee approved the general framework for the Long Term Incentive Plan ("LTIP") on the Closing Date. The purpose of the LTIP is to provide eligible directors and employees the opportunity to receive stock-based incentive awards for employee motivation and retention and to align the economic interests of such persons with those of Allego's shareholders. The delivery of certain shares or other instruments under the LTIP to directors and key management are agreed and approved in certain Allego Board meetings. On December 20, 2022, the Allego Board approved a detailed plan for the LTIP for future years.

As it relates to the LTIP for Allego executive officers, options may be granted annually and would be exercisable after two years. The amount of options issued under the LTIP are based on four equally-weighted criteria: revenue, operational EBITDA, renewable GWh delivered, and appreciation at the discretion of the Board. Targets are set annually.

As of December 31, 2022, no awards were issued under the LTIP.

## **C. Board Practices**

### **Composition of the Board of Directors**

Our business and affairs are managed under the direction of the Allego Board. We currently have a classified board of directors, with two directors in Class I (Thomas Maier and Christian Vollman) which will expire in 2023, three directors in Class II (Jane Garvey and Patrick Sullivan), which will expire in 2024, and four directors in Class III (Mathieu Bonnet, Julien Touati, Julia Prescott and Ronald Stroman), which will expire in 2025. Additionally, Thierry Déau is currently serving as a temporary director, with his term expiring in 2023.

### **Foreign Private Issuer Status**

Allego was formed under the laws of the Netherlands in 2021. The majority of Allego's outstanding voting securities are directly owned of record by non-U.S. residents. In addition, U.S. residents do not comprise a majority of Allego's executive officers or directors, and, following the consummation of the Business Combination Allego's assets are located, and its business is principally administered, outside of the United States. As a result, Allego reports under the Exchange Act as a non-U.S. company with foreign private issuer status. Under Rule 405 of the Securities Act, the determination of foreign private issuer status is made annually on the last business day of an issuer's most recently completed second fiscal quarter and, accordingly, the next determination will be made with respect to Allego on June 30, 2023. For so long as Allego qualifies as a foreign private issuer, it will be exempt from certain provisions of the Exchange Act that are applicable to U.S. domestic public companies, including:

- the sections of the Exchange Act regulating the solicitation of proxies, consents or authorizations in respect of a security registered under the Exchange Act;
- the sections of the Exchange Act requiring insiders to file public reports of their stock ownership and trading activities and imposing liability for insiders who profit from trades made within a short period of time;
- the rules under the Exchange Act requiring the filing with the SEC of an annual report on Form 10-K (although we will file annual reports on a corresponding form for foreign private issuers), quarterly reports on Form 10-Q containing unaudited financial and other specified information (although we will file semi-annual reports on a current reporting form for foreign private issuers), or current reports on Form 8-K, upon the occurrence of specified significant events;
- requirements to follow certain corporate governance practices, and may instead follow home country practices; and

- Regulation Fair Disclosure or Regulation FD, which regulates selective disclosure of material non-public information by issuers.

Accordingly, there may be less publicly available information concerning Allego’s business than there would be if it were a U.S. public company. Additionally, certain accommodations in the NYSE corporate governance standards allow foreign private issuers, such as Allego, to follow “*home country*” corporate governance practices in lieu of the otherwise applicable corporate governance standards. In addition, unlike the corporate governance requirements of the NYSE, our “home country” corporate governance practices do not require us to (i) have a board that is composed of a majority of “independent directors” as defined under the rules of the NYSE; (ii) have a compensation committee that is composed entirely of independent directors; and (iii) have a nominating and corporate governance committee that is composed entirely of independent directors. For as long as we qualify as a foreign private issuer, we may take advantage of these exemptions.

#### **Controlled Company Exception**

We are a “controlled company” within the meaning of the NYSE corporate governance standards. Under the NYSE rules, a controlled company is exempt from certain NYSE corporate governance requirements. Although we are a controlled company at this time we have chosen not to avail ourselves of the exemptions from certain NYSE governance requirements. If we do choose to avail ourselves of the exemptions in the future, shareholders will not have the same protections provided to shareholders of companies that are subject to all NYSE corporate governance requirements.

#### **Board Committees**

The Allego Board has an Audit Committee, a Compensation Committee, a Nominating and Corporate Governance Committee and a Strategy and Business Committee. Each committee has a charter that has been adopted by the Allego Board. Each committee has the responsibilities described below.

##### *Audit Committee*

Allego has established an Audit Committee that is in compliance with NYSE listing standards and Rule 10A-3 under the Exchange Act. Ronald Stroman, Patrick Sullivan and Thomas Josef Maier serve on the Audit Committee, and Mr. Stroman serves as the Chair. Mr. Sullivan and Mr. Maier each qualify as an audit committee financial expert as defined under applicable SEC rules.

The Audit Committee operates under a written charter adopted by the Allego Board. The primary purposes of Allego’s Audit Committee under the committee’s charter are to assist the Allego Board’s oversight of, among other things, the following:

- audits of Allego’s financial statements;
- the integrity of Allego’s financial statements;
- our process relating to risk management and the conduct and systems of internal control over financial reporting and disclosure controls and procedures;
- the qualifications, engagement, compensation, independence and performance of Allego’s independent auditor; and
- the performance of Allego’s internal audit function.

##### *Compensation Committee*

Allego has established a Compensation Committee that is in compliance with the rules and regulations of the SEC and the NYSE. Julien Touati, Jane Garvey, Julia Prescott, and Patrick Sullivan serve on the Compensation Committee, and Mr. Sullivan serves as the Chair.

The Compensation Committee operates under a written charter adopted by the Board of Directors. The primary purposes of Allego’s Compensation Committee under the committee’s charter is to assist the Allego Board in overseeing our compensation policies and practices, including:

- determining and/or approving and recommending to the Allego Board for its approval the compensation of Allego’s executive officers and directors; and
- reviewing and approving and recommending to the Allego Board for its approval incentive compensation and equity compensation policies and programs.

*Nominating and Corporate Governance Committee*

Allego has established a Nominating and Corporate Governance Committee that is in compliance with the rules and regulations of the SEC and the NYSE. Julien Touati, Jane Garvey, Julia Prescott, and Patrick Sullivan serve on the Nominating and Corporate Governance Committee, and Ms. Prescott serves as the Chair.

The Nominating and Corporate Governance Committee operates under a written charter adopted by the Board of Directors. The primary purposes of Allego’s Nominating and Corporate Governance Committee under the committee’s charter includes:

- identifying, screening and recommending for appointment to the Allego Board individuals qualified to serve as directors;
- developing, recommending to the Allego Board and reviewing Allego’s Corporate Governance Guidelines;
- coordinating and overseeing the self-evaluation of the Allego Board and its committees; and
- reviewing on a regular basis the overall corporate governance of Allego and recommending improvements to the Allego Board where appropriate.

*Strategy and Business Committee*

In addition to the above committees, the Allego Board has established a Strategy and Business Committee, composed of Mathieu Bonnet, Christian Vollmann, Julien Touati and Julia Prescott, and Mr. Touati serves as the Chair. The primary purposes of Allego’s Strategy and Business Committee under the committee’s charter includes:

- preparing the business plan including a gap analyses;
- formulating and recording Allego’s objectives mentioned in the business plan;
- reporting about strategic developments;
- overseeing Allego’s strategy and business development; and
- submitting proposals to the Allego Board and reviewing possible acquisitions, divestments, joint ventures and other corporate alliances of Allego.

**D. Employees**

As of December 31, 2022, we had approximately 220 employees globally. None of these employees are represented by a labor union and we consider our relationship with our employees to be good.

**E. Share Ownership**

Ownership of Allego Ordinary Shares by the directors and executive officers of Allego as a group is set forth in *Item 7.A Major Shareholders and Related Party Transactions —Major Shareholders* of this Annual Report.

**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**

**A. Major Shareholders**

The table below sets forth information regarding the beneficial ownership of Allego Ordinary Shares.

[Table of Contents](#)

Beneficial ownership is determined according to the rules of the SEC, which generally provide that a person has a beneficial ownership of a security if, she or it possess sole or shared voting or investment power over that security, and includes shares underlying options and warrants that are currently exercisable or exercisable within 60 days.

Unless otherwise indicated, we believe that all persons named in the table below have sole voting and investment power with respect to all Allego Ordinary Shares beneficially owned by them. Except as otherwise indicated the address for each shareholder listed below is Westervoortsedijk 73 KB, 6827 AV Arnhem, the Netherlands.

The percentages in the table below are computed on the basis of 267,177,592 Allego Ordinary Shares issued and outstanding.

Name and Address of Beneficial Owner	Number of Allego Ordinary Shares	Percentage Of Allego Ordinary Shares
Madeleine	238,935,061 <sup>(1)</sup>	89.4 %
E8 Investor	41,097,994 <sup>(2)</sup>	15.4 %
Spartan Acquisition Sponsor III	18,706,989 <sup>(3)</sup>	7.0 %
All Allego directors and executive officers as a group	* <sup>(4) (5)</sup>	*

\* Less than one percent of outstanding Allego Ordinary Shares

- (1) According to a Schedule 13G filed on February 10, 2023, Madeleine has sole voting and dispositive power over 197,837,067 Allego Ordinary Shares it directly holds. With respect to 41,097,994 Allego Ordinary Shares held by E8 Investor, Madeleine also has, as a result of a power of attorney agreement, sole voting power over all of such shares and shared dispositive power over 26,584,264 of such shares. Meridiam, as the manager of the indirect parent entities of Madeleine (and Emmanuel Rotat, as managing director of Meridiam) has shared voting and dispositive power over the Ordinary Shares beneficially owned by Madeleine. The address of the principal business office of Madeleine is Zuidplein 126, WTC, Tower H, Floor 15, Amsterdam, Netherlands, 1077 XV. The principal business office of Meridiam and Mr. Rotat is 4 place de l'Opera 75002 Paris, France.
- (2) According to a Schedule 13G filed February 9, 2023, E8 Investor, Bruno Heintz and Jean-Marc Oury have shared dispositive power over 41,097,994 Allego Ordinary Shares. Investment decisions with respect to Allego Ordinary Shares held by E8 Investor are made jointly by Mr. Heintz and Mr. Oury. The registered office of E8 Investor, Mr. Heintz and Mr. Oury is 75 avenue des Champs-Élysées, 75008 Paris.
- (3) According to a Schedule 13G filed February 13, 2023, (i) AP Spartan Energy Holdings III (PPW), LLC ("**AP PPW**") has shared voting and dispositive power over 1,334,949 Allego Ordinary Shares, (ii) AP Spartan Energy Holdings III, L.P. ("**AP Spartan**") has shared voting and dispositive power over 13,700,000 Allego Ordinary Shares, (iii) AP Spartan Energy Holdings III (PIPE), LLC ("**PIPE Holdings**") has shared voting and dispositive power over 3,672,040 Allego Ordinary Shares, (iv) Apollo Natural Resources Partners (P2) III, L.P. ("**ANRP (P2)**") has shared voting and dispositive power over 13,700,000 Allego Ordinary Shares, (v) ANRP III (NGL Debt), L.P. ("**NGL Debt**") has shared voting and dispositive power over 3,672,040 Allego Ordinary Shares, (vi) ANRP III Intermediate Holdings II, L.P. ("**ANRP Intermediate**") has shared voting and dispositive power over 1,334,949 Allego Ordinary Shares, (vii) Apollo ANRP Advisors III (P2), L.P. ("**ANRP Advisors (P2)**") has shared voting and dispositive power over 13,700,000 Allego Ordinary Shares, (viii) Apollo ANRP Advisors III, L.P. ("**ANRP Advisors**") has shared voting and dispositive power over 18,706,989 Allego Ordinary Shares, (ix) Apollo ANRP Capital Management III, LLC ("**ANRP Capital Management**") has shared voting and dispositive power over 18,706,989 Allego Ordinary Shares, (x) APH Holdings, L.P. ("**APH Holdings**") has shared voting and dispositive power over 18,706,989 Allego Ordinary Shares, and (xi) Apollo Principal Holdings III GP, Ltd. ("**Principal Holdings III GP**") has shared voting and dispositive power over 18,706,989 Allego Ordinary Shares. AP PPW, AP Spartan and PIPE Holdings each hold Allego Ordinary Shares. ANRP (P2) and ANRP Intermediate are the members of AP PPW. ANRP (P2) and NGL Debt are the members of PIPE Holdings. ANRP Advisors (P2) is the general partner of ANRP (P2). ANRP Advisors is the general partner of each of AP Spartan, ANRP Intermediate and NGL Debt. ANRP Capital Management is the general partner of ANRP Advisors and ANRP Advisors (P2). APH Holdings is the sole member of ANRP Capital Management. Principal Holdings III GP is the general partner of APH Holdings. Scott Kleinman, Marc Rowan and James Zelter are the directors of Principal Holdings III GP, and as such may be deemed to have voting and dispositive control of the securities held of record by AP PPW, AP Spartan and PIPE Holdings. The address of the principal business office of each of AP PPW, PIPE Holdings, AP Spartan, ANRP (P2), ANRP Intermediate and NGL Debt is 9 West 57th Street, 43rd Floor, New York, New York 10019. The address of the

principal business office of each of ANRP Advisors, ANRP Advisors (P2) and Principal Holdings III GP is c/o Walkers Corporate Limited, Cayman Corporate Centre, 27 Hospital Road, George Town, Grand Cayman KY1-9008. The address of the principal business office of each of ANRP Capital Management and APH Holdings is One Manhattanville Road, Suite 201, Purchase, New York, 10577.

- (4) See “*Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions—E8 Arrangements—Additional E8 Arrangements*” for a description of the fees Messrs. Bonnet and Galley are entitled to receive from E8 Investor, if any, relating to the Special Fees Agreements.
- (5) Mr. Déau, Mr. Touati, Ms. Garvey and Ms. Prescott are affiliated with Meridiam. See “*Item 6. Directors, Senior Management and Employees—A. Directors and Senior Management*.”.

All of Allego Ordinary Shares have the same voting rights and no major shareholder of Allego has different voting rights. Based on the information in Allego’s shareholder register, as of May 12, 2023, 267,177,592 Allego Ordinary Shares were issued and outstanding, of which 27,692,531 were held by 7 record holders in the United States. The actual number of shareholders is greater than this number of record holders and includes shareholders who are beneficial owners but whose shares are held in street name by brokers and other nominees. We are not aware of any arrangement that may, at a subsequent date, result in a change of control of the Company.

## **B. Related Party Transactions**

### **E8 Arrangements**

#### ***Performance Fees Agreement***

Under the Performance Fees Agreement, dated December 16, 2020, as amended, by and between Madeleine and E8 Investor (the “***Performance Fees Agreement***”), E8 Investor provided assistance and support to Allego Holding and its subsidiaries in connection with negotiating and securing certain commercial contracts. In exchange for such services, E8 Investor is entitled to receive certain fees, ranging between 2.3% and 2.7% of the net value of those contracts, with 40% of those fees payable upon execution and the remaining 60% being linked to gross margin targets. The Performance Fees Agreement was amended on April 29, 2021 so that the performance compensation is limited to a specified list of contracts. The agreement was novated from Madeleine to Allego Holding on August 10, 2021.

#### ***First Special Fees Agreement***

On December 16, 2020, Allego Holdings' then immediate parent entity — Madeleine — entered into a first agreement (the “***First Special Fees Agreement***”), pursuant to which E8 Investor provided services to the Group relating to the strategic and operational advice for one or more contemplated share transactions (a “***Liquidity Event***” or “***Liquidity Events***”). The Special Fees Agreement was set to terminate on December 31, 2023. As consideration for the services provided pursuant to the First Special Fees Agreement, E8 Investor was entitled to fees payable by Madeleine in cash (“***Part A***”) and in shares (“***Part B***”) based on the value of the Group in relation to future Liquidity Events. The amount of the Part A fees was to be paid directly after the closing of a Liquidity Event. Part B of the fees provided the consulting firm the right, prior to closing, to subscribe for new shares to be issued by an Allego group company at the nominal value of such shares.

E8 Investor was only entitled to cash and shares if the equity value at closing was at least 20% higher than the initial equity value of Allego Holdings provided for in the First Special Fees Agreement as at December 16, 2020. The number of shares that E8 Investor may subscribe for was to be determined based on the equity value of Allego Holding at closing. The maximum number of shares that the consulting firm was entitled to acquire under the original First Special Fees Agreement was equal to 10% of the share capital of the applicable Allego group company.

In January 2021, the First Special Fees Agreement was amended whereby certain definitions, including the definition of what entails a Liquidity Event, were changed. In April 2021, the First Special Fees Agreement was amended whereby E8 Investor was entitled to additional compensation from Madeleine upon the first-time admission of the shares of any Allego group company to a regulated or organized stock exchange. If such admission occurred, E8 Investor had the right to subscribe for additional shares being equal to 5% of the share capital (after completion of the listing) of Allego Holding or the relevant Allego group company. Additionally, the First Special Fees Agreement was extended until the earlier of (i) December 31, 2028 and (ii) the date on which Meridiam or any Meridiam Affiliates would cease to own, directly or indirectly, any shares of the Group.

On July 28, 2021, Spartan and the Company signed the Business Combination Agreement. Madeleine and E8 Investor were also parties to the Business Combination Agreement. On February 28, 2022, the Business Combination Agreement was amended whereby the parties modified the thresholds that determine whether the Part A fees under the First Special Fees Agreement payable to E8 Investor will be paid in cash, shares or a combination of cash and shares, contingent upon the number of redemptions of Spartan shares that will occur as part of Business Combination.

On March 16, 2022, in connection with the Business Combination Agreement, and before the Closing, 22 ordinary shares of Allego Holding at a par value of €1 per share were issued to E8 Investor. On the same day, pursuant to the Business Combination Agreement, each share of Allego Holding held by E8 Investor was exchanged for Allego Ordinary Shares in accordance with the Business Combination Agreement. Consequently, E8 Investor owns 41,097,994 Allego Ordinary Shares.

Certain directors and officers of the Company received compensation from E8 Investor in the form of a fixed percentage of the total benefits that E8 Investor generated under the First Special Fees Agreement. See “—*Additional E8 Arrangements*” below.

During the year ended December 31, 2022, E8 Investor did not receive any additional payments pursuant to the First Special Fees Agreement (2021: €0.6 million as incidental, non-recurring and one-time bonus for the services rendered in connection with their strategic and operational advice). The First Special Fees Agreement was terminated in connection with the Business Combination.

### ***Second Special Fees Agreement***

On February 25, 2022, Allego Holdings' then immediate parent entity — Madeleine — entered into the second agreement (the “***Second Special Fees Agreement***”) with E8 Investor. The purpose of this Second Special Fees Agreement is to compensate E8 Investor for their continuous strategic and operational advice, as well as support with regards to Allego's fundraising efforts in the near future. The agreement expires on the earlier of June 30, 2025, and the date on which Madeleine would no longer hold any equity security in Allego. As consideration for the Second Special Fees Agreement, E8 Investor is entitled to receive cash compensation based on the value of the Group in connection with any new injection of equity, whether in cash or in kind, in any entity of the Group subsequent to the Business Combination (each an “***Equity Injection***”).

On March 10, 2022, the Second Special Fees Agreement was amended to modify the formula of the relevant percentage used in the determination of the fees payable (the “***Relevant Percentage***”) for equity injections subsequent to the first Equity Injection.

On April 20, 2022, the Second Special Fees Agreement was novated from Madeleine to Allego (the “***Novation***”), with all the other terms of the Second Special Fees Agreement remaining the same.

Certain directors and officers of the Company are entitled to compensation from E8 Investor in the form of a fixed percentage of the total benefits that the external consulting firm will generate under the Second Special Fees Agreement, including any amendments. See “—*Additional E8 Arrangements*” below.

### ***Additional E8 Arrangements***

Messrs. Bonnet and Galley are each party to a letter agreement with E8 Investor entitling entities affiliated with Mr. Bonnet and Mr. Galley to receive 30% and 4.5%, respectively, of the revenues (net of all taxes) received by E8 Investor, if any, from the Special Fees Agreements. These entities received €26.9 million under this letter agreement during the year ended December 31, 2022 (2021: €89.6 million)

E8 Investor, in its role as a strategic consulting and technology firm, also has entered into contractual arrangements with MOMA, an acquired subsidiary within the Group, to provide management and administrative services to MOMA. Since the acquisition, €490 thousand has been recognized in general and administrative expenses during the year ended December 31, 2022 related to these services. Additionally, E8 Investor subleases a portion of their office building in France

## [Table of Contents](#)

to MOMA. Since the acquisition, €150 thousand has been recognized in the statement of profit or loss during the year ended December 31, 2022 related to this lease arrangement.

### **Mega-E Arrangements**

After the sale of Mega-E to Meridiam EM SAS, Mega-E established subsidiaries and formed the Mega-E Group. As a result of the sale, the Mega-E Group became a related party under common control with the Group.

The Group exercised the Mega-E Option and obtained control over the Mega-E Group on March 16, 2022 upon the closing of the Business Combination (please also refer to Note 4 (Business combinations and capital reorganization) and Note 35 (Related-party transactions) to the consolidated financial statements included elsewhere in this Annual Report for more information).

Prior to the acquisition of Mega-E by the Group on March 16, 2022, the relationship between the Group and the Mega-E Group was that of a customer and service provider. Subsequent to the sale to Meridiam EM SAS, the Group entered into several development and operation and maintenance ("**O&M**") contracts with the Mega-E Group to construct and operate charging stations across Europe. The development agreements related to the engineering, design, procurement, delivery, construction, installation, testing and commissioning of electric vehicle charging infrastructure at designated areas. The Group received a fixed contract price for these services.

The O&M agreements related to the operation and maintenance of the delivered electric vehicle charging infrastructure by the Group to the Mega-E Group. The services consisted of the technical operation of the charging stations, revenue management, maintenance, providing pricing recommendations and providing access to the Group's EV Cloud platform. The Group received a service fee that contains both fixed and variable fees per charging session.

### **MOMA Acquisition**

On March 26, 2021, Allego Holding entered into two option agreements, pursuant to which Allego Holding was entitled to purchase shares in the share capital of MOMA, an unlisted software company that is a service provider for the Group's EVCloudTM platform.

On April 26, 2022, Allego Holding exercised its first and second option rights and on June 7, 2022, Allego Holding closed two separate share and sale purchase agreements to acquire shares representing 100% of the share capital of MOMA.

The primary reason for the acquisition of MOMA is for the Group to bring the critical support and technological knowledge provided by MOMA for its EVCloudTM platform within its own operations. Additionally, the acquisition of MOMA brings access to new customers and new markets as well as high value-added technological solutions and services within the Group, to better meet the needs of its customers. The financial results of MOMA have been included in the consolidated financial statements from the date of acquisition. Prior to the acquisition of MOMA, Alexis Galley, Chief Technology Officer of Allego, and E8 Investor, held shares in the share capital of MOMA.

Please also refer to Note 4 (Business combinations and capital reorganization) and Note 35 (Related-party transactions) to the consolidated financial statements included elsewhere in this Annual Report for more information.

### **Immediate parent entity arrangements**

Management services were bought from Madeleine, the immediate parent entity, for a fixed fee. Outstanding balances are unsecured. Asset and liability positions can either be offset or can be settled in cash. No loss allowance is recognized on these balances. These balances were not material during 2022.

### **Registration Rights Agreement**

In connection with the Closing, Allego, Sponsor, Madeleine, E8 Investor and certain other holders of Ordinary Shares (collectively, the "**Reg Rights Holders**") entered into a Registration Rights Agreement on March 16, 2022 (the "**Registration Rights Agreement**"). Pursuant to the Registration Rights Agreement, among other things, Allego agreed that, within 15 business days following the Closing, Allego will file this shelf registration statement to register the resale of certain securities held by the Reg Rights Holders (the "**Registerable Securities**"). In certain circumstances, Reg Rights Holders that hold Registerable Securities having an aggregate value of at least \$50 million can demand up to three

underwritten offerings. Each of the Reg Rights Holders are entitled to customary piggyback registration rights, subject to certain exceptions, in such case of demand offerings by Madeleine. In addition, under certain circumstances, Madeleine may demand up to three underwritten offerings. Additionally, at the Closing, Spartan, Sponsor and certain other security holders named therein terminated that certain Registration Rights Agreement, dated February 8, 2021, by and among Spartan, Sponsor and such other security holders.

Furthermore, pursuant to the Registration Rights Agreement,

- E8 Investor agreed, subject to certain exceptions, not to Transfer (as defined in the Registration Rights Agreement) securities received by it in the Part B share issuance until the date that is 18 months after the Closing or earlier if, subsequent to the Closing, Allego consummates a liquidation, merger, stock exchange or other similar transaction which results in all of Allego's shareholders having the right to exchange their Ordinary Shares for cash, securities or other property. Further, in accordance with the power of attorney agreement with Madeleine, E8 Investor has agreed not to transfer more than 26,584,264 Ordinary Shares held by it before September 30, 2026, without the prior written consent of Madeleine or Meridiam.

#### **Indemnification Agreements**

Allego has entered into indemnification agreements with its executive officers and directors. These agreements require us to indemnify these individuals to the fullest extent permitted by Dutch law against liabilities that may arise by reason of their service to us, and to advance expenses incurred as a result of any proceeding against them as to which they could be indemnified. Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors or executive officers, Allego has been informed that in the opinion of the SEC such indemnification is against public policy and is therefore unenforceable.

There is currently no pending material litigation or proceeding involving any of Allego's directors, officers or employees for which indemnification is sought.

#### **PIPE Financing**

On July 28, 2021, Allego entered into separate subscription agreements (collectively, the "**Subscription Agreements**") with a number of investors (collectively, the "**Subscribers**"), pursuant to which the Subscribers agreed to purchase an aggregate of 15,000,000 Ordinary Shares (the "**PIPE Shares**"), for a purchase price of \$10.00 per share at an aggregate purchase price of \$150,000,000, in a private placement (the "**Private Placement**"). Third-party investors accounted for a total of up to \$76 million, or approximately 51%, and an affiliate of the Sponsor and Madeleine collectively accounted for \$74 million, or approximately 49%, of the aggregate \$150 million of commitments in the Private Placement, after giving effect to Allego's consent to assign the right to purchase up to 2,000,000 of the PIPE Shares subscribed for by Madeleine and an affiliate of the Sponsor to a third-party.

In connection with the Private Placement, Madeleine acquired 3,000,000 Allego Ordinary Shares for an aggregate \$30,000,000.

#### **Voltalis**

Upon completion of the MOMA acquisition, Voltalis S.A. ("**Voltalis**"), a private company that provides distributed demand response products which enable households to achieve energy savings, became a related party of the Group through its relationship with Meridiam SAS. Madeleine — the majority shareholder of the Company — is indirectly owned by Meridiam. Voltalis is considered to be an investment in an associate of Meridiam. Details of the transactions during the year have been disclosed in Note 35 (Related-party transactions) to the consolidated financial statements included elsewhere in this Annual Report

#### **EV Cars**

EV Cars is a related party under common control of Meridiam EM SAS. On June 28, 2021, the Group entered into a contract with EV Cars for the design, construction, installation and operation and maintenance of charging stations. Details

of the transactions during the year have been disclosed in Note 35 (Related-party transactions) to the consolidated financial statements included elsewhere in this Annual Report.

#### **E6 Arrangements**

E6 is a European energy management platform for renewable energy. Allego's Chief Executive Officer, Mathieu Bonnet, owns a stake in E6 of 13.4% as of December 31, 2022. E6 has entered into contractual arrangements with MOMA to provide development and maintenance services in support of the E6 platform. Since the acquisition, €1 million has been recognized in service revenue from consulting services during the year ended December 31, 2022.

Allego and E6 entered into a contractual energy contract in 2020, which was subsequently renewed in 2021 and 2022. E6 operates a virtual power plant, aggregating production units to better assign value to production on the markets. In exchange for these services, E6 received fees of €19 million during the year ended December 31, 2022.

Additionally, a separate subsidiary within the Group entered into a contractual energy contract in 2021, which was subsequently renewed in 2022. E6 offers market access through the Nord Pool exchange. E6 purchases electricity that is sold to Allego at cost. In exchange for these services and electricity E6 received €2 million during the year ended December 31, 2022.

#### **OVM Energies**

OVM Energies is an engineering consulting company, of which Allego's Chief Technology Officer, Alexis Galley, owns a 5% stake as of December 31, 2022, and Allego's Chief Executive Officer, Mathieu Bonnet, owns an indirect stake. Allego has entered into a contractual agreement for OVM Energies to provide consulting services for administrative, engineering, and charging site implementation advisory services. OVM Energies received fees of €0.4 million during the year ended December 31, 2022.

#### **Remuneration Arrangements with the Board and Senior Management**

For a description of our remuneration arrangements with members of the Board and senior management, please refer to "Item 6. *Directors, Senior Management and Employees*".

\* \* \*

See also Note 35 (Related-party transactions) to the consolidated financial statements included elsewhere in this Annual Report for more information.

#### **C. Interests of Experts and Counsel**

Not applicable.

### **ITEM 8. FINANCIAL INFORMATION**

#### **A. Consolidated Statements and Other Financial Information**

##### ***Financial Statements***

See Item 18 of this Annual Report for consolidated financial statements and other financial information.

##### ***Legal Proceedings***

There is no material litigation, arbitration or governmental proceeding currently pending against Allego or any members of its management team in their capacity as such.

##### ***Dividend Policy***

We have no current plans to pay cash dividends. The declaration, amount and payment of any future dividends on our Allego Ordinary Shares will be at the sole discretion of our board of directors. Our board of directors may take into account general and economic conditions, our financial condition and results of operations, our available cash and current and

## [Table of Contents](#)

anticipated cash needs, capital requirements, contractual, legal, tax and regulatory restrictions and implications on the payment of dividends by us to our shareholders or by our subsidiaries to us and such other factors as our board of directors may deem relevant. In addition, our ability to pay dividends is limited by our credit facilities and may be limited by covenants of other indebtedness we or our subsidiaries incur in the future. As a result, shareholders may not receive any return on an investment in our Allego Ordinary Shares unless they sell their Allego Ordinary Shares for a price greater than that which they paid for them.

### **B. Significant Changes**

Not applicable.

## **ITEM 9. THE OFFER AND LISTING**

### **A. Offer and Listing Details**

Allego Ordinary Shares and Assumed Warrants are listed on the NYSE under the symbols ALLG and ALLG.WS, respectively.

### **B. Plan of Distribution**

Not applicable.

### **C. Markets**

Information related to markets is set forth in *‘Item 9.A The Offer and Listing—Offer and Listing Details’* of this Annual Report.

### **D. Selling Shareholders**

Not applicable.

### **E. Dilution**

Not applicable.

### **F. Expenses of the Issue**

Not applicable.

## **ITEM 10. ADDITIONAL INFORMATION**

### **A. Share Capital**

Not Applicable.

### **B. Memorandum and Articles of Association**

Allego was incorporated pursuant to Dutch law on June 3, 2021. Allego’s corporate affairs are governed by the Articles, the rules of the Board, Allego’s other internal rules and policies and by Dutch law. Allego is registered with the Dutch Trade Register under number 73283754. Allego’s corporate seat is in Arnhem, the Netherlands, and Allego’s office address is Westervoortsedijk 73 KB, 6827 AV Arnhem, the Netherlands. As of the date of this Annual Report, Allego is a Dutch public limited liability company (*naamloze vennootschap*).

### **Share Capital**

#### *Authorized Share Capital*

As of the date of this Annual Report, Allego has an authorized share capital in the amount of €108,000,000, divided into 900,000,000 Ordinary Shares, each with a nominal value of €0.12. Under Dutch law, Allego’s authorized share capital is

the maximum capital that Allego may issue without amending the Articles. An amendment of the Articles would require a resolution of General Meeting upon proposal by the Board.

The Articles provide that, for as long as any Ordinary Shares are admitted to trading on NYSE or on any other regulated stock exchange operating in the United States, the laws of the State of New York shall apply to the property law aspects of Ordinary Shares reflected in the register administered by Allego's transfer agent, subject to certain overriding exceptions under Dutch law. Such resolution, as well as a resolution to revoke such designation, has been made public in accordance with applicable law and has been deposited at the offices of the Company and the Dutch trade register for inspection.

### **Ordinary Shares**

The following summarizes the material rights of holders of Ordinary Shares:

- each holder of Ordinary Shares is entitled to one vote per Ordinary Share on all matters to be voted on by shareholders generally, including the appointment of directors;
- there are no cumulative voting rights;
- the holders of Ordinary Shares are entitled to dividends and other distributions as may be declared from time to time by Allego out of funds legally available for that purpose, if any;
- upon Allego's liquidation and dissolution, the holders of Ordinary Shares will be entitled to share ratably in the distribution of all of Allego's assets remaining available for distribution after satisfaction of all Allego's liabilities; and
- the holders of Ordinary Shares have pre-emption rights in case of share issuances or the grant of rights to subscribe for shares, except if such rights are limited or excluded by the corporate body authorized to do so and except in such cases as provided by Dutch law and the Articles.

### **Assumed Warrants**

At the Effective Time, Allego entered into the Warrant Assumption Agreement, and pursuant thereto, each of the Spartan Warrants were automatically converted into an Assumed Warrant, which such Assumed Warrant is subject to the same terms and conditions (including exercisability terms) as were applicable to the corresponding Spartan Warrant immediately prior to the Effective Time.

Each whole Assumed Warrant entitles the registered holder to purchase one whole Ordinary Share at a price of \$11.50 per share, subject to adjustment as discussed below, provided that Allego has an effective registration statement under the Securities Act covering the Ordinary Shares issuable upon exercise of the Assumed Warrants and a current prospectus relating to them is available (or Allego permits holders to exercise their Assumed Warrants on a cashless basis under the circumstances specified in the Warrant Agreement) and such shares are registered, qualified or exempt from registration under the securities, or blue sky, laws of the state of residence of the holder. Pursuant to the Warrant Agreement, a warrant holder may exercise its Assumed Warrants only for a whole number of Ordinary Shares. This means that only a whole Assumed Warrant may be exercised at any given time by a warrant holder. No fractional Assumed Warrants will be issued upon separation of the units and only whole Assumed Warrants will trade.

#### *Redemption of Assumed Warrants when the price per Ordinary Share equals or exceeds \$18.00.*

Allego may redeem the outstanding public Assumed Warrants for cash:

- in whole and not in part;
- at a price of \$0.01 per Assumed Warrant;
- upon a minimum of 30 days' prior written notice of redemption, or the 30-day redemption period, to each warrant holder; and
- if, and only if, the last reported sale price of the Ordinary Shares equals or exceeds \$18.00 per share (as adjusted for stock splits, stock dividends, reorganizations, recapitalizations and the like) for any 20 trading days within a 30-day trading period ending on the third trading day prior to the date on which Allego sends the notice of redemption to the warrant holders.

## [Table of Contents](#)

Allego will not redeem the Assumed Warrants as described above unless a registration statement under the Securities Act covering the Ordinary Shares issuable upon exercise of the applicable Assumed Warrants is effective and a current prospectus relating to those shares of Ordinary Shares is available throughout the 30-day redemption period. If and when the Assumed Warrants become redeemable by Allego, Allego may exercise its redemption right even if it is unable to register or qualify the underlying securities for sale under all applicable state securities laws.

If the foregoing conditions are satisfied and Allego issues a notice of redemption of the Assumed Warrants, each warrant holder will be entitled to exercise his, her or its Assumed Warrant prior to the scheduled redemption date. However, the price of the Ordinary Shares may fall below the \$18.00 redemption trigger price (as adjusted for stock splits, stock dividends, reorganizations, recapitalizations and the like) as well as the \$11.50 (for whole shares) warrant exercise price after the redemption notice is issued.

### *Redemption of Assumed Warrants when the price per Ordinary Share equals or exceeds \$10.00.*

Allego may redeem the outstanding public Assumed Warrants for cash:

- in whole and not in part;
- at a price of \$0.10 per Assumed Warrant, provided that holders will be able to exercise their Assumed Warrants on a cashless basis prior to redemption and receive that number of Ordinary Shares determined in accordance with the Warrant Agreement, based on the redemption date and the “fair market value” of Ordinary Shares except as otherwise described below;
- upon a minimum of 30 days’ prior written notice of redemption to each warrant holder; and
- if, and only if, the last reported sale price of the Ordinary Shares equals or exceeds \$10.00 per share (as adjusted for stock splits, stock dividends, reorganizations, recapitalizations and the like) on the trading day prior to the date on which Allego sends the notice of redemption to the warrant holders.

Beginning on the date the notice of redemption is given until the Assumed Warrants are redeemed or exercised, holders may elect to exercise their Assumed Warrants on a cashless basis. The “fair market value” of the Ordinary Shares shall mean the average last reported sale price of the Ordinary Shares for the 10 trading days immediately following the date on which the notice of redemption is sent to the holders of Assumed Warrants. Allego will provide warrant holders with the final fair market value no later than one business day after the ten-trading day period described above ends.

### *Redemption Procedures*

A holder of an Assumed Warrant may notify Allego in writing in the event it elects to be subject to a requirement that such holder will not have the right to exercise such Assumed Warrant, to the extent that after giving effect to such exercise, such person (together with such person’s affiliates), to the warrant agent’s actual knowledge, would beneficially own in excess of 9.8% (or such other amount as a holder may specify) of the shares of Ordinary Shares outstanding immediately after giving effect to such exercise.

### *Anti-Dilution Adjustments*

If the number of outstanding Ordinary Shares is increased by a stock dividend payable in Ordinary Shares, or by a split-up of shares of Ordinary Shares or other similar event, then, on the effective date of such stock dividend, split-up or similar event, the number of Ordinary Shares issuable on exercise of each Assumed Warrant will be increased in proportion to such increase in the outstanding Ordinary Shares. A rights offering to holders of Ordinary Shares entitling holders to purchase Ordinary Shares at a price less than the fair market value will be deemed a stock dividend of a number of shares of Ordinary Shares equal to the product of (i) the number of Ordinary Shares actually sold in such rights offering (or issuable under any other equity securities sold in such rights offering that are convertible into or exercisable for Ordinary Shares) multiplied by (ii) one (1) minus the quotient of (x) the price per Ordinary Share paid in such rights offering divided by (y) the fair market value. For these purposes (i) if the rights offering is for securities convertible into or exercisable for Ordinary Shares, in determining the price payable for Ordinary Shares, there will be taken into account any consideration received for such rights, as well as any additional amount payable upon exercise or conversion and (ii) fair market value means the average last reported sale price of Ordinary Shares as reported for the ten (10) trading day period ending on the trading day prior to the first date on which the shares of Ordinary Shares trade on the applicable exchange or in the applicable market, regular way, without the right to receive such rights.

If the number of outstanding Ordinary Shares is decreased by a consolidation, combination, reverse stock split or reclassification of Ordinary Shares or other similar event, then, on the effective date of such consolidation, combination, reverse stock split, reclassification or similar event, the number of Ordinary Shares issuable on exercise of each Assumed Warrant will be decreased in proportion to such decrease in outstanding Ordinary Shares.

Whenever the number of Ordinary Shares purchasable upon the exercise of the warrants is adjusted, as described above, the Assumed Warrant exercise price will be adjusted by multiplying the warrant exercise price immediately prior to such adjustment by a fraction (x) the numerator of which will be the number of Ordinary Shares purchasable upon the exercise of the Assumed Warrants immediately prior to such adjustment, and (y) the denominator of which will be the number of Ordinary Shares so purchasable immediately thereafter. The Warrant Agreement provides that no adjustment to the number of Ordinary Shares issuable upon exercise of an Assumed Warrant will be required until cumulative adjustments amount to 1% or more of the number of Ordinary Shares issuable upon exercise of an Assumed Warrant as last adjusted.

Any such adjustments that are not made will be carried forward and taken into account in any subsequent adjustment. All such carried forward adjustments will be made (i) in connection with any subsequent adjustment that (taken together with such carried forward adjustments) would result in a change of at least 1% in the number of Ordinary Shares issuable upon exercise of an Assumed Warrant and (ii) on the exercise date of any Assumed Warrant.

In case of any reclassification or reorganization of the outstanding Ordinary Shares (other than those described above or that solely affects the par value of such Ordinary Shares), or in the case of any merger or consolidation of Allego with or into another corporation (other than a consolidation or merger in which Allego is the continuing corporation and that does not result in any reclassification or reorganization of the outstanding Ordinary Shares), or in the case of any sale or conveyance to another corporation or entity of the assets or other property of Allego as an entirety or substantially as an entirety in connection with which Allego is dissolved, the holders of the Assumed Warrants will thereafter have the right to purchase and receive, upon the basis and upon the terms and conditions specified in the Assumed Warrants and in lieu of the Ordinary Shares immediately theretofore purchasable and receivable upon the exercise of the rights represented thereby, the kind and amount of shares of stock or other securities or property (including cash) receivable upon such reclassification, reorganization, merger or consolidation, or upon a dissolution following any such sale or transfer, that the holder of the Assumed Warrants would have received if such holder had exercised his, her or its Assumed Warrants immediately prior to such event. If less than 70% of the consideration receivable by the holders of Ordinary Shares in such a transaction is payable in the form of common stock in the successor entity that is listed for trading on a national securities exchange or is quoted in an established over-the-counter market, or is to be so listed for trading or quoted immediately following such event, and if the registered holder of the Assumed Warrant properly exercises the Assumed Warrant within thirty days following public disclosure of such transaction, the warrant exercise price will be reduced as specified in the Warrant Agreement based on the Black-Scholes value (as defined in the Warrant Agreement) of the Assumed Warrant. The purpose of such exercise price reduction is to provide additional value to holders of the Assumed Warrants when an extraordinary transaction occurs during the exercise period of the Assumed Warrants pursuant to which the holders of the Assumed Warrants otherwise do not receive the full potential value of the Assumed Warrants. The Assumed Warrant exercise price will not be adjusted for other events.

The Warrant Agreement provides that the terms of the Assumed Warrants may be amended without the consent of any holder to cure any ambiguity or correct any defective provision, but requires the approval by the holders of at least 50% of the then outstanding public Assumed Warrants to make any change that adversely affects the interests of the registered holders of public Assumed Warrants. You should review a copy of the Warrant Agreement, which is filed as an exhibit to this Annual Report for a complete description of the terms and conditions applicable to the Assumed Warrants.

The Assumed Warrants may be exercised upon surrender of the warrant certificate on or prior to the expiration date at the offices of the warrant agent, with the exercise form on the reverse side of the warrant certificate completed and executed as indicated, accompanied by full payment of the exercise price (or on a cashless basis, if applicable), by certified or official bank check payable to Allego, for the number of Assumed Warrants being exercised. The warrant holders do not have the rights or privileges of holders of Ordinary Shares or any voting rights until they exercise their warrants and receive Ordinary Shares. After the issuance of Ordinary Shares upon exercise of the Assumed Warrants, each holder will be entitled to one vote for each share held of record on all matters to be voted on by shareholders.

No fractional shares will be issued upon exercise of the Assumed Warrants. If, upon exercise of the Assumed Warrants, a holder would be entitled to receive a fractional interest in a share, Allego will, upon exercise, round down to the nearest whole number of shares of Ordinary Shares to be issued to the warrant holder.

Allego has agreed that any action, proceeding or claim against it arising out of or relating in any way to the Warrant Agreement, including under the Securities Act, will be brought and enforced in the courts of the State of New York or the United States District Court for the Southern District of New York, and Allego has irrevocably submitted to such jurisdiction, which will be the exclusive forum for any such action, proceeding or claim. See “*Item 3.D. Risk Factors—The exclusive forum clause set forth in the Warrant Agreement may have the effect of limiting an investor’s rights to bring legal action against Allego and could limit the investor’s ability to obtain a favorable judicial forum for disputes with us.*” However, there is uncertainty as to whether a court would enforce this provision and investors cannot waive compliance with the federal securities laws and the rules and regulations thereunder. Section 22 of the Securities Act creates concurrent jurisdiction for state and federal courts over all suits brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder. Notwithstanding the foregoing, these provisions of the Warrant Agreement will not apply to suits brought to enforce any liability or duty created by the Exchange Act or any other claim for which the federal district courts of the United States of America are the sole and exclusive forum. Section 27 of the Exchange Act creates exclusive federal jurisdiction over all suits brought to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder.

#### **Shareholders’ Register**

Pursuant to Dutch law and the Articles, Allego must keep its shareholders’ register accurate and current. The Board keeps the shareholders’ register and records names and addresses of all holders of registered shares, showing the date on which the shares were acquired, the date of the acknowledgement by or notification of Allego as well as the amount paid on each share. The register also includes the names and addresses of those with a right of usufruct (*vruchtgebruik*) on registered shares belonging to another or a pledge (*pandrecht*) in respect of such shares. The Ordinary Shares listed in this transaction will be held through DTC. Therefore, DTC or its nominee will be recorded in the shareholders’ register as the holder of those Ordinary Shares. The Ordinary Shares shall be in registered form (*op naam*).

Allego may issue share certificates (*aandeelbewijzen*) for registered shares in such form as may be approved by the Board.

#### **Limitations on the Rights to Own Securities**

Ordinary Shares may be issued to individuals, corporations, trusts, estates of deceased individuals, partnerships and unincorporated associations of persons. The Articles contain no limitation on the rights to own Allego’s shares and no limitation on the rights of non-residents of the Netherlands or foreign shareholders to hold or exercise voting rights.

#### **Limitation on Liability and Indemnification Matters**

Under Dutch law, the members of the Board may be held liable for damages in the event of improper or negligent performance of their duties. They may be held jointly and severally liable for damages to Allego and to third parties for infringement of the Articles or of certain provisions of Dutch law. In certain circumstances, they may also incur additional specific civil and criminal liabilities. Subject to certain exceptions, the Articles provide for indemnification of Allego’s current and former directors and other current and former officers and employees as designated by the Board. No indemnification under the Articles shall be given to an indemnified person:

- if a competent court or arbitral tribunal has established, without having (or no longer having) the possibility for appeal, that the acts or omissions of such indemnified person that led to the financial losses, damages, expenses, suit, claim, action or legal proceedings as described above are of an unlawful nature (including acts or omissions which are considered to constitute malice, gross negligence, intentional recklessness and/ or serious culpability attributable to such indemnified person);
- to the extent that his or her financial losses, damages and expenses are covered under insurance and the relevant insurer has settled, or has provided reimbursement for, these financial losses, damages and expenses (or has irrevocably undertaken to do so);
- in relation to proceedings brought by such indemnified person against Allego, except for proceedings brought to enforce indemnification to which he or she is entitled pursuant to the Articles, pursuant to an agreement between such indemnified person and Allego which has been approved by the Board or pursuant to insurance taken out by Allego for the benefit of such indemnified person; and
- for any financial losses, damages or expenses incurred in connection with a settlement of any proceedings effected without Allego’s prior consent.

Under the Articles, the Board may stipulate additional terms, conditions and restrictions in relation to the indemnification described above.

## **General Meeting of Shareholders and Voting Rights**

### ***General Meeting of Shareholders***

General Meetings may be held in Amsterdam, Arnhem, Assen, The Hague, Haarlem, 's-Hertogenbosch, Groningen, Leeuwarden, Lelystad, Maastricht, Middelburg, Rotterdam, Schiphol (Haarlemmermeer), Utrecht or Zwolle, all in the Netherlands. The annual General Meeting must be held within six months of the end of each financial year. Additional extraordinary General Meetings may also be held, whenever considered appropriate by the Board and shall be held within three months after the Board has considered it to be likely that Allego's shareholders' equity (*eigen vermogen*) has decreased to an amount equal to or lower than half of Allego's paid-in and called up share capital, in order to discuss the measures to be taken if so required.

Pursuant to Dutch law, one or more shareholders or others with meeting rights under Dutch law who jointly represent at least one-tenth of Allego's issued share capital may request Allego to convene a General Meeting, setting out in detail the matters to be discussed. If the Board has not taken the steps necessary to ensure that such meeting can be held within six weeks after the request, the proponent(s) may, on their application, be authorized by a competent Dutch court in preliminary relief proceedings to convene a General Meeting. The court shall disallow the application if it does not appear that the proponent(s) has/have previously requested the Board to convene a General Meeting and the Board has not taken the necessary steps so that the General Meeting could be held within six weeks after the request.

A General Meeting must be convened by an announcement published in a Dutch daily newspaper with national distribution. The notice must state the agenda, the time and place of the meeting, the record date (if any), the procedure for participating in the General Meeting by proxy, as well as other information as required by Dutch law. Allego will observe the statutory minimum convening notice period for a General Meeting. The agenda for the annual General Meeting shall include, among other things, the adoption of Allego's statutory annual accounts, appropriation of Allego's profits and proposals relating to the composition of the Board, including the filling of any vacancies. In addition, the agenda shall include such items as have been included therein by the Board. The agenda shall also include such items requested by one or more shareholders or others with meeting rights under Dutch law representing at least 3% of Allego's issued share capital. These requests must be made in writing or by electronic means and received by the Board at least 60 days before the day of the meeting. No resolutions shall be adopted on items other than those that have been included in the agenda.

In accordance with the Dutch Corporate Governance Code (the "*DCGC*") and Allego's Articles, shareholders having the right to put an item on the agenda under the rules described above shall exercise such right only after consulting the Board in that respect. If one or more shareholders intend to request that an item be put on the agenda that may result in a change in Allego's strategy (for example, the dismissal of members of the Board), the Board must be given the opportunity to invoke a reasonable period up to 180 days to respond to the shareholders' intentions. If invoked, the Board must use such response period for further deliberation and constructive consultation, in any event with the shareholders(s) concerned, and must explore the alternatives. At the end of the response time, the Board must report on this consultation and the exploration of alternatives to the General Meeting. The response period may be invoked only once for any given General Meeting and shall not apply: (a) in respect of a matter for which either a response period or a statutory cooling-off period (as described below) has been previously invoked; or (b) if a shareholder holds at least 75% of Allego's issued share capital as a consequence of a successful public bid.

Moreover, the Board can invoke a cooling-off period of up to 250 days when shareholders, using either their shareholder proposal right or their right to request a General Meeting, propose an agenda item for the General Meeting to dismiss, suspend or appoint a member of the Board (or to amend any provision in the Articles dealing with those matters) or when a public offer for Allego is made or announced without Allego's support, provided, in each case, that the Board believes that such proposal or offer materially conflicts with the interests of Allego and its business. During a cooling-off period, the General Meeting cannot dismiss, suspend or appoint members of the Board (or amend the provisions in the Articles dealing with those matters) except at the proposal of the Board. During a cooling-off period, the Board must gather all relevant information necessary for a careful decision-making process and at least consult with shareholders representing 3% or more of Allego's issued share capital at the time the cooling-off period was invoked, as well as with Allego's Dutch works council (if we or, under certain circumstances, any of our subsidiaries would have one). Formal statements expressed by these stakeholders during such consultations must be published on Allego's website to the extent these stakeholders have approved that publication. Ultimately one week following the last day of the cooling-off period, the Board of directors must publish a report in respect of its policy and conduct of affairs during the cooling-off period on Allego's website. This

report must remain available for inspection by shareholders and others with meeting rights under Dutch law at Allego's office and must be tabled for discussion at the next General Meeting.

Shareholders representing at least 3% of Allego's issued share capital may request the Dutch Enterprise Chamber of the Amsterdam Court of Appeals for early termination of the cooling-off period. The Enterprise Chamber must rule in favor of the request if the shareholders can demonstrate that:

- a. the Board, in light of the circumstances at hand when the cooling-off period was invoked, could not reasonably have come to the conclusion that the relevant shareholder proposal or hostile offer constituted a material conflict with the interests of Allego and its business;
- b. the Board cannot reasonably believe that a continuation of the cooling-off period would contribute to careful policy-making; and
- c. if other defensive measures, having the same purpose, nature and scope as the cooling-off period, have been activated during the cooling-off period and not terminated or suspended at the relevant shareholders' request within a reasonable period following the request (i.e., no 'stacking' of defensive measures).

The General Meeting is presided over by the chairperson of the Board. If no chairperson has been elected or if he or she is not present at the meeting, the General Meeting shall be presided over by the vice-chairperson of the Board. If no vice-chairperson has been elected or if he or she is not present at the meeting, the General Meeting shall be presided over by a person designated in accordance with the Articles. Directors may always attend a General Meeting. In these meetings, they have an advisory vote. The chairperson of the General Meeting may decide at his or her discretion to admit other persons to the meeting.

All shareholders and others with meeting rights under Dutch law are authorized to attend the General Meeting, to address the meeting and, in so far as they have such right, to vote pro rata to his or her shareholding. Shareholders may exercise these rights, if they are the holders of Ordinary Shares on the record date, if any, as required by Dutch law, which is currently the 28th day before the day of the General Meeting. Under the Articles, shareholders and others with meeting rights under Dutch law must notify Allego in writing or by electronic means of their identity and intention to attend the General Meeting. This notice must be received by Allego ultimately on the seventh day prior to the General Meeting, unless indicated otherwise when such meeting is convened.

Each Ordinary Share confers the right on the holder to cast one vote at the General Meeting. Shareholders may vote by proxy. No votes may be cast at a General Meeting on Ordinary Shares held by Allego or its subsidiaries or on Ordinary Shares for which Allego or its subsidiaries hold depository receipts. Nonetheless, the holders of a right of usufruct (*vruchtgebruik*) and the holders of a right of pledge (*pandrecht*) in respect of Ordinary Shares held by Allego or its subsidiaries in its share capital are not excluded from the right to vote on such Ordinary Shares, if the right of usufruct (*vruchtgebruik*) or the right of pledge (*pandrecht*) was granted prior to the time such Ordinary Shares were acquired by Allego or any of its subsidiaries. Neither Allego nor any of its subsidiaries may cast votes in respect of an Ordinary Share on which Allego or such subsidiary holds a right of usufruct (*vruchtgebruik*) or a right of pledge (*pandrecht*). Ordinary Shares which are not entitled to voting rights pursuant to the preceding sentences will not be taken into account for the purpose of determining the number of shareholders that vote and that are present or represented, or the amount of the share capital that is provided or that is represented at a General Meeting.

Decisions of the General Meeting are taken by a simple majority of votes cast, except where Dutch law or the Articles provide for a qualified majority or unanimity.

## **Directors**

### ***Appointment of Directors***

Allego's directors are appointed by the general meeting upon binding nomination by the Board. However, the general meeting may at all times overrule a binding nomination by a resolution adopted by at least a two-thirds majority of the votes cast, provided such majority represents more than half of the issued share capital. If the general meeting overrules a binding nomination, the Board shall make a new nomination.

The Board adopted a diversity policy for the composition of the Board, as well as a profile for the composition of the Board. The Board shall make any nomination for the appointment of a Director with due regard to the rules and principles set forth in such diversity policy and profile, as applicable.

At a General Meeting, a resolution to appoint a Director can only be passed in respect of candidates whose names are stated for that purpose in the agenda of that general meeting or in the explanatory notes thereto.

#### ***Duties and Liabilities of Directors***

Under Dutch law, the Board is charged with the management of Allego, subject to the restrictions contained in the Articles. The Executive Directors manage Allego's day-to-day business and operations and implement Allego's strategy. The Non-Executive Directors focus on the supervision on the policy and functioning of the performance of the duties of all Directors and Allego's general state of affairs. The Directors may divide their tasks among themselves in or pursuant to internal rules. Each Director has a statutory duty to act in the corporate interest of Allego and its business. Under Dutch law, the corporate interest extends to the interests of all corporate stakeholders, such as shareholders, creditors, employees, customers and suppliers. The duty to act in the corporate interest of Allego also applies in the event of a proposed sale or break-up of Allego, provided that the circumstances generally dictate how such duty is to be applied and how the respective interests of various groups of stakeholders should be weighed.

#### ***Certain Other Major Transactions***

The Articles and Dutch law provide that resolutions of the Board concerning a material change to the identity or the character of Allego or the business are subject to the approval of Allego shareholders at the General Meeting. Such changes include:

- transferring the business or materially all of the business to a third-party;
- entering into or terminating a long-lasting alliance of Allego or of a subsidiary either with another entity or company, or as a fully liable partner of a limited partnership or general partnership, if this alliance or termination is of significant importance for Allego; and
- acquiring or disposing of an interest in the capital of a company by Allego or by a subsidiary with a value of at least one third of the value of the assets, according to the balance sheet with explanatory notes or, if Allego prepares a consolidated balance sheet, according to the consolidated balance sheet with explanatory notes in Allego's most recently adopted annual accounts.

#### ***Dividends and Other Distributions***

##### ***Dividends***

Allego has never paid or declared any cash dividends in the past, and Allego does not anticipate paying any cash dividends in the foreseeable future. Allego intends to retain all available funds and any future earnings to fund the further development and expansion of its business. Under Dutch law, Allego may only pay dividends and other distributions from its reserves to the extent its shareholders' equity (*eigen vermogen*) exceeds the sum of its paid-in and called-up share capital plus the reserves Allego must maintain under Dutch law or the Articles and (if it concerns a distribution of profits) after adoption of Allego's statutory annual accounts by the General Meeting from which it appears that such dividend distribution is allowed. Subject to those restrictions, any future determination to pay dividends or other distributions from its reserves will be at the discretion of the Board and will depend upon a number of factors, including Allego's results of operations, financial condition, future prospects, contractual restrictions, restrictions imposed by applicable law and other factors Allego deems relevant.

Under the Articles, the Board may decide that all or part of the profits shown in Allego's adopted statutory annual accounts will be added to Allego's reserves. After reservation of any such profits, any remaining profits will be at the disposal of the General Meeting at the proposal of the Board for distribution on the Ordinary Shares, subject to applicable restrictions of Dutch law. The Board is permitted, subject to certain requirements and applicable restrictions of Dutch law, to declare interim dividends without the approval of the General Meeting. Dividends and other distributions shall be made payable no later than a date determined by the Board. Claims to dividends and other distributions not made within five years from the date that such dividends or distributions became payable will lapse and any such amounts will be considered to have been forfeited to Allego (*verjaring*).

Allego may reclaim any distributions, whether interim or not interim, made in contravention of certain restrictions of Dutch law from shareholders that knew or should have known that such distribution was not permissible. In addition, on the basis of Dutch case law, if after a distribution Allego is not able to pay its due and collectable debts, then its shareholders or directors who at the time of the distribution knew or reasonably should have foreseen that result may be liable to Allego's

creditors. Allego has never declared or paid any cash dividends and Allego has no plan to declare or pay any dividends in the foreseeable future on Ordinary Shares. Allego currently intends to retain any earnings for future operations and expansion.

Since Allego is a holding company, its ability to pay dividends will be dependent upon the financial condition, liquidity and results of operations of, and Allego's receipt of dividends, loans or other funds from, its subsidiaries. Allego's subsidiaries are separate and distinct legal entities and have no obligation to make funds available to Allego. In addition, there are various statutory, regulatory and contractual limitations and business considerations on the extent, if any, to which Allego's subsidiaries may pay dividends, make loans or otherwise provide funds to Allego.

#### ***Exchange Controls***

Under Dutch law, there are no exchange controls applicable to the transfer to persons outside of the Netherlands of dividends or other distributions with respect to, or of the proceeds from the sale of, shares of a Dutch company, subject to applicable restrictions under sanctions and measures, including those concerning export control, pursuant to European Union regulations, the Sanctions Act 1977 (*Sanctiewet 1977*) or other legislation, applicable anti-boycott regulations, applicable anti-money-laundering regulations and similar rules and provided that, under circumstances, payments of such dividends or other distributions must be reported to the Dutch Central Bank at their request for statistical purposes. There are no special restrictions in the Articles or Dutch law that limit the right of shareholders who are not citizens or residents of the Netherlands to hold or vote shares.

#### ***Squeeze-Out Procedure***

A shareholder who holds at least 95% of Allego's issued share capital for his or her own account, alone or together with group companies, may initiate proceedings against Allego's other shareholders jointly for the transfer of their Ordinary Shares to such shareholder. The proceedings are held before the Enterprise Chamber of the Amsterdam Court of Appeal, or the Enterprise Chamber (*Ondernemingskamer*), and can be instituted by means of a writ of summons served upon each of the other shareholders in accordance with the provisions of the Dutch Code of Civil Procedure (*Wetboek van Burgerlijke Rechtsvordering*). The Enterprise Chamber may grant the claim for squeeze-out in relation to the other shareholders and will determine the price to be paid for the Ordinary Shares, if necessary, after appointment of one or three experts who will offer an opinion to the Enterprise Chamber on the value to be paid for the Ordinary Shares of the other shareholders. Once the order to transfer becomes final before the Enterprise Chamber, the person acquiring the shares shall give written notice of the date and place of payment and the price to the holders of the Ordinary Shares to be acquired whose addresses are known to him. Unless the addresses of all of them are known to the acquiring person, such person is required to publish the same in a daily newspaper with a national circulation.

#### ***Dissolution and Liquidation***

Under the Articles, Allego may be dissolved by a resolution of the General Meeting, subject to a proposal of the Board. In the event of a dissolution, the liquidation shall be effected by the Board, unless the General Meeting decides otherwise. During liquidation, the provisions of the Articles will remain in force as far as possible. To the extent that any assets remain after payment of all of Allego's liabilities, any remaining assets shall be distributed to Allego's shareholders in proportion to their number of Ordinary Shares.

#### ***Federal Forum Provision***

Under the Articles, unless Allego consents in writing to the selection of an alternative forum, the sole and exclusive forum for any complaint asserting a cause of action arising under the Securities Act, or the Exchange Act, to the fullest extent permitted by applicable law, shall be the U.S. federal district courts. For further information regarding the limitations that the forum provision may impose and the uncertainty as to whether a court would enforce such provisions with respect to the Securities Act or the Exchange Act and the rules and regulations thereunder, see the section entitled "*Item 3.D. Risk Factors—Risks Related to Ownership of Allego Securities—The Allego Articles include exclusive jurisdiction and forum selection provisions, which may impact the ability of shareholders to bring actions against us or increase the costs of bringing such actions.*"

### C. Material Contracts

Information pertaining to Allego's material contracts is set forth in the sections titled "Item 5. Operating and Financial Review and Prospects" and "Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions", each of which is incorporated herein by reference.

### D. Exchange Controls

Information pertaining to exchange controls set forth in "Item 10.B. Memorandum and Articles of Association—Exchange Controls" is incorporated herein by reference.

### E. Taxation

#### Material Dutch Income Tax Considerations

This section only outlines certain material Dutch tax consequences of the acquisition, ownership and disposition of Ordinary Shares and Warrants. This section does not purport to describe all possible tax considerations or consequences that may be relevant to a holder or prospective holder of Ordinary Shares or Warrants and does not purport to describe the tax consequences applicable to all categories of investors, some of which (such as trusts or similar arrangements) may be subject to special rules. For Dutch tax law purposes, a holder of Ordinary Shares or Warrants may include an individual or entity not holding the legal title to such Ordinary Shares or Warrants, but to whom, or to which, the Ordinary Shares or Warrants are, or the income thereof is, nevertheless attributed based either on the individual or entity owning a beneficial interest in the Ordinary Shares or Warrants or on specific statutory provisions. These include statutory provisions attributing the Ordinary Shares or Warrants to an individual who, or who has directly or indirectly inherited from a person who was, the settlor, grantor or similar originator of a trust, foundation or similar entity that holds the Ordinary Shares or Warrants.

This section is based on the tax laws of the Netherlands, published regulations thereunder and published authoritative case law, all as in effect on the date hereof, including, for the avoidance of doubt, the tax rates applicable on the date hereof, and all of which are subject to change, possibly with retroactive effect. Any such change may invalidate the contents of this section, which will not be updated to reflect such change. Where this section refers to "the Netherlands" or "Dutch" it refers only to the part of the Kingdom of the Netherlands located in Europe.

This section is intended as general information only and is not Dutch tax advice or a complete description of all Dutch tax consequences relating to the acquisition, ownership and disposition of Ordinary Shares or Warrants. In view of its general nature, this section should be treated with corresponding caution. Holders or prospective holders of Ordinary Shares and Warrants should consult their own tax advisors regarding the Dutch tax consequences relating to the acquisition, ownership and disposition of Ordinary Shares and Warrants in light of their particular circumstances.

Please note that this section does not describe the Dutch tax consequences for a holder of Ordinary Shares or Warrants who:

- i. has a substantial interest (*aanmerkelijk belang*) or deemed substantial interest (*fictief aanmerkelijk belang*) in Allego under the Dutch Income Tax Act 2001 (*Wet inkomstenbelasting 2001*). Generally speaking, a holder of securities in a company is considered to hold a substantial interest in such company, if such holder alone or, in the case of individuals, together with such holder's partner for Dutch income tax purposes, or any relatives by blood or marriage in the direct line (including foster children), directly or indirectly, holds (i) an interest of 5% or more of the total issued and outstanding capital of that company or of 5% or more of the issued and outstanding capital of a certain class of shares of that company; or (ii) rights to acquire, directly or indirectly, such interest; or (iii) certain profit sharing rights in that company that relate to 5% or more of the company's annual profits or to 5% or more of the company's liquidation proceeds. A deemed substantial interest may arise if a substantial interest (or part thereof) in a company has been disposed of, or is deemed to have been disposed of, on a non-recognition basis;
- ii. applies the participation exemption (*deelnemingsvrijstelling*) with respect to the Ordinary Shares or Warrants for purposes of the Dutch Corporate Income Tax Act 1969 (*Wet op de vennootschapsbelasting 1969*). Generally, a holder's shareholding of 5% or more in a company's nominal paid-up share capital qualifies as a participation (*deelname*). A holder may also have a participation if (a) such holder does not have a shareholding of 5% or more but a related entity (statutorily defined term) has a participation or (b) the company in which the shares are held is a related entity (statutorily defined term);
- iii. is entitled to the dividend withholding tax exemption (*inhoudingsvrijstelling*) with respect to any income (*opbrengst*) derived from the Ordinary Shares (as defined in Article 4 of the Dutch Dividend Withholding Tax Act

1965 (*Wet op de dividendbelasting*). Generally, a holder of Ordinary Shares may be entitled or required to apply, subject to certain other requirements, the dividend withholding tax exemption if it is an entity and holds an interest of 5% or more in Allego's nominal paid-up share capital;

- iv. is a pension fund, investment institution (*fiscale beleggingsinstelling*) or a tax exempt investment institution (*vrijgestelde beleggingsinstelling*) (each as defined in the Dutch Corporate Income Tax Act 1969) or another entity that is, in whole or in part, not subject to or exempt from Dutch corporate income tax, is an entity that has a function comparable to an investment institution or tax exempt investment institution, or that is exempt from corporate income tax in its country of residence, such country of residence being another state of the European Union, Norway, Liechtenstein, Iceland or any other state with which the Netherlands has agreed to exchange information in line with international standards; and
- v.
- vi. is an individual for whom the Ordinary Shares or Warrants or any benefit derived from the Ordinary Shares or Warrants is a remuneration or deemed to be a remuneration for (employment) activities performed by such holder or certain individuals related to such holder (as defined in the Dutch Income Tax Act 2001).

#### **Withholding tax**

Dividends distributed by Allego generally are subject to Dutch dividend withholding tax at a rate of 15%. Generally, Allego is responsible for the withholding of such dividend withholding tax at its source; the Dutch dividend withholding tax is for the account of the holder of Ordinary Shares or Warrants.

The expression “dividends distributed” includes, among other things:

- i. distributions in cash or in kind, deemed and constructive distributions and repayments of paid-in capital not recognized for Dutch dividend withholding tax purposes;
- ii. liquidation proceeds, proceeds from the redemption of Ordinary Shares or proceeds from the repurchase of Ordinary Shares (other than as temporary portfolio investment; *tijdelijke belegging*) by Allego or one of its subsidiaries or other affiliated entities, in each case to the extent such proceeds exceed the average paid-in capital of those Ordinary Shares as recognized for Dutch dividend withholding tax purposes;
- iii. an amount equal to the par value of Ordinary Shares issued or an increase of the par value of Ordinary Shares, to the extent that it does not appear that a contribution, recognized for Dutch dividend withholding tax purposes, has been made or will be made; and
- iv. partial repayment of the paid-in capital, recognized for Dutch dividend withholding tax purposes, if and to the extent Allego has net profits (*zuivere winst*), unless (i) the General Meeting has resolved in advance to make such repayment and (ii) the par value of the Ordinary Shares concerned has been reduced by an equal amount by way of an amendment of Allego's Articles. The term “net profits” includes anticipated profits that are yet to be realized.

Corporate legal entities which are resident or deemed to be resident of the Netherlands for Dutch corporate income tax purposes (***Dutch Resident Entities***) generally are entitled to an exemption from, or a credit for, any Dutch dividend withholding tax against their Dutch corporate income tax liability. The credit in any given year is, however, limited to the amount of Dutch corporate income tax payable in respect of the relevant year with an indefinite carry forward of any excess amount. Individuals who are resident or deemed to be resident of the Netherlands for Dutch personal income tax purposes (***Dutch Resident Individuals***) generally are entitled to a credit for any Dutch dividend withholding tax against their Dutch income tax liability and to a refund of any residual Dutch dividend withholding tax.

The above generally also applies to holders of Ordinary Shares or Warrants that are neither resident nor deemed to be resident of the Netherlands (***Non-Resident Holders***) if the Ordinary Shares or Warrants are attributable to a Dutch permanent establishment of such Non-Resident Holder.

A holder of Ordinary Shares or Warrants resident of a country other than the Netherlands may, depending on such holder's specific circumstances, be entitled to exemptions from, reductions of, or full or partial refunds of, Dutch dividend withholding tax under Dutch national tax legislation, EU law, or a double taxation convention in effect between the Netherlands and such other country.

#### **Warrants**

The exercise of Warrants does in our view not give rise to Dutch dividend withholding tax, except to the extent (i) the exercise price is below the par value of an Ordinary Share (currently, the par value per Ordinary Share is €0.12 and the exercise price is \$11.50) and (ii) such difference is not charged against Allego's share premium reserve recognized for Dutch dividend withholding tax purposes. If any Dutch dividend withholding tax due is not effectively withheld for the

account of the relevant holder of a Warrant, Dutch dividend withholding tax shall be due by Allego on a grossed-up basis, meaning that the Dutch dividend withholding tax basis shall be equal to the amount referred to in the preceding sentence multiplied by 100/85.

In addition, it cannot be excluded that payments made in consideration for a repurchase or redemption of a Warrant or a full or partial cash settlement of the Warrant are in part subject to Dutch dividend withholding tax. To date, no authoritative case law of the Dutch courts has been made publicly available in this respect.

Exceptions and relief from Dutch dividend withholding tax may apply as set forth in the preceding paragraph.

**Dividend stripping.** According to Dutch domestic anti-dividend stripping rules, no credit against Dutch tax, exemption from, reduction, or refund of Dutch dividend withholding tax will be granted if the recipient of the dividends Allego paid is not considered the beneficial owner (*uiteindelijk gerechtigde*, as described in the Dutch Dividend Withholding Tax Act 1965) of those dividends. This legislation generally targets situations in which a shareholder retains its economic interest in shares but reduces the withholding tax costs on dividends by a transaction with another party. It is not required for these rules to apply that the recipient of the dividends is aware that a dividend stripping transaction took place. The Dutch State Secretary of Finance takes the position that the definition of beneficial ownership introduced by this legislation will also be applied in the context of a double taxation convention.

**Conditional withholding tax on dividends as of January 1, 2024.** As of January 1, 2024, a Dutch conditional withholding tax will be imposed on dividends distributed by Allego to entities related (*gelieerd*) to Allego (within the meaning of the Dutch Withholding Tax Act 2021; *Wet bronbelasting 2021*), if such related entity:

- i. is considered to be resident (*gevestigd*) in a jurisdiction that is listed in the yearly updated Dutch Regulation on low-taxing states and non-cooperative jurisdictions for tax purposes (*Regeling laagbelastende staten en niet-coöperatieve rechtsgebieden voor belastingdoeleinden*) (a “**Listed Jurisdiction**”); or
- ii. has a permanent establishment located in a Listed Jurisdiction to which the Ordinary Shares or Warrants are attributable; or
- iii. holds the Ordinary Shares or Warrants with the main purpose or one of the main purposes of avoiding taxation for another person or entity and there is an artificial arrangement or transaction or a series of artificial arrangements or transactions; or
- iv. is not considered to be the beneficial owner of the Ordinary Shares or Warrants in its jurisdiction of residences because such jurisdiction treats another entity as the beneficial owner of the Ordinary Shares or Warrants (a hybrid mismatch); or
- v. is not resident in any jurisdiction (also a hybrid mismatch); or
- vi. is a reverse hybrid (within the meaning of Article 2(12) of the Dutch Corporate Income Tax Act 1969), if and to the extent (x) there is a participant in the reverse hybrid which is related (*gelieerd*) to the reverse hybrid, (y) the jurisdiction of residence of such participant treats the reverse hybrid as transparent for tax purposes and (z) such participant would have been subject to the Dutch conditional withholding tax in respect of dividends distributed by Allego without the interposition of the reverse hybrid, all within the meaning of the Dutch Withholding Tax Act 2021.

The Dutch conditional withholding tax on dividends will be imposed at the highest Dutch corporate income tax rate in effect at the time of the distribution (2023: 25.8%). The Dutch conditional withholding tax on dividends will be reduced, but not below zero, by any regular Dutch dividend withholding tax withheld in respect of the same dividend distribution. As such, based on the currently applicable rates, the overall effective tax rate of withholding the regular Dutch dividend withholding tax (as described above) and the Dutch conditional withholding tax on dividends will not exceed the highest corporate income tax rate in effect at the time of the distribution (2023: 25.8%).

#### **Taxes on income and capital gains**

**Dutch Resident Entities.** Generally, if the holder of Ordinary Shares or Warrants is a Dutch Resident Entity, any income derived or deemed to be derived from the Ordinary Shares or Warrants or any capital gain or loss realized on the disposal or deemed disposal of Ordinary Shares or exercise, as applicable, of the Warrants is subject to Dutch corporate income tax at a rate of 19% with respect to taxable profits up to €200,000 and 25.8% with respect to taxable profits in excess of that amount (rates and brackets for 2023).

**Dutch Resident Individuals.** If the holder of Ordinary Shares or Warrants is a Dutch Resident Individual, any income derived or deemed to be derived from the Ordinary Shares or Warrants or any capital gain or loss realized on the disposal or deemed disposal of the Ordinary Shares or exercise, as applicable, of the Warrants is taxable at the progressive Dutch income tax rates (with a maximum of 49.5% in 2023), if:

- i. the Ordinary Shares or Warrants are attributable to an enterprise from which the holder of Ordinary Shares or Warrants derives a share of the profit, whether as an entrepreneur (*ondernemer*) or as a person who has a co-entitlement to the net worth (*medegerechtigd tot het vermogen*) of such enterprise without being a shareholder (as defined in the Dutch Income Tax Act 2001); or
- ii. the holder of Ordinary Shares or Warrants is considered to perform activities with respect to the Ordinary Shares or Warrants that go beyond ordinary asset management (*normaal, actief vermogensbeheer*) or otherwise derives benefits from the Ordinary Shares or Warrants that are taxable as benefits from other activities (*resultaat uit overige werkzaamheden*).

**Taxation of savings and investments.** If the above-mentioned conditions (i) and (ii) do not apply to the Dutch Resident Individual, the Ordinary Shares or Warrants will be subject to an annual Dutch income tax under the regime for savings and investments (*inkomen uit sparen en beleggen*). Taxation only occurs insofar the Dutch Resident Individual's net investment assets for the year exceed a statutory threshold (*heffingvrij vermogen*). The net investment assets for the year are the fair market value of the investment assets less the fair market value of the liabilities on January 1 of the relevant calendar year (reference date; *peildatum*). Actual income or capital gains realized in respect of the Ordinary Shares or Warrants are as such not subject to Dutch income tax.

The Dutch Resident Individual's assets and liabilities taxed under this regime, including the Ordinary Shares and Warrants, are allocated over the following three categories: (a) bank savings (*banktegoeden*), (b) other investments (*overige bezittingen*), including the Ordinary Shares and Warrants, and (c) liabilities (*schulden*). The taxable benefit for the year (*voordeel uit sparen en beleggen*) is equal to the product of (x) the total deemed return divided by the sum of bank savings, other investments and liabilities and (b) the sum of bank savings, other investments and liabilities minus the statutory threshold, and is taxed at a flat rate of 32% (rate for 2023).

The deemed return applicable to other investments, including the Ordinary Shares and Warrants, is set at 6.17% for the calendar year 2023. Transactions in the three-month period before and after January 1 of the relevant calendar year implemented to arbitrate between the deemed return percentages applicable to bank savings, other investments and liabilities will for this purpose be ignored if the holder of Ordinary Shares or Warrants cannot sufficiently demonstrate that such transactions are implemented for other than tax reasons.

**Non-residents of the Netherlands.** A holder of Ordinary Shares or Warrants that is neither a Dutch Resident Entity nor a Dutch Resident Individual will not be subject to Dutch taxes on income or capital gains in respect of any income derived or deemed to be derived from the Ordinary Shares or Warrants or in respect of any capital gain or loss realized on the disposal or deemed disposal of the Ordinary Shares or Warrants, provided that:

- i. such holder does not have an interest in an enterprise or deemed enterprise (as defined in the Dutch Income Tax Act 2001 and the Dutch Corporate Income Tax Act 1969) which, in whole or in part, is either effectively managed in the Netherlands or carried on through a permanent establishment, a deemed permanent establishment or a permanent representative in the Netherlands and to which enterprise or part of an enterprise the Ordinary Shares or Warrants are attributable; and
- ii. in the event the holder is an individual, such holder does not carry out any activities in the Netherlands with respect to the Ordinary Shares or Warrants that go beyond ordinary asset management and does not otherwise derive benefits from the Ordinary Shares or Warrants that are taxable as benefits from other activities in the Netherlands.

#### **Gift and inheritance taxes**

**Residents of the Netherlands.** Gift or inheritance taxes will arise in the Netherlands with respect to a transfer of Ordinary Shares or Warrants by way of a gift by, or on the death of, a holder of Ordinary Shares or Warrants who is resident or deemed resident of the Netherlands at the time of the gift or such holder's death.

**Non-residents of the Netherlands.** No gift or inheritance taxes will arise in the Netherlands with respect to a transfer of Ordinary Shares or Warrants by way of a gift by, or on the death of, a holder of Ordinary Shares or Warrants who is neither resident nor deemed to be resident of the Netherlands, unless:

## [Table of Contents](#)

- i. in the case of a gift of an Ordinary Share or Warrant by an individual who at the date of the gift was neither resident nor deemed to be resident of the Netherlands, such individual dies within 180 days after the date of the gift, while being resident or deemed to be resident of the Netherlands;
- ii. in the case of a gift of an Ordinary Share or warrant is made under a condition precedent, the holder of the Ordinary Share or Warrant is resident or is deemed to be resident of the Netherlands at the time the condition is fulfilled; or
- iii. the transfer is otherwise construed as a gift or inheritance made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident of the Netherlands.

For purposes of Dutch gift and inheritance taxes, amongst others, a person that holds the Dutch nationality will be deemed to be resident of the Netherlands if such person has been a resident of the Netherlands at any time during the ten years preceding the date of the gift or such person's death. Additionally, for purposes of Dutch gift tax, amongst others, a person not holding the Dutch nationality will be deemed to be resident of the Netherlands if such person has been a resident of the Netherlands at any time during the twelve months preceding the date of the gift. Applicable tax treaties may override deemed residency.

### **Value added tax ("VAT")**

No Dutch VAT will be payable by a holder of Ordinary Shares or Warrants in respect of any payment in consideration for the ownership or disposition of the Ordinary Shares or Warrants.

### **Other taxes and duties**

No Dutch documentation taxes (commonly referred to as stamp duties) will be payable in respect of or in connection with the execution and/or enforcement (including by legal proceedings and including the enforcement of any foreign judgment in the courts of the Netherlands) of the documents relating to the issue of the Ordinary Shares or Warrants, the performance by Allego of its obligations under such documents or any payments in consideration for the ownership or disposition of the Ordinary Shares or Warrants, notwithstanding that court fees may be due.

### **Material U.S. Federal Income Tax Considerations**

The following is a discussion of material U.S. federal income tax considerations to Holders (as defined below) relating to the acquisition, ownership and disposition of the Ordinary Shares and Warrants as of the date hereof. The discussion below only applies to the Ordinary Shares and Warrants held as capital assets for U.S. federal income tax purposes and does not describe all of the tax consequences that may be relevant to holders in light of their particular circumstances, including alternative minimum tax and Medicare contribution tax consequences, or holders who are subject to special rules, such as:

- financial institutions or financial services entities;
- insurance companies;
- government agencies or instrumentalities thereof;
- regulated investment companies and real estate investment trusts;
- expatriates or former residents of the United States;
- persons that acquired the Ordinary Shares or Warrants pursuant to an exercise of employee share options, in connection with employee share incentive plans or otherwise as compensation;
- dealers or traders subject to a mark-to-market method of tax accounting with respect to the Ordinary Shares or Warrants;
- persons holding the Ordinary Shares or Warrants as part of a "straddle," constructive sale, hedging, integrated transactions or similar transactions;
- a person whose functional currency is not the U.S. dollar;
- persons subject to the alternative minimum tax;
- entities or arrangements treated as partnerships or other pass-through entities for U.S. federal income tax purposes or holders of interests therein;
- persons that actually or constructively own five percent or more of any class of Allego's stock (by vote or by value);

- “controlled foreign corporations,” “passive foreign investment companies,” and corporations that accumulate earnings to avoid U.S. federal income tax;
- a person required to accelerate the recognition of any item of gross income with respect to the Ordinary Shares or Warrants as a result of such income being recognized on an applicable financial statement;
- a person actually or constructively owning 10% or more of the Ordinary Shares;
- real estate investment trusts;
- regulated investment companies;
- certain former citizens or long-term residents of the United States; or
- tax-exempt entities.

This discussion does not consider the tax treatment of entities that are partnerships or other pass-through entities for U.S. federal income tax purposes or persons who hold the Ordinary Shares or Warrants through such entities. If a partnership or other pass-through entity for U.S. federal income tax purposes is the beneficial owner of Ordinary Shares or Warrants, the U.S. federal income tax treatment of partners of the partnership will generally depend on the status of the partners and the activities of the partner and the partnership. This discussion assumes that Allego is not an Inverted Corporation or a Surrogate Foreign Corporation.

This discussion is based on the Code, and administrative pronouncements, judicial decisions and final, temporary and proposed U.S. Treasury regulations all as of the date hereof, changes to any of which subsequent to the date hereof may affect the tax consequences described herein. This discussion does not take into account potential suggested or proposed changes in such tax laws which may impact the discussion below and does not address any aspect of state, local or non-U.S. taxation, or any U.S. federal taxes other than income taxes. Each of the foregoing is subject to change, potentially with retroactive effect. Holders are urged to consult their tax advisors with respect to the application of U.S. federal tax laws to their particular situation, as well as any tax consequences arising under the laws of any state, local or non-U.S. jurisdiction.

THIS DISCUSSION IS ONLY A SUMMARY OF THE MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES OF THE ACQUISITION, OWNERSHIP AND DISPOSITION OF THE ORDINARY SHARES AND WARRANTS. EACH HOLDER OF ORDINARY SHARES OR WARRANTS IS URGED TO CONSULT ITS OWN TAX ADVISOR WITH RESPECT TO THE PARTICULAR TAX CONSEQUENCES TO SUCH INVESTOR, INCLUDING THE APPLICABILITY AND EFFECT OF ANY STATE, LOCAL, AND NON-U.S. TAX LAWS, AS WELL AS U.S. FEDERAL TAX LAWS AND ANY APPLICABLE TAX TREATIES.

#### **Holder, U.S. Holders and Non-U.S. Holder Defined**

The section applies to you if you are a U.S. Holder. For purposes of this discussion, a U.S. Holder means a beneficial owner of Ordinary Shares or Warrants that is, for U.S. federal income tax purposes:

- an individual who is a citizen or resident of the United States;
- a corporation (or other entity taxable as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate whose income is subject to U.S. federal income tax regardless of its source; or
- a trust if (1) a U.S. court can exercise primary supervision over the trust’s administration and one or more U.S. persons are authorized to control all substantial decisions of the trust; or (2) the trust has a valid election in effect under applicable Treasury Regulations to be treated as a U.S. person.

A “Non-U.S. Holder” is a beneficial owner of Allego Ordinary Shares or Warrants that is, for U.S. federal income tax purposes, an individual, corporation, estate or trust, in each case that is not a U.S. Holder. “U.S. Holders” and “Non-U.S. Holders” are referred to collectively herein as “Holders”.

#### *Distributions on Ordinary Shares*

Subject to the discussion below under “—*Passive Foreign Investment Company Rules*,” the gross amount of any distribution on Ordinary Shares that is made out of Allego’s current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) generally will be taxable to a U.S. Holder as ordinary dividend income on the date such

distribution is actually or constructively received. Any such dividends generally will not be eligible for the dividends received deduction allowed to corporations in respect of dividends received from other U.S. corporations. To the extent that the amount of the distribution exceeds Allego's current and accumulated earnings and profits (as determined under U.S. federal income tax principles), such excess amount will be treated first as a non-taxable return of capital to the extent of the U.S. Holder's tax basis in its Ordinary Shares, and thereafter as capital gain recognized on a sale or exchange.

Subject to the discussion below under "*—Passive Foreign Investment Company Rules,*" dividends received by non-corporate U.S. Holders (including individuals) from a "qualified foreign corporation" may be eligible for reduced rates of taxation, provided that certain holding period requirements and other conditions are satisfied. For these purposes, a non-U.S. corporation will be treated as a qualified foreign corporation if it is eligible for the benefits of a comprehensive income tax treaty with the United States that meets certain requirements. There can be no assurances that Allego will be eligible for benefits of an applicable comprehensive income tax treaty with the United States. A non-U.S. corporation is also treated as a qualified foreign corporation with respect to dividends it pays on shares that are readily tradable on an established securities market in the United States. U.S. Treasury guidance indicates that shares listed on NYSE are generally considered readily tradable on an established securities market in the United States. There can be no assurance that Ordinary Shares will be considered readily tradable on an established securities market in future years. Non-corporate U.S. Holders that do not meet a minimum holding period requirement during which they are not protected from the risk of loss or that elect to treat the dividend income as "investment income" pursuant to Section 163(d)(4) of the Code (dealing with the deduction for investment interest expense) will not be eligible for the reduced rates of taxation regardless of Allego's status as a qualified foreign corporation. In addition, the rate reduction will not apply to dividends if the recipient of a dividend is obligated to make related payments with respect to the positions in substantially similar or related property. This disallowance applies even if the minimum holding period has been met. Allego will not constitute a qualified foreign corporation for purposes of these rules if it is a passive foreign investment company for the taxable year in which it pays a dividend or for the preceding taxable year. See "*—Passive Foreign Investment Company Rules.*" U.S. Holders should consult with their tax advisors regarding the availability of the lower preferential rate for qualified dividend income for any dividends paid with respect to the Ordinary Shares.

Subject to certain conditions and limitations, withholding taxes, if any, on dividends paid by Allego may be treated as foreign taxes eligible for credit against a U.S. Holder's U.S. federal income tax liability under the U.S. foreign tax credit rules. For purposes of calculating the U.S. foreign tax credit, dividends paid on Ordinary Shares will generally be treated as income from sources outside the United States and will generally constitute passive category income. The rules governing the U.S. foreign tax credit are complex. U.S. Holders should consult their tax advisors regarding the availability of the U.S. foreign tax credit under their particular circumstances.

#### *Sale, Exchange, Redemption or Other Taxable Disposition of Ordinary Shares and Warrants*

Subject to the discussion below under "*—Passive Foreign Investment Company Rules,*" a U.S. Holder generally will recognize gain or loss on any sale, exchange, redemption or other taxable disposition of Ordinary Shares or Warrants in an amount equal to the difference between (i) the amount realized on the disposition and (ii) such U.S. Holder's adjusted tax basis in such Ordinary Shares and/or Warrants. Any gain or loss recognized by a U.S. Holder on a taxable disposition of Ordinary Shares or Warrants generally will be capital gain or loss and will be long-term capital gain or loss if the U.S. Holder's holding period in such shares and/or warrants exceeds one year at the time of the disposition. Preferential tax rates may apply to long-term capital gains of non-corporate U.S. Holders (including individuals). The deductibility of capital losses is subject to certain limitations. Any gain or loss recognized by a U.S. Holder on the sale or exchange of Ordinary Shares or Warrants generally will be treated as U.S. source gain or loss.

#### *Exercise or Lapse of a Warrant*

Except as discussed below with respect to the cashless exercise of a Warrant, a U.S. Holder generally will not recognize gain or loss upon the acquisition of an Ordinary Share on the exercise of a Warrant for cash. A U.S. Holder's tax basis in the Ordinary Shares received upon exercise of the Warrant generally should be an amount equal to the sum of the U.S. Holder's tax basis in the Warrant exchanged therefor and the exercise price. It is unclear whether a U.S. Holder's holding period for the Ordinary Shares received upon exercise of the Warrant will commence on the date of exercise of the Warrant or the immediately following date. In either case, the holding period will not include the period during which the U.S. Holder held the Warrant. If a Warrant is allowed to lapse unexercised, a U.S. Holder generally will recognize a capital loss equal to such holder's tax basis in the Warrant. As noted above, the deductibility of capital losses is subject to certain limitations.

The tax consequences of a cashless exercise or cashless redemption (collectively referred to herein as a “cashless exchange”) of a Warrant are not clear under current tax law. A cashless exchange may be tax-deferred, either because the exchange is not a gain realization event or, if it is treated as a realization event, because the exchange is treated as a recapitalization for U.S. federal income tax purposes. In either tax-deferred situation, a U.S. Holder’s basis in the Ordinary Shares received would equal the U.S. Holder’s basis in the Warrants exercised therefore. If the cashless exchange were treated as not being a gain realization event, it is unclear whether a U.S. Holder’s holding period in the Ordinary Shares would be treated as commencing on the date of exchange of the Warrants or on the immediately following date. In either case, the holding period would not include the period during which the U.S. Holder held the Warrants. If the cashless exchange were treated as a recapitalization, the holding period of the Ordinary Shares would include the holding period of the Warrants exchanged therefore. Allego intends to treat any cashless exchange of a Warrant occurring after its giving notice of an intention to redeem the Warrant for cash as if Allego redeemed such Warrant for shares in a cashless redemption qualifying as a recapitalization. It is also possible that a cashless exchange of a Warrant could be treated in part as a taxable exchange in which gain or loss would be recognized. In such event, a U.S. Holder would recognize gain or loss with respect to the portion of the exercised Warrants treated as surrendered to pay the exercise price of the Warrants (the “surrendered warrants”). The U.S. Holder would recognize capital gain or loss with respect to the surrendered warrants in an amount generally equal to the difference between (i) the fair market value of the Ordinary Shares that would have been received with respect to the surrendered Warrants in a regular exercise of the Warrants and (ii) the sum of the U.S. Holder’s tax basis in the surrendered warrants and the aggregate cash exercise price of such Warrants (if they had been exercised in a regular exercise). In this case, a U.S. Holder’s tax basis in the Ordinary Shares received would equal the U.S. Holder’s tax basis in the Warrants exchanged plus (or minus) the gain (or loss) recognized with respect to the surrendered warrants. A U.S. Holder’s holding period for the Ordinary Shares would commence on the date following the date of exchange (or possibly the date of exchange) of the Warrants.

Due to the absence of authority on the U.S. federal income tax treatment of a cashless exchange of warrants, there can be no assurance which, if any, of the alternative tax consequences and holding periods described above would be adopted by the IRS or a court of law. Accordingly, U.S. Holders should consult their tax advisors regarding the tax consequences of a cashless exchange of Warrants.

#### *Possible Constructive Distributions*

The terms of each Warrant provide for an adjustment to the number of Ordinary Shares for which the Warrant may be exercised or to the exercise price of the Warrant in certain events, as discussed in the section of this Annual Report in “*Item 10.B. Memorandum and Articles of Association.*” An adjustment which has the effect of preventing dilution generally is not taxable. A U.S. Holder of a Warrant would, however, be treated as receiving a constructive distribution from Allego if, for example, the adjustment increases the holder’s proportionate interest in Allego’s assets or earnings and profits (e.g., through an increase in the number of Ordinary Shares that would be obtained upon exercise of such Warrant) as a result of a distribution of cash or other property, such as other securities, to the holders of the Ordinary Shares, or as a result of the issuance of a stock dividend to holders of the Ordinary Shares, in each case, which is taxable to the U.S. Holders of such shares as described under “*—Distributions on Ordinary Shares*” above. Such constructive distribution would be subject to tax as described under that section in the same manner as if the U.S. Holder of such Warrant received a cash distribution from Allego equal to the fair market value of such increased interest. For certain information reporting purposes, Allego is required to determine the date and amount of any such constructive distributions. Proposed U.S. Treasury regulations, which Allego may rely on prior to the issuance of final regulations, specify how the date and amount of any such constructive distributions are determined.

#### *Passive Foreign Investment Company Rules*

*Generally.* The treatment of U.S. Holders of the Ordinary Shares could be materially different from that described above if Allego is treated as a passive foreign investment company, or PFIC, for U.S. federal income tax purposes. A PFIC is any foreign corporation with respect to which either: (i) 75% or more of the gross income for a taxable year constitutes passive income for purposes of the PFIC rules, or (ii) 50% or more of such foreign corporation’s assets in any taxable year (generally based on the quarterly average of the value of its assets during such year) is attributable to assets, including cash, that produce passive income or are held for the production of passive income. Passive income generally includes dividends, interest, certain royalties and rents, annuities, net gains from the sale or exchange of property producing such income and net foreign currency gains. The determination of whether a foreign corporation is a PFIC is based upon the composition of such foreign corporation’s income and assets (including, among others, its proportionate share of the income and assets of any other corporation in which it owns, directly or indirectly, 25% (by value) of the stock), and the nature of such foreign corporation’s activities. A separate determination must be made after the close of each taxable year as to whether a foreign

corporation was a PFIC for that year. Once a foreign corporation qualifies as a PFIC it is, with respect to a shareholder during the time it qualifies as a PFIC, and subject to certain exceptions, always treated as a PFIC with respect to such shareholder, regardless of whether it satisfied either of the qualification tests in subsequent years.

The tests for determining PFIC status are applied annually after the close of the taxable year, and it is difficult to predict accurately future income and assets relevant to this determination. The fair market value of the assets of Allego is expected to depend, in part, upon (a) the market value of the Ordinary Shares, and (b) the composition of the assets and income of Allego. Further, because Allego may value its goodwill based on the market value of the Ordinary Shares, a decrease in the market value of the Ordinary Shares and/or an increase in cash or other passive assets would increase the relative percentage of its passive assets. The application of the PFIC rules is subject to uncertainty in several respects and, therefore, no assurances can be provided that the IRS will not assert that Allego is a PFIC for the current taxable year or in a future year.

If Allego is or becomes a PFIC during any year in which a U.S. Holder holds Ordinary Shares, there are three separate taxation regimes that could apply to such U.S. Holder under the PFIC rules, which are the (i) excess distribution regime (which is the default regime), (ii) QEF regime, and (iii) mark-to-market regime. A U.S. Holder who holds (actually or constructively) stock in a foreign corporation during any year in which such corporation qualifies as a PFIC is subject to U.S. federal income taxation under one of these three regimes. The effect of the PFIC rules on a U.S. Holder will depend upon which of these regimes applies to such U.S. Holder. However, dividends paid by a PFIC are generally not eligible for the lower rates of taxation applicable to qualified dividend income (“**QDI**”) under any of the foregoing regimes.

*Excess Distribution Regime.* If you do not make a QEF election or a mark-to-market election, as described below, you will be subject to the default “excess distribution regime” under the PFIC rules with respect to (i) any gain realized on a sale or other disposition (including a pledge) of your Ordinary Shares, and (ii) any “excess distribution” you receive on your Ordinary Shares (generally, any distributions in excess of 125% of the average of the annual distributions on Ordinary Shares during the preceding three years or your holding period, whichever is shorter). Generally, under this excess distribution regime:

- the gain or excess distribution will be allocated ratably over the period during which you held your Ordinary Shares;
- the amount allocated to the current taxable year, will be treated as ordinary income; and
- the amount allocated to prior taxable years will be subject to the highest tax rate in effect for that taxable year and the interest charge generally applicable to underpayments of tax will be imposed on the resulting tax attributable to each such year.

The tax liability for amounts allocated to years prior to the year of disposition or excess distribution will be payable generally without regard to offsets from deductions, losses and expenses. In addition, gains (but not losses) realized on the sale of your Ordinary Shares cannot be treated as capital gains, even if you hold the shares as capital assets. Further, no portion of any distribution will be treated as QDI.

*QEF Regime.* A QEF election is effective for the taxable year for which the election is made and all subsequent taxable years and may not be revoked without the consent of the IRS. If a U.S. Holder makes a timely QEF election with respect to its direct or indirect interest in a PFIC, the U.S. Holder will be required to include in income each year a portion of the ordinary earnings and net capital gains of the PFIC as QEF income inclusions, even if amount is not distributed to the U.S. Holder. Thus, the U.S. Holder may be required to report taxable income as a result of QEF income inclusions without corresponding receipts of cash. Allego’s shareholders that are U.S. Holders subject to U.S. federal income tax should not expect that they will receive cash distributions from Allego sufficient to cover their respective U.S. tax liability with respect to such QEF income inclusions. In addition, U.S. Holders of Warrants will not be able to make a QEF election with respect to their warrants.

The timely QEF election also allows the electing U.S. Holder to: (i) generally treat any gain recognized on the disposition of its shares of the PFIC as capital gain; (ii) treat its share of the PFIC’s net capital gain, if any, as long-term capital gain instead of ordinary income; and (iii) either avoid interest charges resulting from PFIC status altogether, or make an annual election, subject to certain limitations, to defer payment of current taxes on its share of PFIC’s annual realized net capital gain and ordinary earnings subject, however, to an interest charge on the deferred tax computed by using the statutory rate of interest applicable to an extension of time for payment of tax. In addition, net losses (if any) of a PFIC will not pass through to our shareholders and may not be carried back or forward in computing such PFIC’s ordinary earnings and net

capital gain in other taxable years. Consequently, a U.S. Holder may over time be taxed on amounts that as an economic matter exceed our net profits.

A U.S. Holder's tax basis in Ordinary Shares will be increased to reflect QEF income inclusions and will be decreased to reflect distributions of amounts previously included in income as QEF income inclusions. No portion of the QEF income inclusions attributable to ordinary income will be treated as QDI. Amounts included as QEF income inclusions with respect to direct and indirect investments generally will not be taxed again when distributed. You should consult your tax advisors as to the manner in which QEF income inclusions affect your allocable share of Allego's income and your basis in your Ordinary Shares.

In order to comply with the requirements of a QEF election, a U.S. Holder must receive certain information from Allego. If Allego determines that it is a PFIC for any taxable year, Allego will endeavor to provide all of the information that a U.S. Holder making a QEF election is required to obtain to make and maintain a QEF election, but there is no assurance that Allego will timely provide such information. There is also no assurance that Allego will have timely knowledge of its status as a PFIC in the future or of the required information to be provided. In addition, if Allego holds an interest in a lower-tier PFIC (including, without limitation, in any PFIC subsidiaries), U.S. Holders will generally be subject to the PFIC rules described above with respect to any such lower-tier PFICs. There can be no assurance that a portfolio company or subsidiary in which Allego holds an interest will not qualify as a PFIC, or that a PFIC in which Allego holds an interest will provide the information necessary for a QEF election to be made by a U.S. Holder (in particular if Allego does not control that PFIC).

*Mark-to-Market Regime.* Alternatively, a U.S. Holder may make an election to mark marketable shares in a PFIC to market on an annual basis. PFIC shares generally are marketable if: (i) they are "regularly traded" on a national securities exchange that is registered with the SEC or on the national market system established under Section 11A of the Exchange Act; or (ii) they are "regularly traded" on any exchange or market that the Treasury Department determines to have rules sufficient to ensure that the market price accurately represents the fair market value of the stock. It is expected that Ordinary Shares, which are listed on NYSE, will qualify as marketable shares for the PFIC rules purposes, but there can be no assurance that Ordinary Shares will be "regularly traded" for purposes of these rules. Pursuant to such an election, you would include in each year as ordinary income the excess, if any, of the fair market value of such stock over its adjusted basis at the end of the taxable year. You may treat as ordinary loss any excess of the adjusted basis of the stock over its fair market value at the end of the year, but only to the extent of the net amount previously included in income as a result of the election in prior years. A U.S. Holder's adjusted tax basis in the PFIC shares will be increased to reflect any amounts included in income, and decreased to reflect any amounts deducted, as a result of a mark-to-market election. Any gain recognized on a disposition of Ordinary Shares will be treated as ordinary income and any loss will be treated as ordinary loss (but only to the extent of the net amount of income previously included as a result of a mark-to-market election). A mark-to-market election only applies for the taxable year in which the election was made, and for each subsequent taxable year, unless the PFIC shares ceased to be marketable or the IRS consents to the revocation of the election. U.S. Holders should also be aware that the Code and the Treasury Regulations do not allow a mark-to-market election with respect to stock of lower-tier PFICs that is non-marketable. There is also no provision in the Code, Treasury Regulations or other published authority that specifically provides that a mark-to-market election with respect to the stock of a publicly-traded holding company (such as Allego) effectively exempts stock of any lower-tier PFICs from the negative tax consequences arising from the general PFIC rules. We advise you to consult your own tax advisor to determine whether the mark-to-market tax election is available to you and the consequences resulting from such election. In addition, U.S. Holders of Warrants will not be able to make a mark-to-market election with respect to their warrants.

*PFIC Reporting Requirements.* A U.S. Holder of Ordinary Shares will be required to file an annual report on IRS Form 8621 containing such information with respect to its interest in a PFIC as the IRS may require. Failure to file IRS Form 8621 for each applicable taxable year may result in substantial penalties and result in the U.S. Holder's taxable years being open to audit by the IRS until such Forms are properly filed.

#### *Additional Reporting Requirements*

Certain U.S. Holders holding specified foreign financial assets with an aggregate value in excess of the applicable dollar thresholds are required to report information to the IRS relating to Ordinary Shares, subject to certain exceptions (including an exception for Ordinary Shares held in accounts maintained by U.S. financial institutions), by attaching a complete IRS Form 8938 to their tax return, for each year in which they hold Ordinary Shares. Substantial penalties apply to any failure to file IRS Form 8938, unless the failure is shown to be due to reasonable cause and not willful neglect. Also, in the event a U.S. Holder does not file IRS Form 8938 or fails to report a specified foreign financial asset that is required to be reported,

the statute of limitations on the assessment and collection of U.S. federal income taxes of such U.S. Holder for the related taxable year may not close before the date which is three years after the date on which the required information is filed. U.S. Holders should consult their tax advisors regarding the effect, if any, of these rules on the ownership and disposition of Ordinary Shares.

#### **Non-U.S. Holders**

A non-U.S. Holder of Ordinary Shares will not be subject to U.S. federal income tax or, subject to the discussion below under “—*Information Reporting and Backup Withholding*,” U.S. federal withholding tax on any dividends received on Ordinary Shares or any gain recognized on a sale or other disposition of Ordinary Shares (including, any distribution to the extent it exceeds the adjusted basis in the non-U.S. Holder’s Ordinary Shares) unless the dividend or gain is effectively connected with the non-U.S. Holder’s conduct of a trade or business in the United States, and if required by an applicable tax treaty, is attributable to a permanent establishment maintained by the non-U.S. Holder in the United States. In addition, special rules may apply to a non-U.S. Holder that is an individual present in the United States for 183 days or more during the taxable year of the sale or disposition, and certain other requirements are met. Such Holders should consult their own tax advisors regarding the U.S. federal income tax consequences of the sale or disposition of Ordinary Shares.

Dividends and gains that are effectively connected with a non-U.S. Holder’s conduct of a trade or business in the United States (and, if required by an applicable income tax treaty, are attributable to a permanent establishment or fixed base in the United States) generally will be subject to U.S. federal income tax at the same regular U.S. federal income tax rates applicable to a comparable U.S. Holder and, in the case of a non-U.S. Holder that is a corporation for U.S. federal income tax purposes, also may be subject to an additional branch profits tax at a 30% rate or a lower applicable tax treaty rate.

The U.S. federal income tax treatment of a non-U.S. Holder’s exercise of a Warrant, or the lapse of a Warrant held by a non-U.S. Holder, generally will correspond to the U.S. federal income tax treatment of the exercise or lapse of a warrant by a U.S. Holder, as described under “—*U.S. Holders—Exercise or Lapse of a Warrant*,” above, although to the extent a cashless exercise results in a taxable exchange, the consequences would be similar to those described in the preceding paragraphs above for a non-U.S. Holder’s gain on the sale or other disposition of the Ordinary Shares and Warrants.

#### **Information Reporting and Backup Withholding**

Information reporting requirements may apply to dividends received by U.S. Holders of Ordinary Shares and the proceeds received on the disposition of Ordinary Shares effected within the United States (and, in certain cases, outside the United States), in each case other than U.S. Holders that are exempt recipients (such as corporations). Backup withholding (currently at a rate of 24%) may apply to such amounts if the U.S. Holder fails to provide an accurate taxpayer identification number (generally on an IRS Form W-9 provided to the paying agent of the U.S. Holder’s broker) or is otherwise subject to backup withholding. U.S. Holders should consult their tax advisors regarding the application of the U.S. information reporting and backup withholding rules.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against the U.S. Holder’s U.S. federal income tax liability, and a U.S. Holder may obtain a refund of any excess amounts withheld under the backup withholding rules by timely filing the appropriate claim for a refund with the IRS and furnishing any required information.

#### **F. Dividends and Paying Agents**

Not Applicable.

#### **G. Statement by Experts**

Not Applicable.

#### **H. Documents on Display**

We are subject to the informational requirements of the Exchange Act that are applicable to foreign private issuers. Accordingly, we are required to file or furnish reports and other information with the SEC, including annual reports on Form 20-F and reports on Form 6-K. The SEC maintains an Internet website that contains reports and other information

regarding issuers that file electronically with the SEC. Our filings with the SEC are available to the public through the SEC's website at <http://www.sec.gov>.

As a foreign private issuer, we are exempt under the Exchange Act from, among other things, the rules prescribing the furnishing and content of proxy statements, and our executive officers, directors and principal and selling shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. In addition, we will not be required under the Exchange Act to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act, nor be required to comply with Regulation FD, which restricts the selective disclosure of material information.

The mailing address of Allego's principal executive office is Westervoortsedijk 73 KB, 6827 AV Arnhem, the Netherlands and its telephone number is +31 (0) 88 033 3033. Allego also maintains a website at <https://www.allego.eu>. In this Annual Report, the website addresses of the SEC and Allego are provided solely for information and are not intended to be active links. Allego is not incorporating the contents of the websites of the SEC and Allego or any other entity into this Annual Report.

**I. Subsidiary Information**

Not Applicable.

**J. Annual Report to Security Holders**

If we are required to provide an annual report to security holders in response to the requirements of Form 6-K, we will submit the annual report to security holders in electronic format in accordance with the EDGAR Filer Manual.

**ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Please refer to Note 32 (Financial risk management) to the audited consolidated financial statements included elsewhere in this Annual Report for details on the market risks to which Allego is exposed.

**ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES**

**A. Debt Securities**

Not applicable.

**B. Warrants and Rights**

Not applicable.

**C. Other Securities**

Not applicable.

**D. American Depositary Shares**

Not applicable.

**PART II**

**ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

None.

**ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS**

None.

**ITEM 15. CONTROLS AND PROCEDURES**

**Disclosure Controls and Procedures**

As required by Rule 13a-15 under the Exchange Act, our management, under the supervision and with the participation of our chief executive officer and our chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2022. As defined in Rule 13a-15 of the Exchange Act, the term “disclosure controls and procedures” means controls and other procedures designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and to ensure that information required to be disclosed by us in our reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our chief executive officer, our chief financial officer and other management, as appropriate, to allow timely decisions regarding our required disclosures.

Based on the foregoing, our chief executive officer and our chief financial officer have concluded that, as of December 31, 2022, our disclosure controls and procedures were not effective.

**Management’s Annual Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act, for the Company. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements and includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of a company’s assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that a company’s receipts and expenditures are being made only in accordance with authorizations of a company’s management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of a company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness of our internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

As required by Section 404 of the Sarbanes-Oxley Act of 2002 and related rules promulgated by the SEC, our management assessed the effectiveness of internal control over financial reporting as of December 31, 2022 using the criteria set forth in the report “Internal Control-Integrated Framework (2013)” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, our management concluded that our internal control over financial reporting as of December 31, 2022 was not effective due to the presence of material weaknesses in our internal control over financial reporting, as further discussed below.

In connection with the audits of our consolidated financial statements as of December 31, 2022 and 2021 and for the years ended December 31, 2022, 2021 and 2020, our management and our independent registered public accounting firm identified material weaknesses in our internal control over financial reporting. A “material weakness” is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis.

## [Table of Contents](#)

A remediation project has been set in place to remediate the internal controls according to the design. The remediation of the controls design and effectiveness is currently in progress. Allego described but did not adequately maintain an effective control environment commensurate with its financial reporting requirements.

Management identified the following other material weaknesses:

- Allego did not maintain a sufficient complement of personnel with an appropriate degree of accounting knowledge, experience and training, including supervision of external consultants, to appropriately analyze, record and disclose accounting matters commensurate with its accounting and reporting requirements.
- Allego did not adequately maintain formal accounting policies, procedures, including those around risk assessments, and controls, including segregation of duties, over accounts and disclosures to achieve complete, accurate and timely financial accounting, reporting and disclosures, including segregation of duties and adequate controls related to the preparation and review of journal entries. Further, Allego did not maintain sufficient entity level controls to prevent and correct material misstatements.
- Allego did not adequately maintain controls over the identification and assessment of recurring transactions in revenue recognition, including modification to contracts, inventory management and valuation, and lease accounting as well as the proper accounting of unusual significant transactions such as in areas of share-based payments and related parties.
- Allego did not adequately document controls over certain information technology (“IT”) general controls, including third-party IT service providers, for information systems that are relevant to the preparation of its consolidated financial statements. Specifically, Allego did not design and maintain (a) program change management controls to ensure that information technology program and data changes affecting financial IT applications and underlying accounting records are identified, tested, authorized and implemented appropriately and (b) user access controls to ensure appropriate segregation of duties and that adequately restrict user and privileged access to its financial applications and data to appropriate company personnel.

The material weakness related to formal accounting policies, procedures and controls resulted in adjustments to several accounts and disclosures. The IT deficiencies did not result in a material misstatement to the consolidated financial statements, however, the deficiencies, when aggregated, could impact maintaining effective segregation of duties, as well as the effectiveness of IT-dependent controls that could result in misstatements potentially impacting all financial statement accounts and disclosures that would not be prevented or detected. Each of these material weaknesses could result in a misstatement of account balances or disclosures that would result in a material misstatement to the annual or interim consolidated financial statements that would not be prevented or detected.

Allego has begun implementing a plan to remediate these material weaknesses; however, its overall control environment is still immature and may expose it to errors, losses or fraud. These remediation measures are ongoing and include hiring additional IT, accounting and financial reporting personnel and implementing additional policies, procedures and controls. Allego currently cannot estimate when it will be able to remediate these material weaknesses and it cannot, at this time, provide an estimate of the costs it expects to incur in connection with implementing the plan to remediate this material weakness. These remediation measures may be time consuming, costly, and might place significant demands on its financial and operational resources. If Allego is unable to successfully remediate these material weaknesses or successfully rely on outside advisors with expertise in these matters to assist it in the preparation of its financial statements, the financial statements could contain material misstatements that, when discovered in the future, could cause Allego to fail to meet its future reporting obligations and cause the trading price of Allego Ordinary Shares to decline.

### **Attestation Report of the Registered Public Accounting Firm**

This Annual Report on Form 20-F does not include an attestation report of the company’s registered public accounting firm regarding internal control over financial reporting due to a transition period established by rules of the SEC for emerging growth companies.

### **Changes in Internal Control Over Financial Reporting**

Except for the matters noted above, there were no changes in our internal control over financial reporting occurred during the period covered by this Annual Report on Form 20-F that have materially affected, or are reasonably likely to affect, our internal control over financial reporting.

**ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

Based on the qualifications and relevant experience described in “*Item 6.A. Directors and Senior Management*”, our Board has determined that Patrick Sullivan and Thomas Josef Maier each qualify as an audit committee financial expert as defined under applicable SEC rules and are independent in accordance with Rule 10A-3 of the Securities Exchange Act, NYSE rules and the DCGC.

**ITEM 16B. CODE OF ETHICS**

Our Board has established a Code of Business Conduct and Ethics applicable to our employees, directors and officers. Any waiver or amendment of this code may be made only by our Board and will be promptly disclosed as required by applicable U.S. federal securities laws and the corporate governance rules of the NYSE. Our Code of Business Conduct and Ethics is publicly available on our website at [www.allego.eu](http://www.allego.eu) and is reviewed on an annual basis. For the year ended December 31, 2022, we did not grant any waivers of the Code of Business Conduct and Ethics.

**ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

The following table sets forth the aggregate fees by categories specified below in connection with certain professional services rendered by Ernst & Young Accountants LLP (“E&Y”), our independent registered public accounting firm, for the years ended December 31, 2022 and 2021:

<i>(In €'000)</i>	For the year ended December 31,	
	2022	2021
Audit Fees <sup>(1)</sup>	3,847	3,321
Audit-Related Fees <sup>(2)</sup>	—	238
Tax Fees <sup>(3)</sup>	—	0
All Other Fees	—	0
<b>Total</b>	<b>3,847</b>	<b>3,559</b>

- (1) Audit Fees consist of fees billed for professional services rendered by the principal accountant for the audit of our annual financial statements, and those of our consolidated subsidiaries, as well as additional services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements.
- (2) Audit-Related Fees consist of fees billed for assurance and related services by the principal accountant that are reasonably related to the performance of the audit or review of our financial statements.
- (3) Tax Fees consist of fees for professional services rendered by the principal accountant for tax compliance, tax advice, and tax planning.

***Audit Committee’s pre-approval policies and procedures***

Our Audit Committee makes recommendations for the appointment, compensation and retention of our independent registered public accounting firm entrusted with the audit of our consolidated financial statements. Our Audit Committee has adopted a policy requiring management to obtain the Audit Committee’s approval before engaging our independent registered public accounting firm to provide any other audit or permitted non-audit services to us or our subsidiaries. Pursuant to this policy, which is designed to ensure that such engagements do not impair the independence of our independent registered public accounting firm, the Audit Committee reviews and pre-approves (if appropriate) specific audit and non-audit services in the categories Audit Services, Audit-Related Services, Tax Services, and any other services that may be performed by our independent registered public accounting firm.

**ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES**

None.

**ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

None.

**ITEM 16F. CHANGE IN REGISTRANT’S CERTIFYING ACCOUNTANT**

Not applicable.

**ITEM 16G. CORPORATE GOVERNANCE**

Pursuant to Section 303A.11 of the NYSE listing standards applicable to foreign private issuers, we are permitted to follow our home country practices in lieu of certain NYSE corporate governance requirements, provided that we disclose the requirements we are not following and describe the home country practices we are following.

Accordingly, we follow Dutch law and the rules of the DCGC in lieu of certain of the corporate governance requirements of the NYSE. The significant differences between Dutch law and the DCGC and the corporate governance requirements of the NYSE are set forth below:

- NYSE listing standards generally require a majority of board members to be “independent” as determined under the NYSE listing standards. While the DCGC, in principle, also requires that a majority of board members be “independent”, the definition of “independent” under the DCGC differs in its details from the corresponding definition of “independent” under the NYSE listing standards. In some cases, DCGC requirements are stricter; in other cases the NYSE listing standards are stricter. Currently, a majority of the members of the Allego Board are independent under the NYSE listing standards and the DCGC.
- NYSE listing standards applicable to U.S. companies require that external auditors be appointed by the audit committee. The general rule under Dutch law is that external auditors are appointed at an Allego General Meeting. In accordance with the requirements of Dutch law, the appointment and removal of our independent registered public accounting firm must be resolved upon at an Allego General Meeting. Our Audit Committee is responsible for determining the process for selecting and determining the remuneration of the independent registered public accounting firm and oversees and evaluates the work of our independent registered public accounting firm.
- Under NYSE listing standards, shareholders of U.S. companies must be given the opportunity to vote on all equity compensation plans and material revisions to those plans, with limited exceptions set forth in the NYSE listing standards. As a foreign private issuer, we are permitted to follow our home country laws regarding shareholder approval of compensation plans. Under Dutch law such approval is only required in relation to members of the board of directors if the articles of association of a company (i.e., public limited liability company (*naamloze vennootschap*)) stipulate that a corporate body other than the general meeting is authorized to determine the remuneration of members of the board of directors. The adoption of sub-plans under an equity incentive plan that has been approved by the general meeting does not require separate approval of the company’s general meeting, provided, however, that such sub-plans are adopted within the framework and limits of the equity incentive plan as approved by the general meeting. Approval by the general meeting is also not required in respect of equity compensation plans for employees, provided, however, that (i) such employees are no members of the board of directors and (ii) the general meeting has authorized the board of directors to issue shares and/or rights to subscribe for shares.
- We do not follow NYSE’s quorum recommendations applicable to meetings of shareholder. In accordance with Dutch law, the DCGC and generally accepted business practices in the Netherlands, the Allego Articles do not provide quorum requirements generally applicable to general meetings of shareholders is be subject to a quorum specified by Dutch law. Additionally, certain resolutions require an enhanced majority under Dutch law if less than half of the issued share capital of Allego is present or represented at such general meeting.
- Under NYSE listing standards, shareholder approval is generally required prior to the issuance of ordinary shares (i) to a director, officer or substantial security holder of the Company (or their affiliates or entities in which they have a substantial interest) in excess of one percent of either the number of ordinary shares or the voting power outstanding before the issuance, with certain exceptions; (ii) that will have voting power or number equal to or in excess of 20% of either the voting power or the number of shares, respectively, outstanding before the issuance, with certain exceptions; or (iii) that will result in a change of control of the issuer. We are exempt from the aforementioned NYSE requirements and under Dutch law and the Allego Articles, shareholders can delegate authority to issue ordinary shares to the board of directors at an annual general meeting of shareholders, which authorization was obtained prior to the completion of the Business Combination for a period of five years.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Allego N.V.

**Opinion on the Financial Statements**

We have audited the accompanying consolidated statements of financial position of Allego N.V. (the Company) as of December 31, 2022 and 2021, and the related consolidated statements of profit or loss, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2022, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2022, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

**Change in Accounting Principle**

As discussed in Note 2.7.24 to the consolidated financial statements, the Company has elected to change its accounting policy related to the allocation of depreciation and amortization expenses in the consolidated statement of profit and loss in 2022.

**Basis for Opinion**

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young Accountants LLP

We have served as the Company's auditor since 2018

Amsterdam, Netherlands

## 1 Reporting Entity

Allego N.V. (“Allego” or the “Company”), a continuation of the former Allego Holding B.V. (“Allego Holding”) as detailed below, was incorporated as a Dutch private limited liability company (*besloten vennootschap met beperkte aansprakelijkheid*) on June 3, 2021 under the laws of the Netherlands, under the name of Athena Pubco B.V.

On March 16, 2022, Athena Pubco B.V. changed its legal form from a private limited liability company to a public limited liability company (*naamloze vennootschap*), changed its name to Allego N.V. and entered into the Deed of Conversion containing the Articles of Association of Allego N.V. Allego N.V. consummated the previously announced business combination (“the SPAC Transaction”) with Spartan Acquisition Corp. III (“Spartan”) pursuant to the terms of the business combination agreement (“BCA”) and became a publicly traded company on the New York Stock Exchange (“NYSE”). The new public company — Allego N.V. — trades under the Allego name with the ticker “ALLG”. The Company’s registered seat and head office are in Arnhem, the Netherlands. Its head office is located at Westervoortsedijk 73 KB, 6827 AV in Arnhem, the Netherlands. The Company is registered with the Dutch Trade Register under number 82985537.

The Company’s main activity is enabling electrification through designing, building and the operation of charging solutions for electric vehicles in Europe. The Company services corporate customers with the long-term operation of comprehensive charging solutions. The Company’s goal is to offer the best EV charging experience with end-to-end charging solutions through different charging products (e.g. slow, fast, ultra-fast charging) in combination with our EV Cloud platform and additional service support. Upon completion of the BCA, Allego N.V. underwent a capital restructuring process which resulted in additional shares being issued to Madeleine Charging B.V. (“Madeleine”), an external consulting firm, the Private Investment in Public Entity (“PIPE”) Investors and former Spartan shareholders. The majority of the Allego N.V. shares are held by Madeleine which is an indirectly controlled subsidiary of Meridiam SAS (“Meridiam”) – a global investor and asset manager based in Paris, France. Meridiam specializes in the development, financing and long-term management of sustainable public infrastructure in the mobility, energy transition and social infrastructure sectors.

These financial statements are consolidated financial statements for the group consisting of Allego N.V. and its subsidiaries (jointly referred to as the “Group” or “Allego Group”). Further disclosure on why the Company’s consolidated financial statements include comparative information for transactions occurring during the years ended December 31, 2021 and 2020, despite the Company only being incorporated on June 3, 2021, is provided in Note 2 and Note 3. Allego’s principal subsidiaries are listed in Note 36.

## 2 Significant accounting policies

This section provides an overview of the significant accounting policies adopted in the preparation of these consolidated financial statements. These policies have been consistently applied to all the periods presented, unless otherwise stated. Certain amounts in prior reporting periods have been reclassified to conform to the current reporting period presentation. These reclassifications had no effect on loss for the year, shareholders’ equity or loss per share. See section 2.7.24 for additional detail.

### 2.1. Basis of preparation

#### 2.1.1 Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) and interpretations issued by the IFRS Interpretations Committee (“IFRS IC”) as issued by the International Accounting Standards Board (“IASB”).

The consolidated financial statements were approved and authorized for issuance in accordance with a resolution of the Board of Directors on May 16, 2023.

#### 2.1.2 Basis of measurement

The consolidated financial statements have been prepared on a historical cost basis, unless otherwise stated. All amounts disclosed in the consolidated financial statements are presented in thousands of euros (€), unless otherwise indicated.

The Company cannot be considered a separate entity acting in its own right for the period prior to the completion of the BCA, and the economic substance of its incorporation and the holding of the shares of Allego Holding constitutes a capital reorganization of the Group subsequent to the completion of the BCA and to aid with integrating new investors. Consequently, management has concluded that Allego should recognize in its consolidated financial statements the net

assets of Allego Holding and subsidiaries as per their preceding carrying amounts, and that comparative information should be represented, as the consolidated financial statements of the Company and its subsidiaries are a continuation of those of Allego Holding and its subsidiaries.

Therefore, the comparable consolidated financial statements as of and for the years ended December 31, 2021, December 31, 2020, and the current period from January 1, 2022, until March 16, 2022, represent the consolidated financial statements of Allego Holding and its subsidiaries.

## **2.2. Going concern assumption and financial position**

### ***Going concern***

The accompanying consolidated financial statements of the Group have been prepared assuming the Group will continue as a going concern. The going concern basis of presentation assumes that the Group will continue in operation for a period of at least one year after the date these financial statements are issued and contemplates the realization of assets and the settlement of liabilities in the normal course of business. See further discussion below.

### ***The Group's scale of operations***

The Group's strategy requires significant capital expenditures, as well as investments in building the Group's organization aimed at increasing the scale of its operations. The Group incurred losses during the first years of its operations including 2022 and expects to continue to incur losses in the next twelve months from the issuance date of these consolidated financial statements. This is typical in the industry, as builders and operators of EV charging sites often incur losses in the early years of operation as the network grows and consumers begin adopting EVs. Therefore, the Group relies heavily on funding from bank financing and equity issuance. For example, during 2022, the Group expanded its old credit facility by an additional €50,000 thousand through an accordion feature with the group of lenders within the original old facility agreement. Additionally, during 2022, the Group entered into a new facility agreement with a group of lenders led by Société Générale and Banco Santander, increasing the total available facility by €230,000 thousand to €400,000 thousand, to further support its growth. Further envisioned growth — in line with the Group's strategy — will require additional significant investments from lenders or its existing shareholders.

### ***Financial position of the Group***

As at December 31, 2022, the losses incurred during the first years of its operations were offset by equity contributions from 2022 and resulted in a positive equity of €7,758 thousand (December 31, 2021: negative €76,652 thousand) and cash and cash equivalents of €83,022 thousand (December 31, 2021: €24,652 thousand). The Group's operations to date have been funded by borrowings from the Company's shareholders and banks, as well as proceeds from the SPAC Transaction. In the consolidated statement of financial position as at December 31, 2022, the carrying value of the Group's borrowings amounts to €269,033 thousand (December 31, 2021: €213,128 thousand). Additionally, the Group had €51,324 thousand in lease liabilities (December 31, 2021: €31,617 thousand) and €56,390 thousand in trade and other payables (December 31, 2021: €29,333 thousand).

### ***Impact of COVID-19***

The results for the year ended December 31, 2022 have not been materially impacted by COVID-19 to the same extent as previous periods. As COVID-19 lockdown measures eased, traffic by EV-drivers and consumed energy levels increased. The impact on the Group's charging revenues correlates with these trends, increasing compared to 2021.

During the years ended December 31, 2022, 2021 and 2020, the Group did not receive COVID-19 related government support or any COVID-19 related rent concessions.

### ***Impact of increasing energy prices***

The Group provides electricity directly through its own chargers and needs to procure this energy from the power markets in Europe. As a result of the conflict between Russia and Ukraine, the price of gas has increased sharply, thereby increasing the demand on the European power markets with corresponding constraints in supply. This supply and demand imbalance has recently caused record increases in the price of electricity in Europe.

Allego obtains electricity through contracts with power suppliers or through direct sourcing on the power market. Allego utilizes an external, technology-enabled energy management platform to diversify its supply of power. Allego has entered into medium- and long-term power purchase agreements with renewable power to mitigate the future negative impact of

increased energy costs. This has allowed the Group to fix the price of a portion of energy purchased, with plans to grow this percentage substantially over the next 12-24 months.

Additionally, the Group expects to be able to pass these costs onto EV customers. The Group increased prices several times during 2022, particularly in the second half of the year in response to rises in the price of electricity. Despite the price increases, the Group experienced improved utilization rates, indicating a relatively high degree of demand inelasticity by customers. If energy prices were to decline below the fixed price obtained through power purchase agreements, the Group would still expect to keep prices charged to customers constant, enabling predictable margins on charging revenues.

### **Financing**

On May 27, 2019, the Group entered into a senior debt bank facility (“the old facility”), totaling €20,000 thousand, with a group of lenders. During the year ended December 31, 2021, the Group completed three drawdowns on the old facility for a total amount of €44,315 thousand. As a result of these drawdowns, the Group had utilized the maximum amount of credit as allowed under the old facility as of December 2, 2021. The old facility was due to expire on May 27, 2026.

On July 28, 2022, the Group expanded the old facility by an additional €50,000 thousand through an accordion feature with the group of lenders. Additionally, the Group received a waiver such that the Group was no longer required to pledge an amount of bank balances. In the original agreement, these bank balances were required to be pledged to secure the payment of interest and commitment fees (December 31, 2021: €2,563 thousand). Consequently, these bank balances were at the free disposal of the Group.

On December 19, 2022, the Group entered into a new facility agreement (“the renewed facility”) with a group of lenders led by Société Générale and Banco Santander, increasing the total available facility by €230,000 thousand to €400,000 thousand, to further support its growth. The renewed facility consists of (i) €70,000 thousand used to settle the old facility, (ii) up to €200,000 thousand to be used for financing and refinancing certain capital expenditures and permitted acquisitions (and for other permitted debt servicing uses) and (iii) up to €30,000 thousand to be used for issuance of guarantees and letters of credit (and when utilized by way of letters of credit, for general corporate purposes). The renewed facility expires in December 2027 and bears interest at Euribor plus a margin. As of December 31, 2022, the Group has not drawn on €120,790 thousand of this facility.

Under the terms of the renewed facility, the Group is required to comply with financial covenants, including leverage ratio and interest cover ratio, at the consolidated level of Allego N.V. Historically, the Group met its covenants as per the old facility agreement. A covenant breach would negatively affect the Group’s financial position and cash flows, in a way that could reasonably be expected to influence the decisions of the primary users of these consolidated financial statements. The Group considers the likelihood of a breach occurring as higher than remote as the Group incurred losses during the first years of its operations, even though the Group has complied with the covenants of the old facility throughout all reporting periods presented and expects to continue to meet financial covenants performance criteria of the renewed facility.

The compliance with covenants under the renewed facility agreement shall be tested every 6 months, with the testing period being the 12 months ending December 31 and June 30. The first testing date of the interest cover ratio is June 30, 2023, and the first testing date of the leverage ratio is June 30, 2024.

In the event of a covenant breach, the Group may within ten business days from the occurrence of a breach or the anticipated breach of the loan covenants remedy such default by providing evidence of receipt of new funding, sufficient to cure such breach (“equity cure right”). Such remediation is available for not more than two consecutive testing dates and four times over the duration of the renewed facility. In case if the covenants breach is not cured, such a breach is considered a default and could lead to the cancellation of the total undrawn commitments and the loan to become immediately due and payable.

Additionally, there are covenant ratios set as drawstop event conditions for the part of the renewed facility aimed at financing and refinancing certain capital expenditures and permitted acquisitions, which if breached prior to the anticipated utilization of the capex portion of the renewed facility – will result in the drawdown stop. Continuing breaches in the drawstop conditions would permit the bank to cancel the total undrawn commitments and immediately call the debt. The Group may within twenty business days from the occurrence of a drawstop event provide a remedial plan setting out the actions, steps and/or measures (which may include a proposal for adjustments of the financial covenants' or utilization rate's levels) which are proposed to be implemented in order to remedy such drawstop event.

Please refer to Note 33 for additional detail on loan covenants, and Note 25 for information on the terms and conditions of the existing credit facilities.

In parallel to the renewed facility, the Group entered into interest rate caps derivatives to help offset the interest rate risk of 65% of the outstanding loan amounts under the renewed facility. The Group has two interest rate caps in place with a notional of €181,487 thousand which mature in December 2027. The strike price changes over time and ranges between 1.50% and 3.43%.

Interest rate risks on the remaining portion of the outstanding loan amounts, including the impact that higher interest rates would have on the Company's going concern analysis, was included in the cash flow forecasts described below. Additional information on interest rate risk is described in Note 32.

#### ***Liquidity forecasts***

Management prepares detailed liquidity forecasts and monitors cash and liquidity forecasts on a continuous basis. In assessing the going concern basis of preparation of the consolidated financial statements, management estimated the expected cash flows for the next 12 months, incorporating current cash levels, revenue projections, detailed capital expenditures, operating expense budgets, interest payment obligations, and working capital projections, as well as compliance with covenants, the potential exercise of warrants, potential future equity raises, and availability of other financial funding from banks, like those obtained in 2022. The Group invests in new stations, chargers, grid connections, and potential business acquisitions only if the Group has secured financing for such investments. These forecasts reflect potential scenarios and management plans and are dependent on securing significant contracts and related revenues.

The Group has applied different scenarios ranging from a scenario that assumes regular capital expenditure levels based on the current available capex facility and a scenario that assumes a service-light model including revenues based only on existing contracts. All scenarios result in the Group having sufficient available cash and liquidity.

Based on these estimations, management has concluded that Allego will be able to fund the expected cash outflows in the next 12 months. Although the expectation for the coming year is that the Company will continue to have net losses and make additional investments, its cash flows from operations and renewed credit facility is sufficient for more than the next 12 months from the issuance of these consolidated financial statements. Therefore, the consolidated financial statements have been prepared under the assumption that the Group operates on a going concern basis.

As described above, long-term investments, development activities, and operations more than 12 months out may require additional financing to be obtained. Currently, no commitments exist for further growth investments. The Group will be required to seek additional financing to continue to execute its growth strategy and business plan in the long-term. The realization of such financing is inherently uncertain. Securing additional funding — by raising additional equity or debt financing — is important for the Group's ability to continue as a going concern in the long-term. However, there is no assurance that the Group will be able to raise additional equity or debt financing on acceptable terms, or at all.

### **2.3. Basis of consolidation**

Subsidiaries are all entities over which the Group has control. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee;
- the ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement(s) with the other vote holders of the investee;
- rights arising from other contractual arrangements;
- the Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit or loss, statement of comprehensive income, statement of changes in equity and statement of financial position respectively.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset.

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognized in equity and attributed to the equity holders of the Company.

If the Group loses control over a subsidiary, it derecognizes the related assets (including goodwill), liabilities and non-controlling interest, while any resultant gain or loss is recognized in profit or loss. Amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss. Any retained interest in the entity is remeasured to its fair value, with the change in the carrying amount recognized in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequent accounting for the retained interest as an associate, joint venture or financial asset.

Associates are all entities over which the Group has significant influence but not control or joint control. Investments in associates are accounted for using the equity method and are initially recognized at cost, including any potential transaction costs, as of the date the significant influence was obtained. Subsequently, the Group's share of the profit or loss and other comprehensive income/(loss) of the associates is included in the consolidated financial statements until the date on which the significant influence ceases. As at December 31, 2022, the Group has one associate (December 31, 2021: nil, December 31, 2020: nil).

The Group discontinues applying the equity method when the investment in associates is reduced to zero. Accordingly, additional losses are not recognized unless the Group has guaranteed certain obligations of the associates. When the associates subsequently report net income, the Group resumes applying the equity method but only after its share of that net income equals the share of net losses not recognized during the period the equity method was suspended.

#### **2.4. Principles for the consolidated statement of cash flows**

The consolidated statement of cash flows is prepared based on the indirect method. The consolidated statement of cash flows distinguishes between cash flows from operating, investing and financing activities. The cash items disclosed in the statement of cash flows comprise cash at bank, cash in hand, deposits held at call with financial institutions and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts when they are considered an integral part of the Group's cash management.

Cash flows denominated in foreign currencies have been translated at average exchange rates. Exchange differences on cash and cash equivalents are shown separately in the consolidated statement of cash flows. The Group has chosen to present interest paid as cash flows from operating activities and interest received as cash flows from investing activities.

The Group has classified the principal portion of lease payments within cash flows from financing activities and the interest portion within cash flows from operating activities. The Group has classified cash flows received from operating leases as cash flows from operating activities. Cash flows from the principal and interest of the finance lease receivables received are classified as cash flows from investing activities.

## **2.5. Foreign currency translation**

### **2.5.1 Functional and presentation currency**

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in euros (€), which is the Company's functional and presentation currency.

### **2.5.2 Transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies at year-end exchange rates, are recognized in the consolidated statement of profit or loss. All foreign exchange gains and losses are presented in the consolidated statement of profit or loss, within finance income/(costs).

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

### **2.5.3 Translation of foreign operations**

The results and financial position of foreign operations that have a functional currency different from the presentation currency of the Group are translated into the presentation currency as follows. Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position. Income and expenses for each statement of profit or loss and statement of comprehensive income are translated at average exchange rates, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of transactions are used. All resulting exchange differences are recognized in the consolidated statement of comprehensive income and accumulated in a foreign currency translation reserve, as a separate component in equity (attributed to non-controlling interests as appropriate).

When a foreign operation is sold, the associated exchange differences are reclassified to the consolidated statement of profit or loss, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate. Exchange differences arising are recognized in the consolidated statement of comprehensive income.

## **2.6. New and amended standards**

### **2.6.1 New and amended standards adopted by the group**

The Group applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after January 1, 2022. Other than for the standards and amendments set out in this section, the Group did not have to change its accounting policies or make retrospective adjustments as a result of applying these standards and amendments.

#### ***Annual improvements to IFRS 2018-2020: IFRS 9 Financial Instruments – Fees in the “10 per cent” test for derecognition of financial liabilities***

As part of its 2018–2020 annual improvements to the IFRS standards process, the IASB issued an amendment to IFRS 9 Financial Instruments. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received fees between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment. The amendment is effective for annual reporting periods beginning on or after January 1, 2022 with earlier adoption permitted.

The Group applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period ending December 31, 2022. The Group followed this amendment to assess whether the terms of the renewed facility were substantially different from the terms of the old facility.

***Amendments to IAS 16 Property, Plant and Equipment: Proceeds before intended use***

The amendment to IAS 16 Property, Plant and Equipment prohibits an entity from deducting from the cost of an item of property, plant and equipment any proceeds received from selling items produced while the entity is preparing the asset for its intended use. It also clarifies that an entity is “testing whether the asset is functioning properly” when it assesses the technical and physical performance of the asset, while the financial performance of the asset is not relevant to this assessment. Entities must disclose separately the amounts of proceeds and costs relating to items produced that are not an output of the entity’s ordinary activities, in profit or loss. The amendment is effective for annual reporting periods beginning on or after January 1, 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

The Group does not deduct proceeds received from charging sessions when the Group is preparing its chargers for its intended use from its property, plant and equipment cost. Therefore, this amendment does not have an impact on the Group’s consolidated financial statements.

The Group has also applied the following amendments for the first time for the annual reporting period commencing January 1, 2022:

- Amendments to IAS 37: Onerous Contracts – Cost of Fulfilling a Contract
- Amendments to IFRS 3: Reference to the Conceptual Framework
- Annual improvements to IFRS 2018-2020: minor amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards – Subsidiary as a First-time Adopter, IAS 41 Agriculture – Taxation in Fair Value Measurements, Illustrative Examples accompanying IFRS 16 Leases

The amendments listed above did not have any impact on the amounts recognized in prior periods and are not expected to significantly affect the current or future periods.

**2.6.2 New standards and interpretations not yet adopted**

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group’s financial statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

***Amendments to IAS 1 – Classification of Liabilities as Current or Non-current***

The narrow-scope amendments to IAS 1 *Presentation of Financial Statements* clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the expectations of the entity or events after the reporting date (e.g., the receipt of a waiver or a breach of covenant). The amendments also clarify what IAS 1 means when it refers to the “settlement” of a liability. In October 2022 further amendments were issued to clarify that covenants of loan agreements which an entity must comply with only after the reporting date would not affect classification of a liability of current or non-current at the reporting date. These amendments introduce additional disclosure requirements.

The amendments could affect the classification of liabilities, particularly for entities that previously considered management’s intentions to determine classification and for some liabilities that can be converted into equity. The amendments are effective for annual reporting periods beginning on or after January 1, 2024 and must be applied retrospectively in accordance with the normal requirements of IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*. The Group does not expect the standard to have an impact on the classification of the Group’s liabilities within the consolidated financial statements, but will evaluate any additional disclosure requirements, as applicable. ~~has not yet considered the potential impact of the amendments to the standard on the Group’s consolidated financial statements, if any.~~

***IFRS 17 – Insurance Contracts***

In May 2017, the IASB issued IFRS 17 *Insurance Contracts* (IFRS 17), a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 *Insurance Contracts* (IFRS 4) that was issued in 2005. IFRS 17 applies to all types of insurance contracts

(i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. IFRS 17 is effective for reporting periods beginning on or after January 1, 2023, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17. The Group does not expect the standard to have an impact on the Group's consolidated financial statements.

#### ***Other new and amended standards and interpretations***

The following new and amended standards and interpretations that are issued, but not yet effective, are not expected to have an impact on the Group's consolidated financial statements:

- Amendments to IAS 12 'Income Taxes': Deferred Tax related to Assets and Liabilities arising from a Single Transaction
- Amendments to IAS 1 and IFRS Practice Statement 2: Disclosure of Material Accounting policies
- Amendments to IAS 8 – Definition of Accounting Estimates
- Amendment to IFRS 16 – Leases on sale and leaseback

The amendments are effective for annual periods beginning on or after January 1, 2023.

## **2.7. Summary of significant accounting policies**

### **2.7.1 Segment reporting**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker ("CODM"), who is responsible for assessing the performance of the operating segments and allocating resources, has been identified as the Executive Board of the Group. The Executive Board consists of the chief executive officer (CEO), the chief financial officer (CFO) and the chief technology officer (CTO).

### **2.7.2 Business combinations**

The Group accounts for business combinations using the acquisition method when the acquired set of activities and assets meets the definition of a business as per IFRS 3 and control is transferred to the Group. To determine whether a particular set of activities and assets is a business, the Company assesses whether the set of assets and activities acquired includes, at a minimum, an input and a substantive process and whether outputs can be produced.

The cost of an acquisition is measured at the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

Any contingent or deferred consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent or deferred consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured, and settlement is accounted for within equity. Otherwise, other contingent or deferred consideration is remeasured at fair value at each reporting date and subsequent changes in the fair value of the consideration are recognized in the consolidated statement of profit or loss.

If the business combination is achieved in stages, the acquisition date carrying value of the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognized in the consolidated statement of profit or loss.

In the event of an asset acquisition, the Group applies the guidance prescribed by IFRS 3 and allocates the cost of the transaction to the assets acquired and liabilities assumed based on their relative fair values at the date of purchase with no goodwill recognized. For any identifiable asset or liability initially measured at an amount other than cost, the Group initially measures that asset or liability at the amount specified in the applicable IFRS Standard. The Group then allocates the residual transaction price to the remaining identifiable assets and liabilities based on their relative fair values at the date of the acquisition.

### **2.7.3 Goodwill**

In a business combination, goodwill is initially measured at cost (being the excess of the aggregate of the: consideration transferred, amount of non-controlling interests and the fair value of any previously interest held, over the fair value of the net identifiable assets acquired and liabilities assumed). After initial recognition, goodwill is not amortized but it is tested

for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Refer to the accounting policies on impairment of non-financial assets (including goodwill) in Note 2.7.15.

On disposal of an entity, the associated goodwill is included in the carrying amount of the entity when determining the gains or losses on disposal.

#### **2.7.4 Revenue recognition**

The Group recognizes revenue from the following activities:

- revenue from charging sessions;
- revenue from the sale of charging equipment to customers;
- revenue from installation services;
- revenue from the operation and maintenance of charging equipment owned by customers; and
- revenue from consulting services.

#### ***Charging sessions***

Charging sessions reflect the revenues related to charging sessions at charging equipment owned by the Group. The Group acts as a charge point operator in public spaces, at consumer's homes and at companies' locations. The Group supplies electricity to owners and drivers of electric vehicles which use a charge card issued by a mobility service provider ("MSP"), credit card or a charging app to pay for these services. Charging revenue is recognized at the moment of charging, when the control of electricity is transferred to the customer. The Group is acting as a principal in charging transactions for charging equipment that is owned by the Group as it has the primary responsibility for these services and discretion in establishing the price of electricity.

The Group is considered an agent in charging transactions for charging equipment owned by third parties as the Group does not have control over electricity, the Group has to reimburse the electricity costs to EV drivers, and because the charging services to homeowners and company locations are administrative in nature.

#### ***Sale of charging equipment***

The Group enters into agreements with customers for the sale of charging equipment. These contracts are generally awarded based on a proposal and business case for a certain location including traffic and other activity predictions. If the proposal is awarded by the customer, the Group enters into a development contract under which the Group purchases and installs charging equipment at the relevant location. The Group has determined that the sale and installation of the equipment constitute two distinct performance obligations since the integration of both performance obligations is limited, the installation is relatively straight-forward and these installation services can be provided by other suppliers as well. These separate performance obligations are both sold on a stand-alone basis and are distinct within the context of the contract. When the contract includes multiple performance obligations, the transaction price is allocated to each performance obligation based on the stand-alone selling prices. Where such stand-alone selling prices are not directly observable, these are estimated based on expected cost-plus margin.

Revenue from the sale of charging equipment is recognized at a point in time when control of the charging equipment is transferred to the customer. Depending on the terms and conditions of the contract, this can be:

- the moment when the customer has the legal title and the physical possession of the charging equipment once the delivery on premise takes place; or
- the moment when the customer has not taken physical possession of the charging equipment and the delivery on premise has not taken place, but the customer has requested the Group to hold onto the charging equipment, and has the ability to direct the use of, and obtain substantially all of the remaining benefits from the charging equipment.

#### ***Installation services***

Revenue from installation of charging equipment is recognized over time. The Group uses an input method in measuring progress of the installation services. The input method is based on the proportion of contract costs incurred for work

performed to date in proportion to the total estimated costs for the services to be provided. Management considers that this input method is an appropriate measure of the progress towards complete satisfaction of these performance obligations under IFRS 15. In case the Group cannot reliably measure progress of the installation services, the Group only recognizes revenue to the level of costs incurred.

The Group also sells charging equipment and installation services separately. In that event the same revenue recognition principles are applied as those applied for a combined sale of charging equipment and installation services.

***Operation and maintenance of charging equipment***

Service revenue from operation and maintenance (“O&M”) services of charging equipment owned by customers is recognized over time. Services include the deployment of the Group’s cloud-based platform to collect, share and analyze charging data as well as the maintenance of the site. Customers are invoiced on a monthly basis and consideration is payable when invoiced. The Group recognizes revenue only when the performance obligation is satisfied, therefore any upfront billing and payments are accounted for as an advance payment.

Part of the O&M fees are variable and based on certain performance indicators related to the charging equipment, such as utilization. The Group recognizes variable consideration when the O&M fees occur.

The Group and a customer may enter into a development contract and an O&M contract at the same time. These contracts are not negotiated as a package and there are distinct commercial objectives and terms, the amount of consideration to be paid in one contract does not depend on the price or performance of the other contract and the goods or services promised in the contracts represent multiple performance obligations. Therefore, development and O&M contracts are treated as separate arrangements.

No significant element of financing is deemed present as the sales are made with a credit term of 30 days, which is consistent with market practice. Except for assurance type warranty provisions, the Group did not recognize an obligation to repair or warrant products or services as the Group does not provide any guarantee extension services.

***Consulting services***

The Group recognizes revenue from providing consulting services on research strategy and development of proprietary integrated tools taking the form of both software and/or hardware. Revenue from providing consulting services is recognized in the accounting period in which the services are rendered. Revenue is recognized over time using the input variable method as a measure of progress.

In the case of fixed-price contracts, the customer pays the fixed amount based on a payment schedule. If the services rendered by the Group exceed the payments, a contract asset is recognized. If the payments exceed the services rendered, a contract liability is recognized.

***Contract assets***

Fees associated with the development contracts are fixed and payable upon the achievement of milestones. If the services rendered by the Group exceed the payment, a contract asset is recognized. Contract assets are subject to an impairment assessment. Refer to the accounting policies on impairment of financial assets in Note 2.7.17.

***Contract liabilities***

A contract liability is recognized if a payment from the customer is received, and it precedes the satisfaction of a performance obligation by the Group. Contract liabilities are recognized as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

**2.7.5 Cost of sales**

Cost of sales represents the electricity cost for the charging revenues, which is billed to the Group by utility companies, maintenance costs, depreciation expense related to charging equipment and charging infrastructure, and amortization expense related to the EV Cloud platform. Cost of sales related to development contracts consists of the cost of charging equipment and the third-party service cost for the installation services including the establishment of the grid connection.

Cost of sales related to the O&M contracts mainly consists of the third-party service cost (such as costs incurred for monitoring the state of charging poles, cleaning of charging poles, data-related costs). These expenses are recognized in the period in which they are incurred.

During the year ended December 31, 2022, the Company changed its accounting policy related to the allocation of depreciation and amortization expenses in the statement of profit or loss, refer to Note 2.7.24 for details.

#### **2.7.6 Other income**

The Group recognizes other income from the following sources:

- sale of CO<sub>2</sub> tickets (for example, “HBE certificates” or *hernieuwbare brandstofeenheden* in the Netherlands);
- government grants;
- disposal of property, plant and equipment;
- sublease rental income;
- fair value gains/(losses) on derivatives (purchase options); and
- other items.

CO<sub>2</sub> tickets are issued by governments and therefore IAS 20 *Accounting for government grants and disclosure of government assistance* is applicable. CO<sub>2</sub> tickets are initially recognized at fair value as inventory (refer to the accounting policies on inventories in Note 2.7.16). Other income from the sale of CO<sub>2</sub> tickets (for example, HBE certificates in the Netherlands) includes both the fair value gain on initial recognition and the gain or loss on the subsequent sale.

The accounting policy for the disposal of property, plant and equipment is disclosed in Note 2.7.12. The accounting policy for government grants is disclosed in Note 2.7.7. The accounting policy for sublease rental income is disclosed in Note 2.7.14, section “Group as a lessor”.

The accounting policy for the fair value gains and losses on the purchase options derivatives is disclosed in Note 2.7.17.

Other items mainly relate to reimbursements that the Group has received from one of its suppliers for chargers. See note 7.

#### **2.7.7 Government grants**

Government grants are recognized where there is reasonable assurance that the grant will be received and that the Group will comply with all attached conditions. When the grant relates to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, which it is intended to compensate, are expensed. Income from government grants is recorded in the consolidated statement of profit or loss as other income.

When the grant relates to an asset, the carrying amount of the related asset is reduced with the amount of the grant. The grant is recognized in the consolidated statement of profit or loss over the useful life of the depreciable asset by way of a reduced depreciation charge.

Grants relating to assets relate to the Group’s chargers and charging infrastructure. Refer to Note 15 for details.

#### **2.7.8 General and administrative expenses**

General and administrative expenses relate to the Group’s support function and mainly comprise employee benefits, depreciation, amortization and impairment charges, IT costs, housing and facility costs, travelling costs, fees incurred from third parties and other general and administrative expenses. General and administrative expenses are recognized in the consolidated statement of profit or loss when incurred.

During the year ended December 31, 2022 the Company changed its accounting policy, related to the allocation of a portion of depreciation and amortization expenses in the consolidated statement of profit or loss. Refer to the details and the rationale of the change in Note 2.7.24.

## **2.7.9 Selling and distribution expenses**

Selling and distribution expenses relate to the Group's sales function and mainly comprise employee benefits, depreciation charges, marketing and communication costs, housing and facility costs, travelling costs and other selling and distribution expenses. Selling and distribution expenses are recognized in the consolidated statement of profit or loss when incurred.

## **2.7.10 Employee benefits**

### ***Short-term employee benefits***

Short-term employee benefits include wages, salaries, social security contributions, annual leave, including paid time-off, accumulating sick leave and non-monetary benefits and are recognized as an expense as the related services are provided by the employee to the Group. Liabilities for short-term employee benefits that are expected to be settled within twelve months after the reporting period are recorded for the amounts expected to be paid when the liabilities are settled.

### ***Pensions and other post-employment obligations***

#### ***Pension plans***

The Group operates various pension plans, including both defined benefit and defined contribution plans, for its employees in the Netherlands, Belgium, Germany, the United Kingdom, Norway and Sweden. To the employees in France no Group pension plan applies, but a statutory end-of-service benefit applies. The plans are generally funded through payments to insurance companies or trustee-administered funds as determined by periodic actuarial calculations.

#### ***Defined benefit plans***

The liability or asset recognized in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation. In countries where there is no deep market in such bonds, the market rates on government bonds are used.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expenses in the consolidated statement of profit or loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. They are included in accumulated deficit in the consolidated statement of changes in equity and in the consolidated statement of financial position.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in the consolidated statement of profit or loss as past service costs.

#### ***Defined contribution plans***

For defined contribution plans, the Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expenses when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

### ***Other long-term employee benefits***

The Group operates a jubilee plan for certain employees in the Netherlands, for which the Group records a provision. The provision is measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period, using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service.

Expected future payments are discounted using market yields at the end of the reporting period of high-quality corporate bonds with terms and currencies that match, as closely as possible, the estimated future cash outflows. Interest cost is calculated by applying the discount rate to the expected future payments. This cost is recognized in the consolidated statement of profit or loss, within finance income/(costs).

Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognized in the consolidated statement of profit or loss.

#### **Termination benefits**

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits at the earlier of the following dates: (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the Group recognizes costs for a restructuring that is within the scope of IAS 37 and involves the payment of terminations benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

### **2.7.11 Share-based payment**

#### **2.7.11.1 First special fees agreement**

A first share-based payment arrangement was provided to an external consulting firm via a first special fees agreement (the *First Special Fees Agreement*). Information relating to this agreement between the Company's immediate parent entity — Madeleine — and the consulting firm is set out in Note 11.1. The fair value of the share-based payment arrangement granted under the First Special Fees Agreement was recognized as an expense, with a corresponding increase in accumulated deficit. The total amount to be expensed was determined by reference to the fair value of the share-based payment arrangement, including market performance conditions. The fair value excluded the impact of any service and non-market performance vesting conditions.

IFRS 2 requires the total expense to be recognized over the vesting period, which is the period over which all of the specified service and non-market vesting conditions are to be satisfied. For the First Special Fees Agreement the expenses were recognized over the service period (from the grant date until a liquidity event, refer to Note 3.1.7).

#### **2.7.11.2 Second special fees agreement**

A second share-based payment arrangement is provided to an external consulting firm via a second special fees agreement (the *Second Special Fees Agreement*) (compared to the First Special Fees Agreement entered into in December 2020). Information relating to this agreement which was originally between the Company's immediate parent entity — Madeleine — and the consulting firm is set out in Note 11.2. The fair value of the share-based payment arrangement granted under the Second Special Fees Agreement is recognized as an expense, with a corresponding increase in accumulated deficit as long as the agreement remained in place between Madeleine and the consulting firm. The Second Special Fees Agreement was novated from Madeleine to the Company during the reporting period and as a result, the fair value of the share-based payment arrangement granted under the Second Special Fees Agreement is recognized as an expense, with corresponding movements in the provision recognized as part of the novation. The total amount to be expensed is determined by reference to the fair value of the share-based payment arrangement, including market performance conditions. The fair value excludes the impact of any service and non-market performance vesting conditions.

IFRS 2 requires the total expense to be recognized over the vesting periods, which are the periods over which all of the specified service and non-market vesting conditions are to be satisfied. For the Second Special Fees Agreement the expenses are recognized over the service periods (from the grant date until each forecasted equity injection, refer to Note 3.1.8). The Group shall revise its estimate of the length of the vesting periods, if necessary, if subsequent information indicates that the length of the vesting period differs from previous estimates. This may result in the reversal of expenses if the estimated vesting periods are extended.

### 2.7.11.3 Management Incentive Plan

The share-based payment arrangement in place related to the Management Incentive Plan qualifies as an equity settled share-based payment in accordance with IFRS 2. As mentioned in Note 11.3, as part of Allego's Management Incentive Plan some key management employees were granted options, with performance vesting criteria attached to some of these options.

The grant date fair value of grant options (options subject to the expiry of a blocking period of 18 months) is recognized as an operating expense with a corresponding increase in accumulated deficit. The fair value is determined at the grant date and the total expense is recognized immediately since the participants are not required to complete a specified period of service period before becoming unconditionally entitled to these equity instruments.

The grant date fair value of the performance options (options subject to predefined performance conditions and the expiry of the blocking period) is recognized as an operating expense with a corresponding increase in accumulated deficit. The fair value is determined at the grant date and the total expense is recognized over the vesting period. At the end of each reporting period, the Group revises the expense for the services received based on the non-market vesting and service conditions. The impact is recognized in the consolidated statement of profit or loss with the corresponding increase in accumulated deficit.

The grant options and performance options do not include any market conditions or non-vesting conditions that should be included in their fair value. The grant date fair value remains the same over time.

### 2.7.12 Property, plant and equipment

Property, plant and equipment are initially recorded in the consolidated statement of financial position at their cost. For property, plant and equipment acquired from third parties this is the acquisition cost, including costs that are directly attributable to the acquisition of the asset. For internally constructed assets, cost comprises direct costs of materials, labor and other direct production costs attributable to the construction of the asset. Each item of property, plant and equipment is subsequently stated at historical cost less accumulated depreciation and accumulated impairment, if any.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to the consolidated statement of profit or loss during the reporting period in which they are incurred.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the asset's use or disposal. Any gain or loss arising on the disposal or retirement of the asset (determined as the difference between the net disposal proceeds and the carrying amount of the asset) is recorded in the consolidated statement of profit or loss when the asset is derecognized, within other income. Occasionally, the Group sells its own chargers and/or charging equipment to a customer. In that case, the carrying value of the disposed assets are recorded within cost of sales. The proceeds of such transactions are recorded within revenue from the sale of charging equipment.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

#### *Depreciation methods and periods*

The Group depreciates its property, plant and equipment using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives. Leasehold improvements are depreciated over the shorter of their lease term and their estimated useful lives. The estimated useful lives used are as follows:

<b>Asset class</b>	<b>Useful life</b>
Chargers and charging infrastructure	7 – 10 years
Other fixed assets	3 – 10 years
Assets under construction	Not depreciated

Other fixed assets mainly comprise leasehold improvements, office equipment, IT assets and other fixed assets.

The residual values, useful lives and depreciation methods are reviewed at the end of each reporting period and adjusted prospectively, if appropriate.

### **2.7.13 Intangible assets**

The Group's intangible assets consist of software, customer relationships and goodwill. Software primarily comprises the Group's internally developed EV Cloud platform and software purchased from third parties. Customer relationships and goodwill resulted from the business combinations as detailed in Note 4.

#### ***Internally developed software***

Internally developed software comprises the Group's internally developed EV Cloud platform. Its cost consists of the development cost that are directly attributable to the design and testing of the EV Cloud platform, which is controlled by the Group.

Development costs are capitalized as software if the following criteria are met:

- It is technically feasible to complete the software so that it will be available for use.
- Management intends to complete the software and use or sell it.
- There is an ability to use or sell the software.
- It can be demonstrated how the software will generate probable future economic benefits.
- Adequate technical, financial and other resources to complete the development and to use or sell the software are available.
- The expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalized as part of the software include direct costs of labor and other direct production costs attributable to the development of the software.

Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use over its estimated useful life of 8 years. Following initial recognition, internally developed software is carried at cost less any accumulated amortization and accumulated impairment losses.

Research expenditure and development expenditure related to software that do not meet the criteria above are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

#### ***Software and licenses purchased from third parties***

Software and licenses purchased from third parties comprises software and licenses for the use of platforms from third parties. Software and licenses purchased from third parties are measured on initial recognition at cost. Cost comprises the purchase price and directly attributable costs of preparing (i.e., tailoring) the software or platform for its intended use by the Group. Following initial recognition, software and licenses purchased from third parties are carried at cost less any accumulated amortization and accumulated impairment losses. Software and licenses purchased from third parties are amortized over its useful life or the duration of the license, as applicable.

#### **Goodwill**

The goodwill arisen from the acquisition of subsidiaries is included in the Group's intangible assets. Please refer to Note 2.7.3 and Note 2.7.15 for details over the accounting policies applied in accounting for goodwill.

#### **Customer relationships**

The customer relationships were acquired as part of a business combination (see Note 4 for details). They are recognized at their fair value at the date of acquisition and are subsequently carried at cost less accumulated amortization and accumulated impairment losses. Customer relationships are amortized on a straight-line basis over its useful life, which is based on the timing of projected cash flows of the contracts.

*Derecognition*

An intangible asset is derecognized upon disposal or when no future economic benefits are expected to arise from the asset's use or disposal. Any gain or loss arising on derecognition of the asset (determined as the difference between the net disposal proceeds and the carrying amount of the asset) is recorded in the consolidated statement of profit or loss when the asset is derecognized.

*Amortization methods and periods*

The Group amortizes intangible assets with a finite useful life using the straight-line method to allocate their cost over their estimated useful lives. The estimated useful lives used are as follows:

<b>Asset class</b>	<b>Useful life</b>
Software – Internally developed software	3 years
Software and licenses – Purchased from third parties	1 – 25 years
Customer relationships	16 – 17 years

The useful lives and amortization methods are reviewed at the end of each reporting period and adjusted prospectively, if appropriate.

**2.7.14 Leases**

***Group as a lessee***

The Group leases office buildings, cars, software, land permits and other assets. Other assets comprise office furniture. Rental contracts are typically agreed for fixed periods of several years. The contractual lease term of cars is set at four years, where extensions are unusual. Software relates to the right of use of a third-party supplier's application software. The contractual lease term of software is set at five years with a two-year extension option. The contractual lease term of office buildings is typically set at five years but may have extension options as described below.

Contracts may contain both lease and non-lease components. The Group has elected not to separate lease and non-lease components for all identified asset classes and instead accounts for these as a single lease component.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

***Determining the right-of-use asset and lease liability***

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance payments), less any lease incentives receivable;
- variable lease payments that are based on an index or rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Group under residual value guarantees;
- the exercise price of a purchase option if it is reasonably certain that the Group will exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the lease liability.

The Group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Lease payments are allocated between principal and finance cost. The finance cost is charged to the consolidated statement of profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the lease liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of the lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs, and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain that it will exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

The right-of-use assets are also subject to impairment and are allocated to the cash-generating unit to which these assets relate. Refer to the accounting policy for impairment of non-financial assets, which is disclosed in Note 2.7.15.

#### ***Discount rate***

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions. To determine the incremental borrowing rate, the Group uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the Group and makes adjustments specific to the lease (e.g., term, country, currency and security).

#### ***Leases of low-value assets and short-term leases***

Low-value assets comprise small items of office furniture. The Group has not applied the practical expedient to recognize leases of low-value assets on a straight-line basis as an expense in the consolidated statement of profit or loss.

Short-term leases are leases with a lease term of twelve months or less without a purchase option. The Group has short-term building and car leases. The Group has applied the practical expedient to recognize short-term building leases, but not for short-term car leases, on a straight-line basis as an expense in the consolidated statement of profit or loss.

#### ***Lease term***

Extension and termination options are included in a number of office buildings, software, car leases and land permits across the Group. These are used to maximize operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor.

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if it is reasonably certain that the lease will be extended (or not terminated).

For leases of offices and land permits, the following factors are normally the most relevant:

- If there are significant penalty payments to terminate (or not to extend), it is typically reasonably certain that the Group will extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, it is typically reasonably certain that the Group will extend (or not terminate).
- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or to not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

***Group as a lessor***

When the Group acts as a lessor, it determines at lease commencement whether each lease is a finance lease or an operating lease. To classify each lease, the Group makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, the lease is classified as a finance lease. If this is not the case, the lease is classified as an operating lease.

As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset and whether, at the inception date, the present value of the lease payments amounts to at least substantially all of the fair value of the underlying asset.

If an arrangement contains lease and non-lease components, the Group applies IFRS 15 *Revenue from Contracts with Customers* to allocate the consideration in the contract.

When the Group is an intermediate lessor, it accounts for its interests in the head-lease and the sublease separately. It assesses the lease classification of a sublease with reference to the right-of-use asset arising from the head-lease, not with reference to the underlying asset.

***Operating subleases***

The Group subleases some of its leased office buildings to third parties. The contractual term of subleases of office buildings is typically set at three years but is in no event longer than the lease term of the head-lease.

Subleases may have extension and/or termination options that are typically exercisable only by the lessee and not by the Group. All subleases of the Group's leased office buildings are classified as operating subleases.

The Group recognizes lease payments received under operating leases as income on a straight-line basis over the lease term as part of other income.

**2.7.15 Impairment of non-financial assets (including goodwill)**

The Group assesses at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, the Group estimates the asset's recoverable amount. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets ("cash-generating units"). An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses are recognized in the consolidated statement of profit or loss in expense categories consistent with the function of the impaired asset.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

The Group bases its impairment calculation on most recent budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal

is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of profit or loss.

#### *Goodwill*

Goodwill impairment testing is performed annually or more frequently if indicators of potential impairment exist, which includes evaluating qualitative and quantitative factors to assess the likelihood of an impairment. These indicators include changes in the business climate, changes in management, legal factors, operating performance indicators or sale of disposal of the acquired business. The Group allocates goodwill to a group of CGU's for the purpose of impairment testing based on such CGU's being expected to benefit from the business combination in which the goodwill arose. This group of CGU's is the lowest level at which goodwill is monitored for internal management purposes. The carrying amount of goodwill is compared with the recoverable amount of the group of CGU's it was allocated to, which is the higher of the group of CGU's value in use and its fair value less cost to sell.

#### **2.7.16 Inventories**

##### *Finished products and goods for resale*

Inventories of finished products and goods for resale are stated at the lower of cost and net realizable value. Costs are assigned to individual items of inventory on the basis of weighted average costs. Costs of purchased inventory are determined after deducting rebates and discounts.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

##### *CO<sub>2</sub> Tickets (for example, HBE certificates in the Netherlands)*

*CO<sub>2</sub> Tickets* are initially measured at fair value, which is the initial cost of the certificates. Upon initial recognition of the certificates, the Group records a corresponding gain in other income. They are subsequently stated at the lower of cost and net realizable value. Costs are assigned on an individual basis.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

#### **2.7.17 Financial instruments**

The Group recognizes a financial asset or financial liability in its consolidated statement of financial position when the Group becomes a party to the contractual provisions of the financial instrument.

##### *Financial assets*

##### *Classification*

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through other comprehensive income with recycling of cumulative gains and losses – debt instruments (“FVOCI – debt instruments”);
- those to be measured subsequently at fair value through other comprehensive income with no recycling of cumulative gains and losses upon derecognition – equity instruments (“FVOCI – equity instruments”);
- those to be measured subsequently at fair value through profit or loss (“FVPL”); and
- those to be measured at amortized cost.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are “solely payments of principal and interest (“SPPI”)” on the principal amount outstanding. This assessment is

referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortized cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at FVOCI are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets that do not meet the criteria for amortized cost or FVOCI are measured at FVPL.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

***Initial measurement***

With the exception of trade receivables that do not contain a significant financing component, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in the consolidated statement of profit or loss.

***Trade receivables***

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within 30 days and are therefore all classified as current. Trade receivables are recognized initially at the transaction price, unless they contain significant financing components, when they are recognized at fair value.

***Subsequent measurement***

***Financial assets at amortized cost***

Financial assets at amortized cost are subsequently measured using the effective interest ("EIR") method and are subject to impairment. Gains and losses are recognized in the consolidated statement of profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost include cash and cash equivalents, trade receivables, other receivables and pledged bank balances included under current and non-current other financial assets.

***Financial assets at FVOCI — debt instruments***

For debt instruments at FVOCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the consolidated statement of profit or loss and computed in the same manner as for financial assets measured at amortized cost. The remaining fair value changes are recognized in the consolidated statement of comprehensive income ("OCI"). Upon derecognition, the cumulative fair value change recognized in OCI is recycled to the consolidated statement of profit or loss.

The Group does not have debt instruments at FVOCI.

***Financial assets at FVOCI – equity instruments***

The Group measures all equity investments at fair value. Where the Group has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to the consolidated statement of profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognized in the consolidated statement of profit or loss as other income when the Group's right to receive payments is established.

The Group's investments in equity securities at FVOCI relate to an investment in a private company that provides distributed demand response products, which enable households to achieve energy savings. The Group has elected to present fair value gains and losses related to this equity investment in OCI, as investing in (equity) securities is not the main activity of the Group and the objective of the investment is not to hold it for trading purposes.

## [Table of Contents](#)

### *Financial assets at FVPL*

Financial assets at fair value through profit or loss are carried in the consolidated statement of financial position at fair value with net changes in fair value recognized in the consolidated statement of profit or loss.

This category includes purchase options derivatives which are included under current other financial assets and interest cap derivatives which are included under non-current other financial assets.

### ***Impairment***

The Group recognizes an allowance for expected credit losses (“ECLs”) for all debt instruments not held at FVPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

### *Trade receivables and contract assets*

The Group applies the IFRS 9 simplified approach to measuring ECLs which uses a lifetime expected loss allowance for all trade receivables and contract assets. To measure the ECLs, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets.

The Group considers a financial asset in default when contractual payments are 60 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

### ***Derecognition of financial assets***

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

### **Financial liabilities**

#### ***Classification***

The Group classifies its financial liabilities in the following measurement categories:

- financial liabilities at FVPL; and
- financial liabilities at amortized cost.

The Group’s financial liabilities include trade and other payables, borrowings including bank overdrafts, and derivative financial instruments.

#### ***Initial measurement***

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

#### ***Subsequent measurement***

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- financial liabilities at FVPL; and
- financial liabilities at amortized cost.

## [Table of Contents](#)

### *Financial liabilities at FVPL*

Financial liabilities at FVPL include derivative financial instruments.

### *Financial liabilities at amortized cost*

This is the category most relevant to the Group and consists of borrowings and trade and other payables.

### *Trade and other payables*

These amounts represent liabilities for goods and services provided to the Group prior to the end of the financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are subsequently measured at amortized cost using the EIR method.

### *Borrowings*

After initial recognition, borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in the consolidated statement of profit or loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included within finance income/(costs) in the consolidated statement of profit or loss.

Fees paid on the establishment of borrowings and commitment fees paid on the unused part of the facility are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

### ***Derecognition***

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statement of profit or loss.

### ***Derivatives***

The Group uses derivative financial instruments, interest rate caps, to hedge its interest rate risks. Derivatives are initially recognized at fair value on the date a derivative contract is entered into, and they are subsequently remeasured to their fair value at the end of each reporting period. The Group does not apply hedge accounting. Therefore, changes in the fair value of the Group's derivative financial instruments are recognized immediately in the consolidated statement of profit or loss and are included in finance income/(costs).

Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

### ***Offsetting of financial instruments***

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

### **2.7.18 Fair value measurement**

The Group measures financial instruments such as derivatives, debt and FVOCI equity instruments at fair value at the end of each reporting period.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or, in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

#### **2.7.19 Cash and cash equivalents**

Cash and cash equivalents include cash in hand, cash at banks, deposits held at call with financial institutions and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Bank overdrafts are shown within borrowings in current liabilities in the consolidated statement of financial position.

#### **2.7.20 Equity**

##### ***Share capital***

The Company's share capital consists of ordinary shares, which are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

##### ***Reserves***

Reserves include the following:

*(i) Legal reserve for capitalized development costs*

A legal reserve has been recognized within equity with regard to the capitalized development costs of the Group's internally developed EV Cloud platform in accordance with article 2:365.2 of the Dutch Civil Code. The legal reserve is reduced as the capitalized development costs are amortized. Additions and releases from the legal reserve are recorded through accumulated deficit.

*(ii) Foreign currency translation reserve*

The foreign currency translation reserve includes the cumulative exchange differences that result from the translation of the financial statements of the Group's foreign operations.

*(iii) Reserve for financial assets at FVOCI*

The reserve for financial assets at FVOCI includes changes in the fair value of certain investments in equity securities in OCI. The group transfers amounts from this reserve to accumulated deficit when the relevant equity securities are derecognized.

### **2.7.21 Profit/(loss) per share**

Basic loss per share is calculated by dividing the profit/(loss) attributable to owners of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year.

Diluted profit/(loss) per share adjusts the figures used in the determination of basic profit/(loss) per share to take into account the after-income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares. Potentially dilutive securities are excluded from the computation of diluted profit (loss) per share if their inclusion is anti-dilutive (for example, if it would result in a lower loss per share).

### **2.7.22 Provisions and contingencies**

Provisions are recognized when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount can be reliably measured. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received, and the amount of the receivable can be measured reliably. The expense relating to a provision is presented in the consolidated statement of profit or loss net of any reimbursement.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense, presented within finance income/(costs) in the consolidated statement of profit or loss.

#### ***Jubilee provisions***

The accounting policy for jubilee provisions is described in the employee benefits section.

#### ***Restructuring provisions***

Restructuring provisions are recognized only when the Group has a constructive obligation, which is when:

- there is a detailed formal plan that identifies the business or part of the business concerned, the location and number of employees affected, the detailed estimate of the associated costs, and the timeline; and
- the employees affected have been notified of the plan's main features.

The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the business or part of the business concerned.

#### ***Contingent liabilities***

Contingent liabilities arise when there is a:

- possible obligation that might, but will probably not require an outflow of resources embodying economic benefits; or
- present obligation that probably requires an outflow of resources embodying economic benefits, but where the obligation cannot be measured reliably; or
- present obligation that might, but will probably not, require an outflow of resources embodying economic benefits.

Contingent liabilities are not recognized in the consolidated statement of financial position, but rather are disclosed, unless the possibility of an outflow is considered remote.

***Warranty provisions***

A provision for estimated warranty claims is made by the Group in respect of products sold that are under warranty at the end of the reporting period. The provision is based on historical warranty data and the claims are expected to be settled in the next financial year.

**2.7.23 Income tax**

The income tax expense or credit for the period is the tax payable on the current period's taxable income or tax receivable on the current period's deductible losses, based on the applicable income tax rate for each jurisdiction, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

*Current tax*

The current income tax charge/credit is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

*Deferred tax*

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax liabilities and assets are not recognized for temporary differences between the carrying amount and tax bases of investments in foreign operations where the company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred income tax assets and liabilities are measured at nominal value.

*Current and deferred tax for the year*

Current and deferred tax is recognized in the consolidated statement of profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

## 2.7.24 Changes in accounting policies

During the year ended December 31, 2022, the Group changed its accounting policy related to the allocation of depreciation and amortization expenses in the consolidated statement of profit or loss. Under the previous policy, the Group classified depreciation and amortization expenses within General and administrative expenses. The Group changed its policy to begin allocating a portion of depreciation expense to Cost of sales, specifically depreciation expenses related to its charging equipment and charging infrastructure (property, plant and equipment) and depreciation expenses related to its land permits (right-of-use assets). Additionally, the Group began allocating a portion of amortization expense to Cost of sales, specifically amortization expenses related to its EV Cloud platform and the software used to purchase electricity.

This voluntary change in accounting policy is a result of management's evaluation of their changing business model upon the U.S. public listing following the SPAC Transaction. Using the proceeds from the SPAC Transaction, management continues to invest in a more asset-intensive business model (e.g., with the acquisition of Mega-E) and therefore depreciation and amortization expenses are more clearly linked to Cost of sales. The Group believes that this change will result in a more relevant and reliable classification as it is better aligned with the IFRS conceptual framework and more consistent with the Group's peer group, especially the peers in the U.S., therefore increasing the comparability of the Group's results to those of peers. This change has no impact on the Group's total operating result, financial position, statement of changes in equity, or cash flows for any periods presented. This change is effective for the year ended December 31, 2022 and is applied retrospectively for comparative purposes. For the year ended December 31, 2022, Cost of sales included depreciation expenses of €17,450 thousand and amortization expenses of €2,883 thousand as a result of this change. Comparative information for the years ended December 31, 2021 and 2020 has been restated as shown in the table below.

### Consolidated statement of profit or loss for the years ended December 31, 2021 and 2020

(in €'000)	2021			2020		
	as reported	Change in accounting policies	restated	as reported	Change in accounting policies	restated
Cost of sales	(61,122)	(8,154)	(69,276)	(30,954)	(8,035)	(38,989)
Gross profit	25,169	(8,154)	17,015	13,295	(8,035)	5,260
General and administrative expenses	(337,451)	8,154	(329,297)	(47,468)	8,035	(39,433)

## 3 Significant accounting estimates, assumptions and judgments

The preparation of the Group's consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent assets and liabilities. The reported amounts that result from making estimates and assumptions, by definition, will seldom equal the actual results. Management also needs to exercise judgment in applying the Group's accounting policies.

### 3.1. Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the consolidated financial statements.

#### 3.1.1 Business Combination Agreement (Spartan Merger)

The merger with Spartan is not within the scope of IFRS 3 Business Combinations as Spartan does not meet the definition of a business as per IFRS 3. In accordance with an agenda decision of the IFRS Interpretations Committee, the transaction is in scope of IFRS 2 Share-based Payment and was accounted for as a recapitalization in which Allego issued shares in exchange for the net assets of Spartan.

The excess of fair value of Allego Ordinary Shares issued over the fair value of Spartan's identifiable net assets was treated as costs for the service of obtaining a listing and expensed during the reporting period in which the transaction occurred.

Additionally, Allego Ordinary Shares were issued with respect to the PIPE offering. Allego received a total of €36,048 thousand in cash and cash equivalents in return for issuing 15 million Allego Ordinary Shares with a nominal value of €0.12 per share. The Group also entered into a strategic partnership with a PIPE Investor for future charging sessions. A portion of the cash received for the PIPE Investment was therefore accounted for as a contract liability in recognition of future services to be transferred to the customer. The remaining difference between the value of the proceeds on the date of the merger and the nominal value of the shares has been accounted for as share premium. See Note 6 for further details.

Furthermore, Allego Ordinary Shares were issued to Madeleine and an external consulting firm based on their relative shareholding percentage in Allego Holding immediately before the capital reorganization. This increase in share capital has been offset by a reduction in share premium of the same amount.

### 3.1.2 Warrants

Each Public Warrant and Private Placement Warrant originally issued by Spartan to its public shareholders and its sponsors were converted on the closing date of the SPAC Transaction, into a right to acquire one ordinary share of Allego on the same terms as were in effect immediately prior to the closing date.

On the closing date of the BCA, Allego assumed the warrants to registered holders of Spartan's Public Warrants and Private Placement Warrants. Allego assumed and continues to hold these warrants on the same terms as before.

According to management's assessment, both the Public Warrants and Private Placement Warrants fall within the scope of IAS 32 and have been classified as a current derivative financial liability (based on the warrants being exercisable 30 days after the closing date of the BCA). In accordance with IFRS 9 Financial Instruments, the warrant derivatives that have been classified as financial liabilities shall be measured at fair value with subsequent changes in fair value to be recognized in the consolidated statement of profit or loss. For further details see Note 27.

### 3.1.3 Consolidation of Mega-E

On July 28, 2021, the Allego Group and Meridiam EM SAS — an indirectly wholly-owned subsidiary of Meridiam SAS, the Company's then ultimate parent — entered into a call option (the "Mega-E Option") agreement to acquire 100% of the share capital of Mega-E Charging B.V. ("Mega-E"). The Group paid no consideration for the option. The purchase price under the option amounted to €9,456 thousand in accordance with the Mega-E Option agreement. The call option was exercisable by the Group at the earliest on January 15, 2022, and within the six-month period thereafter.

Until March 16, 2022, the exercise of the call option by the Allego Group was conditioned upon completion of the SPAC Transaction. On March 16, 2022, the Allego Group consummated the SPAC Transaction, thereby becoming able to exercise its call option right pursuant to the terms of the Mega-E Option agreement. Therefore, the Group reassessed its control assessment over Mega-E.

The Mega-E Option provided the Group with potential voting rights, which are considered substantive as of March 16, 2022, because as of that date all conditions under the Mega-E Option were met and the Group was able to exercise its rights thereunder. The Group concluded that these potential voting rights provided the Group with control over Mega-E. The acquisition of Mega-E by the Group is not considered to be a business combination within the scope of IFRS 3 as Mega-E does not meet the definition of a business as it does not contain any substantive processes. The acquisition of Mega-E has therefore been accounted for as an asset acquisition in the Group's consolidated financial statements.

### 3.1.4 Acquisition of MOMA

On June 7, 2022, the Group acquired shares representing 100% of the share capital of Modélisation, Mesures et Applications S.A. ("MOMA") – an unlisted software company based in France and current service provider for the Group's EV Cloud platform. This constitutes a Business Combination (specifically referred to as the "MOMA acquisition") as defined in terms of IFRS 3 Business Combinations, thus the transaction has been accounted for by the Allego Group using the acquisition method of accounting in accordance with IFRS 3. The Group has considered the following main judgements:

#### *Purchase price allocation*

Assets and liabilities of subsidiaries acquired are included at their fair value at the acquisition date. Some assets, namely the investment in equity securities, customer relationships and goodwill at acquisition date had fair values that differed significantly from its carrying values (refer to Note 4 for further details).

### *Goodwill*

The excess of the purchase price over the fair value of the identifiable assets and liabilities is recorded as goodwill. An impairment assessment is performed at least once annually, or more frequently if indicators of potential impairment exist, which includes evaluating qualitative and quantitative factors to assess the likelihood of an impairment. Such impairment assessments require management to make significant estimates and assumptions, which are further detailed in Note 3.2.2.

### **3.1.5 Capitalization of development costs**

The development costs in relation to the design and testing of the Group's internally developed EV Cloud software platform are capitalized based on management judgments. These judgments relate to whether the following criteria are met:

- It is technically feasible to complete the software so that it will be available for use.
- Management intends to complete the software and use or sell it.
- There is an ability to use or sell the software.
- It can be demonstrated how the software will generate probable future economic benefits.
- Adequate technical, financial and other resources to complete the development and to use or sell the software are available.
- The expenditure attributable to the software during its development can be reliably measured.

In determining the development costs to be capitalized, the Group estimates the expected future economic benefits of the software (component) that is the result of the development project. Furthermore, management estimates the useful life of such software (component).

As at December 31, 2022, the carrying amount of capitalized development costs was €3,312 thousand (December 31, 2021: €4,198 thousand). The Group estimates the useful life of the development costs to be at three years based on the expected lifetime of the software (component). However, the actual useful life may be shorter or longer than three years, depending on innovations, market developments and competitor actions.

### **3.1.6 Revenue recognition**

Significant judgment and estimates are necessary for the allocation of the proceeds received from an arrangement to the multiple performance obligations in a contract and the appropriate timing of revenue recognition. The Group enters into development contracts with customers that include promises to transfer multiple products and services, such as charging equipment and installation services. For arrangements with multiple products or services, the Group evaluates whether each of the individual products or services qualify as distinct performance obligations. In its assessment of whether products or services are a distinct performance obligation, the Group determines whether the customer can benefit from the product or service on its own or with other readily available resources and whether the service is separately identifiable from other products or services in the contract. This evaluation requires the Group to assess the nature of the charging equipment, as well as the grid connection and installation services and how each is provided in the context of the contract.

The Group enters into development contracts for the delivery and installation of charging equipment as a bundled package. The Group has determined that there are two separate performance obligations in these contracts. These distinct promises are (1) to deliver the charging equipment and, (2) to install the charging equipment (including the connection to the grid). The main reasons for separating these performance obligations are that these promises can be fulfilled separately with other readily available resources, and that the Group does not provide significant integration, modification or customization services related to the charging equipment.

The Group also provides operation and maintenance services to its customers which include operation of the EV charging infrastructure, maintenance of the charging points, access to the Group's EV Cloud solution, EV Cloud software updates and interface management. The Group has determined that operation and maintenance services represent one single performance obligation because all services components are highly interrelated with one another.

### **3.1.7 Accounting for the first Special Fees Agreement**

On December 16, 2020 ('the First Special Fees Agreement grant date'), the Company's immediate parent entity — Madeleine — entered into the First Special Fees Agreement, pursuant to which an external consulting firm provided

services to the Group relating to strategic and operational advice for one or more contemplated share transactions (a “Liquidity Event” or “Liquidity Events”). As consideration for these services, the consulting firm is entitled to fees in cash and in shares based on the value of the Company in relation to a future Liquidity Event, payable by Madeleine.

Management assessed whether the Group has received services under the First Special Fees Agreement that requires the First Special Fees Agreement to be accounted for in the Group’s consolidated financial statements. The First Special Fees Agreement was entered into by Madeleine and the consulting firm reports to the board of directors of Madeleine. The consulting services provided related to a Liquidity Event, but also to strategic and operational advice. The Group has benefited from these services and might also benefit from a Liquidity Event. Although the Group does not have the obligation to settle the obligation under the First Special Fees Agreement, management believes that the services provided under the agreement benefit the Group. Therefore, the First Special Fees Agreement is in scope of IFRS 2 *Share-based Payment* from the perspective of the Group and accounted for in the Group’s consolidated financial statements.

The Group has also assessed that the total fair value of the grant should be recognized between the grant date and the estimated date of the Liquidity Event as the First Special Fees Agreement compensates the external consulting firm for future services and creates a significant incentive for the external consulting firm to continue to provide services until a Liquidity Event takes place. The First Special Fees Agreement therefore includes an implicit future service period over which the share-based payment expenses should be recognized.

In January 2021, the First Special Fees Agreement was amended whereby certain definitions, including the definition of what entails a Liquidity Event, were changed. Another amendment in April 2021, provides the external consulting firm with the right to subscribe for additional shares being equal to 5% of the share capital (after completion of the listing) of the Company and the First Special Fees Agreement was extended until December 31, 2028. Management assessed and reflected these changes by re-estimating the service period and the total fair value of the grant.

On July 28, 2021, the parties to the BCA agreed that the cash payments to be made by Meridiam under the First Special Fees Agreement will be recharged to the Company or its legal successor. However, this repayment agreement does not result in an obligation for the Company to settle the First Special Fees Agreement. Therefore, this does not change the accounting treatment of the First Special Fees Agreement in the consolidated financial statements for the year ended December 31, 2022 and December 31, 2021.

Refer to Note 11 for further details on the accounting for the First Special Fees Agreement.

### **3.1.8 Accounting for the second Special Fees Agreement**

On February 25, 2022 (‘the Second Special Fees Agreement grant date’), the Company’s then immediate parent entity — Madeleine — entered into the Second Special Fees Agreement, with the same external consulting firm as for the First Special Fees Agreement described above. The purpose of this Second Special Fees Agreement is to compensate the external consulting firm for their continuous strategic and operational advice, as well as support with regards to the Group’s capital raising efforts in the near future. The agreement expires on the earlier of June 30, 2025, and the date on which Madeleine no longer holds any equity security in the Company. As consideration for the Second Special Fees Agreement, the external consulting firm is entitled to receive cash compensation based on the value of the Group in connection with any new injection of equity, whether in cash or in kind, in any entity of the Group subsequent to the completion of the SPAC Transaction (the “Equity Injection(s)”).

Management assessed whether the Group has received services under the Second Special Fees Agreement that requires the Second Special Fees Agreement to be accounted for in the Group’s consolidated financial statements. The Second Special Fees Agreement was entered into by Madeleine and the consulting firm reports to the board of directors of Madeleine. The consulting services provided related to the Equity Injections, but also to strategic and operational advice. The Group has benefited from these services and might also benefit from Equity Injections. Although the Group does not have the obligation to settle the obligation under the Second Special Fees Agreement, management believes that the services provided under the Second Special Fees Agreement benefit the Group. Therefore, the Second Special Fees Agreement is in scope of IFRS 2 *Share-based Payment* from the perspective of the Group and accounted for in the Group’s consolidated financial statements.

The Group has also assessed that the total fair value of the grant should be recognized between the grant date and the estimated dates of the Equity Injections as the Second Special Fees Agreement compensates the external consulting firm for future services and creates a significant incentive for the external consulting firm to continue to provide services until

the Equity Injections takes place. The Second Special Fees Agreement therefore includes an implicit future service period over which the share-based payment expenses should be recognized.

On March 10, 2022, the Second Special Fees Agreement was amended to modify the formula of the relevant percentage used in the determination of the fees payable for equity injections subsequent to the first Equity Injection. Management assessed and concluded these changes had no impact to the fair value of the grant.

On April 20, 2022, the Second Special Fees Agreement was novated from Madeleine to Allego (the "Novation"), all the other terms of the Second Special Fees Agreement remaining the same. As a result of the Novation, the Group has now the obligation, instead of Madeleine, to settle the share-based payment arrangement with the consulting firm. The Second Special Fees Agreement's classification therefore changed to a cash-settled share-based payment arrangement from the Novation date.

Refer to Note 11.2 for further details on the accounting for the Second Special Fees Agreement.

### **3.1.9 Accounting for the Management Incentive Plan**

In March 2022, the Group established the Management Incentive Plan ("MIP"), which includes two types of options that can be issued to the key management personnel: the grant options and the performance options. The options issued under the plan are classified as equity-settled share-based payment transactions, as the settlement with the participants shall be made using the company's shares, as such they fall in scope of IFRS 2 Share-based Payment from the perspective of the Group and accounted for in the Group's consolidated financial statements.

The issued options are recognized at fair value as an operating expense with the corresponding increase in accumulated deficit, over the vesting period being the period over which all of the specified vesting conditions are satisfied. For both options the service period is concluded to start on March 17, 2022 (the date at which the Group became a listed entity) as at that date there was a valid expectation of an award and a corresponding obligation by the Group. On March 17, 2022 there was no legally enforceable arrangement which was completed on May 14, 2022 which is the grant date. For the grant options the vesting date is the grant date and the expenses are recognized between the start of the service period and the vesting date. The performance options are recognized over the relevant service period (starting on March 17, 2022), being the period to which the bonus relates and the vesting period of the shares. The number of shares expected to vest is estimated based on the non-market vesting conditions. For the details of fair value assessment we refer to Note 11.3.

At the end of each period, the Group revises its estimates of the number of options that are expected to vest based on the service conditions and non-market conditions. It recognizes the impact of the revision to original estimates, if any, in operating expenses, with a corresponding adjustment to accumulated deficit.

When the options are exercised, the Group transfers the appropriate number of shares to the employee. The proceeds received, net of any directly attributable transaction costs, are credited directly to equity. Where options are forfeited due to a failure by the employee to satisfy the service conditions, any expenses previously recognized in relation to such shares are reversed effective from the date of the forfeiture.

It is possible for the Group to net settle the options for (i) withholding taxes and (ii) the exercise price. This will result in classification of all the options as equity-settled since IFRS 2 includes an exception to the general principles for classification as cash-settled when an employer withholds awards due to a mandatory requirement to settle a tax exposure on behalf of an employee which is applicable to the Group.

Refer to Note 11.3 for further details on the accounting for the MIP.

### **3.1.10 Accounting for the refinancing of old facility**

On December 19, 2022, the Group entered into a new facility agreement (the "*renewed facility*") with a group of lenders. The purpose of the renewed facility is the settlement of the existing senior debt bank facility (the "*old facility*") as well as financing and refinancing of certain capital expenditures and permitted acquisitions (and for other permitted debt servicing uses) and issuance of guarantees and letters of credit (and when utilized by way of letters of credit, for general corporate purposes).

Management determined that the refinancing of the old facility is an extinguishment of the former financial liability based on the following considerations:

- the transaction is treated as an exchange of financial instruments between an existing borrower and lender;
- the terms of the renewed facility are substantially different to the old facility on a quantitative basis (10% test) and qualitative basis (comparison of terms).

Refer to Note 25 for further details on the accounting for the refinancing of the old facility.

### **3.1.11 Initial recognition of leases with the extension options**

The lease accounting requirements under IFRS 16 require estimates and judgement regarding the determination of lease terms. Management applied its best estimate on the execution of renewal options and termination options, taking into account business practices within the Group in order to estimate the lease term.

The Group took contractual provisions and legal frameworks into account. In doing so, it applied legal and contractual renewal terms for leases and took into account break options (provided by contractual provisions and/or legal frameworks) in determining estimated lease terms. Lease terms at the end of their term are reviewed 18 - 24 months in advance to assess if a new term should be added.

For all seven office leases the extension options have not been included in the lease liability, because the leases either have a significant remaining non-cancellable lease term or the Group is contemplating whether that office will be suitable for the Group's operations.

For all land permit leases, the extension options have not been included in the lease liability, because the leases either have a significant remaining non-cancellable lease term or it is not reasonably certain that the Group will extend these leases. The extension is dependent on future performance of the sites.

The determined remaining lease terms per December 31, 2022 vary in ranges of 1 up to 15 years for land permits, 1 up to 12 years for offices and other assets, and 1 up to 4 years for cars and software.

## **3.2. Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within future periods, are described below.

The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared and are based on historical experience and other factors that are considered to be relevant. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

### **3.2.1 Recognition of deferred tax assets**

Deferred tax assets are carried on the basis of the tax consequences of the realization or settlement of assets, provisions, liabilities or accruals and deferred income as planned by the Group at the reporting date. A deferred tax asset is recognized to the extent that it is probable that there will be sufficient future taxable profit. In this assessment, the Group includes the availability of deferred tax liabilities, the possibility of planning of fiscal results and the level of future taxable profits in combination with the time and/or period in which the deferred tax assets are realized.

As at December 31, 2022, the Group recorded a deferred tax asset of €23 thousand (December 31, 2021: €570 thousand) which relates to the partial recognition of the carried-forward tax losses of the Group's operations in Germany and Belgium (December 31, 2021: Germany and Belgium). The Group expects that future taxable profits will be available against which these unused tax losses can be utilized. These losses can be carried forward indefinitely and have no expiry date.

At each reporting date presented, the Group also had unused tax losses available for carryforward in other jurisdictions where the Group incurred losses in the past for which no deferred tax assets have been recognized. The Group expects that future taxable profits will be available against which these unused tax losses can be utilized before the expiry date. However, the Group has determined that, for those jurisdictions, the threshold for recognizing deferred tax assets in excess of the level of deferred tax liabilities has not been met due to uncertainties such as the planned fiscal restructuring of the Group (e.g. the potential integration of the Mega-E group into the Allego group). Therefore, for those jurisdictions, deferred tax assets have been recognized to the extent that the Group has deferred tax liabilities and no additional deferred tax assets have been recognized for unused tax losses at each reporting date presented.

Management determined the (deferred) tax position of the Group using estimates and assumptions that could result in a different outcome in the tax return filed with the tax authorities and could result in adjustments in subsequent periods.

### **3.2.2 Impairment of non-financial assets**

Goodwill is not subject to amortization and is tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired. Other assets and groups of assets are tested for impairment whenever there is an indication that the carrying amounts of the asset or group of assets may not be recoverable. In such event the Group compares the assets or group of assets carrying value with its recoverable amount, which is the higher of the value in use and the fair value less costs of disposal. The Group uses a discounted cash flow (“DCF”) model to determine the value-in-use. The cash flow projections contain assumptions and estimates of future expectations. This value in use is determined using cash flow projections from financial budgets approved by senior management covering a five-year period, cash flows beyond the five-year period are extrapolated using a growth rate and the future cash flows are discounted. The value in use amount is sensitive to the discount rate used in the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

#### ***Impairments and reversal of impairments of chargers***

During the years ended December 31, 2022 and 2021 the Group has identified several chargers that were not performing as expected. For these chargers the utilization was lower than included in the business plan for these chargers. Utilization rates are calculated by dividing the number of charging sessions by a maximum of fifty sessions per day. The identified chargers that were underutilized had a negative margin, but no technical issues (uptime above 95%). The Group considers this an indication for impairment. The Group subsequently compared the carrying value of these chargers with the value-in-use.

The impairment loss recognized in the consolidated statement of profit or loss for the year ended December 31, 2022 amounted to €01 thousand (2021: €354 thousand, 2020: €466 thousand).

During the year ended December 31, 2022, the Group has identified improvements in utilization rates for several chargers that were impaired in prior periods. The Group considers this an indication that an impairment loss recognized in prior periods no longer exists or may have decreased. The Group subsequently compared the carrying value of these chargers with the value-in-use. The increased carrying value as a result of the reversal of impairment shall not exceed the carrying value that would have been determined (net of depreciation) had no impairment loss been recognized for these chargers in prior periods.

The reversal of impairments recognized in the consolidated statement of profit or loss for the year ended December 31, 2022 amounted to €79 thousand (2021: €381 thousand, 2020: € nil).

#### ***Impairment of goodwill***

Goodwill impairment testing is performed annually or more frequently if indicators of potential impairment exist, which includes evaluating qualitative and quantitative factors to assess the likelihood of an impairment. The Group allocates goodwill to a group of CGU's, which is the lowest level within the Group at which the goodwill is monitored for internal management purposes. Goodwill is allocated and monitored by Allego at the level of the operating segment.

During goodwill impairment testing, the carrying amount of goodwill is compared with the recoverable amount of the CGU's it was allocated to, which is the higher of the CGU's value in use and the CGU's fair value less cost to sell. The Group uses a discounted cash flow (“DCF”) model to determine the value-in-use. The cash flow projections contain assumptions and estimates of future expectations. This value in use is determined using cash flow projections from financial budgets approved by senior management covering a five-year period, cash flows beyond the five-year period are extrapolated using a growth rate and the future cash flows are discounted. The value in use amount is sensitive to the discount rate used in the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

The impairment assessment was performed for the year ended December 31, 2022, resulting in a sufficient headroom (refer to Note 16 for details), as such no impairment was identified.

#### ***Impairment of other intangible assets***

During the year ended December 31, 2022 no impairment indicators were identified for other intangible assets.

### 3.2.3 Valuation of share-based payment awards

Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model and making assumptions about them.

For the measurement of the fair value of equity-settled transactions with an external consulting firm under the First Special Fees Agreement at the grant date (and subsequent measurement dates to determine the fair value of consulting services received, for the portion of share-payment expenses that relates to compensation for external consulting services), the Group used a valuation model which takes into account how the fees payable in cash and equity instrument will depend on the equity value at the time of a future Liquidity Event.

For the measurement of the fair value of equity-settled transactions with an external consulting firm under the Second Special Fees Agreement at the grant date (and subsequent measurement dates until the novation of the Second Special Fees Agreement to determine the fair value of consulting services received, for the portion of share-payment expenses that relates to compensation for external consulting services) and at the novation date, the Group uses a valuation model which takes into account how the fees payable in cash will depend on the equity value following future Equity Injection events. The same valuation model is used for the measurement of the fair value of cash-settled transactions with an external consulting firm under the Second Special Fees Agreement for measurement dates subsequent to the novation of the Second Special Fees Agreement.

As the exercise price applicable to the options is negligible, no specific option-pricing models are used by the Company and the fair value of options granted under the Company's management incentive plan is determined by reference to the fair value of the Company's share at the grant date, excluding the impact of any service and non-market performance vesting conditions (e.g. operational EBITDA, financing targets, compliance and reporting, engagement with investors and remaining an employee of the company over a specified time period). The options do not include any market conditions or non-vesting conditions that should be included in the fair value at recognition.

The assumptions and model used for estimating the fair value for share-based payment transactions under the First and Second Special Fees Agreements are disclosed in Note 11.

### 3.2.4 Valuation of purchase options to acquire MOMA and Mega-E

On March 26, 2021, the Group entered into two option agreements, pursuant to which the Group was entitled to purchase shares representing 8.50% of the share capital (on a fully diluted basis) of MOMA, a service provider for the Group's EV Cloud platform — and 100% of a third-party company, which held 42.0% of the share capital of MOMA.

On July 28, 2021, the Group and Meridiam EM — an indirectly wholly-owned subsidiary of Meridiam SAS, the Company's then ultimate parent — entered into a call option agreement to acquire 100% of the share capital of Mega-E.

The fair value of the purchase options recorded in the consolidated statement of financial position cannot be measured based on quoted prices in active stock markets. Their fair value is therefore measured using an option pricing model, i.e. Black-Scholes pricing model. The inputs to this model are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing the fair value. Judgements include considerations of inputs such as the market value of the underlying assets (i.e. spot price per share) and volatility. Changes in assumptions relating to these factors could affect the reported fair value of the purchase options.

Due to the exercise of the MOMA options and the consolidation of Mega-E, as of December 31, 2022, these options are not recognized on the consolidated statement of financial position.

The assumptions and model used for estimating the fair value of the purchase options are disclosed in Note 31.

### 3.2.5 Valuation of warrant liabilities

Public Warrants and Private Placement Warrants originally issued by Spartan to its public shareholders and its sponsors were converted on the closing date of the BCA into a right to acquire one ordinary share of the Company on substantially the same terms as were in effect immediately prior to the closing date (see Note 4).

On the closing date of the BCA (March 16, 2022), the Company issued warrants to registered holders of Spartan's Public Warrants and Private Placement Warrants in exchange for the originally issued warrants. The Company assumed and continues to hold these warrants on the same terms as before (unless the options were exercised during the period).

According to management's assessment, both the Public Warrants and Private Placement Warrants fall within the scope of IAS 32 and have been classified as a derivative financial liability. In accordance with IFRS 9, derivatives that are classified

as financial liabilities shall be measured at fair value with subsequent changes in fair value to be recognized in the consolidated statement of profit or loss.

The Public Warrants and Private Placement Warrants qualified for the level 3 category in the fair value hierarchy at the time of their issuance due to the fact that they were not traded in an active market at the time and their fair value was determined using valuation techniques which use unobservable inputs that were significant to the fair value. As at December 31, 2022, the warrants qualify for the level 1 category in the fair value hierarchy due to the fact that their fair value is determined based on quoted market inputs.

Fair value valuations require management to make significant estimates and assumptions regarding the measurement of the Public Warrants and Private Placement warrant derivative liabilities. The warrants qualified for the level 3 category in the fair value hierarchy at the time of their issuance due to the fact that they were not traded in an active market at the time and their fair value was determined using a binomial tree framework. As at December 31, 2022, the warrants qualify for the level 1 category in the fair value hierarchy due to the fact that their fair value is determined based on quoted market inputs. On April 15, 2022, the Private Placement Warrants were exercised with the fair value on that date being determined based on quoted market inputs such as the spot price per share.

For further details regarding the inputs and assumptions inherent in the warrants' valuation models used refer to Note 31.

#### 4 Business combinations and capital reorganization

##### *Merger between Allego Holding B.V. and Spartan Acquisition Corp. III (the "SPAC Transaction")*

On July 28, 2021, Allego Holding and Spartan signed a Business Combination Agreement ("*BCA*"). Prior to the SPAC Transaction, Spartan was listed on the NYSE in the United States (NYSE: SPAQ).

In connection with the merger, Athena Pubco B.V. — a private limited liability parent company (*besloten vennootschap met beperkte aansprakelijkheid*) under Dutch law — was incorporated by Madeleine (the Company's then immediate parent entity) on June 3, 2021. This newly incorporated entity acquired 100% of the outstanding equity of Allego Holding and Spartan. As a result of the merger, Spartan ceased to exist. The Group received €146,035 thousand (\$161,080 thousand<sup>1</sup>) of gross proceeds<sup>2</sup> from a combination of a PIPE offering of €136,048 thousand (\$150,000 thousand<sup>1</sup>) at €9.07 (\$10.00<sup>1</sup>) per share, along with €9,987 thousand (\$11,080 thousand<sup>1</sup>) of cash held in trust by Spartan after redemptions. Meridiam — the existing shareholder of the Company — rolled 100% of its equity and, together with management and former advisors, retained 82% of the combined entity.

On March 9, 2022, Spartan convened a special meeting of stockholders ("the Special Meeting"). At the Special Meeting, Spartan's stockholders approved the business combination proposal.

On March 16, 2022 ("the closing date"), the following transactions occurred pursuant to the terms of the *BCA*:

- Athena Pubco B.V. changed its legal form from a private limited liability company to a public limited liability company (*naamloze vennootschap*), changed its name to Allego N.V. and entered into the Deed of Conversion containing the Articles of Association of Allego N.V.
- The Group's shareholder loans of €101,931 thousand were converted into equity.
- The Company consummated the previously announced business combination pursuant to the terms of the *BCA* and became a publicly traded company on the NYSE.

On March 17, 2022, trading in the new public company commenced on the NYSE. The new public company — Allego N.V. — trades under the Allego name under the ticker symbol "ALLG".

The fair value of Spartan's net assets at the closing date amounted to negative €71,117 thousand, consisting of cash and cash equivalents of €10,079 thousand, receivable balances of €5,185 thousand, warrant liabilities of €42,253 thousand and transaction costs liabilities of €44,128 thousand.

The fair value of the Company's shares exchanged in the transaction to Spartan amounts to €87,597 thousand, resulting in a difference with the net assets of Spartan of €158,714 thousand. The difference is considered as an expense and has been recognized in general and administrative expenses in the consolidated statement of profit and loss of the Group at the closing date, representing the costs of service in respect of the stock exchange listing for Spartan's shares.

*Treatment of transaction costs*

The total costs incurred in relation to the SPAC Transaction were analyzed to determine which were directly attributed to the issuance of new shares and therefore are to be deducted from equity directly instead of being recognized in the consolidated statement of profit or loss. Transaction costs incurred of € nil (December 31, 2021: €1,059 thousands) were directly attributable to the issuance of new shares and have been deducted from share premium. Transaction costs incurred of €7,190 thousand (December 31, 2021: €6,145 thousand) were not directly attributable to the issuance of new shares. These transaction costs have been recorded in the consolidated statement of profit or loss, within general and administrative expenses.

<sup>1</sup> Translated at the EUR/USD exchange rate as at March 16, 2022.

<sup>2</sup> Gross proceeds: not inclusive of transaction expenses.

*Impact of the SPAC Transaction on loss per share*

Upon the completion of the SPAC Transaction the already existing 124 shares in Allego Holding were exchanged for 235,935,061 shares with no cash contribution being made. As such, the exchange ratio used at March 16, 2022, has been deemed to be 1,902,702.

The contribution in kind of Spartan shares modified the number of ordinary shares with a change in resources (the net assets of Spartan are new in the Allego Group and are considered a change in resources). Therefore, such new shares would impact the weighted average number of ordinary shares outstanding from March 16, 2022. Consequently, the weighted average number of ordinary shares outstanding for basic and diluted earnings per share ("EPS") for the prior periods is as follows:

	December 31, 2021	December 31, 2020
<b>Shares for basic EPS Allego Holding</b>	<b>100</b>	<b>100</b>
Exchange ratio	1,902,702	1,902,702
<b>Adjusted number of shares</b>	<b>190,270,211</b>	<b>190,270,211</b>

*Acquisition of Mega-E (asset acquisition)*

On March 16, 2022, the Group consummated the previously announced business combination pursuant to the terms of the BCA and became a publicly traded company on the NYSE. This resulted in the Group being able to exercise its call option right to acquire Mega-E, pursuant to the terms of the Mega-E Option. The Mega-E Option provided the Group with potential voting rights which are considered substantive as of March 16, 2022, the date when all conditions outlined in the Mega-E Option were met.

Mega-E is a company whose main activity relates to operating charging points for vehicles in Europe as well as holding and financing its subsidiaries and associated entities. The Group has a long-standing pre-existing relationship with Mega-E, in which the parties have jointly entered into several development and O&M contracts to construct and operate charging stations across Europe. The acquisition of Mega-E brings critical access to new customers within the Group, as well as the creation of numerous operational synergies in the delivering development and O&M contracts to existing customers. The Group paid in exchange of Mega-E a total purchase consideration of €10,594 thousand comprising of €9,456 thousand for the shares, and €1,138 thousand for the accrued interest on the deferred purchase price. As described in Note 3, the transaction has been accounted for as an acquisition of assets due to Mega-E not meeting the definition of a business under IFRS 3 *Business Combinations*.

## Table of Contents

The assets and liabilities recognized as a result of the acquisition on March 16, 2022, are as follows:

(in €'000)	Fair value
Property, plant and equipment	90,651
Right-of-use assets	11,055
Lease liabilities	(11,055)
Borrowings (current)	(23,398)
Other working capital (excl. cash and cash equivalents)	166
Cash and cash equivalents	874
<b>Net identifiable assets acquired</b>	<b>68,293</b>
Less: non-controlling interest	(1,259)
<b>Net assets acquired</b>	<b>67,034</b>

### Property, plant and equipment

The property, plant and equipment was initially measured at cost by allocating the purchase price based on the relative fair values of the assets.

### Lease liabilities and right-of-use assets

The acquired lease liability was measured using the present value of the remaining lease payments at the acquisition date. The right-of-use assets were measured at an amount equal to the lease liabilities and adjusted to reflect the terms of certain leases relative to market terms.

### Non-controlling interest

The Group has chosen to recognize the non-controlling interest at its fair value for this acquisition. Mega-E has 00% interest in its subsidiaries, except for GreenToWheel SAS ("GreenToWheel") in which it holds an interest of 80%, resulting in a 20% Non-controlling Interest ("NCI"). The fair value of the non-controlling interest in GreenToWheel has been determined based on the fair value of the net identifiable assets acquired.

### Acquisition of MOMA (business combination)

On March 26, 2021, the Group entered into two option agreements, pursuant to which the Group was entitled to purchase shares representing 8.50% of the share capital (on a fully diluted basis) of MOMA, a service provider for the Group's EV Cloud platform (the "Direct MOMA Shares") — and 100% of Oury-Heintz Energie Applications SA ("OHEA"), which held 42.0% of the share capital of MOMA (the "Indirect MOMA Shares"). The provisions of the shareholder's agreement of MOMA include drag-along rights. Consequently, the Group was required to acquire the remaining 49.50% of the share capital of MOMA upon exercising its option rights, under similar terms and conditions as the original option agreements. On September 28, 2021, the Group extended the option agreements under similar terms and conditions as the original option agreements.

On April 26, 2022, the Group exercised its second purchase option and drag-along rights to purchase the Direct MOMA Shares, simultaneously signing and closing the acquisition of the Indirect MOMA Shares pursuant to the exercise of the first purchase option. Consequently, on June 7, 2022, the Group closed two separate share and sale purchase agreements (the "Agreements") to acquire shares representing 100% of the share capital of MOMA in a business combination agreement (the "MOMA Business Combination").

On June 7, 2022, the transfer of 159,995 ordinary shares representing 100% of the issued share capital of MOMA was completed. On the same date, a cash payment of €30,000 thousand being an amount of 50% of the total purchase price consideration for the MOMA acquisition, was paid into the respective bank accounts of the selling shareholders (the "First Installment"). On July 29, 2022 the Group has settled the second installment of €30,000 thousand, representing the remaining 50% of the total purchase price consideration payable for the acquisition in accordance with the terms of the Share Purchase agreement. The fair value of the option was € nil on June 7, 2022, the exercise date of the option. For further details see Note 19.

## Table of Contents

The primary reason for the business combination is for the Group to bring the critical support provided by MOMA for its EV Cloud platform within its own operations. Additionally, the acquisition of MOMA brings access to new markets as well as services within the Group, to better meet the needs of its customers. The financial results of MOMA have been included in the consolidated financial statements from the acquisition date.

The following table summarizes the estimated fair values of identifiable assets acquired and liabilities assumed as of the acquisition date (June 7, 2022).

(in €'000)	Fair value
Property, plant and equipment	181
Right-of-use asset	1,594
Other financial assets	41,984
Derivatives	255
Trade and other receivables	3,240
Intangible Assets	8,681
Cash and cash equivalents	1,343
Prepayments	—
Current Tax Liabilities	(405)
Defined benefit provision	(386)
Deferred tax liabilities	(3,044)
Lease Liabilities	(1,594)
Trade and other payables	(2,587)
<b>Net identifiable assets acquired</b>	<b>49,262</b>
<b>Add: goodwill</b>	<b>10,724</b>
<b>Net assets acquired</b>	<b>59,986</b>

### Intangible assets

#### *Customer relationships*

The Group obtained two existing customer contracts, assessed as customer relationships in accordance with IFRS 3. The fair value of these assets is determined using the multi-period excess earnings method (“MEEM”), which is a valuation technique that estimates the fair value of an asset based on market participants’ expectations of the cash flows associated with that asset over its remaining useful life. The fair value of the customer relationships is based on an estimate of positive future cash flows associated with incremental profits related to excess earnings, discounted with a post-tax discount rate.

#### *Internally developed software*

The internally developed software consists of the capitalized annual IT development costs less accumulated amortization.

#### Other financial assets (non-current)

An investment in equity securities is presented under other financial assets (non-current). The fair value of this financial asset was determined through an analysis of a recent transaction based on observable market inputs as detailed further in Note 31.

### Derivatives

The Group obtained certain potential economic rights associated with a portion of the shares held by the Group in Voltalis. These rights provide the Group with the option to convert these rights into additional ordinary shares upon the occurrence of a Triggering Event. A Triggering Event is a majority disposal, public listing or a joint decision of an extraordinary general meeting of the shareholders to convert the shares of Voltalis. The Group has determined that these economic rights classify as derivatives.

Given that these rights would be derived from the outcomes of a specific Triggering Event scenario, a probability-weighted equity return method was historically applied in order to value the payouts under the economic rights. Under this approach, the payouts were estimated based upon an analysis of future values for Voltalis, assuming various probable Triggering Event scenarios, each with their own probability attached.

During the year the Group has waived these potential economic rights associated with a portion of the ordinary shares held by the Group in Voltalis. Please refer to Note 7.

Trade and other receivables

Trade receivables with a fair value of €2,642 thousand and gross contractual amount of €2,642 thousand were acquired, of which € nil is not expected to be collected. Other receivables include deposit receivables and current tax receivables with a fair value of €598 thousand and an equivalent gross contractual amount.

Current Tax Liabilities

Current tax liabilities of €405 thousand relating to income tax payables were acquired.

Lease liabilities and right-of-use assets

The acquired lease liabilities were measured at the present value of the remaining lease payments at the acquisition date. The right-of-use assets were measured at an amount equal to the lease liabilities.

Deferred tax liabilities

A deferred tax liability was recognized in relation to the fair value step-up on the investment in equity securities. This liability represents the taxable portion of capital gain that could potentially arise from future dilution of the interest of the Group in the investment.

Pro forma impact on revenues and net profit

From the acquisition date to December 31, 2022, the acquired business of MOMA contributed revenues of approximately €3,108 thousand and net loss of approximately €2,189 thousand to the Group. If the acquisition had occurred on January 1, 2022, the Group's consolidated revenues and consolidated net loss after tax for the year ended December 31, 2022, would have been €136,015 thousand and €302,605 thousand respectively. These amounts have been calculated using the results of the Group and subsidiary and adjusting them for the following:

- differences in the accounting policies between the Group and the subsidiary;
- the additional interest on lease liabilities and depreciation on right-of-use assets that would have been charged assuming leases would have been accounted under IFRS 16 *Leases* from January 1, 2022, together with the consequential tax effects;
- the removal of the fair value movements in the purchase option to acquire MOMA from January 1, 2022.

The following table summarizes the operating results of MOMA that were included in the consolidated statement of profit or loss for the year ended December 31, 2022.

[Table of Contents](#)

(in €'000)	December 31, 2022
Revenue	3,108
Cost of sales	—
Other income	428
Selling and distribution expenses	(231)
General and administrative expenses	(4,785)
<b>Operating loss</b>	<b>(1,480)</b>
Finance costs	(55)
<b>Loss before income tax</b>	<b>(1,535)</b>
Income tax	(654)
<b>Loss for the year</b>	<b>(2,189)</b>

Calculation of goodwill

Goodwill arising from the MOMA acquisition was determined as follows:

(in €'000)	As at the acquisition date (June 7, 2022)
Cash consideration paid	59,986
<b>Total consideration transferred</b>	<b>59,986</b>
Less: fair value of identifiable net assets acquired	49,262
<b>Goodwill</b>	<b>10,724</b>

Goodwill recognized on the MOMA acquisition relates to the expected growth, synergies and intellectual capacity of the acquired workforce, which cannot be separately recognized as an intangible asset. This goodwill is not expected to be deductible for tax purposes.

Acquisition-related expenses

Acquisition-related expenses of €248 thousand have been recognized in the consolidated statement of profit or loss, within general and administrative expenses.

**5 Segmentation**

The Executive Board of the Group is the chief operating decision maker (“CODM”) which monitors the operating results of the business for the purpose of making decisions about resource allocation and performance assessment. The management information provided to the CODM includes financial information related to revenue, cost of sales and gross result disaggregated by charging revenue and combined service revenue streams and by region. These performance measures are measured consistently with the same measures as disclosed in the consolidated financial statements. Further financial information, including net income (loss), employee expenses and operating expenses are only provided on a consolidated basis.

The CODM assesses the financial information of the business on a consolidated level. As the operating results of the business for the purpose of making decisions about resource allocation and performance assessment are monitored on a consolidated level, the Group has one operating segment which is also its only reporting segment.

As the Group only has one reporting segment, all relevant financial information is disclosed in the consolidated financial statements.

Revenue from major customers

For the year ended December 31, 2022, revenue from one customer (2021: two customers, 2020: three customers), namely Customer D (2021: Customer A and D, 2020: Customer A, B and C), amounted to 10% or more of the Group’s total revenue. The amount of revenue from the major customers can be broken down as follows:

(in €'000)	2022	2021	2020
Customer A	1,066	23,974	10,702
Customer B	647	663	6,566
Customer C	—	1,119	5,065
Customer D	51,424	24,566	—
<b>Total</b>	<b>53,137</b>	<b>50,322</b>	<b>22,333</b>

**Revenue from external customers**

The Company is domiciled in the Netherlands. The amount of revenue from external customers, based on the locations of the customers, can be broken down by country as follows:

(in €'000)	2022	2021	2020
The Netherlands	46,302	29,689	16,369
Belgium	10,692	4,358	2,874
Germany	15,045	14,477	13,465
France	55,815	32,098	8,285
Other	6,046	5,669	3,256
<b>Total</b>	<b>133,900</b>	<b>86,291</b>	<b>44,249</b>

**Non-current assets by country**

The amount of total non-current assets, based on the locations of the assets, can be broken down by country as follows:

(in €'000)	December 31, 2022	December 31, 2021
The Netherlands	109,851	59,047
Belgium	8,778	7,049
Germany	43,510	13,568
France	32,675	357
Other	12,369	209
<b>Total</b>	<b>207,183</b>	<b>80,230</b>

Non-current assets for this purpose consist of total non-current assets as recorded in the consolidated statement of financial position, excluding non-current financial assets and deferred tax assets.

**6 Revenue from contracts with customers**

**Disaggregation and timing of revenue from contracts with customers**

Set out below is the disaggregation of the Group's revenue from contracts with customers.

(in €'000)	2022	2021	2020
<b>Type of goods or service</b>			
Charging sessions	65,347	26,108	14,879
Service revenue from the sale of charging equipment	33,585	37,253	15,207
Service revenue from installation services	28,630	19,516	12,313
Service revenue from operation and maintenance of charging equipment	3,230	3,414	1,850
Service revenue from consulting services	3,108	—	—
<b>Total revenue from external customers</b>	<b>133,900</b>	<b>86,291</b>	<b>44,249</b>
<b>Timing of revenue recognition</b>			
Services transferred over time	34,968	22,930	14,162
Goods and services transferred at a point in time	98,932	63,361	30,087
<b>Total revenue from external customers</b>	<b>133,900</b>	<b>86,291</b>	<b>44,249</b>

**Assets and liabilities related to contracts with customers**

The Group has recognized the following assets and liabilities related to contracts with customers:

(in €'000)	December 31, 2022	December 31, 2021
<b>Assets</b>		
Current contract assets	1,512	1,226
Loss allowance	—	—
<b>Total contract assets</b>	<b>1,512</b>	<b>1,226</b>
<b>Liabilities</b>		
Current contract liabilities	7,917	21,192
Non-current contract liabilities	2,442	—
<b>Total contract liabilities</b>	<b>10,359</b>	<b>21,192</b>

Refer to Note 20 for details on trade receivables and the loss allowance on trade receivables and contract assets.

**Significant changes in contract assets and liabilities**

The change in contract assets and contract liabilities is the result of the Group's development contract activities which started in 2019 and which have increased since then. For certain development contracts, the Group provides services exceeding the payments received from customers which result in contract assets. Conversely, the Group receives prepayments for certain development contracts which result in contract liabilities. For the year ended December 31, 2022, contract assets increased mainly for development contracts with Mega-E where significant milestones were reached. Contract liabilities decreased mainly as a result of prepayments received for development contracts with EV Cars in prior year for which the performance obligations have been satisfied in the current year. This decrease has been offset by an increase in contract liabilities of €3,358 thousand for future charging services to be provided to one of the PIPE Investors. For more information on balances with related parties, reference is made to Note 35.2

During the year ended December 31, 2022, the Group entered into a strategic partnership with a PIPE Investor for future charging sessions. A portion of the cash received for the PIPE Investment was therefore accounted for as a contract liability in recognition of future services to be transferred to the customer. As of December 31, 2022, €3,358 thousand (December 31, 2021: € nil) of the contract liability balance relates to this arrangement, of which €916 thousand is recognized as current and €2,442 thousand is recognized as non-current.

The Group did not recognize a loss allowance for contract assets in accordance with IFRS 9 as of December 31, 2022 and December 31, 2021, see Note 32 for further information.

**Revenue recognized in relation to contract liabilities**

The following table shows how much revenue the Group recognized that relates to carried-forward contract liabilities.

(in €'000)	2022	2021	2020
Revenue recognized that was included in the contract liability balance at the beginning of the period	21,192	7,280	5,250

**Performance obligations**

The transaction price allocated to the remaining performance obligations (unsatisfied or partially unsatisfied) as at each reporting date is, as follows:

(in €'000)	2022	2021
Within one year	24,791	25,274
More than one year	7,909	—
<b>Total</b>	<b>32,700</b>	<b>25,274</b>

As at December 31, 2022, the Group expects that 76% of the transaction price allocated to unsatisfied performance obligations will be recognized as revenue during the next financial reporting year. The remaining 24% will be recognized in the 2024 and 2025 financial reporting years. Of the total unsatisfied performance obligations, 90% relates to service revenue from the sale of charging equipment and service revenue from installation services. The remaining portion of 10% relates to revenue from charging sessions.

**7 Other income**

(in €'000)	2022	2021	2020
Government grants	213	2,037	2,302
Income from sale of CO <sub>2</sub> tickets	9,527	5,403	2,396
Net gain/(loss) on disposal of property, plant and equipment	(12,528)	(210)	7
Sublease rental income	200	200	—
Fair value gains/(losses) on derivatives (purchase options)	3,856	2,900	—
Fair value gains/(losses) on pref. shares derivatives and net gain/(loss) on sale of pref. shares derivatives	(69)	—	—
Other items	2,525	523	724
<b>Total</b>	<b>3,724</b>	<b>10,853</b>	<b>5,429</b>

**Government grants**

Government grants that relate to an expense item, are recognized as income on a systematic basis over the periods that the related costs, which the grants are intended to compensate, are expensed.

**Income from sale of CO<sub>2</sub> tickets**

The Group sells CO<sub>2</sub> tickets (for example, HBE certificates in the Netherlands) to companies that are required to compensate their use of non-green energy through a brokerage. These certificates are issued by the government and therefore IAS 20 *Accounting for government grants and disclosure of government assistance* is applicable.

For the year ended December 31, 2022, income from the sale of CO<sub>2</sub> tickets includes a fair value gain on initial recognition of €9,423 thousand (2021: €5,483 thousand, 2020: €2,136 thousand) and a gain on the subsequent sale of €104 thousand (2021: loss of €80 thousand, 2020: gain of €260 thousand).

**Sublease rental income**

Refer to Note 17.2 for details on the Group's subleases.

**Fair value gains/(losses) on derivatives (purchase options)**

Refer to Note 19 for details on the Group's purchase options.

**Fair value gains/(losses) on preference shares derivatives and net gain/(loss) on sale of preference shares derivatives**

The Group has waived certain potential economic rights associated with a portion of the shares held by the Group in Voltalis for a consideration of €87 thousand. The transaction resulted in an immaterial loss, which has been recognized in the consolidated statement of profit or loss, within other income. This transaction does not affect the Group's interest held in the ordinary share capital of Voltalis.

**Other items**

Other items primarily consists of reimbursements that the Group has received from one of its suppliers for chargers.

During the year ended December 31, 2022, the Group purchased a number of chargers that malfunctioned and the Group has disposed of these chargers. During the year ended December 31, 2022, the Group has recognized a gain of €2,250 thousand (2021: € nil, 2020: € nil) for reimbursement received from suppliers.

## 8 Selling and distribution expenses

(in €'000)	2022	2021	2020
Employee benefits expenses	1,650	1,898	2,907
Amortization of customer relationships	231	—	—
Depreciation of right-of-use assets	148	92	153
Marketing and communication costs	478	421	478
Housing and facility costs	48	60	358
Travelling costs	32	1	23
<b>Total</b>	<b>2,587</b>	<b>2,472</b>	<b>3,919</b>

Refer to Note 10 for a breakdown of expenses by nature.

## 9 General and administrative expenses

(in €'000)	2022	2021 (restated) <sup>1</sup>	2020 (restated) <sup>1</sup>
Employee benefits expenses	65,089	105,025	23,549
Depreciation of property, plant and equipment	185	206	285
Depreciation of right-of-use assets	5,676	3,175	1,511
Amortization of intangible assets	577	97	333
IT costs	3,307	1,625	2,786
Housing and facility costs	490	337	496
Travelling costs	398	7	81
Legal, accounting and consulting fees	73,867	208,945	9,134
Insurance costs	7,164	397	240
Other costs	7,891	9,483	1,018
Share-based payment expenses - SPAC Transaction	158,714	—	—
<b>Total</b>	<b>323,358</b>	<b>329,297</b>	<b>39,433</b>

Employee benefits expenses for the year ended December 31, 2022 include share-based payment expenses relating to the First and Second Special Fees Agreements of €26,869 thousand (2021: €89,636 thousand, 2020: €2,450 thousand) as certain directors of the Company are entitled to a percentage of the total benefits received by the external consulting firm as part of these agreements. Refer to Note 11.1 and Note 11.2 for details. Furthermore, employee benefits expenses for the year ended December 31, 2022 include share-based payment expenses relating to the management incentive plan of €14,361 thousand (2021: € nil, 2020: € nil) as the Group has granted the options to acquire a percentage of the Company's issued share capital to key management personnel. Refer to Note 11.3 for details.

Legal, accounting and consulting fees for the year ended December 31, 2022 include share-based payment expenses relating to the First and Second Special Fees Agreements of €58,145 thousand (2021: €202,201 thousand, 2020: €4,650 thousand) as the Group has provided share-based payment awards to an external consulting firm. Refer to Note 11.1 and Note 11.2 for details.

Share-based payment expenses related to the SPAC Transaction for the year ended December 31, 2022 represent the difference between Spartan's net assets at the closing date and the fair value of the Company's shares exchanged in the transaction to Spartan. This difference is considered as an expense representing the costs of service in respect of the stock exchange listing for Spartan's shares.

Refer to Note 10 for a breakdown of expenses by nature.

<sup>1</sup> Refer to Note 2.7.24 for details regarding the restatement of comparative figures as a result of changes in accounting policies

**10 Breakdown of expenses by nature**

**10.1. Depreciation, amortization and impairments**

(in €'000)	2022	2021 (restated) <sup>1</sup>	2020 (restated) <sup>1</sup>
<b>Included in cost of sales:</b>			
Depreciation of property, plant and equipment	16,542	5,417	4,024
Impairments of property, plant and equipment	701	354	466
Reversal of impairments of property, plant and equipment	(679)	(381)	—
Amortization of intangible assets	2,883	2,623	3,404
Depreciation of right-of-use assets	886	141	141
<b>Included in selling and distribution expenses:</b>			
Depreciation of right-of-use assets	148	92	153
Amortization of customer relationships	231	—	—
<b>Included in general and administrative expenses:</b>			
Depreciation of property, plant and equipment	185	206	285
Depreciation of right-of-use assets	5,676	3,175	1,511
Amortization of intangible assets	577	97	333
<b>Total</b>	<b>27,150</b>	<b>11,724</b>	<b>10,317</b>

<sup>1</sup> Refer to Note 2.7.24 for details regarding the restatement of comparative figures as a result of changes in accounting policies

**10.2. Employee benefits expenses**

(in €'000)	2022	2021	2020
<b>Included in selling and distribution expenses:</b>			
Wages and salaries	1,195	1,527	1,961
Social security costs	127	178	266
Pension costs	139	144	239
Termination benefits	194	11	360
Other employee costs	(5)	34	78
Contingent workers	—	4	3
<b>Subtotal</b>	<b>1,650</b>	<b>1,898</b>	<b>2,907</b>
<b>Included in general and administrative expenses:</b>			
Wages and salaries	14,968	9,951	12,190
Social security costs	1,980	1,262	1,666
Pension costs	1,553	1,025	1,479
Termination benefits	222	42	2,674
Share-based payment expenses	41,230	89,636	2,450
Other employee costs	283	219	410
Contingent workers	4,853	3,358	3,012
Capitalized hours	—	(468)	(332)
<b>Subtotal</b>	<b>65,089</b>	<b>105,025</b>	<b>23,549</b>
<b>Total</b>	<b>66,739</b>	<b>106,923</b>	<b>26,456</b>

**Termination benefits**

The Group incurred termination benefits in connection with the restructuring of its operations in 2020. Refer to Note 26 for details.

**Average number of employees**

During 2022, 163 employees were employed on a full-time basis (2021: 127, 2020: 189). Of these employees, 59 were employed outside the Netherlands (2021: 40, 2020: 52).

**Pension plans**

*The Netherlands*

In the Netherlands, the Group voluntarily participates in the industry-wide pension fund for civil servants “ABP”. All Dutch employees are covered by this plan, which is financed by both employees and the employer. The pension benefits are related to the employee’s average salary and the total employment period covered by the plan. The Group has no further payment obligations once the contributions have been paid.

As the ABP pension plan contains actuarial risks, i.e. a recovery contribution is charged as part of the annual contribution, it does not qualify as a defined contribution plan under IAS 19 and thus qualifies as a defined benefit plan. Under IAS 19, the ABP pension plan qualifies as a multi-employer plan. The Group’s proportionate share in the total multi-employer plan is insignificant. The Group should account for its proportionate share of this multi-employer plan, which is executed by ABP. However, ABP is unwilling to provide the information to perform such an actuarial valuation to the Group. As such, the ABP plan is treated as a defined contribution pension plan for accounting purposes. The contributions are treated as an employee benefit expense in the consolidated statement of profit or loss when they are due. The expense recognized in relation to the ABP pension plan in 2022 was €1,290 thousand (2021: €1,034 thousand, 2020: €1,716 thousand). The contributions to the ABP pension plan for the year ending December 31, 2023 are expected to be in line with the contributions paid for the year ended December 31, 2022.

The pension plan of the Group in the Netherlands is administered by Stichting Pensioenfonds ABP (“the fund”). The most important characteristics of this pension plan are:

- The plan provides a retirement and survivor’s pension.
- The pension plan is an average pay plan.
- The retirement age depends on the AOW retirement age.
- The board of the fund sets an annual contribution for the retirement pension, partner’s pension and orphan’s pension which is based on the actual funding ratio of the fund.
- If the fund holds sufficient assets, the board of the fund can increase the accrued benefits of (former) employees and retirees in line with the consumer price index for all households. This indexation is therefore conditional. There is no right to indexation and it is not certain for the longer term whether and to what extent indexations will be granted. The board of the fund decides annually to what extent pension benefits and pension benefits are adjusted.
- The board of the fund can decide to reduce the accrued benefits of (former) employees and retirees in case the funding level is below the legally required level.

The main features of the implementation agreement are:

- Participation in the ABP pension fund is mandatory for the employees of the Group.
- The Group is only obliged to pay the fixed contributions. The Group, under no circumstances, has an obligation to make an additional payment and does not have the right to a refund. Therefore, the Group has not recorded a pension liability.

The funding ratio of the fund as at December 31, 2022 was 110.9% (December 31, 2021: 110.2%, December 31, 2020: 93.5%). The policy funding ratio as at December 31, 2022 was 118.6% (December 31, 2021: 102.8%, December 31, 2020: 87.6%), which is above the required minimum of 104.0% as prescribed by De Nederlandsche Bank (DNB).

*Belgium*

The Group operates a defined benefit pension plan in Belgium. Statutory minimum interest rates apply to the contributions paid by employees. If in any year the pension contribution is insufficient to cover the minimum yield and if the means in the premium reserve / depot are not sufficient to finance the deficit, the employer should finance the deficit by paying an additional contribution into the depot. Therefore, the plan qualifies as a defined benefit plan under IAS 19 due to the

## [Table of Contents](#)

employer's obligation to finance the plan's minimum guaranteed returns. These should be quantified and recognized as a liability in the Group's consolidated statement of financial position. However, given the limited number of participants, limited annual contributions of Enil in 2022 (2021: €10 thousand, 2020: €27 thousand) and as the plan started as of 2016, the current underfunding and the resulting pension liability under IAS 19 is expected to be limited. The Group estimates that the resulting pension liability is immaterial to the consolidated financial statements and therefore the Group has not recorded a pension liability for this plan in the consolidated statement of financial position. The contributions to the defined contribution pension plan in Belgium for the year ending December 31, 2023 are expected to be in line with the contributions paid for the year ended December 31, 2022.

### *France:*

#### *Description of plans*

A retirement indemnity plan ('Indemnités de fin de carrière') applies to the Group's employees in France, which qualifies as another post-employment benefit under IAS 19. The retirement benefit depends on the number of service years within the industry and the Group. The benefit equals 1/4<sup>th</sup> of the average monthly salary for the first ten years of seniority and 1/3<sup>rd</sup> of the average monthly salary for the service years thereafter. Contributions for the retirement indemnity plan are obligations from past events with a probable outflow for which reliable estimates can be made. The Group should therefore record a provision for these obligations on its consolidated statement of financial position. The plans are not funded, as there is no mandatory minimum funding requirement for this scheme. The Company does not have plan assets, therefore there is no allocation of plan assets disclosed.

The next table provides a summary of the changes in the defined benefit obligations in France.

(in €'000)	2022
<b>Defined benefit pension provision - Opening</b>	—
Current service cost	30
Interest cost	6
<b>Total amount recognized in the consolidated statement of profit or loss</b>	<b>36</b>
Remeasurement:	
(Gain)/loss from change in financial assumptions	(19)
Experience (gain)/loss	46
<b>Total amount recognized in the consolidated statement of other comprehensive income</b>	<b>27</b>
Acquisition	386
Benefit payments from plans	—
<b>Defined benefit provision - Closing</b>	<b>449</b>

#### *Actuarial assumptions*

The principal actuarial assumptions at the reporting dates are:

(in %)	2022
Discount rate	2.5% - 3.7%
Wage inflation	2.5 %
Turnover	5.6% - 16.8%

The discount rate is based on yields on AA-rated high-quality bonds, with durations comparable to the duration of the pension plan's liabilities. Based on the assumptions described in this note.

#### *Sensitivity analysis*

The calculation of the defined benefit obligation is sensitive to, amongst others, the discount rate, rate of inflation and changes in life expectancy. In 2022, the sensitivity analysis was as follows:

## Table of Contents

In % / in €'000	-0.5%	+0.5%
Discount rate	5.1 %	(4.7)%
Salary increases	(4.7)%	5.1 %
Turnover rates	1.0 %	(1.0)%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognized in the balance sheet.

### Other countries

The Group solely operates defined contribution plans in Germany, United Kingdom, Sweden and Norway. The Group's legal or constructive obligation for these plans is limited to the Group's contributions. The expense recognized in relation to these defined contribution pension plans was €67 thousand in 2022 (2021: €75 thousand, 2020: €124 thousand). The contributions to these defined contribution pension plans for the year ending December 31, 2023 are expected to be in line with the contributions paid for the year ended December 31, 2022.

### Other long-term employee benefits:

#### The Netherlands

##### Jubilee plan

The Group operates a jubilee plan for all active employees under the Dutch collective labor agreement (CLA) for energy networking companies (CAO NWb). The most recent actuarial valuations of the present value of the long-term employee benefits were carried out as at December 31, 2022. The valuation is carried out with a discount rate of 3.6% (December 31, 2021: 0.8%), an expected rate of salary increase of 2.5% (December 31, 2021: an increase of 2.5%) and a retirement age of 68 years (December 31, 2021: 68 years). The provision recorded in the Group's consolidated statement of financial position amounts to €26 thousand as at December 31, 2022 (December 31, 2021: €73 thousand).

The amounts recorded in the consolidated statement of financial position and the movements in the jubilee provision over all reporting periods presented, are as follows:

(in €'000)	2022	2021
<b>Jubilee provision – Opening</b>	<b>73</b>	<b>78</b>
Current service cost	11	11
Past service cost	—	(19)
Interest cost	—	—
Remeasurements	(58)	3
<b>Total amount recognized in the consolidated statement of profit or loss</b>	<b>(47)</b>	<b>(5)</b>
Employer contributions	—	—
Benefit payments	—	—
<b>Jubilee provision – Closing</b>	<b>26</b>	<b>73</b>

For the year ended December 31, 2022, there were no past service costs recognized on the jubilee plan. For the year ended December 31, 2021, past service costs of positive €19 thousand are the result of a change in the jubilee plan as part of the new company collective labor agreement which became effective on April 1, 2021.

##### Senior leave plan

Additionally, the Group operates a senior leave plan for its employees in the Netherlands. As the amount of benefits (i.e. additional leave) provided under the plan is limited, the Group does not contract any additional hours to replace the respective employees. In addition, only a limited number of employees is entitled to seniority leave as of December 31, 2022. The Group estimates that the resulting liability is immaterial to the consolidated financial statements and therefore the Group has not recorded a pension liability for this plan in the consolidated statement of financial position.

## 11 Share-based payments

### 11.1. First Special Fees Agreement

On December 16, 2020, Allego Holdings' then immediate parent entity — Madeleine — entered into the First Special Fees Agreement, pursuant to which an external consulting firm provided services to the Group relating to strategic and operational advice for one or more contemplated share transactions (a “*Liquidity Event*” or “*Liquidity Events*”). The First Special Fees Agreement was set to terminate on December 31, 2023. As consideration for the services provided pursuant to the First Special Fees Agreement the consulting firm was entitled to fees payable by Madeleine in cash (“Part A”) and in shares (“Part B”) based on the value of the Group in relation to future Liquidity Events. The amount of the Part A fees was to be paid directly after the closing of a Liquidity Event. Part B of the fees provided the consulting firm the right, prior to closing, to subscribe for new shares to be issued by an Allego group company at the nominal value of such shares.

The consulting firm was only entitled to cash and shares if the equity value at closing was at least 20% higher than the initial equity value of Allego Holdings provided for in the First Special Fees Agreement as at December 16, 2020. The number of shares that the consulting firm may subscribe for was to be determined based on the equity value of Allego Holding at closing. The maximum number of shares that the consulting firm was entitled to acquire under the original First Special Fees Agreement was equal to 10% of the share capital of the applicable Allego group company.

In January 2021, the First Special Fees Agreement was amended whereby certain definitions, including the definition of what entails a Liquidity Event, were changed. In April 2021, the First Special Fees Agreement was amended whereby the external consulting firm was entitled to additional compensation from Madeleine upon the first-time admission of the shares of any Allego group company to a regulated or organized stock exchange. If such admission occurred, the external consulting firm had the right to subscribe for additional shares being equal to 5% of the share capital (after completion of the listing) of Allego Holding or the relevant Allego group company. Additionally, the First Special Fees Agreement was extended until the earlier of (i) December 31, 2028 and (ii) the date on which Meridiam or any Meridiam Affiliates would cease to own, directly or indirectly, any shares of the Group.

On July 28, 2021, Spartan and Allego Holding signed a Business Combination Agreement. Madeleine and the external consulting firm were also parties to the Business Combination Agreement. On February 28, 2022, the Business Combination Agreement was amended whereby the parties modified the thresholds that determine whether the Part A fees under the First Special Fees Agreement payable to the external consulting firm will be paid in cash, shares or a combination of cash and shares, contingent upon the number of redemptions of Spartan shares that will occur as part of the Business Combination. The amendment did not change the accounting treatment of the First Special Fees Agreement as disclosed in this note, as the total First Special Fees Agreement is classified as an equity-settled share-based payment arrangement (see below), and the amendment did not give rise to an incremental fair value of the share-based payment arrangement.

On March 16, 2022, in connection with the Business Combination Agreement, and before the closing of the Business Combination, 22 ordinary shares of Allego Holding at a par value of €1 per share were issued to the external consulting firm. On the same day, pursuant to the Business Combination Agreement, each share of Allego Holding held by the external consulting firm was exchanged to ordinary shares of Allego N.V. in accordance with the Exchange Ratio. Consequently, the external consulting firm owns 41,097,994 ordinary shares of Allego N.V. at a par value of €0.12 each.

Although Madeleine had the obligation to settle the First Special Fees Agreement, the Group accounted for the First Special Fees Agreement as a share-based payment since the Group obtained services from the consulting firm in exchange for equity instruments of an Allego group company or cash amounts based on the equity value of the Company (together “the share-based payment arrangement”). Since the Group did not have an obligation to settle the share-based payment arrangement with the consulting firm in cash (Part A) or equity instruments (Part B), the total First Special Fees Agreement was classified as an equity-settled share-based payment arrangement.

Certain directors and officers of the Company received compensation from the external consulting firm in the form of a fixed percentage of the total benefits that the external consulting firm generated under the First Special Fees Agreement. The share-based payment expenses related to the First Special Fees Agreement therefore reflect both compensation for external consulting services and key management remuneration.

During the year ended December 31, 2022, the consulting firm did not receive any additional payments pursuant to the First Special Fees Agreement (2021: €600 thousand as incidental, non-recurring and one-time bonus for the services rendered in connection with their strategic and operational advice).

The First Special Fees Agreement was terminated in connection with the Business Combination.

### **Measurement of fair value at the grant date**

In accordance with IFRS 2 *Share-based Payment*, the fair value of key management remuneration is measured by reference to the fair value of the equity instruments granted, at the grant date. The fair value determined at the grant date is not subsequently adjusted.

As the value of the services provided by the consulting firm is not directly related to the time incurred by the consultants, management considers that the fair value of the services cannot be measured reliably. Therefore, the fair value of the services received under the First Special Fees Agreement is measured by reference to the fair value of the share-based payment arrangement offered as consideration, as the Group obtains these services. The Group applies an approach where the average fair value over the reporting period is used to determine the fair value of the services received.

Since the First Special Fees Agreement included an implicit service condition, the services received under the First Special Fees Agreement were recognized as expenses between December 16, 2020 (the "*grant date*") and March 17, 2022 (the "*Liquidity Event date*"), by reference to the fair value of the share-based payment arrangement measured at the grant date (for key management remuneration) or the average fair value over the reporting period (for external consulting services). As described further below, the amendment to the First Special Fees Agreement in April 2021 was a modification to the share-based payment arrangement. The expense recognition for this modification followed the same pattern as described above, with the exception that the grant date is considered to be the modification date (April 28, 2021).

### **Fair value of equity instruments granted**

The fees payable under the agreement (either in cash or in shares) depended on the future value of the Allego Group at the time of a future Liquidity Event. Since there was no market price for the services, to measure the fair value of this instrument under IFRS 2 *Share-based Payment*, valuation techniques that are based on discounting expected future cash flows, also referred to as the income approach, were taken into account.

Given that all fees payable under the agreement would be derived from the outcomes of a specific Liquidity Event scenario, a probability-weighted equity return method was historically applied in order to value the payouts under the First Special Fees Agreement. Under this approach, the fees payable were estimated based upon an analysis of future values for the Allego Group, assuming various probable Liquidity Event scenarios, each with their own probability attached.

In order to measure the fair value of the instrument throughout the period from December 31, 2021, to March 17, 2022, the only scenario that was considered for the fair value measurement of the instrument was the Business Combination.

For the above-described scenario, the future (post-money) value of the Allego Group has been estimated for the valuation of the instrument as of December 31, 2021, and a discount rate of 15% has been applied to determine the present value of the expected payouts. Additionally, for the valuation of the instrument as of March 17, 2022, the actual value of the Allego Group based on the offer price and the number of shares outstanding at the time of the Business Combination was used.

Since the Part B fees include a lock-up mechanism, a discount for lack of marketability ("DLOM") of 1.5% (December 31, 2021: 9.4%) has been applied using the following main input parameters:

<b>Input parameters (DLOM)</b>	<b>March 17, 2022</b>	<b>December 31, 2021</b>
Expected life	0.5 years	0.5 years
Expected volatility (in %)	72.5	58.6
Expected dividend yield (in %)	0.0	0.0

The total fair value of the share-based payment arrangement as at March 17, 2022 was €303,500 thousand (December 31, 2021: €459,300 thousand), of which €9,000 thousand (December 31, 2021: €97,900 thousand) related to Part A and €294,500 thousand (December 31, 2021: €361,400 thousand) related to Part B.

The Group assessed the impact to the fair value of the share-based payment arrangement as a result of the two amendments to the First Special Fees Agreement which were entered into in January and April 2021. Only the amendment in April 2021 had a fair value impact to part B of the share-based payment arrangement, through the right for the external consulting firm to subscribe for additional shares being equal to 5.0% of the share capital (after completion of the Liquidity Event). The fair value of the share-based payment arrangement as a result of the amendment and at the modification date (April 28, 2021) was determined to be €250,400 thousand. The incremental fair value of €87,850 thousand was recognized as an

expense over the period from the modification date to March 17, 2022 (the date of the Liquidity Event). The expense for the original terms of the agreement continued to be recognized as if the terms had not been modified. The fair value of the modification to the share-based payment arrangement was determined using the same models and principles as described in this note. There were no further amendments to the First Special Fees Agreement in 2022.

#### **Share-based payment expenses**

During the year ended December 31, 2022, the Group recognized share-based payment expenses of €67,621 thousand (2021: €291,837 thousand, 2020: €7,100 thousand) for this equity-settled arrangement, with a corresponding increase in accumulated deficit. As the share-based payment expenses reflect both compensation for external consulting services and key management remuneration, the Group has recognized share-based payment expenses for an amount of €46,433 thousand (2021: €202,201 thousand, 2020: €4,650) as legal, accounting and consulting fees and share-based payment expenses for an amount of €21,188 thousand (2021: €89,636 thousand, 2020: €2,450 thousand) has been recognized as employee benefits expenses, both within general and administrative expenses.

#### **11.2. Second Special Fees Agreement**

On February 25, 2022, the Allego Holdings' then immediate parent entity — Madeleine — entered into the Second Special Fees Agreement with the same external consulting firm as for the First Special Fees Agreement described above. The purpose of this Second Special Fees Agreement is to compensate the external consulting firm for their continuous strategic and operational advice, as well as support with regards to Allego's fundraising efforts in the near future. The agreement ultimately expires on the earlier of June 30, 2025, and the date on which Madeleine would no longer hold any equity security in Allego. As consideration for the Second Special Fees Agreement, the external consulting firm is entitled to receive cash compensation based on the value of the Group in connection with any new injection of equity, whether in cash or in kind, in any entity of the Group subsequent to the Business Combination (each, an "**Equity Injection**").

On March 10, 2022, the Second Special Fees Agreement was amended to modify the formula of the relevant percentage used in the determination of the fees payable (the "**Relevant Percentage**") for equity injections subsequent to the first Equity Injection.

The Group accounts for the Second Special Fees Agreement as a share-based payment since the Group obtained services from the consulting firm in exchange for cash amounts based on the equity value of the Company. Madeleine, instead of the Group, had the obligation to settle the share-based payment arrangement with the consulting firm. The Second Special Fees Agreement was therefore classified as an equity-settled share-based payment arrangement. On April 20, 2022, the Second Special Fees Agreement was novated from Madeleine to Allego (the "**Novation**"), with all the other terms of the Second Special Fees Agreement remaining the same. As a result of the Novation, Allego now has the obligation, instead of Madeleine, to settle the share-based payment arrangement with the consulting firm. The Second Special Fees Agreement's classification therefore changed to a cash-settled share-based payment arrangement from the Novation date.

Certain directors and officers of the Company are entitled to compensation from the external consulting firm in the form of a fixed percentage of the total benefits that the external consulting firm will generate under the Second Special Fees Agreement, including any amendments. The share-based payment expenses for the Second Special Fees Agreement therefore reflect both compensation for external consulting services and key management remuneration.

#### **Measurement of fair value as an equity-settled plan**

In accordance with IFRS 2 *Share-based Payment*, the fair value of key management remuneration under an equity-settled share-based payment arrangement is measured by reference to the fair value of the equity instruments granted, measured at the grant date. The fair value determined at the grant date is not subsequently adjusted.

As the value of the services provided by the consulting firm is not directly related to the time incurred by the consultants, management considers that the fair value of the services cannot be measured reliably. Therefore, the fair value of the services received under the Second Special Fees Agreement are measured by reference to the fair value of the share-based payment arrangement offered as consideration, as the Group obtains these services. The Group applies an approach where the average fair value over the reporting period is used to determine the fair value of the services received.

Since the Second Special Fees Agreement includes an implicit service condition, the services received under the Second Special Fees Agreement are recognized as expenses over the period in which the Company expects to have the Equity Injections, therefore between February 25, 2022 (the "**grant date**") and the dates of the Equity Injections by reference to the fair value of the share-based payment arrangement measured at the grant date (for key management remuneration) or the average fair value over the reporting period (for external consulting services).

### Measurement of fair value as a cash-settled plan

Following the Novation, the Second Special Fees Agreement was classified as a cash-settled plan as opposed to an equity-settled plan. Therefore, in accordance with IFRS 2 *Share-based Payment*, the fair value of both the key management remuneration and the services provided by the consulting firm under a cash-settled share-based payment arrangement is measured by reference to the fair value of the share-based payment arrangement offered as consideration, as the Group obtains these services. The fair value of the liability is recognized over the service period.

In effect, IFRS 2 *Share-based Payment* provides that the cumulative amount recognized as the expense over the life of the Second Special Fees Agreement is the grant-date fair value plus or minus any subsequent changes in fair value after the change in classification. Therefore, the cumulative amount may be less than the original grant-date fair value.

### Fair value of equity instruments granted

The fees payable under the Second Special Fees Agreement will depend on the future value of the Allego Group following each future Equity Injection. Since there is no market price for the services, to measure the fair value of this instrument under IFRS 2 *Share-based Payment*, the future value of the Allego Group for the Equity Injection has been derived from a weighted average valuation model in which that value can be simulated based on various amounts and expected dates of Equity Injection events, and taking into account the likelihood of Equity Injections to happen, as well as the expected price per share upon Equity Injection.

The total fair value of the share-based payment arrangement as at December 31, 2022 is estimated at €33,481 thousand (grant date: €32,250 thousand)

The Group assessed the impact to the fair value of the share-based payment arrangement as a result of the amendment to the Second Special Fees Agreement which was entered into in March 2022. The amendment modifies the formula of the Relevant Percentage applied to the future value of the Group for equity injections subsequent to the first Equity Injection, which is a component of the calculation of the fees payable. However, the Relevant Percentage used to calculate the fees remained the same following the amendment and therefore did not impact the fair value of the Second Special Fees Agreement as of the amendment date.

Additionally, the Group assessed the accounting impact of the Novation. The Group measured the liability using the Novation date fair value of the equity-settled share-based payment arrangement based on the elapsed portion of the vesting period (period from Grant Date to each Equity Injection date). Therefore, as of the Novation, an amount of €4,440 thousand was recognized as a current liability, and an amount of €1,353 thousand was recognized as a non-current liability, with a corresponding decrease to equity of €5,793 thousand.

### Share-based payment expenses

During the year ended December 31, 2022, the Group recognized total share-based payment expenses with respect to the Second Special Fees Agreement of €7,393 thousand (2021: € nil, 2020: € nil). As a result of the Novation, the Second Special Fees Agreement was modified from an equity-settled plan to a cash-settled plan during the period. Therefore:

- The Group recognized share-based payments expenses of €6,380 thousand (2021: € nil, 2020: € nil) for the period before the Novation, with a corresponding increase in accumulated deficit. As the share-based payment expenses for the Second Special Fees Agreement reflect both compensation for external consulting services and key management remuneration, for the period before the Novation the Group has recognized share-based payment expenses for an amount of €4,498 thousand (2021: € nil, 2020: € nil) as legal, accounting and consulting fees and share-based payment expenses for an amount of €1,881 thousand (2021: € nil, 2020: € nil) has been recognized as employee benefits expenses, both within general and administrative expenses.
- The Group recognized share-based payments expenses of €11,014 thousand (2021: € nil, 2020: € nil) for the period after the Novation, with a corresponding increase in liability. As the share-based payment expenses for the Second Special Fees Agreement reflect both compensation for external consulting services and key management remuneration, for the period after the Novation the Group has recognized share-based payment expenses for an amount of €7,214 thousand (2021: € nil, 2020: € nil) as legal, accounting and consulting fees and share-based payment expenses for an amount of €3,800 thousand (2021: € nil, 2020: € nil) has been recognized as employee benefits expenses, both within general and administrative expenses.

### 11.3. Management Incentive Plan

The establishment of the company's management incentive plan ("*MIP*") was approved by the board of directors on April 20, 2022. The MIP is designed to provide long-term incentives for key management employees to deliver long-term shareholder returns, and includes two types of granted options: the right to acquire a percentage of the Company's issued share capital immediately following the listing, subject to the expiry of a blocking period of 18 months (the "*Grant*")

*Options*”), and the right to acquire a percentage of the Company's issued share capital immediately following the listing, subject to predefined performance conditions and the expiry of the blocking period (the “*Performance Options*”). The granted options carry no dividend or voting rights. The options do not include any market conditions or non-vesting conditions that should be included in the fair value at recognition.

Under the plan, the Grant Options vest immediately, and the Performance Options only vest if certain performance standards are met. Participation in the plan is at the board of directors’ discretion, and no individual has a contractual right to participate in the plan or to receive any guaranteed benefits.

The amount of Performance Options that will vest depends on the group’s performance, including operational EBITDA, financing targets, compliance and reporting, engagement with investors, and the minimum service period of the employees. Once vested, the granted options remain exercisable for a period of ten years following the end of the blocking period, which ends on September 18, 2023, for the Grant Options and ten years from the grant date (May 14, 2022) for the Performance Options.

The exercise price of the granted options under the plan is €0.12 per option. When exercisable, each option is convertible into one ordinary share of the Company.

Set out below are summaries of Grant Options and Performance Options granted under the plan:

	For the year ended December 31, 2022		
	Average exercise price per share option (in €)	Number of grant options	Number of performance options
<b>As at January 1</b>	—	—	—
Granted during the period	0.12	1,329,213	1,329,213
Exercised during the period	—	—	—
Forfeited during the period	—	—	—
<b>As at December 31</b>	0.12	1,329,213	1,329,213
Vested and exercisable at December 31	—	—	—

No options expired during the year ended December 31, 2022.

Share options outstanding at the end of the reporting period have the following expiry dates and exercise prices:

Grant date	Expiry date	Exercise price (in €)	Share options December 31, 2022
May 14, 2022	Sep 17, 2033	0.12	1,329,213
May 14, 2022	Mar 16, 2032	0.12	1,329,213
<b>Total</b>			<b>2,658,426</b>

The weighted average remaining contractual life of options outstanding at the end of period is 9.97 years.

The total expenses arising from the MIP transactions recognized during the period as part of employee benefit expense were €4,361 thousand (2021: € nil, 2020: € nil).

#### Fair value of options granted

The assessed fair value of options granted during the year ended December 31, 2022, was €7.75 per option (December 31, 2021: no options granted, December 31, 2020: no options granted) for both the Grant Options and Performance Options.

The fair value was determined as the share price of the Company’s ordinary shares on grant date of \$8.17 (€7.87<sup>3</sup>), determined as the closing price on May 13, 2022 (the last working day preceding the grant date), less the exercise price of €0.12.

No specific option-pricing model (e.g., Black-Scholes) was applied for the valuation, as in the situation when the exercise price applicable to the options is negligible, the calculated fair value of an option is close (or equal) to the value of an ordinary share less the exercise price, regardless of the other input parameters applied in the option valuation.

As the options do not include any market conditions or non-vesting conditions that has an impact on the fair value and there is no adjustment for dividends, the grant date fair value of both Grant Options and Performance Options was determined using the same approach.

<sup>3</sup> Translated at the EUR/USD exchange rate as at May 13, 2022.

#### 11.4. Long-term Incentive Plan

The Allego Board and the Compensation Committee approved the general framework for the Long Term Incentive Plan ("LTIP") on the Closing Date. The purpose of the LTIP is to provide eligible directors and employees the opportunity to receive stock-based incentive awards for employee motivation and retention and to align the economic interests of such persons with those of Allego's shareholders. The delivery of certain shares or other instruments under the LTIP to directors and key management are agreed and approved in certain Allego Board meetings. On December 20, 2022, the Allego Board approved a detailed plan for the LTIP for future years.

As it relates to the LTIP for Allego executive officers, options may be granted annually and would be exercisable after two years. The amount of options issued under the LTIP are based on four equally-weighted criteria: revenue, operational EBITDA, renewable GWh delivered, and appreciation at the discretion of the Board. Targets are set annually. As of December 31, 2022, no awards were issued under this plan.

As it relates to the LTIP for other Allego employees, individuals may elect to receive up to 50% of their annual performance bonus to be paid in Restricted Stock Units ("RSUs"), which would vest on an annual basis. Additionally, certain Allego employees (approximately 15% as of December 31, 2022, up to a maximum of 50%) are eligible to receive additional RSUs based on the Company's existing internal performance evaluation framework. These RSUs would be granted annually and vest after three years. As of December 31, 2022, no RSUs have been granted under this plan.

#### 12 Finance income/(costs)

(in €'000)	2022	2021	2020
Interest expenses on shareholder loans	(1,743)	(8,162)	(7,530)

Exchange differences – net	(2,069)	(877)	(7)
<b>Finance income/(costs)</b>	<b>10,320</b>	<b>(15,419)</b>	<b>(11,282)</b>

#### 13 Loss per share

Basic loss per share is calculated by dividing the loss for the year attributable to ordinary equity holders of the Company by the weighted average number of ordinary shares outstanding during the year (see explanations regarding the impact of the SPAC Transaction over the weighted average number of ordinary shares in Note 4).

## [Table of Contents](#)

The following table reflects the loss and share data used in the basic and diluted loss per share calculations for the years ended December 31, 2022, 2021, and 2020:

	2022	2021	2020
Loss attributable to ordinary equity holders of the Company (in €'000)	(304,778)	(319,672)	(43,256)
Weighted average number of ordinary shares outstanding	251,434,593	190,270,210	190,270,210
<b>Basic and diluted loss per share (in €)</b>	<b>(1.21)</b>	<b>(1.68)</b>	<b>(0.23)</b>

The Company only has ordinary shares. Refer to Note 23 for details about the Company's share capital.

There is no difference between basic and diluted loss per share as the effect of the potential ordinary shares that would be issued by the Company under the First Special Fees Agreement, the Management Incentive Plan or the Public Warrants are anti-dilutive for all periods presented. Refer to Note 11.1, Note 11.3 and Note 27 for details on the First Special Fees Agreement, the Management Incentive Plan and the Public Warrants, respectively.

There have been no other transactions involving ordinary shares or potential ordinary shares between the reporting date and the date of authorization of these consolidated financial statements.

### *Impairments and reversals of impairments of chargers*

In the consolidated statement of profit or loss for the year ended December 31, 2022, the Group recorded an impairment loss of €701 thousand (2021: €354 thousand, 2020: €466 thousand) for chargers that were underutilized and not performing as expected. The carrying amount of these chargers have been reduced to its recoverable amount.

In the consolidated statement of profit or loss for the year ended December 31, 2022, the Group recorded a reversal of impairment of €679 thousand (2021: €381 thousand, 2020: € nil) for chargers for which an impairment loss was previously recognized that demonstrated an improvement in their utilization rate as at December 31, 2022. The impairment loss and reversal of impairment have been recorded within general and administrative expenses.

Refer to Note 3.2.2 for details on estimates and assumptions made with respect to the impairment and reversal of impairments of non-financial assets.

***Additions of property, plant and equipment for which payment is still pending***

At December 31, 2022, additions of property, plant and equipment for which payment was still pending totaled €953 thousand (December 31, 2021: €123 thousand).

***Additions of property, plant and equipment through the Mega-E asset acquisition***

Property, plant and equipment of €90,651 thousand were recognized through the asset acquisition of Mega-E. For further details on the fair value of the assets acquired as of the acquisition date, refer to Note 4.

***Additions of property, plant and equipment through the MOMA acquisition***

The Group recognized additions to property, plant and equipment with an acquisition value of €81 thousand on completion of the MOMA acquisition. For further details on the fair value of the assets acquired as of the acquisition date, refer to Note 4.

***Government grants related to chargers and charging infrastructure***

The Group has received government grants for the purchase of certain items of chargers and charging infrastructure. There are no unfulfilled conditions or contingencies attached to these grants.

The grants are recognized in the consolidated statement of profit or loss over the useful life of the depreciable assets by way of a reduced depreciation charge. The movements in government grants related to chargers and charging infrastructure for the years ended December 31, 2022 and 2021 have been as follows:

(in €'000)	2022	2021
<b>Opening balance at the beginning of the year</b>	<b>9,628</b>	<b>10,471</b>
Received during the year	512	1,702
Released to the consolidated statement of profit or loss	(1,601)	(2,545)
Reclassifications	(1,554)	—
<b>Closing balance at the end of the year</b>	<b>6,985</b>	<b>9,628</b>

***Purchase commitments***

The Group's purchase commitments for chargers and charging infrastructure are disclosed in Note 34. At the end of each reporting period presented, the Group did not have purchase commitments for other asset classes of property, plant and equipment.

## 16 Intangible assets

The movements in intangible assets for the years ended December 31, 2022 and 2021 have been as follows:

(in €'000)	Software and licenses	Internally developed software	Customer relationships	Goodwill	Total
Cost	1,172	9,802	—	—	10,974

### Internally developed software

Internally developed software comprises the Group's internally developed EV Cloud platform. As at December 31, 2022, the remaining amortization period was one to three years (December 31, 2021: one to three years, December 31, 2020: one to three years). The Group acquired software in connection with the acquisition of MOMA for a total amount of €2,120 thousand. Refer to Note 4 for details.

### Customer relationships

The Group acquired customer relationships in connection with the acquisition of MOMA for a total amount of €6,560 thousand. Refer to Note 4 for details.

## Goodwill

Goodwill originated from the acquisition of MOMA as described in Note 4.

### *Impairment test for goodwill*

For annual impairment testing, the Group allocated goodwill to groups of Cash-Generating Units ("CGUs"). The group of CGUs is the lowest level within the Group at which goodwill is monitored for internal management purposes. Goodwill is allocated and monitored by management at the level of the operating segment, which is the Company as a whole.

The Group tests whether goodwill has suffered any impairment on an annual basis. The fair value of the business as of December 31, 2022, which is equal to the market capitalization of the business, was compared to the carrying value of the Company as a whole (i.e., the group of CGUs making up the operating segment) and indicated sufficient headroom of approximately €700,000 thousand at this level. As a result, it was concluded that there is no goodwill impairment as of December 31, 2022.

## 17 Leases

### 17.1. Group as a lessee

#### *Amounts recognized in the consolidated statement of financial position*

The consolidated statement of financial position shows the following amounts relating to leases:

(in €'000)	December 31, 2022	December 31, 2021
<b>Right-of-use assets</b>		
Office buildings	11,684	9,886
Cars	646	1,134
Software	14,613	18,674
Land permits	20,366	84
Other	508	575
<b>Total</b>	<b>47,817</b>	<b>30,353</b>

Additions to the right-of-use assets for office buildings during 2022 were €2,912 thousand (2021: €259 thousand), which includes €1,594 thousand (2021: € nil) as a result of business combinations. Additions to the right-of-use assets for cars during 2022 were €179 thousand (2021: €144 thousand). Additions to the right-of-use assets for software during 2022 were € nil (2021: €20,308 thousand). Additions to the right-of-use assets for land permits during 2022 were €21,166 thousand (2021: € nil). This includes additions from business combinations of €11,055 thousand (2021: € nil) and additions from the

## [Table of Contents](#)

ordinary course of business of €10,110 thousand (2021: € nil). Additions to the right-of-use assets for other during 2022 were €nil (2021: €90 thousand).

(in €'000)	December 31, 2022	December 31, 2021
<b>Lease liabilities</b>		
<b>Current</b>		
Office buildings	1,066	820
Cars	553	604
Software	4,406	4,002
Land permits	1,191	32
Other	64	62
<b>Total</b>	<b>7,280</b>	<b>5,520</b>
<b>Non-current</b>		
Office buildings	11,105	9,423
Cars	108	551
Software	12,181	15,596
Land permits	20,188	—
Other	462	527
<b>Total</b>	<b>44,044</b>	<b>26,097</b>

Lease liabilities are effectively secured as the rights to the leased assets recorded in the consolidated financial statements revert to the lessor in the event of default.

### *Amounts recognized in the consolidated statement of profit or loss*

The consolidated statement of profit or loss shows the following amounts relating to leases:

(in €'000)	2022	2021	2020
<b>Depreciation expenses right-of-use assets</b>			
Office buildings	1,114	893	682
Cars	581	653	948
Software	4,062	1,633	—
Land permits	885	141	141
Other	68	88	34
<b>Total</b>	<b>6,710</b>	<b>3,408</b>	<b>1,805</b>
<b>Interest expenses on lease liabilities (included in finance costs)</b>			
Office buildings	281	216	241
Cars	17	25	39
Software	565	266	—
Land permits	898	2	5
Other	16	18	9
<b>Total</b>	<b>1,777</b>	<b>527</b>	<b>294</b>

During 2022 the expenses relating to variable lease payment recognized were €323 thousand (2021: €nil and 2020: €nil).

**Total cash outflows for leases**

The total cash outflows for leases were as follows:

(in €'000)	2022	2021	2020
Office buildings	1,267	1,031	764
Cars	602	675	974
Software	4,404	1,774	—
Land permits	657	94	176
Other	78	168	39
<b>Total</b>	<b>7,008</b>	<b>3,742</b>	<b>1,953</b>

**Decommissioning of charging sites**

The Group has land permits in Germany and in the Netherlands. For some land permits, the Group is required to decommission charging equipment upon termination of the concession. In Germany, in most instances the charging equipment will become the property of the municipality and therefore there are no dismantling costs for the Group. In the Netherlands, in most instances the requester for termination will be required to pay for the dismantling costs which is not expected to be the Group. In other instances, it is expected that the sites will be continued at the end of the concession period. Therefore, any dismantling costs to be capitalized as part of right-of-use assets are considered to be immaterial as this only constitutes expenses to be incurred for recovering the charging equipment.

**17.2. Group as a lessor**

During the year ended December 31, 2021, the Group entered into a sublease rental agreement with a third party for one of its office buildings. In the consolidated statement of profit or loss for the year ended December 31, 2022, the Group recognized sublease rental income of €200 thousand (2021: €200 thousand, 2020: € nil).

Future minimum rentals receivable under non-cancellable sublease rental agreements classified as operating leases as at each reporting date, are as follows:

(in €'000)	December 31, 2022	December 31, 2021
Within one year	200	200
After one year but not more than five years	—	200
More than five years	—	—
<b>Total</b>	<b>200</b>	<b>400</b>

**18 Inventories**

(in €'000)	December 31, 2022	December 31, 2021
Finished products and goods for resale	21,440	3,748
CO <sub>2</sub> tickets	4,577	5,483
<b>Total</b>	<b>26,017</b>	<b>9,231</b>

The CO<sub>2</sub> tickets are carried at their net realizable value.

**Amounts recognized in the consolidated statement of profit or loss**

Inventories recognized as an expense in 2022 amounted to €49,092 thousand (2021: €21,243 thousand, 2020: €9,368 thousand). These were included in cost of sales. Any subsequent net realizable value is determined by an individual assessment of the inventories.

Write-downs of inventories to net realizable value in 2022 amounted to €27 thousand (2021: €651 thousand, 2020: €870 thousand). These were recognized as an expense and included in cost of sales.

## 19 Other financial assets

(in €'000)	December 31, 2022	December 31, 2021
Pledged bank balances	12,190	18,887
Security deposits	7,990	—

Current	601	30,400
<b>Total</b>	<b>63,088</b>	<b>49,982</b>

### *Pledged bank balances*

As at December 31, 2022, the Group has pledged bank balances to secure the payment of interest and commitment fees to the Group's external lender. During the year ended December 31, 2022, the Group exercised the accordion feature of the old facility and subsequently entered into the renewed facility (refer to Note 25 for details). This resulted in a decrease of €6,697 thousand of the pledged bank balances compared to December 31, 2021. These pledged bank balances have an original maturity of twelve months or more. Therefore, the Group has presented its pledged bank balances as other financial assets in the consolidated statement of financial position, as opposed to cash and cash equivalents.

As at December 31, 2022, pledged bank balances for an amount of €2,190 thousand (December 31, 2021: €18,887 thousand) have an original maturity of twelve months or more and are presented as non-current. There were no pledged bank balances that have an original maturity between three and twelve months.

As at December 31, 2022, the non-current portion relates to bank balances pledged to secure the payment of interest and commitment fees to the Group's external lender for an amount of €10,500 thousand (December 31, 2021: €17,257 thousand) and bank balances pledged to secure payments to suppliers of the Group for an amount of €30 thousand (December 31, 2021: €430 thousand).

During previous reporting periods, the Group received subsidies in advance from the Innovation and Networks Executive Agency ("INEA"), an agency established by the European Commission. The Group pledged bank balances as a security, in the event the Group is required to repay the subsidy. As at December 31, 2022, the Group pledged bank balances in relation to these subsidies for an amount of €1,200 thousand (December 31, 2021: €1,200 thousand).

### *Security deposits*

During the year ended December 31, 2022, the Group entered into contracts related to the purchase of electricity. This resulted in an increase of the Group's security deposits with third parties.

### *Derivatives*

#### *Purchase option to acquire MOMA*

On March 26, 2021, the Group entered into two option agreements, pursuant to which the Group was entitled to purchase shares representing 8.5% of the share capital (on a fully diluted basis) of MOMA – a service provider for the Group's EV Cloud platform – and 100% of OHEA, which holds 42% of the share capital of the MOMA. The provisions of the shareholder's agreement of the MOMA price include drag-along rights. Consequently, the Group was required to acquire the remaining 49.50% of the share capital of the MOMA upon exercising its option rights, under similar terms and conditions as the original options agreements. The purchase price for 100% of the share capital of the MOMA amounts to €60,000 thousand.

On September 28, 2021, the Group extended the option agreements under similar terms and conditions as the original option agreements. After the extension, the options could be exercised up to and until February 28, 2022. On February 2, 2022, the Group extended the option agreements.

On April 26, 2022, the Group notified MOMA that it intended to exercise its purchase options, subject to, inter alia, obtaining approval from the workers council and simultaneous signing and closure of share purchase agreements for the acquisition of the Direct and Indirect MOMA Shares. Pursuant to the exercise of the Option Rights, on June 7, 2022, Allego Holding B.V closed two separate share and sale purchase agreements (the “agreements”) to acquire shares representing 100% of the share capital of MOMA in a business combination agreement (the “MOMA Business Combination”). For further details refer to Note 4.

The MOMA options qualified as derivatives and were accounted at fair value through profit and loss. During the year ended December 31, 2022, and up until June 7, 2022, the acquisition date of MOMA, the Group recognized a fair value loss of €3,200 thousand (2021: gain of €1,700 thousand) in relation to the options. As of June 7, 2022, the fair value of these options amounted to fair value € nil (December 31, 2021: €3,200 thousand). The assumptions and model used for estimating the fair value of the purchase options to acquire MOMA are disclosed in Note 31. As at December 31, 2022, the Group no longer holds these derivative options.

#### ***Purchase option to acquire Mega-E***

On July 28, 2021, the Group and Meridiam EM — an indirectly wholly-owned subsidiary of Meridiam SAS, the Company’s ultimate parent — entered into a call option agreement to acquire 100% of the share capital of Mega-E. Meridiam EM is a related party under common control. The Group paid a consideration of €nil for the option. The exercise of the call option by the Group was conditional upon satisfaction of the Transaction contemplated under the BCA and the call option could be exercised by the Group at the earliest on January 15, 2022, and within the six-month period thereafter. The purchase price under the option amounted to €9,456 thousand. On March 16, 2022, the Group consummated the SPAC Transaction, thereby becoming able to exercise its call option right pursuant to the terms of the Mega-E Option agreement. Therefore, the Group reassessed its control assessment over Mega-E and concluded that the Mega-E Option provided the Group with potential voting rights, which became substantive as of March 16, 2022, being the date all conditions under the Mega-E Option agreement were met and the Group effectively obtained control over Mega-E. Refer to Note 4 for further details.

The Mega-E option qualified as a derivative and was accounted at fair value through profit and loss. The option was acquired via a transaction with a related party under common control. Therefore, the Group recognized the difference between the fair value of the option at the transaction date of €26,000 thousand and the consideration paid of € nil as a share premium contribution in equity during the year ended December 31, 2021. During the year ended December 31, 2022, and up until March 16, 2022, the date the Group obtained control over Mega-E, the Group recognized a fair value gain of €7,056 thousand (2021: €1,200 thousand) in relation to the option in the consolidated statement of profit or loss within other income. As of March 16, 2022, the fair value of the option amounted to €34,256 thousand (December 31, 2021: €27,200 thousand). The assumptions and model used for estimating the fair value of the purchase option to acquire Mega-E are disclosed in Note 31. As at December 31, 2022, the Mega-E Option has been exercised and the Group no longer holds the derivative option.

#### ***Preference share derivatives relating to economic rights in Voltalis***

Please refer to Note 4 for the acquisition of the derivatives relating to economic rights in Voltalis and the valuation methods applied. These rights qualified as derivatives and were accounted at fair value through profit and loss. Fair value changes of the Group’s preference share derivatives are recognized in the consolidated statement of profit or loss, within other income which are disclosed in Note 7.

#### ***Other derivatives***

Included in the Group’s derivatives balance as at December 31, 2022, are two interest rate cap(s) (December 31, 2021: one) which the Group entered into to hedge its interest rate risk exposure. The Group entered into the previous interest rate cap in September 2019, which was terminated on December 19, 2022, upon signing the refinancing agreement (refer to Note 25), and the two new interest rate caps. The Group entered into a new interest rate cap with the same counterparty as the previous interest rate cap and received a payment of €1,071 thousand representing the net balance of the premium payable for the new interest rate cap of €4,067 thousand and the amount due with respect to the termination of the old interest cap of €5,138 thousand. Additionally, the Group paid a premium of €4,068 thousand for the second interest rate cap, entered into with a different counterparty. The derivatives are only used for economic hedging purposes and not as a speculative

investment. The Group does not apply hedge accounting. Therefore, the Group accounts for the derivatives at fair value through profit or loss.

During the year ended December 31, 2022, the Group recognized a fair value gain of €5,507 thousand (2021: gain of €593 thousand, 2020: loss of €208 thousand) on its interest rate caps. As at December 31, 2022, the fair value of the interest rate caps amount to €9,198 thousand (December 31, 2021: €695 thousand).

Fair value changes of the Group's interest rate cap derivatives are recognized in the consolidated statement of profit or loss, within finance income/(costs) which are disclosed in Note 12. Fair value changes of the Group's purchase options derivatives are recognized in the consolidated statement of profit or loss, within other income which are disclosed in Note 7.

Additionally, in the fourth quarter of 2022, the Group purchased two forward contracts to sell, and buy, an equal amount of CO<sub>2</sub> tickets for a fixed price during April and June, 2023. The Group agreed to sell CO<sub>2</sub> tickets that were set to expire during 2022, and purchase an equal amount of CO<sub>2</sub> tickets for calendar year 2023. The market for these forward contracts is highly illiquid, with limited market activity and no price fluctuations expected before the delivery date of the CO<sub>2</sub> tickets. These contracts qualified as derivatives and were accounted at fair value through profit and loss. The Group recognized no gain or loss during the year ended December 31, 2022 and the balance of the derivative on the consolidated statement of financial position as of December 31, 2022 is € nil.

Refer to Note 31 for information about the methods and assumptions used in determining the fair value of derivatives.

#### **Investment in equity securities**

The Group's investments in equity securities relate to an investment in Voltalis S.A. ("Voltalis"), a private company that provides distributed demand response products which enable households to achieve energy savings. The Group acquired the investment through the acquisition of MOMA (refer to Note 4 for details).

As of December 31, 2022, the Group holds 12.38% (December 31, 2021: nil) of the total share capital of Voltalis, which has a fair value of €31,389 thousand (December 31, 2021: € nil). The Group recognized a fair value loss of €10,595 thousand with respect to this investment during the year ended December 31, 2022.

Fair value changes of the Group's investment in equity securities are recognized in the consolidated statement of other comprehensive income. Refer to Note 31 for information about the methods and assumptions used in determining the fair value of the investment.

#### **Other non-current receivables**

As of December 31, 2022, the Group has included the non-current portion of an outstanding receivable with one of the Group's customers of €2,321 thousand (net of an allowance of €301 thousand) in the other non-current receivables. The Group has agreed on payments terms with its customer. The receivable will be settled in equal payment installments during approximately four years from the balance sheet date. The Group accrues interest on the balance at an annual rate of 8.4%.

## **20 Trade and other receivables**

(in €'000)	December 31, 2022	December 31, 2021
Trade receivables – gross	42,670	39,563
Loss allowance	—	(1)
<b>Trade receivables – net</b>	<b>42,670</b>	<b>39,562</b>
VAT receivables	2,459	1,015
Other receivables	1,517	232
Receivables from related parties	194	142
Government grants receivables	395	1,126
<b>Total</b>	<b>47,235</b>	<b>42,077</b>

The aging of the Group's trade receivables and contract assets at the reporting date for all periods presented is disclosed in Note 32.

The movements in the loss allowance for the years ended December 31, 2022 and 2021 have been as follows:

(in €'000)	Trade receivables	
	2022	2021
<b>Opening balance loss allowance at the beginning of the year</b>	<b>1</b>	<b>2</b>
Additions to loss allowance	—	—
Receivables written off during the year as uncollectible	—	—
Unused amount reversed during the year	(1)	(1)
<b>Closing balance loss allowance at the end of the year</b>	<b>—</b>	<b>1</b>

There are no loss allowances on contract assets recognized as of December 31, 2022 and December 31, 2021. Impairment losses on trade receivables and contract assets are recorded in other costs, within general and administrative expenses in the consolidated statement of profit or loss. Subsequent recoveries of amounts previously written off are credited against the same line item.

Details about the Group's exposure to credit risk is included in Note 32.

## 21 Prepayments and other assets

(in €'000)	December 31, 2022	December 31, 2021
Current prepayments and other assets	9,079	11,432
<b>Total</b>	<b>9,079</b>	<b>11,432</b>

Current prepayments and other assets primarily relate to prepaid chargers, charging equipment that have not yet been delivered to the Group, prepaid software licenses with a duration of less than twelve months, prepaid insurance premiums, prepaid extended warranty and other costs to fulfil a contract.

## 22 Cash and cash equivalents

(in €'000)	December 31, 2022	December 31, 2021
Cash at banks	83,022	24,652
<b>Total</b>	<b>83,022</b>	<b>24,652</b>

The above figures reconcile to the amount of cash and cash equivalents shown in the consolidated statement of cash flows at the end of each reporting period.

The renewed credit facility is secured in part by pledges on the bank accounts. Refer to Note 25 for additional details and amounts.

The remaining cash and cash equivalents balance is at the free disposal of the Group for all periods presented.

## 23 Share capital, share premium and transaction costs on new equity instruments

### *Share capital*

As at December 31, 2022, the issued share capital of the Company amounts to €2,061 thousand (December 31, 2021: €100), divided into 267,177,592 ordinary shares of €0.12 (December 31, 2021: 100 ordinary shares of €1 per share). They entitle the holder to participate in dividends, and to share in the proceeds of winding up the Company in proportion to the

number of shares held. The authorized share capital of the Company as at December 31, 2022 amounted to €08,000 thousand (December 31, 2021: €100), divided into 900,000,000 ordinary shares of €0.12 per share (December 31, 2021: 100 ordinary shares of €1 per share).

***Shareholder loans equity conversion***

In 2018 and 2019, the Group entered into shareholder loans with Madeleine (the Company's immediate parent) to finance its operations.

On March 16, 2022, before the closing of the SPAC Transaction, the shareholder loan equity conversion resulted in a share issuance of 2 Allego Holding ordinary shares at a par value of €1 per share, increasing share capital by €2, with the remaining difference in the shareholder loan equity conversion being recorded as an increase to share premium of €101,931 thousand and accordingly no gain or loss has been recognized in the consolidated statement of profit or loss.

For further details regarding the terms of the shareholder loans refer to Note 25.

***First Special Fees Agreement with external consulting firm***

Under the First Special Fees Agreement between Madeleine and an external consulting firm dated December 16, 2020, and subsequently amended, the external consulting firm was provided with the right, prior to closing of a Liquidity Event, to subscribe for new shares to be issued by an Allego Group company at the nominal value of such shares.

On March 16, 2022, in accordance with the First Special Fees Agreement, and before the closing of the SPAC Transaction, Allego Holding issued 2 ordinary shares at a par value of €1 per share to the external consulting firm, increasing share capital by €2. Please refer to Note 11.1 for more details on the First Special Fees Agreement.

***Merger between Allego Holding B.V. and Spartan Acquisition Corp. III - the SPAC Transaction***

As indicated in Note 4, on March 16, 2022, pursuant to the Business Combination Agreement, each holder of Allego N.V. ordinary shares exchanged by means of a contribution in kind its Allego Holding ordinary shares to Allego N.V. in exchange for the issuance of shares in accordance with the Exchange Ratio. Therefore, Allego Holding became a wholly owned subsidiary of Allego N.V. Consequently, 124 Allego Holding ordinary shares at a par value of €1 each were exchanged for 235,935,061 ordinary shares of Allego N.V. at a par value of €0.12 each. Consequently, share capital increased by €28,311 thousand and the share premium decreased by the same amount.

Furthermore, on March 16, 2022, each share of Spartan's common stock was exchanged by means of a contribution in kind in exchange for the issuance of ordinary shares of Allego N.V., whereby Allego N.V. issued one ordinary share for each share of Spartan's common stock exchanged. This resulted in the issuance of 4,907,582 Allego N.V. ordinary shares of €0.12 par value, and increased share capital by €1,789 thousand and share premium by €85,808 thousand, which includes the impact of applying IFRS 2 for €158,714 thousand (see Note 4).

***PIPE Financing***

Concurrently with the execution of the BCA, Spartan and Allego entered into Subscription Agreements (the "Subscription Agreements"), dated July 28, 2021, with a number of investors (collectively the "PIPE Investors"), pursuant to which the PIPE Investors agreed to subscribe to and purchase, and Allego N.V. agreed to issue and sell to such PIPE Investors, an aggregate of 15,000,000 Ordinary Shares (the "PIPE Shares") at a price of \$10.00 per share (€9.07<sup>4</sup> per share) for an aggregate purchase price of \$150,000 thousand (€136,048 thousand) in proceeds (the "PIPE Financing") on the Closing Date.

Such Subscription Agreements entered with the PIPE investors resulted in two separate share issuances (hereinafter referred to as the "First PIPE Share Issue" and the "Second PIPE Share Issue" respectively) by the Company during the year ended December 31, 2022. The First PIPE Share Issue executed on March 16, 2022, meant a share capital increase of €1,500 thousand (12,500,000 ordinary shares at a price of €0.12 per share) and a rise in share premium of €108,515 thousand. Additionally, an increase in contract liability of €3,358 thousand was recognized for future charging services to be provided to one of the PIPE Investors. See Note 6 for further detail. On March 22, 2022 the Second PIPE Share Issue was executed, 2,500,000 ordinary shares were issued at price of €0.12 per share, increasing share capital by €300 thousand, and raising share premium by €22,375 thousand.

***Transaction costs on new equity instruments***

During the year ended December 31, 2022, the Group incurred transaction costs of €nil (2021: €1,059 thousand, 2020 € nil) that are directly attributable to the issuance of new equity instruments in relation to the SPAC Transaction. These transaction costs have been recorded as a deduction to share premium. For further details regarding these transaction costs refer to Note 4.

## [Table of Contents](#)

The Group also incurred transaction costs in relation to the SPAC Transaction, which are not directly related to the issuance of new equity instruments (refer to Note 4). These transaction costs have been recorded in the consolidated statement of profit or loss for the year ended December 31, 2022, within general and administrative expenses.

### **Issuance of Ordinary Shares upon exercise of the Private Placement Warrants**

As indicated in Note 27, on April 15, 2022, all the Private Placement Warrants were exercised on a cashless basis. As a result of the exercise 9,360,000 Private Placement Warrants were converted into 1,334,949 Allego N.V. ordinary shares, with a nominal value of €0.12 per share, increasing share capital by €160 thousand, and raising share premium by €13,694 thousand.

<sup>4</sup> Translated at the EUR/USD Exchange rate as at March 16, 2022

### **Share capital and share premium movements**

Movement of share capital and share premium are as follows:

	Notes	Shares	Price per share (in €)	Share Capital (in €'000)	Share Premium (in €'000)
<b>As at January 1, 2020</b>		<b>100</b>	<b>1.00</b>	<b>1</b>	<b>36,947</b>
<b>As at December 31, 2020</b>		<b>100</b>	<b>1.00</b>	<b>1</b>	<b>36,947</b>
<b>As at January 1, 2021</b>		100	1.00	1	36,947

***Legal reserve for capitalized development costs***

The Company’s legal reserve relates to the capitalized development costs of the Group’s internally developed EV Cloud software platform. The Company recorded the net change in the legal reserve of negative €886 thousand in 2022 (2021: positive €386 thousand, 2020: negative €777 thousand) through accumulated deficit.

***Reserve for financial assets at FVOCI***

The Group has elected to recognize changes in the fair value of its investment in Voltalis in the consolidated statement of other comprehensive income (as explained in Note 19). These changes are accumulated within the FVOCI reserve within equity.

***Foreign currency translation reserve***

Exchange differences arising on translation of the foreign controlled entity are recognized in other comprehensive income and accumulated in a separate reserve within equity. The cumulative amount is reclassified to profit or loss when the net investment is disposed of.

The legal reserve for capitalized development costs, the foreign currency translation reserve, and the reserve for financial assets at FVOCI are not freely distributable.

## 25 Borrowings

This note provides a breakdown of borrowings in place as at December 31, 2022 and 2021.

(in €'000)	Interest rate	Maturity	December 31, 2022	December 31, 2021
Renewed facility	Euribor* + 3.9%**	December 19, 2027	269,033	—
Old facility (senior debt)	Euribor* + 5%***	May 27, 2026	—	112,935
Shareholder loans (1)	9 %	November 30, 2035, May 31, 2035****	—	100,193
Shareholder loans (2)	Euribor* + 0.1%*****	December 31, 2022	—	—
<b>Total</b>			<b>269,033</b>	<b>213,128</b>

\* The Euribor rate (6M) is floored at 0%. This floor is closely related to the contract of the loan and is therefore not presented separately in the consolidated statement of financial position.

\*\* The margin of 3.9% will increase by 0.2% per year, for the first time in December 2025.

\*\*\* The margin of 5% would increase by 0.25% per year, for the first time it increased in June 2022.

\*\*\*\* Of the total shareholder loans, one shareholder loan had a maturity date of November 30, 2035. The carrying amount at December 31, 2022 was 6mil (2021: €8,129 thousand).

\*\*\*\*\* The Euribor rate (6M) is floored at 0%. Therefore, in case of a negative Euribor the applied interest rate is 0.1%.

### Old facility (senior debt)

In May 2019, the Group entered into the old facility agreement with a group of lenders to finance its operations. The principal terms and conditions of the old facility are as follows:

- a facility of €120,000 thousand;
- drawdown stop when conditions precedent (covenant ratios) are not met;
- repayment in full at maturity date;
- commitment fee per year equal to 35% of the applicable margin. For the years ended December 31, 2022 and 2021, the commitment fee was 1.75% per year (equal to 35% of the margin of 5%).

During the year ended December 31, 2021, the Group completed three (2020: two) drawdowns on the facility for a total amount of €44,315 thousand (2020: €38,339 thousand). On March 31, 2021, September 30, 2021, and December 2, 2021, the Group completed drawdowns on the facility of €24,203 thousand, €5,660 thousand, and €14,452 thousand, respectively. As a result of these drawdowns, the Group has utilized the maximum amount of credit as allowed under the old facility as of December 2, 2021.

### Exercise of old facility accordion feature

On July 28, 2022, the Group has expanded its old €120,000 thousand facility by an additional €50,000 thousand through an accordion feature with the group of lenders within the original old facility agreement. The Group incurred €1,505 thousand in transaction fees. Additionally, the Group has received a waiver such that the Group is no longer required to pledge certain bank balances. In the original agreement, these bank balances were required to be pledged to secure the payment of interest and commitment fees. As at June 30, 2022, these bank balances amounted to €13,247 thousand (December 31, 2021: €12,257 thousand). Consequently, these bank balances are at the free disposal of the Group. All other terms and conditions of the old facility remained effective upon exercising the accordion feature. Under the original terms, the old facility was due to expire in May 2026.

The exercise of the accordion feature was made in the context of the anticipated refinancing of the old facility in December 2022 and was accounted for as modification of the former financial liability. The loss on modification amounted to €1,730 thousand and was recognized in the statement of profit and loss, within finance income/(costs). Refer to Note 12 for details.

**Refinancing of the old facility with the renewed facility**

On December 19, 2022, the Group has entered into the renewed facility agreement with a group of lenders led by Société Générale and Banco Santander, increasing the total available facility by €230,000 thousand to €400,000 thousand, to further support its growth. The renewed facility consists of:

- i. €170,000 thousand used to settle the old facility;
- ii. up to €200,000 thousand to be used for financing and refinancing certain capital expenditures and permitted acquisitions (and for other permitted debt servicing uses); and
- iii. up to €30,000 thousand to be used for issuance of guarantees and letters of credit (and when utilized by way of letters of credit, for general corporate purposes).

The renewed facility expires in December 2027 and bears interest at EURIBOR plus a margin. The principal terms and conditions of the renewed facility are as follows:

- drawdown stop when conditions precedent are not met;
- repayment in full at maturity date;
- commitment fee per year equals to 35% of the applicable margin and is payable for each undrawn facility in the period from the agreement signing date to the date being 42 months following the signing date. For the year ended December 31, 2022, the commitment fee was 1.365% per year (equal to 35% of the margin of 3.9%).

In December 2022, the Group completed two drawdowns on the renewed facility for a total amount of €279,210 thousand, of which €170,000 thousand was used to repay the Group's old facility by a way of netting with the drawdown on the renewed facility.

In parallel to the renewed facility, the Group entered into interest rate caps to hedge the interest rate risk on 65% of the outstanding loan amounts under the renewed facility. Details about the Group's interest rate caps are included in Note 19 and Note 32.

The refinancing of the old facility was accounted for as extinguishment of the former financial liability and recognition of the new debt instrument. The loss on extinguishment amounted to €2,832 thousand and was recognized in the statement of profit and loss, within finance income/(costs). Refer to Note 12 for details.

**Loan covenants**

Under the terms of the renewed facility, the Company and its subsidiaries (other than specific unrestricted subsidiaries) are required to comply with financial covenants. The renewed facility also contains customary negative covenants, including, but not limited to, certain restrictions on the ability of the Company to merge and consolidate with other companies, incur indebtedness, grant liens or security interests on assets, pay dividends or make other restricted payments, sell or otherwise transfer assets or enter into transactions with affiliates. The renewed facility further provides that upon the occurrence of certain events of default, the obligations thereunder may be accelerated. Such events of default include non-payment, drawdown stop events, breach of financial and other covenants, cross default, insolvency, unlawfulness, material adverse change and other customary events of default. Details about the covenants and compliance with covenants are included in Note 33.

### Assets pledged as security

The renewed facility is secured by pledges on the bank accounts (presented as part of cash and cash equivalents and non-current other financial assets) and pledges on the shares in the capital of Allego Holding B.V. held by the Company.

The old facility was secured by pledges on the bank accounts (presented as part of cash and cash equivalents), pledges on trade and other receivables presented in Note 20 and pledges on the shares in the capital of Allego B.V. and Allego Innovations B.V. held by the Company.

The carrying amount of assets pledged as security for the renewed and old facilities respectively are as follows:

(in €'000)	December 31, 2022	December 31, 2021
<b>Current assets</b>		
<i>Floating charge</i>		
Cash and cash equivalents	56,317	6,206
Trade receivables	—	38,767
Other receivables	—	5,752
<b>Total current assets pledged as security</b>	<b>56,317</b>	<b>50,725</b>
<b>Non-current assets</b>		
<i>Floating charge</i>		
Non-current other financial assets	10,500	—
<b>Total current assets pledged as security</b>	<b>10,500</b>	<b>—</b>
<b>Total assets pledged as security</b>	<b>66,817</b>	<b>50,725</b>

After December 31, 2022, the Group has pledged additional assets in relation to the renewed facility. Refer to Note 37 for details.

### Transaction costs

During the year ended December 31, 2022, the Group incurred €1,657 thousand (2021: €517 thousand, 2020: €1,291 thousand) of transaction costs of which €1,505 thousand (2021: €517 thousand, 2020: €1,291 thousand) are directly attributable to the old and renewed facilities. These costs are included in the measurement of the respective drawdowns and are amortized over the term of these drawdowns using the effective interest method. Interest expenses on the Group's old and renewed facilities are recognized as part of finance income/(costs) in the consolidated statement of profit or loss. Refer to Note 12 for details.

The Group expects that it will draw on the funds available under the parts (i) and (ii) of the renewed facility. Therefore, commitment fees paid on the unused portion of these parts of the renewed facility are deferred and treated as an adjustment to the loan's effective interest rate and recognized as interest expense over the term of the respective facility parts. For the part (iii) of the renewed facility there is no evidence that it is probable that some or all of this part will be drawn down. As such, the commitment fee is capitalized as a prepayment for liquidity services, amortized over the period of that part of the facility and recognized in the consolidated statement of profit or loss, within finance income/(costs). During the year ended December 31, 2022, the Group did not incur material commitment fees for part (iii) of the renewed facility.

The Group did not incur additional commitment fees after December 2, 2021, on the old facility, as the Group has utilized the maximum amount of credit as allowed under the old facility as of that date.

**Shareholder loans (1)**

In 2018 and 2019, the Group entered into six shareholder loans with Madeleine (the Company's immediate parent) to finance its operations. All shareholder loans have similar terms and conditions. The principal terms and conditions are as follows:

- repayment in full at maturity date;
- interest can be paid or accrued at the discretion of the Group. Any accrued interest is due at the maturity date of the loan.

Interest expenses on the Group's shareholder loans are recognized as part of finance income/(costs) in the consolidated statement of profit or loss. Refer to Note 12 for details. During the year ended December 31, 2022, the Group recognized interest expenses of €1,738 thousand (2021: €8,162 thousand, 2020: €7,530 thousand) on the shareholder loans. These interest expenses have been accrued to the carrying value of the shareholder loans.

On March 16, 2022, immediately prior to the closing of the previously announced business combination and pursuant to the terms of the BCA, the outstanding principal of the shareholder loans together with the accrued interest on these loans have been converted into equity. For further details regarding the equity conversion of the shareholder loans refer to Note 23.

**Shareholder loans (2)**

With the acquisition of Mega-E on March 16, 2022, the Group assumed a shareholder loan with Meridiam EM SAS to finance its operations. The terms and conditions of the loan have been amended subsequent to the initial loan agreement being signed. The principal terms and conditions are as follows:

- repayment in full at maturity date;
- interest is paid half yearly in arrears;
- the loans becomes due in the event of a share capital increase.

Interest expense on the shareholder loan is recognized as part of finance income/(costs) in the consolidated statement of profit or loss. During the year ended December 31, 2022, the Group recognized interest expenses of €5 thousand on the shareholder loans. During the year ended December 31, 2022, the loan was fully settled.

**Maturity profile of borrowings**

The maturity profile of the borrowings is included in Note 32.

Changes in liabilities arising from financing activities

The movements in liabilities from financing activities in 2022 and 2021 have been as follows:

(in €'000)	Renewed facility	Old facility (senior debt)	Shareholder loans (1)	Shareholder loan (2)	Lease liabilities	Total

***Jubilee provision***

Refer to Note 10.2 for details about the Group's jubilee plan in the Netherlands and the movements in the provision over all reporting periods presented.

***Restructuring provision***

In February 2020, the Group announced a restructuring plan in order to streamline its operations so as to align its expense profile with the size of the business. The Group expected that the restructuring would place the Group in a better position to execute on its strategy in the near future. Implementation of the restructuring plan commenced in June 2020. The Group's restructuring plan affected its operations in the Netherlands, Germany and Belgium. As a result of the restructuring, the Group's headcount has been reduced by 167 internal and external staff members.

For the year ended December 31, 2021, the total restructuring costs amounted to €804 thousand. The Group recognized termination benefits of €2,674 thousand for its general and administrative function and €360 thousand for its selling and distribution function. The Group incurred €15 thousand of other employee expenses for its general and administrative function and €15 thousand for its selling and distribution function. These expenses primarily relate to termination penalties of leased vehicles. The Group incurred €640 thousand of legal fees in connection with the implementation of its

## [Table of Contents](#)

restructuring plan. These expenses have been presented as part of legal, accounting and consulting fees, within general and administrative expenses.

The carrying amount of the restructuring provision recorded in the consolidated statement of financial position and the movements in the restructuring provision for the years ended December 31, 2022 and 2021 are presented below.

(in €'000)	2022	2021

<b>Carrying amount at December 31</b>	<b>144</b>	<b>248</b>
Current portion	144	248
Non-current portion	—	—
<b>Carrying amount at December 31</b>	<b>144</b>	<b>248</b>

The remaining provision of €144 thousand will be fully utilized in 2023.

### *Warranty provision*

The Group generally offers its customers 24-month assurance type warranties for charging equipment sold to its customers. Management estimates the amount of the provision for warranty claims and its classification as current based on historical information. As at December 31, 2022, this provision had a carrying amount of €273 thousand (December 31, 2021: € nil).

### *Share-based payment provision*

Refer to Note 11.2 for details about the Group's share-based payment provision related to the Second Special Fees Agreement and the movements in the provision over all reporting periods presented.

### *Maturities of provisions*

Maturities of total provisions as at December 31, 2022 are as follows:

(in €'000)	Amounts due within one year	Amounts due between one and five years	Amounts due after five years	Total
Jubilee provision	—	—	26	26
Defined benefit provision	34	129	286	449

Other provisions	—	—	45	45
<b>Total</b>	<b>17,257</b>	<b>129</b>	<b>357</b>	<b>17,743</b>

## **27 Warrant liabilities**

As mentioned in Note 4, as part of the SPAC Transaction, 13,799,948 Public Warrants and 9,360,000 Private Placement Warrants issued by Spartan have been assumed by the Group. At December 31, 2022, the Group had 13,799,948 Public

Warrants and no Private Placement Warrants outstanding, after the Private Placement Warrants holders exercised all their warrants on April 15, 2022.

Public Warrants entitle the holder to convert each warrant into one ordinary share of the Company of €0.12 par value at an exercise price of \$11.50 (€10.80)<sup>5</sup>, and can be exercised starting 30 days after the SPAC Transaction. The Private Placement Warrants have terms and provisions that are identical to those of the Public Warrants, with the exception that as long as the Private Placement Warrants are held by Spartan, they may be exercised for cash or on a cashless basis, and they cannot be transferred, assigned, or sold until 30 days after the Business Combination.

The cashless basis exercise entitles the Private Placement Warrants holders to convert the warrants into a number of Allego ordinary shares of €0.12 par value equal to the quotient obtained by dividing the product of the number of ordinary shares of Allego underlying the warrants and the excess of the fair market value over the exercise price of the warrants by the fair market value. For the purpose of the calculation above, the fair market value shall mean the average last reported sale price of the ordinary shares of Allego for the ten trading days ending on the third trading day prior to the date on which notice of exercise of the warrant is given.

Until warrant holders acquire the ordinary shares upon exercise of such warrants, they will have no voting or economic rights. The warrants will expire on March 16, 2027 five years after the SPAC Transaction, or earlier upon redemption or liquidation in accordance with their terms.

As there are no elements in the warrant agreements that give the Group the possibility to prevent the warrant owners to convert their warrants within twelve months, the Group has classified the warrant liabilities as current liabilities.

#### *Exercise of warrants*

On April 15, 2022, all the Private Placement Warrants were exercised on a cashless basis, and the Private Placement Warrants holders received 1,334,949 ordinary shares of the Company. The Private Placement Warrants had a fair value of €13,854 thousand on the exercise date. For further details regarding the Private Placement Warrants exercise refer to Note 23.

There were no Public Warrants exercised during the year ended December 31, 2022.

#### *Movements in warrant liabilities*

The financial liabilities for the warrants are accounted for at fair value through profit or loss. For further details on the assumptions and models used for estimating the fair value of the derivative warrants refer to Note 31.

During the year ended December 31, 2022 the Group recognized a total net fair value gain of €7,103 thousand (2021: € nil) in relation to both the Public Warrants and the Private Placement Warrants, in the consolidated statement of profit or loss, within finance income/(costs).

<sup>5</sup> Translated at the EUR/USD Exchange rate as at December 31, 2022.

Movements in the warrant liabilities for the year ended December 31, 2022 are summarized as follows:

	Public Warrants		Private Placement Warrants		Total

<b>Total</b>	<b>570</b>	<b>(3,043)</b>	<b>486</b>	<b>326</b>	<b>(1,661)</b>	<b>13,637</b>	<b>(15,298)</b>
Set-off of deferred tax balances pursuant to set-off provisions*						(13,114)	13,114
<b>Net deferred tax balances at December 31, 2022</b>						<b>523</b>	<b>(2,184)</b>

\* Allego N.V. and its wholly-owned Dutch subsidiaries have applied the tax consolidation legislation, which means that these entities are taxed as a single entity. As a consequence, the deferred tax assets and deferred tax liabilities of these entities have been offset in the consolidated financial statements.

*Unrecognized deferred tax assets*

(in €'000)	December 31, 2022	December 31, 2021
Tax losses	197,171	132,498
Deductible temporary differences	17,679	—
Tax credits	—	—
Interest carry forward	36,612	16,986
<b>Total</b>	<b>251,462</b>	<b>149,484</b>
Potential tax benefit	65,832	40,313

Interest carry forwards do not expire.

*Estimates and assumptions*

Refer to Note 3.2.1 for details on estimates and assumptions made with respect to the recognition of deferred tax assets.

*Changes to the applicable tax rate (the Netherlands)*

On December 21, 2021, changes to the Dutch corporate income tax law were substantively enacted and are effective from January 1, 2022. Unused tax losses available for carry forward do not longer have an expiry date. The carry back period remains one year. However, the amount of unused tax losses available for carry forward without an expiry date has been maximized to 50% of taxable profits for the year in excess of one million euros. The revised carry forward period applies to all tax losses arising as of January 1, 2022, but also to unused tax losses available for carry forward as of that date to the extent that these tax losses have arisen in fiscal years that commenced on or after January 1, 2013.

On December 20, 2022, changes to the Dutch corporate income tax law were substantively enacted and are effective from January 1, 2023. The corporate income tax rate effective from January 1, 2023, will remain 25.8% (2022: increase from 25.0% to 25.8%), for taxable income in excess of €200 thousand (2022: €395 thousand; 2021: €245 thousand). The corporate income tax rate for taxable income up to €200 thousand (2022: €395 thousand, 2021: €245 thousand) increased from 15.0% to 19.0%. Consequently, the relevant deferred tax balances have been remeasured.

*Expiration year of loss carryforwards*

As at December 31, 2022, the Group had unused tax losses available for carryforward for an amount of €97,171 thousand (December 31, 2021: €132,498 thousand). These unused tax losses do not have an expiry date for all periods presented.

**29.3. Fiscal unity for Dutch corporate income tax purposes***Exclusion from the fiscal unity for Dutch corporate income tax purposes*

As of June 1, 2018, Allego Holding and its Dutch wholly-owned subsidiaries formed a fiscal unity with Madeleine — Allego Holding's then immediate parent entity — and Opera Charging B.V. ("Opera"—parent entity of Madeleine) for Dutch corporate income tax purposes. The completion of the SPAC Transaction has resulted in the exclusion of the Company's Dutch wholly-owned subsidiaries from the Dutch corporate income tax fiscal unity headed by Opera. During the year ended December 31, 2021, the Group has prepared and filed a request with the Dutch Tax Authorities ("DTA") for upfront certainty regarding the consequences of the exclusion from the fiscal unity. This request specifically covers:

- the methodology of determining the carryforward Dutch tax losses allocable to the Company and its Dutch wholly-owned subsidiaries and the carryover of these carryforward Dutch tax losses;
- the non-deductibility of interest in relation to the carryover of carryforward non-deductible interest allocable to the Company and its Dutch wholly-owned subsidiaries;
- the non-applicability of the Dutch restriction for the use of carryforward tax losses/non-deductible interest after a change in control; and
- the non-applicability of the clawback rules following transfers within the Dutch fiscal unity.

The Group submitted the request to the DTA on July 28, 2021. The request, together with the Group's answers to various follow-up questions, was under review by the DTA for the remainder of the year ended December 31, 2021. The Group has reached an agreement with the DTA on January 18, 2022 on this request. The agreement with the Dutch Tax Authorities mitigates potential discussions on the various tax topics that have been agreed upon. Additionally, the agreement provides the Group with tax certainty regarding the dissolution of the fiscal unity for Dutch corporate income tax purposes headed by Opera and the related Dutch corporate income tax considerations for the year ended December 31, 2018 up to and including the year ended December 31, 2021 and fiscal year 2022 until the moment of exclusion from the fiscal unity.

Following the Business Combination consummated on March 16, 2022, Allego NV formed a new fiscal unity with Allego Holding BV, Allego BV, Allego Employment and Allego Innovations BV as the subsidiaries included in the fiscal unity.

### 30 Financial instruments

This note provides information about the Group's financial instruments, including:

- an overview of all financial instruments held by the Group;
- the classification of the financial instruments;
- the line item on the consolidated statement of financial position in which the financial instrument is included;
- the financial instrument's book and fair value.

The Group holds the following financial instruments:

#### Financial assets

(in €'000)	Notes	At amortized cost	Fair value through PL	Fair value through OCI	Total book value	Total fair value
<b>As at December 31, 2021</b>						
Non-current other financial assets	19	18,887	695	—	19,582	19,582
Current other financial assets	19	—	30,400	—	30,400	30,400
Trade and other receivables	20	41,063	—	—	41,063	41,063
Cash and cash equivalents	22	24,652	—	—	24,652	24,652
<b>Total</b>		<b>84,602</b>	<b>31,095</b>	<b>—</b>	<b>115,697</b>	<b>115,697</b>
<b>As at December 31, 2022</b>						
Non-current other financial assets	19	21,900	9,198	31,389	62,487	62,487
Trade and other receivables	20	44,776	—	—	44,776	44,776
Cash and cash equivalents	22	83,022	—	—	83,022	83,022
<b>Total</b>		<b>150,299</b>	<b>9,198</b>	<b>31,389</b>	<b>190,886</b>	<b>190,886</b>

Due to the highly liquid nature of cash and cash equivalents and the pledged bank balances classified within non-current other financial assets, their carrying amount is considered to be the same as their fair value. Due to the short-term nature of trade and other receivables, their carrying amount is considered to be the same as their fair value.

*Financial liabilities*

(in €'000)	Notes	At amortized cost	Fair value through PL	Total book value	Total fair value
<b>As at December 31, 2021</b>					
Borrowings	25	213,128	—	213,128	271,370
Non-current lease liabilities	17	26,097	—	26,097	N/A
Current lease liabilities	17	5,520	—	5,520	N/A
Trade and other payables	28	24,072	—	24,072	24,072
<b>Total</b>		<b>268,817</b>	<b>—</b>	<b>268,817</b>	<b>295,442</b>
<b>As at December 31, 2022</b>					
Borrowings	25	269,033	—	269,033	272,641
Non-current lease liabilities	17	44,044	—	44,044	N/A
Current lease liabilities	17	7,280	—	7,280	N/A
Trade and other payables	28	51,263	—	51,263	51,263
Warrant liabilities		—	1,296	1,296	1,296
<b>Total</b>		<b>371,620</b>	<b>1,296</b>	<b>372,916</b>	<b>325,200</b>

Due to the short-term nature of the trade and other payables, their carrying amount is considered to be the same as their fair value.

**31 Fair value measurement**

This note explains the judgments and estimates made in determining the fair values of the financial instruments that are recognized and measured at fair value and the financial instruments for which the fair value is disclosed in the consolidated financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under the accounting standards.

An explanation of each level is included in Note 2.7.18 of these consolidated financial statements for the year ended December 31, 2022.

*Assets and liabilities measured at fair value*

As at December 31, 2022, the Group has recorded the following financial instruments at fair value in the consolidated statement of financial position:

- preference share derivatives;
- interest rate cap derivatives;
- warrant liabilities;
- investment in equity securities.

Preference share derivatives, interest rate cap derivatives and the investment in equity securities are presented within non-current other financial assets. Warrant liabilities are presented as a separate line in the consolidated statement of financial position as at December 31, 2022. During the year ended December 31, 2022 the Group terminated the interest rate cap related to the old facility and entered into two new interest rate caps related to the renewed facility.

As at December 31, 2021, the Group had its interest rate cap derivative and purchase options to acquire Mega-E and MOMA recorded at fair value in the consolidated statement of financial position, which were presented within non-current other financial assets. The Group did not have any other assets and liabilities that were measured at fair value as at December 31, 2021.

The interest rate caps qualify for the level 2 category in the fair value hierarchy due to the fact that they are not traded in an active market and the fair value is determined using valuation techniques which maximize the use of observable market

data. Since all significant inputs required to fair value the instruments are observable, the instruments are included in level 2.

The investment in equity securities qualified for the level 2 category in the fair value hierarchy at the time of acquisition due to the fact that the investee is not a public company traded in an active market and the fair value was determined using valuation techniques which maximize the usage of observable market data. During the year ended December 31, 2022, the investment in equity securities qualified for and was transferred into the level 3 category in the fair value hierarchy due to the fact that the securities were not traded in an active market at the time and there was no longer observable market data. Therefore, as at December 31, 2022, the fair value of these securities was determined using valuation techniques which use unobservable inputs that were significant to fair value.

The preference share derivatives and purchase options qualified for the level 3 category in the fair value hierarchy before being derecognized in 2022, due to the fact that they were not traded in an active market and the fair value was determined using valuation techniques which use unobservable inputs that were significant to the fair value.

The Public Warrants and Private Placement Warrants qualified for the level 3 category in the fair value hierarchy at the time of their issuance due to the fact that they were not traded in an active market at the time and their fair value was determined using valuation techniques which use unobservable inputs that were significant to the fair value. As at December 31, 2022, the Public Warrants qualify for the level 1 category in the fair value hierarchy due to the fact that their fair value is determined based on quoted market inputs.

For assets and liabilities that are recognized in the consolidated financial statements at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. During the year ended December 31, 2022, transfers of €20,568 thousand from level 3 to level 1 occurred with respect to the warrants and transfers of €1,984 thousand from level 2 to level 3 occurred with respect to the investment in equity securities.

The fair values of the Group's assets and liabilities measured at fair value are disclosed in the table in Note 30.

***Fair value of assets and liabilities not measured at fair value***

The Group has determined the fair value of assets and liabilities not measured at fair value, but for which the fair value is required to be disclosed.

***Borrowings:***

For the shareholder loans and the renewed facility, the fair value differs from its carrying amount because the interest payable on the loans is (partially) fixed. The borrowings qualify for the level 3 category in the fair value category due to the use of unobservable inputs, including own credit risk.

The fair values of the Group's assets and liabilities not measured at fair value are disclosed in the table in Note 30.

***Specific valuation techniques to determine fair values***

Specific valuation techniques used to value financial instruments include:

- preference share derivatives: option pricing model;
- interest rate cap derivatives: option pricing model;
- investment in equity securities: discounted cash flow analysis;
- purchase options: option pricing model, i.e. Black-Scholes pricing model;
- borrowings: discounted cash flow analysis using a market interest rate;
- warrants valuation as of issuance: binomial tree framework.

**Financial instruments measured at fair value (level 3)**

The changes in level 3 items for the year ended December 31, 2022 have been as follows:

(in €'000)	Purchase options	Investment in equity securities
Carrying amount at January 1, 2021	—	—
<b>Movements during the year ended December 31, 2021</b>		
Option premium paid for purchase options	1,500	—
Fair Value gain recognized as a share premium contribution	26,000	—
Fair value gains/(losses) recognized in other income/(expenses)	2,900	—
<b>Carrying amount at December 31, 2021</b>	<b>30,400</b>	<b>—</b>
Carrying amount at January 1, 2022	30,400	—
<b>Movements during the year ended December 31, 2022</b>		
Fair value gain on purchase options	3,856	—
Derecognition of substantive purchase option	(34,256)	—
Exercise of purchase option	—	—
Transfer of investment in equity securities from level 2	—	41,984
Fair value loss on investment in equity securities from level 3 classification	—	(10,595)
<b>Carrying amount at December 31, 2022</b>	<b>—</b>	<b>31,389</b>

(in €'000)	Warrant liabilities	Preference shares derivatives
Carrying amount at January 1, 2021	—	—
<b>Movements during the year ended December 31, 2021</b>		
Change in fair value of private placement warrant liabilities	—	—
Change in fair value of public warrant liabilities	—	—
<b>Carrying amount at December 31, 2021</b>	<b>—</b>	<b>—</b>
Carrying amount at January 1, 2022	—	—
<b>Movements in the year ended December 31, 2022</b>		
Public warrants assumed as part of the SPAC Transaction	21,260	—
Private placement warrants assumed as part of the SPAC Transaction	20,993	—
Change in fair value of private placement warrant liabilities	(7,139)	—
Transfer of private placement warrant liabilities into level 1	(13,854)	—
Change in fair value of public warrant liabilities	(14,546)	—
Transfer of public warrant liabilities into level 1	(6,714)	—
Preference shares derivatives acquired as part of MOMA acquisition	—	255
Sale of preference shares derivatives	—	(186)
Fair value gains/(losses) recognized in other income/(expenses)	—	(69)
<b>Carrying amount at December 31, 2022</b>	<b>—</b>	<b>—</b>

The Group's engages with third party valuation specialists to perform its fair value measurements for financial reporting purposes on a periodic basis. Involvement of external valuers is determined annually by the Group's finance team after discussion with and approval by the Group's Executive Board. Selection criteria for valuation specialist include market knowledge, reputation, independence and whether professional standards are maintained.

The Group works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. At each reporting date, the Group analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Group's accounting policies.

**Valuation inputs to the fair value of purchase options**

Inputs to the fair value of the purchase options are the spot price per share, the exercise price, the risk-free rate, volatility, time to expiration and dividend yield. The following table summarizes the quantitative information about the significant unobservable input parameters used in the level 3 fair value measurement of the purchase options at the time of their derecognition or exercise in 2022, using a Black-Scholes pricing model.

	<b>June 7, 2022</b>	<b>March 16, 2022</b>
Purchase option	MOMA	Mega-E
<b>Parameters</b>		
Spot price per share (in €)	253	437,000
Volatility	N/A	100.00 %

Given that all purchase options have either been exercised or have become substantive during the year ended December 31, 2022, changes to significant unobservable input parameters and the result of these changes on the fair value of the options have not been disclosed.

Further details and background on the purchase options are disclosed in Note 19.

**Valuation inputs to the fair value of warrant liabilities**

The fair value of the Public Warrants and the Private Placement Warrants have been estimated using a binomial tree framework at the time of their issuance (March 16, 2022) as there was no observable trade price available.

For Public Warrants, subsequent to their listing on an active market, their fair value as of December 31, 2022, is based on the observable listed quoted price (Level 1) for such warrants. For Private Placement Warrants, these were exercised on April 15, 2022 with the fair value on that date being determined based on the spot price per underlying ordinary share of Allego, which is a quoted market input.

Upon issuance, the estimated fair value of both the Public Warrants and Private Placement Warrants was determined using Level 3 inputs as no observable market inputs were available. Inputs to the binomial framework tree are the spot price per share, risk-free interest rate, the warrants key contractual terms and assumptions related to the Groups expected stock-price volatility and dividend yield.

**Valuation inputs to the fair value of investments in equity securities**

The Group used a third party valuation report to determine the fair value of investment in equity securities. Inputs to the fair value of the investments in equity securities are the earnings growth factor and risk-adjusted discount rate. The following table summarizes the quantitative information about the significant unobservable input parameters used in the level 3 fair value measurement of the, using the DCF (“Discounted Cash Flows”) methodology.

In %	<b>December 31, 2022</b>
Growth factor	3.0 %
Discount rate	11.9 %

An increase or decrease of 100 basis point in the growth factor would change the fair value of the investment in equity with €4,407 thousand and respectively €(1,122) thousand.

An increase or decrease of 100 basis point in the discount rate would change the fair value of the investment in equity with €(2,537) thousand and respectively €3,115 thousand.

**Valuation inputs to the fair value of preference shares derivatives**

The fair value of the preference shares derivatives will depend on the future value of shares in Voltalis at the time of a future Triggering Event. A Triggering Event is a majority disposal, public listing or a joint decision of an extraordinary general meeting of the shareholders to convert the shares of Voltalis. To measure the fair value of the instruments,

valuation techniques that are based on discounting expected future cash flows, also referred to as the income approach, have been taken into account.

Given that these rights would be derived from the outcomes of a specific Triggering Event scenario, a probability-weighted equity return method was historically applied in order to value the payouts under the economic rights. Under this approach, the payouts were estimated based upon an analysis of future values for Voltalis, assuming various probable Triggering Event scenarios, each with their own probability attached.

The following table summarizes the quantitative information about the significant unobservable input parameters used in the level 3 fair value measurement of the preference shares derivatives in 2022.

<b>Parameters</b>	<b>June 7, 2022</b>	<b>December 15, 2022</b>
Spot price per share (in €)	115	108
Volatility (in %)	27.50	27.50
Discount rate (in %)	(0.1)% - 0.7%	2.3% - 2.5%

Given that the Group has waived certain potential economic rights associated with a portion of the ordinary shares held by the Group in Voltalis on December 15, 2022, changes to significant unobservable input parameters and the result of these changes on the fair value of the preference shares derivatives have not been disclosed.

Further details and background on the preference shares derivatives are disclosed in Note 4 and 7.

### 32 Financial risk management

This note explains the Group's exposure to financial risks and how these risks could affect the Group's future financial performance.

<b>Risk</b>	<b>Exposure arising from</b>	<b>Measurement</b>	<b>Management</b>
Market risk – interest rate risk	Long-term borrowings at variable rates	Sensitivity analysis	Economic hedge with an interest rate cap
Market risk – price risk	Investments in equity securities	Sensitivity analysis	Monitoring quarterly valuation updates and forecasts of future cash flows
Credit risk	Cash and cash equivalents, trade receivables, derivative financial instruments and contract assets.	Aging analysis	Doing business with creditworthy companies and a strict policy of cash collection.
Liquidity risk	Borrowings and other liabilities	Cash flow forecasts	Availability of borrowing facilities.

The Group's management oversees the management of these risks. The Group's management is supported by the Finance department that advises on financial risks and the appropriate financial risk governance framework for the Group. The Group's risk management is predominantly controlled by the Finance department under policies approved by the Executive Board. The Executive Board provides principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments. Since the largest part of the Group's assets, liabilities, and transactions are denominated in euro, the market risk of foreign exchange is considered not to be significant. There are no changes compared to the previous period.

**Market risk**

**Cash flow and fair value interest rate risk**

The Group's main interest rate risk arises from a long-term borrowing with a variable rate, which exposes the Group to cash flow interest rate risk. The cash flow risk is mitigated through the usage of interest rate caps. During the years ended December 31, 2022 and 2021, the Group's borrowings at a variable rate were denominated in euro.

The Group's borrowings are carried at amortized cost.

As at December 31, 2022, approximately 0% of the Group's borrowings are at a fixed rate of interest (December 31, 2021: 47%). An analysis by maturities is provided below in section "Maturities of financial liabilities" of this note.

Instruments used by the Group

The Group has two interest rate caps in place with a notional of €181,487 thousand (December 31, 2021: one interest rate cap with a notional of €83,054 thousand) which mature in December 2027 (December 31, 2021: in May 2026). As at December 31, 2022, the interest rate caps cover approximately 65% (December 31, 2021: 69%) of the variable loan principal outstanding. The notional of the derivative instruments and the renewed (2021: old) facility changes over time in order for the interest rate cap to mitigate at least 65% (2021: 69%) of the variable debt outstanding. Specifically, the strike price changes over time and ranges between 1.50% and 3.43%. The remaining cash flow risk is accepted.

The interest rate caps require settlement of any interest receivable, if applicable, semiannually. The settlement dates coincide with the dates on which interest is payable on the renewed facility.

Sensitivity

The consolidated statement of profit or loss is sensitive to higher/lower interest expenses from borrowings as a result of changes in interest rates as both the Group's bank facilities have a variable interest rate. The Group's interest expenses incurred in relation to the shareholder loans are not sensitive to changes in interest rates as these borrowings had a fixed interest rate. Equity is not impacted as no hedge accounting is applied. Additionally, an increase or decrease of the Euribor has an impact on the fair value of the Group's interest rate caps. The impact on the loss for the years ended December 31, 2022 and 2021 as a result of a change in interest rates is as follows:

(in €'000)	Impact on pre-tax loss	
	2022	2021
Interest rates – increase by 10 basis points*	586	76
Interest rates – decrease by 10 basis points*	(629)	(68)

\* Keeping all other variables constant.

Global regulators and central banks have been driving international efforts to reform key benchmark interest rates. The market is therefore in transition to alternative risk-free reference rates. Although limited impact is expected on the Euribor, the Group is in the process of evaluating the implications of such a phase out. The Group has no interest rate hedging relationships which are affected by the reform and does not expect any significant impact on existing contracts due to a change in the interest rates. The Group will continue to monitor market developments.

**Price risk**

Exposure

The Group's exposure to equity securities price risk arises from investments held by the group and classified in the consolidated statement of financial position as at fair value through other comprehensive income (FVOCI) as detailed in

## Table of Contents

Note 19. The price risk is mitigated by monitoring quarterly valuation updates and forecasts of future cash flows and aligning the business strategy accordingly.

### Sensitivity

The table below summarizes the impact of increases/decreases of the price of equity securities acquired in 2022 on the group's equity through OCI reserve for the period. The analysis is based on the assumption that the fair value of the equity securities held by the group has increased or decreased by 40%, with all other variables held constant.

(in €'000)	Impact on Group's equity	
	2022	
Fair Value – increase by 4,000 basis points		12,556
Fair Value – decrease by 4,000 basis points		(12,556)

### Amounts recognized in other comprehensive income

The amounts recognized in other comprehensive income in relation to the investment in equity securities held by the group are disclosed in Note 19.

### Credit risk

The Group is exposed to credit risk from its operating activities (primarily trade receivables and contract assets) and from its financing activities, including deposits with banks.

### Risk management

Credit risk is managed on a Group basis. The Group is doing business with creditworthy companies and has a strict policy of cash collection.

Customer credit risk is managed by the Finance department subject to the Group's established policy, procedures and control relating to customer credit risk management. The credit quality of customers is assessed, taking into account its financial position, past experience and other factors. Outstanding customer receivables and contract assets are regularly monitored, and any major orders are generally covered by prepayments or other forms of credit insurance obtained from reputable banks and other financial institutions.

At December 31, 2022, the Group had 14 customers (December 31, 2021: 7) that owed the Group more than €450 thousand each and accounted for approximately 86% (December 31, 2021: 71%) of the total amount of trade receivables and contract assets. There were 3 customers (December 31, 2021: 1) with a balance greater than €4,500 thousand accounting for just over 49% (December 31, 2021: 59%) of the total amount of trade receivables and contract assets.

### Impairment of financial assets

The Group has six types of financial assets that are subject to the expected credit loss ("ECL") model:

- trade receivables;
- contract assets;
- pledged bank balances;
- security deposits;
- cash and cash equivalents.

While cash and cash equivalents, security deposits and pledged bank balances (refer to Note 22 and Note 19, respectively) are also subject to the impairment requirements of IFRS 9, no impairments were required to be recognized on these financial assets due to their definition of being subject to an insignificant risk of changes in value.

The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of financial assets disclosed in Note 30.

## [Table of Contents](#)

The Group applies the IFRS 9 simplified approach to measuring ECLs which uses a lifetime expected loss allowance for all trade receivables and contract assets.

To measure the ECLs, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets.

The expected loss rates are based on the payment profiles of sales over a period of 36 months before December 31, 2022 and the corresponding historical credit losses experienced within this period. The Group has considered but not identified any forward-looking factors which require an adjustment of the historical loss rates based on expected changes in these factors.

On that basis, the loss allowance as at December 31, 2022 and December 31, 2021 was determined as follows for both trade receivables and contract assets:

(in €'000)	Current	1 – 30 days past due	31 –60 days past due	61 –90 days past due	91+ days past due	Total
<b>As at December 31, 2021</b>						
Expected loss rate (in %)	0.00 %	0.00 %	0.00 %	0.00 %	0.00 %	
Gross carrying amount – trade receivables	33,439	909	480	382	4,353	39,563
Gross carrying amount – contract assets	1,226	—	—	—	—	1,226
Loss allowance	1	—	—	—	—	1
<b>As at December 31, 2022</b>						
Expected loss rate (in %)	0.00 %	0.00 %	0.00 %	0.00 %	0.00 %	
Gross carrying amount – trade receivables	31,404	5,337	3,189	292	2,448	42,670
Gross carrying amount – contract assets	1,512	—	—	—	—	1,512
Loss allowance	—	—	—	—	—	—

Trade receivables and contract assets are written off where there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Group, and a failure to make contractual payments for a period of over 60 days past due.

For the loss allowances for trade receivables and contract assets for each period presented, refer to Note 20.

### **Liquidity risk**

Prudent liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, the Group maintains flexibility in funding by maintaining availability under committed credit lines. The Group has been predominantly contracting customers of sound commercial standing and their payment behavior was generally good. Refer to Note 2.2 for details about the Group's financial position and the going concern assumption applied in preparing the consolidated financial statements.

As disclosed in Note 19, the Group has pledged bank balances to secure the payment of interest and commitment fees to the Group's external lenders and pledged bank balances in relation to bank guarantees issued to suppliers of the Group.

The main risk for the Group is not meeting the debt covenants or drawdown requirements described in Note 33. In this case, funding via the renewed facility would not be available. The Group monitors the liquidity risk on a weekly basis. Management monitors rolling forecasts of the Group's cash and cash equivalents (Note 22) on the basis of expected cash flows. This is generally carried out at Group level, in accordance with practice and limits set by the Group. In addition, the

## Table of Contents

Group's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans. The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low.

### Financing arrangements

The Group had access to the following undrawn borrowing facilities for each reporting period presented:

(in €'000)	December 31, 2022	December 31, 2021
Expiring beyond one year—renewed facility	120,790	—
Expiring beyond one year—old facility	—	—

As indicated in Note 25, the Group has refinanced its old facility in December 2022. The renewed facility is available to be drawn if the drawdown covenants are met, in euros and has an average maturity of approximately 5 years (December 31, 2021: 5 years).

As at December 31, 2022, €90,790 thousand of the capital expenditures facility and €30,000 thousand of the guarantee facility were undrawn.

### Maturities of financial liabilities

The table below analyzes the Group's financial liabilities into relevant maturity groupings based on their contractual maturities. The table includes both non-derivative and derivative financial liabilities.

The amounts disclosed in the table are the contractual undiscounted cash flows (including interest payments). Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

(in €'000)	Contractual cash flows						
	Carrying amount of liabilities	Total	Less than 6 months	6–12 months	1–2 years	2–5 years	More than 5 years
<b>As at December 31, 2021</b>							
Borrowings	213,128	464,440	2,975	3,176	6,451	137,258	314,580
Lease liabilities	31,617	38,208	3,630	3,560	6,871	16,729	7,418
Trade and other payables	24,072	24,072	24,072	—	—	—	—
<b>Total</b>	<b>268,817</b>	<b>526,720</b>	<b>30,677</b>	<b>6,736</b>	<b>13,322</b>	<b>153,987</b>	<b>321,998</b>
<b>As at December 31, 2022</b>							
Borrowings	269,033	501,004	9,441	13,925	27,802	449,836	—
Lease liabilities	51,324	71,097	4,546	4,828	8,891	18,916	33,916
Trade and other payables	51,263	51,263	51,263	—	—	—	—
Warrant liabilities	1,296	1,296	1,296	—	—	—	—
<b>Total</b>	<b>372,916</b>	<b>624,660</b>	<b>66,546</b>	<b>18,753</b>	<b>36,693</b>	<b>468,752</b>	<b>33,916</b>

### 33 Capital management

For the purpose of the Group's capital management, capital includes issued capital, share premium and all other equity reserves attributable to the equity holders of the parent. Refer to Note 23 and Note 24 for the quantitative disclosures of the Company's share capital, share premium and other reserves.

The objective of capital management is to secure financial flexibility to maintain long-term business operations. The Group manages its capital structure and makes adjustments in light of changes in economic conditions. To maintain or adjust the

capital structure, the Group may adjust the dividend payments to shareholders, return capital to shareholders or issue new shares or other financial instruments.

The Group has not paid any dividends since its incorporation. The Group expects to retain all earnings, if any, generated by operations for the development and growth of its business and does not anticipate paying any dividends to shareholders in the foreseeable future. The Group has secured financing for its operations through a renewed facility, which is disclosed in Note 25.

No changes were made in the objectives for managing capital during the years ended December 31, 2022 and 2021.

**Loan covenants - renewed facility**

Under the terms of the renewed facility, the Group is required to comply with the following financial covenants related to interest and earnings before interest, taxes, depreciation and amortization (“EBITDA”) at the consolidated level of the Group:

1. Leverage ratio: calculated on a consolidated level as (total net debt / Group EBITDA).
2. Interest cover ratio: calculated on a consolidated basis as (Group EBITDA / interest paid).

The covenants shall be determined based on the IFRS financial statements of the Group, as required by the terms and conditions of the renewed facility. The compliance with these covenants shall be tested every six months, with the testing period being twelve months ending December 31 and June 30, with the first testing date being June 30, 2023.

The target covenant ratios are determined based on a twelve-month running basis and are as follows:

<b>Testing period ending on</b>	<b>Leverage ratio</b>	<b>Interest cover ratio</b>
June 30, 2023	Unconditional	-0.8x
December 31, 2023	Unconditional	-0.9x
June 30, 2024	34x	0.4x
December 31, 2024	5.4x	2.3x
June 30, 2025	3.2x	3.8x
December 31, 2025	2.2x	5.5x
June 30, 2026	2.2x	5.5x
December 31, 2026	2.2x	5.5x
June 30, 2027	2.2x	5.5x

The Group may within ten business days from the occurrence of a breach or the anticipated breach of the loan covenants remedy such default by providing evidence of receipt of new funding, sufficient to cure such breach (“equity cure right”). Such remediation is available for not more than two consecutive testing dates and four times over the duration of the renewed facility. In case if the covenants breach is not cured, such a breach is considered a default and could lead to the cancellation of the total undrawn commitments and the loan to become immediately due and payable.

Additionally, the following ratios are set as drawstop event conditions for the part of the renewed facility aimed at financing and refinancing certain capital expenditures and permitted acquisitions, which if breached prior to the anticipated utilization of the capex portion of the renewed facility – will result in the drawdown stop:

- Group EBITDA margin ratio: calculated on a consolidated level as (Group EBITDA / Real Period Revenue).
- Group EBITDA amount: calculated on a consolidated level
- Fast/ultra-fast charging equipment utilization rate: calculated on a consolidated level as (average number of sessions over the relevant Group charger base, divided by 50).

The target drawdown stop conditions are determined based on a twelve-month running basis and are as follows:

Testing period ending on	EBITDA margin (drawstop)	EBITDA (drawstop)	Fast/ultra-fast charging equipment utilization rate (drawstop)
June 30, 2023	-4.3 % €	(8.5) million	10.4 %
December 31, 2023	-5.8 % €	(11.6) million	11.5 %
June 30, 2024	8.1 % €	19.8 million	12.7 %
December 31, 2024	19.4 % €	68.2 million	12.9 %
June 30, 2025	24.1 % €	111.2 million	14.2 %
December 31, 2025	27.3 % €	157.5 million	15.5 %
June 30, 2026	28.9 % €	200.0 million	16.6 %
December 31, 2026	Unconditional	Unconditional	Unconditional
June 30, 2027	Unconditional	Unconditional	Unconditional

Breaching the requirements would cause a drawdown stop. Continuing breaches in the drawstop conditions would permit the bank to cancel the total undrawn commitments and immediately call the debt. The Group may within twenty business days from the occurrence of a drawstop event provide a remedial plan setting out the actions, steps and/or measures (which may include a proposal for adjustments of the financial covenants' or utilization rate's levels) which are proposed to be implemented in order to remedy such drawstop event.

In the preparation of its consolidated financial statements, the Group assessed whether information about the existence of the covenant and its terms is material information, considering both the consequences and the likelihood of a breach occurring. The consequences of a covenant breach have been described in this note. A covenant breach would affect the Group's financial position and cash flows in a way that could reasonably be expected to influence the decisions of the primary users of these consolidated financial statements. Refer to Note 2.2 for additional information.

### 34 Commitments and contingencies

#### *Purchase commitments for chargers and charging infrastructure*

Significant expenditures for chargers and charging infrastructure contracted for, but not recognized as liabilities, as at December 31, 2022 were €2,452 thousand (December 31, 2021: €2,261 thousand). The Group uses these assets either as own chargers (property, plant and equipment) or as charging equipment to fulfill its obligations under development contracts entered into with its customers (inventory).

### 35 Related-party transactions

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

#### *Terms and conditions of transactions with related parties*

Management services were bought from the immediate parent entity for a fixed fee. Outstanding balances are unsecured. Asset and liability positions can either be offset or can be settled in cash. No loss allowance is recognized on these balances.

#### *Relationship with the Mega-E Group*

After the sale of Mega-E Charging B.V. ("Mega-E") to Meridiam EM SAS, Mega-E established subsidiaries and formed the Mega-E Group. As a result of the sale, Mega-E and its subsidiaries (the "Mega-E Group") became related parties under common control until the Group resumed the control over Mega-E Group on March 16, 2022 upon the SPAC Transaction (please also refer to Note 4, Note 35.1 and Note 35.2 for more information).

Prior to the acquisition of Mega-E by the Group on March 16, 2022, the relationship between the Group and the Mega-E Group was that of a customer and service provider. Subsequent to the sale to Meridiam EM SAS, the Group entered into several development and O&M contracts with the Mega-E Group to construct and operate charging stations across Europe. The development agreements related to the engineering, design, procurement, delivery, construction, installation, testing and commissioning of electric vehicle charging infrastructure at designated areas. The Group received a fixed contract price for these services.

The O&M agreements related to the operation and maintenance of the delivered electric vehicle charging infrastructure by the Group to the Mega-E Group. The services consisted of the technical operation of the charging stations, revenue management, maintenance, providing pricing recommendations and providing access to the Group's EV Cloud platform. The Group received a service fee that contains both fixed and variable fees per charging session.

During the year ended December 31, 2021, one of the directors of the Group was also an executive director of Mega-E. As at December 31, 2021, the director resigned from the Group. Additionally, one of the non-executive directors of the Group was also a non-executive director of Mega-E.

**Relationship with EV Cars**

EV Cars is a related party under common control of Meridiam EM SAS. On June 28, 2021, the Group entered into a contract with EV Cars for the design, construction, installation and operation and maintenance of charging stations.

**Voltalis**

Upon completion of the MOMA acquisition, Voltalis became a related party of the Group in accordance with the criteria outlined in IAS 24 Related Party Disclosures through its relationship with Meridiam SAS. Madeleine — the majority shareholder of the Company — is indirectly owned by Meridiam. Voltalis is considered to be a controlled investment of Meridiam. Consequently, the Group and Voltalis are related parties and the related-party transactions have been disclosed in the table in this note.

**35.1. Transactions with related parties**

(in €'000)	Relationship	2022	2021	2020
<b>Madeleine Charging B.V.</b>	<i>Immediate parent entity</i>			
Interest expenses on shareholder loans		1,743	8,162	7,530
Management fee		—	—	25
Reimbursement of advisory fees		953	1,868	1,400
Reimbursement of marketing expenses		—	—	1,568
Share-based payment expenses		74,001	291,837	7,100
<b>Mega-E Group (Mega-E Charging B.V. and its subsidiaries)</b>	<i>Other related party</i>			
Revenue from contracts with related party		1,066	23,974	10,702
<b>EV Cars</b>	<i>Other related party</i>			
Revenue from contracts with related party		51,424	24,566	—
<b>Voltalis</b>	<i>Other related party</i>			
Revenue from contracts with related party		2,268	—	—
Fair value losses on pref. shares derivatives and net loss on sale of pref. shares derivatives		69	—	—
<b>Executive Board Member</b>	<i>Key management</i>			
Other payments		4,740		

The transactions with Mega-E until March 16, 2022, are considered related-party transactions. The Group obtained control of Mega-E as of that date. All subsequent transactions are therefore considered to be intra-group transactions and have been eliminated in these consolidated financial statements.

***Share-based payment expenses***

On December 16, 2020, the Company's then immediate parent entity — Madeleine — entered into an agreement, under which share-based payment awards are provided to an external consulting firm. Madeleine has the obligation to settle the agreement, but the Group accounts for the agreement as a share-based payment arrangement as the Group receives services from the consulting firm under the agreement. The Group does not have an obligation to settle the share-based payment awards with the consulting firm in cash or equity instruments and therefore the total arrangement is classified as an equity-settled share-based payment arrangement. On July 28, 2021, Spartan and the Company signed a BCA. Madeleine and the external consulting firm were also parties to the BCA. On February 28, 2022, the BCA was amended whereby the parties modified the thresholds of the First Special Fees Agreement that determine whether the fees payable in cash ("Part A") to the external consulting firm will be paid in cash, shares or a combination of cash and shares, contingent upon the number of redemptions that will result from the SPAC Transaction. The amendment did not change the accounting treatment of the First Special Fees Agreement, as the total First Special Fees Agreement is classified as an equity-settled share-based payment arrangement, and the amendment did not give rise to an incremental fair value of the share-based payment arrangement. Refer to Note 11.1 for details on the First Special Fees Agreement.

On February 25, 2022, the Company's then immediate parent entity — Madeleine — entered into a Second Special Fees Agreement, under which share-based payment awards are provided to an external consulting firm. On April 20, 2022, the Second Special Fees Agreement was novated from Madeleine to Allego. Before the novation, Madeleine had the obligation to settle the agreement, and the Group accounted for the Second Special Fees Agreement as a share-based payment arrangement as the Group receives services from the consulting firm under the agreement. The Group did not have an obligation to settle the share-based payment awards with the consulting firm and therefore the total arrangement was classified as an equity-settled share-based payment arrangement. Following the novation, the Group has the obligation to settle the share-based payment awards with the consulting firm in cash and therefore the total arrangement was classified as a cash-settled share-based payment arrangement. Refer to Note 11.2 for details on the Second Special Fees Agreement.

***Other payments to key management***

This amount represents a one-time payment made by the Company to a member of management for their outstanding shares in an acquired subsidiary during 2022.

### 35.2. Balances with related parties

At December 31, 2022 and 2021, the Group held the following balances with related parties:

(in €'000)	Relationship	December 31, 2022	December 31, 2021
<b>Madeleine Charging B.V.</b>	<i>Immediate parent entity</i>		
Shareholder loans		—	(100,193)
Current receivables/(payable) from related party		—	106
Trade payable to related party		—	(140)
<b>Opera Charging B.V.</b>	<i>Parent entity and ultimate holding company</i>		
Current receivables from related party		—	37
<b>Mega-E Group (Mega-E Charging B.V. and its subsidiaries)</b>	<i>Other related party</i>		
Trade receivables from related party		—	26,449
Trade payable to related party		—	(1,599)
Contract assets with related party		—	277
Contract liabilities with related party		—	(2,291)
Other current receivables from related party		—	3
<b>EV Cars</b>	<i>Other related party</i>		
Contract assets with related party		1,512	237
Contract liabilities with related party		(5,721)	(17,997)
Trade receivables from related party		11,367	—
Trade payable to related party		(51)	—
<b>Meridiam EM</b>	<i>Other related party</i>		
Purchase option derivative		—	27,200
<b>Voltalis</b>	<i>Other related party</i>		
Current receivables from related party		187	—

The balances with Mega-E as at December 31, 2021 are considered related-party balances. The Group obtained control of Mega-E as of March 16, 2022. The balances as at December 31, 2022 are therefore considered to be intra-group balances and have been eliminated in these consolidated financial statements.

#### **Key management transaction**

This amount represents a one-time payment made by the Company to a member of management for their outstanding shares in an acquired subsidiary during 2022.

### 35.3. Remuneration of key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group. The Group considers all executive and non-executive members of the Board of Directors and the Executive Board to be key management personnel as defined in IAS 24 *Related party disclosures*. The Executive Board consists of the chief executive officer (CEO), the chief financial officer (CFO) and the chief technology officer (CTO).

## Table of Contents

The following remuneration of key management personnel was recognized as an expense in the consolidated statement of profit or loss for the years ended December 31, 2022, 2021 and 2020:

(in €'000)	2022	2021	2020
Short-term employee benefits	5,262	1,086	1,675
Termination benefits	—	—	283
Share-based payments	41,230	89,636	2,450
<b>Total</b>	<b>46,492</b>	<b>90,722</b>	<b>4,408</b>

### Share-based payments - Special Fee Agreements

On December 16, 2020, the Company's then immediate parent entity — Madeleine — entered into a First Special Fees Agreement, under which share-based payment awards are provided to an external consulting firm (refer to Note 11.1 for details). On February 25, 2022, the Company's then immediate parent entity — Madeleine — entered into a Second Special Fees Agreement with the same external consulting firm as for the First Special Fees Agreement (refer to Note 11.2 for details). Prior to joining the Company as members of the Executive Board, two directors were contractors of the external consulting firm, in which capacity they provided management services related to the Company to Madeleine, the Company's immediate shareholder.

The directors are entitled to compensation from the external consulting firm in the form of a fixed percentage of the total benefits (including the proceeds from a future sale of shares in the Company) that the external consulting firm will generate under the agreement. Therefore, the Group has considered that a portion of the share-based payment expenses represents key management compensation and accordingly recognized that portion as employee benefits expenses within general and administrative expenses. For the year ended December 31, 2022, that portion of the share-based payment expenses amounted to €26,869 thousand (2021: €89,636 thousand, 2020: €2,450 thousand).

For the year ended December 31, 2022, the remaining amount of the total share-based payment expenses of €58,145 thousand (2021: €202,201 thousand, 2020: €4,650 thousand) is compensation for external consulting services. Therefore, the Group has recognized this amount as legal, accounting and consulting fees, within general and administrative expenses (refer to Note 9 and Note 11 for details).

### Share-based payments - Management Incentive Plan

In March 2022, the Company established the management incentive plan and during the year ended December 31, 2022, issued the grant options and the performance options to the key management. These options are classified as equity-settled share-based payment transactions as the settlements with the participants shall be done using the Company's shares. The vested options were recognized at fair value at the issuance date as an employee benefits expense in the general and administrative expenses, with a corresponding increase in equity. Refer to Note 11.3 for details on the Management Incentive Plan.

## 36 Group information

### 36.1. List of principal subsidiaries, associates and joint ventures

The Group's principal subsidiaries, associates and joint ventures as at December 31, 2022 and 2021 are set out below. Unless otherwise stated, they have share capital consisting solely of ordinary shares that are held directly by the Group, and the proportion of ownership interests held equals the voting rights held by the Group. The country of incorporation or registration is also their principal place of business.

#### Subsidiaries

3EA SAS	Paris, France	Electric installation work	50 %	—	—

**36.2. Changes to the composition of the Group**

On March 16, 2022, the Group obtained control over Mega-E. The Group held a Mega-E Option that provided the Group with potential voting rights which were considered substantive as of March 16, 2022.

On March 16, 2022, the Group consummated the previously announced business combination pursuant to the terms of the BCA. As a result of the completion of the SPAC Transaction, the Group acquired 100% of the shares of Spartan (subsequently renamed Allego USA Inc.).

On June 7, 2022, the Group acquired 100% share capital of MOMA, a service provider for the Group's EV Cloud platform. The acquisition brings the critical support for the EV Cloud platform into the Group and the access to new markets as well as services within the Group, to better meet the needs of its customers. The Group consolidates MOMA as of the acquisition date. Refer to Note 3.1.4 for details about the judgments applied by the Group in applying the acquisition method of accounting for MOMA. FOROIL SAS is an associate of MOMA, but was written off as part of the accounting for the acquisition of MOMA due to it being a loss-making entity.

Reference is made to Note 4 for details on these transactions.

**37 Subsequent events**

The following events occurred after December 31, 2022:

*Pledges in relation the renewed facility*

As described in the original agreement entered into during the year ended December 31, 2022, as part of the renewed facility agreement, pledges on the bank accounts and pledges on the shares in the capital of Allego Holding B.V. held by the Company would be used to secure the renewed facility. During the three months ended March 31, 2023, the Group has pledged additional assets in relation to the renewed facility: the bank accounts of €4,776 thousand as at March 31, 2023 (presented as part of cash and cash equivalents), trade and other receivables of €18,782 thousand as at March 31, 2023, and the shares in the capital of Allego Netherlands, Allego Germany and Allego France held by the Group.

*Changes to the management incentive plan ('MIP')*

In February 2023, the Group's MIP was modified whereby one of the performance criteria was extended from 2022 until 2023. This modification has no impact on the fair value of the MIP as the performance criterion is a non-market vesting criterion. As a result, the impact to the share-based payment expenses will be recognized in 2023.

**ALLEGO N.V.**  
**SECTION 302 CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER**

I, Mathieu Bonnet, Chief Executive Officer of Allego N.V. (the "Company"), certify that:

1. I have reviewed this Annual Report on Form 20-F of the Company;
  2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
  3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this report;
  4. The Company's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Company and have:
    - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    - (c) Evaluated the effectiveness of the Company's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    - (d) Disclosed in this report any change in the Company's internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting; and
  5. The Company's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Company's auditors and the audit committee of the Company's board of directors (or persons performing the equivalent functions):
    - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Company's ability to record, process, summarize and report financial information; and
    - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal control over financial reporting.

**ALLEGO N.V.**  
**SECTION 302 CERTIFICATION OF THE CHIEF FINANCIAL OFFICER**

I, Ton Louwers, Chief Financial Officer of Allego N.V. (the "Company"), certify that:

1. I have reviewed this Annual Report on Form 20-F of the Company;
  2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
  3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this report;
  4. The Company's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Company and have:
    - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    - (c) Evaluated the effectiveness of the Company's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    - (d) Disclosed in this report any change in the Company's internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting; and
  5. The Company's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Company's auditors and the audit committee of the Company's board of directors (or persons performing the equivalent functions):
    - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Company's ability to record, process, summarize and report financial information; and
    - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal control over financial reporting.
